FIRE FIGHTING FOAM™

AQUEOUS FILM FORMING FOAM FOR USE AT 3% DILUTION

FIRE FIGHTING FOAM is a non-corrosive synthetic concentrate that produces a long-lasting and dense foam designed for fighting class A and class B fires, involving non-polar liquids such as gasoline, fuel oil, benzene, mineral spirits and other hydrocarbons. FIRE FIGHTING FOAM offers superior water retention while promoting smothering, and vapor suppression capabilities. FIRE FIGHTING FOAM is compatible with surfactants and tank protector. DO NOT MIX WITH ALCOHOL OR ANY OTHER ANTI-FREEZE.
