

SAUDER® | Education

Solutions for higher education

## An Unmatched Start

In 1934, Erie Sauder – a carpenter and craftsman with a passion and a knack for crafting furniture – founded Sauder Woodworking. The quality and dependability of our products increased the company's popularity, and in 1945, it expanded to officially become Sauder Manufacturing Company. Over the years, we gained extensive furniture-making experience and introduced

Cor

mfort

our products to the education market in 1983. Today, more than 1400 colleges and universities across the country rely on us for their furniture needs. For the whole story visit [saudereducation.com](http://saudereducation.com).

Sauder Education's small scale seating is a staple product in campuses nationwide. We've developed our seats to withstand the rigors of campus life while still providing the comfort that you would expect from the leader in educational seating.

## Upholstery

A wide selection of standard upholstery fabrics and vinyls from which to choose from many of the leading mills and jobbers in the country, all well exceeding minimum industry standards for durability. Non-standard and COM fabrics also available. High-quality foam offers the staying power to retain its shape and level of support over time. Seat and back pads are easily replaceable to further extend chair service life.

## Comfort

"Waterfall" seat design and contoured foam and seat/back panels provide natural cushioning support with appropriate points of contact.

## Finish

Sauder Education's use of high-tech, catalyzed varnish finishes offers flexibility in coloration—permitting a more perfect match with your décor. These wood finishes are also durable, beautifully resisting scratches, stains and temperature extremes.

## Functionality

Engineered with product placement and function in mind. Unique 3-position model provides alternate sitting positions for enhanced comfort and ergonomic benefits.

## Frame

Molded/plybent construction of Northern hardwoods requires fewer joints for superior durability. Reliable mortise and tenon joinery eliminates unsightly metal fasteners that work loose.

## Warranty

Our warranty covers our manufactured small-scale chairs against defects in workmanship and materials, except as specifically excluded, for a period of 10-years from the date of the receipt of the chairs. PlyLok and PlyWedge chairs are warranted for 25 years.

## Trey® Multifunction Task Chair

Trey® is designed to embrace how students study, interact and relax. One easy pull to the release handle transforms from task chair to floor rocker and table/stool. The perfect space-saving 2-in-1 chair.

- Ergonomic task chair easily converts into a floor rocker with a table/stool unit in seconds.
- 360° Swivel.
- Pneumatic seat height adjustment.
- Tilt lock control and adjustable tilt tension.
- Contoured foam cushions provide extra sitting comfort and are easily removable for cleaning, repair, or replacement.
- Arm or Armless versions available.
- Casters are standard; large-footprint glides are available as an option.
- Non-upholstered versions also available.
- State-of-the-art engineered polymers are used in the construction of the frame and base.
- Pat. U.S. D585,204, U.S. Patent No. 8,083,288 - US Patent Pending.
- 10-year warranty

Sauder Education has long been a proponent of designing and building environmentally responsible seating products. The company continues to implement initiatives to help promote environmentally responsible practices throughout the organization.

To further its commitment to environmental stewardship, Sauder Education is continually exploring creative, responsible ways to do business, so as to better preserve our natural resources and protect the environment for future generations.

# Renew

Sauder Education's renewable lounge seating is designed to maximize the way students study, collaborate, eat and relax.

We understand the needs of the education market and carefully select materials to ensure both lasting performance and appearance.

## Chassis

To ensure easy component renewability, Sauder Education lounge products are designed to remove components with a hex wrench. Newer models, Puzzle and Rally, and all future models are constructed with a boltless method to make renewability even easier.

## Fabrics

Fabrics are held in place with hook and loop closures. With the furniture disassembled, the fabric connections are easily accessible.

## Foam

All lounge seating foams are high quality, and guaranteed to retain their shape. Lower-quality foams quickly lose their resiliency, resulting in furniture that sits poorly, supports badly and causes the cushions to look baggy.

## Moisture Barrier

All lounge seating foams are covered by a pliable moisture barrier membrane, which protects the foams from liquids and spills.

## Replaceable Fabrics

The lounge seating is designed with change in mind. If the fabrics become soiled or worn, they can be quickly changed on-site, without special tools or skills. Only a 3/16" hex wrench is needed to complete the task.

## Warranty

All lounge seating is covered by a 25-year warranty.

Sled base adds approximately 20 lbs.

Pally creatively offers an infinite number of possibilities to furnish any space.

## Arm Styles

Embrace is sleek and contemporary offering a blend of modern design and functionality. Settle in and relax in this squared-arm armchair.

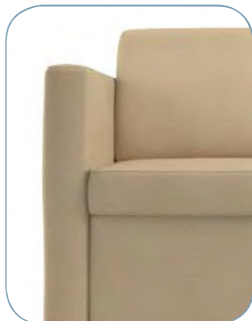

Aspire's arms are flared just a bit for the adventurous, adding sophistication and an element of high-style to an already welcoming chair.

Indulge is generously proportioned with a casual, relaxed style. Soft, curving arms and comfy seat are inviting and friendly.

Designed with a sensitivity to proportion and performance, Compose offers an ideal surface for writing, studying, snacking or other activities.

# Auditorium Seating

Every institution has its own character and culture built around core values. Sauder recognizes and celebrates this diversity with Clarity™ auditorium seating which provides a variety of flexible options for any space.

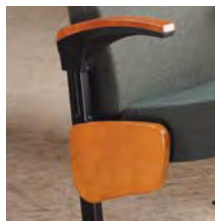

35221

## Clarity Auditorium Seating

- Stationary, tablet, lift-up or armless configurations available at purchase or add later.
- Lift-up and armless options can allow for ADA compliance and easy exiting.
- Back outer panels available in upholstered, wood veneer, and polymer versions.
- Drink holders available.
- Floor mount pitch standard angles are 0°, 2.5°, and 5°.
- Offset standard allows for carpet aisle to reach under the end panel for a custom look.
- High back options allow for balcony installation, gives increased code compliance, and allows for seating modesty on taller risers.
- Removable anchor system.
- Riser mount standards.
- Metal and polymer components are available in black.
- Allows for greater installation flexibility, is easier to clean under, and gives a clean uncluttered look under the seat.
- Row and seat identification.
- Row identification lighting.
- Swing-out ADA End Panel.
- Easy to use release mechanism, can be placed at any row end, and allows for ADA compliance.
- Wood available in oak or maple in any of Sauder's standard finishes.
- Optimal lumbar support has over 4" of foam at critical pressure points.
- Remarkably quiet operation, based on the simplicity and gravity.
- The lowest lifetime ownership cost, with easily renewable upholstery, minimum fasteners to loosen over time, and no moving seat-lift parts to wear out.

## Edge Styles and Surfaces

Tables are available in a wide variety of sizes, shapes, and tops for many education applications. A selection of standard surface/edge styles allows you to choose the table top that best meets both your functional and design requirements while providing a durable solution to withstand years of heavy use.

### Framed Wood Edge

Select, clear grade, ½" maple edging bonded flush to laminate surface with a highly water-resistant, thermoset, urea resin glue. Wood edging mitered on 45° angles on ends for square fit at corners. Eased corners standard on all rectangular tops. Edging for round tops cut from 1¼" thick solid planks – minimum five pieces per top – to ensure structural integrity and minimize grain checking. Oak edge available upon request.

### Half Round Wood Edge

Post-laminated ½" half-round wood edge banded to core surface with highly water resistant thermoset glue. Laminate is overlaid up to the exposed radius edge.

### Bullnose Wood Edge

Select, clear grade, 1¼" solid maple bullnose edging. Eased corners standard on all rectangular tops. Edging corners standard on all rectangular tops. Edging for round tops cut from 1¼" thick solid oak planks – minimum five pieces per top – to ensure structural integrity and minimize grain checking. Oak edge available upon request.

### Laminated Hardwood Edge

Combines the strength and beauty of wood with 21 plies of laminated hardwood creating a truly warm, unique look. 13 ply tops are also available for coffee, end, corner and Kidz tables. Top can also be laminated with a choice of colors to match any interior decor.

### Vinyl Bumper

Handsome and durable, Sauder Education vinyl bumper edges come standard in black, brown, grey, almond or white. The ¼" T-molding is pressure-driven into the vertical core edges, then anchored with spot nails. The hand-trimming vinyl bumper edge conforms to the ⅞" half round.

### Soft Edge

Feels soft, is strong, this edge actually makes your table tougher! The edge is semi-soft (Shore A 75 durometer) urethane molded onto premium 45-lb. density particle board. The soft edge has color running completely through it and contains an added ultraviolet inhibitor to resist fading. It's self-sealing and resists acids. Available in extended bullnose, square edge and raised edge drip-free specification.

### Laminate Surfaces

Choose the Sauder Education table top color and style that best reflects your interior environment needs. Laminates from Formica®, Wilsonart®, Nevamar®, and Pionite® are standard, however any manufacturer can be specified.

### Self Edge

Match the edge with your top. The self edge duplicates the laminate color or wood grain pattern of your Sauder Education table top. Rounded and hand filed for a smooth, custom crafted finish.

### Solid Surface Tops

Reinforced solid surface material compression molded in one piece for superior heat, stain, and impact resistance over fabricated sheet products. Finished to 1½" thick.

### Level Locks

Sauder Education Level Lock #105-2000 allows two or more tables to be aligned and connected, providing a flat, more stable table top surface. To order, specify as an accessory with your table top.

### Construction Specifications

Core: Premium, 45 lb. Density particle board, finishing to 1⅞". Laminate: Horizontal grade, .04" thick with a phenolic-impregnated backing laminate of .02". Overall Top Thickness: 1¼".

### Table Top Shapes

Sauder Education Table Tops come in several standard shapes, including Round, Square, Rectangle, Trapezoid, Boat, and Race Track.

### Trapezoid Table Tops

Trapezoid Table Tops are interior design geometry at its best! Configure the trapezoid table in a variety of combinations that best suit the needs of changing interior environments.

## Standard Edge Styles

- Substrate is 1-1/4" thick 45-lb. per cubic foot particleboard covered with a high-pressure laminate (specified by the customer) on the top surface and a laminate backer on the bottom surface.
- Edge material is a semi-soft (75 Shore A durometer) elastomer urethane that is U.V. stable.

### Vinyl Bumper Edge Color Selections

## Soft Edge Styles

- Soft Edge table tops are an attractive and practical solution for tables.
- Semi-soft molded urethane edge looks great, is durable, and is available in several profiles and colors. See colors on page 64-65.

## Corian® Solid Surface Edges Styles

- Corian authentic solid surface offers the toughest impact strength of any solid surface material.
- Color and texture run throughout and won't wear away. Substrate is  $\frac{3}{4}$ " thick engineered board laminated with  $\frac{1}{2}$ " solid surface material. Edge is  $1\frac{1}{2}$ " built up solid surface material and routed to desired profile.
- Easy-to-clean for your education environment, visit [corian.com](http://corian.com) to view more than 100 colors. Price groups A through E apply.

## Wood Table Legs and Bases

### A. Corner Leg Base

Timeless corner leg design available with or without braces. 16-plys of 1/16" hardwood laminations with interior miter-lock joint construction for exceptional stability. 27¾" standard height.

### B. Full Pedestal Base

The warm elegance of wood with the strength of steel. For tables up to 60" in diameter. 16-plys of 1/16" hardwood laminations conceals a 3½" square steel tube with braces of 11-plys for added stability. 27¾" standard height.

### C. Half Pedestal Base

Combination laminated hardwood and steel tube construction similar to Full Pedestal Bases. Ideal for longer tables in dining and conference rooms. Optional support trestle available for added stability. 27¾" standard height.

### D. Kidz Table Base

Sturdy, one-piece design of 16 ply hardwood laminations are perfect as four corner legs for Kidz Series Tables. 19¼" standard height.

### E. Flip Top Option

Sauder Education Flip Top #105-9999 is a great space-saving solution. A simple and convenient lever allows the table top to be quickly moved from a horizontal to a vertical position for efficient storage. Available as an option on all standard tops up to 54" wide.

For more information on wood table legs and bases see page 70.

## Metal Table Legs and Bases

### A. Economy Base

Heavy cast iron base and spider with 3" or 4" 18 ga. steel tubing, depending on table size. Equipped with plastic glides. 28½" standard height.

### B. Standard Base

Heavy cast iron base and spider with 2" 15 ga. steel or 3" 18 ga. steel tubing, depending on table size. Equipped with chrome, rubber-cushioned adjustable glides. 28½" standard height.

### C. Tubular Base

Cast iron base and spider with 2" 15 ga. steel or 3" 18 ga. steel tubing, depending on table size. Equipped with chrome, rubber-cushioned adjustable glides. 28½" standard height.

### D. Domino Base

Heavy cast iron base and spider with 2" 15 ga. steel or 3" 18 ga. steel tubing, depending on table size. Equipped with chrome, rubber-cushioned adjustable glides. 29¼" standard height.

### E. Leveling Base

Leveling controls on each foot make it easy to put all four on the floor for stability. Cast iron base and spider with 2" 15 ga. steel or 3" 18 ga. steel tubing, depending on table size. Equipped with nylon glides with ABS plastic adjustment knobs. 27½" standard height.

### F. Adjustable/Flip Top Base #105-0020

Versatile base provides adjustment from 28" to 34" to accommodate both wheelchairs and regular dining chairs. Equipped with "quick tilt" feature for tilting the table top for storage and cleaning, and a "quickstep" center transport system for easier moving. Suitable for square, round, and rectangle table tops from 36" to 60".

For more information on wood table legs and bases see page 71.

## Wood Table Legs and Bases

The enduring beauty and warmth of wood is given full expression in Sauder Education wood table legs and bases. Beautifully finished plybent/laminate construction of responsibly resourced hardwoods ensures both appearance and performance. Count on Sauder Education Tables to have the strength to stand up to the job and the subtle style to look great while doing it.

Ordering Information: Use the chart below to select the specific legs or base that is appropriate for size and shape of table top.
