SALT RINSE™

NEUTRALIZES CORROSIVE FILM LEFT BY ICE MELT CHEMICALS

SALT RINSE is an industrial strength rinsing compound that was developed to remove the dulling, white-chalky residue left behind by ice melting products. SALT RINSE neutralizes the corrosive film left behind without harming painted or finished surfaces. Directions for mopping: use 1-3 oz. per gallon of water, apply liberally to floor with mop, allow to sit several minutes, and then rinse immediately with water. Wring mop frequently. For heavy equipment use 6 oz. per gallon of water. Spray liberally over equipment. Allow to act several minutes and then rinse.

AREAS OF USE

HOSPITALS/NURSING HOMES
DAY CARE FACILITIES/SCHOOLS
RESTAURANTS/HEALTH CLUBS
HOTELS/MOTELS/OFFICES
HWY DEPT/ROAD AND GROUNDS
KENNELS

APPLICATIONS

WALK AREAS
GYM FLOOR
SNOW PLOWS
WORK EQUIPMENT
ROAD WAYS
GROUNDS

TECHNICAL DATA

FORM: Liquid
ODOR: Cherry
COLOR: Clear
DETERGENCY: N/D
SHIPPING: Class 8
WETTING ABILITY: Saturates
STORAGE STABILITY: 1 Year +
COLD STABILITY: N/D
FLASH POINT: N/A
BOILING POINT: N/D° F
SOLUBILITY IN WATER: Soluble
SPECIFIC GRAVITY: 1.0
pH: 2.0
VISCOSITY: Thin
EVAPORATION RATE: N/D
