March 2023

TECHNICAL SPECIFICATIONS

Tabletops

Standard tabletops are nominal 1 1/4" overall thickness with .030" thick high-pressure laminate top surface and .028" phenolic backer (bottom surface). The density of the core in standard tops is 45 lb/cu ft. particleboard. Pirouette table is available with the 2 mm (74P) edge.

Flipping/Nesting Table Frame

The framework for table support and flipping/nesting operation consists of 30 mm x 50 mm x 3 mm thick wall steel tubing, with 4 mm thick formed steel support hubs welded to the tubes for mounting the legs. A 3 mm formed steel table support bracket is attached to the beam and hub structure using a 10 mm diameter steel pivot pin. #12 x 1 3/4" Phillips wood screws attach the framework brackets to the tabletop. A 9.9 mm steel hex rod connects the latch mechanism and is connected to a nylon release paddle on either end of the table base. The table latch release handle is actuated by squeezing the paddle on either end to the underside of the tabletop. Pulling upward raises the tabletop for nesting storage.

To lower the table, grasp the top center of the tabletop edge and lower the surface to allow the latches to engage once the surface is down. All hinge pins for the flipping mechanism are zinc plated steel. Hinge pin spacers are molded nylon. The framework is shipped separately, ready to be assembled to the tabletop and legs.

Leg Assemblies

Flipping/Nesting Table

The leg assembly consists of one right-hand leg and one left-hand leg, with three leg depth options. One depth fits 18" deep tables; one fits 24" and 30" deep tables; the other fits 36" deep tables. Leg height is fixed to provide 29" high tabletop height. An ADA table height of 32" is accomplished using 3" leg extensions threaded into the bottom of the leg. Café height of 36" and standing height of 42" are also available. Leg construction consists of 2.2" diameter, .10" thick wall steel tubing with a 4 mm thick steel pivot plate welded to it. The feet consist of two 4 mm thick blades welded to the leg tube. The blade covers are aluminum die cast, attached with self-tapping metal screws. The leg assemblies are bolted to the table frame structure using two M12 x 25 mm flat head bolts. Leg assemblies ship with blade covers installed but casters or glides must be installed upon assembly. A hardware kit is shipped with the base that consists of a cover that must be installed after the leg assembly to prevent access to the pivot mechanism.

Fixed T-Base Table

Three T-base leg depths are available. One depth fits 18" deep tables; one fits 24" and 30" deep tables; the other fits 36" deep tables. Leg height is fixed to provide 29" high tabletop height. Leg construction consists of 2.2" diameter, .10" thick wall steel tubing with a 5 mm thick steel plate welded to it. The feet consist of two 4 mm thick blades welded to the leg tube. The blade covers are aluminum die cast, attached with self-tapping metal screws. The leg assemblies are attached to the tabletops using #12 x 1" screws. Leg assemblies ship with blade covers installed but casters or glides must be installed upon assembly.

Fixed TT-Base Table

Some larger fixed leg tables use a T or TT-base style leg. Available standard in one depth of 38" to fit 42" and 48" deep tables. Leg height is fixed to provide only 29" high tabletop height. ADA table height of 32" is accomplished using 3" leg extensions threaded into the bottom of the leg. Leg construction consists of 2.2" diameter, .10" thick wall steel tubing with a 5 mm thick steel plate welded to it. The feet consist of two 4 mm thick blades welded to two leg tubes separated by a 1" x 2" welded steel cross tube, and the blade covers are aluminum die cast attached with self-tapping metal screws. The leg assemblies are attached to the tabletop using #12 x 1" screws. Leg assemblies ship with blade covers installed but casters or glides must be installed upon assembly.

Pattern allows up to eighteen power modules depending on table width, and connects to one 15-amp power supply cord (power infeed). Pattern is a non-sequential system and the infeed is compatible with ground fault interrupter (GFI/GFCI) outlets. Power modules for Pattern are specified as an option on Pirouette tables.

Pattern Power Distribution Blocks
Pattern power distributions blocks are standalone connectors, each containing four port locations. Distribution blocks are included with appropriate power jumper and power infeed kits, so do not need to be ordered separately. Distribution blocks bring the power infeed, power jumpers, and power modules together and allow power to be efficiently supplied to each table. Two distribution block types are included with the Pattern system, grey and white.

Pattern Table-to-Table Power Jumper Kits
Pattern table-to-table jumper power kits come with one grey distribution block and an appropriately sized power jumper. Jumpers are nonsequential and are keyed on each end to connect between distribution blocks. Table-to-table power jumper kits are ordered separately, according to layout configuration.

Pattern Power Infeed Kits
The Pattern power infeed kit must be ordered separately. Site configurations vary and will affect the number of power infeeds required. The number and size of tables, as well as the number of receptacles per table and amperage needs in each ganging configuration will determine the number of power infeed kits required at any given installation. Infeeds can be installed anywhere in the run.

Kit comes with one grey Pattern power distribution block, one 12" power jumper, one white Pattern power distribution block and Pattern power infeed cord. Power infeed consists of a 15-amp plug on one end of the 108" cord and a keyed connector at the opposite end of the cord. A Pattern quick-release tool is also included to assist with disconnecting connector ends from distribution blocks.

Tabletops

Standard tabletops are nominal 1 1/4" overall thickness with .030" thick high-pressure laminate top surface and .028" phenolic backer (bottom surface). The density of the core in standard tops is 45 lb/cu ft. particleboard. Pirouette table is available with the 2 mm (74P) edge.

Table Frames

Flipping & Nesting Base
The framework for table support and flipping/nesting mechanism consists of a set of steel hinge mechanisms which allow the top to be flipped vertical, allowing the table to be nested with a mating table. A 4 mm thick formed steel lower table support hinged using a 10 mm steel pin with a 3 mm thick worksurface mounting plate. A 9.9 mm steel hex rod joins the latch mechanisms and is connected to a nylon release paddle on each end of the table base. The tabletop lock paddle is actuated by pulling the paddle up on either end of the tabletop. Pulling upward rotates the tabletop for nesting storage. To lower the table, grasp the top center of the tabletop edge and rotate the surface down until the latches engage when the surface is horizontal. All hinge pins for the flipping mechanism are zinc plated steel. Hinge pin spacers are molded nylon. The framework is shipped separately, ready to be assembled to the tabletop and legs. #12 x 1 1/2" Phillips wood screws attach the framework to the to the tabletop.

Fixed-Top Base
The table support framework for the fixed-top, non-nesting table consists of a pair of 7-gauge formed steel enclosures. The steel enclosures are welded directly to the 1 3/4" diameter, 14-gauge upper leg tube for both the pneumatic and screw adjustable-height versions. Each plate is attached to the tabletop using four #12 x 1" screws.

Leg Assemblies

Pneumatic-Adjustable Height Leg (Nesting-Top Base)
An 11-gauge steel leg support bracket is welded to the 1 3/4" diameter, 14-gauge upper leg tube. The lower leg structure consists of 4 mm steel feet welded to a 2 1/4" diameter, 14-gauge steel vertical tube. The inner leg tube is supported in the lower leg tube by a set of Delrin glide bushings. Housed inside each leg tube is a pneumatic cylinder which includes a locking feature to prevent vertical movement when any force is applied to the worksurface and the cylinder is not actuated. Each leg assembly is attached to the mechanism using four total 1/4 -20 x 5/8" Torx head (T-30) thread forming screws. The legs are joined by a 1 1/4" by 2", 14-gauge rectangular steel tube cross-brace bar that is secured in place with six total 1/4 -20 x 5/8" Torx head (T-30) thread forming screws. Leg assemblies ship with foot covers installed, but casters or glides must be installed upon assembly.

On Pneumatic-adjustable height tables, the tabletop adjusts up and down between 29" and 44" from the floor by activating a pneumatic cylinder using a lever located under the user side of the worksurface. The table's recommended weight load is 20 lb or less.
