TURBO

Granular Drain Opener
"A must to sustain your drain"

This drain opener contains powerful caustic granules activated with aluminum needles to quickly unclog drains and sewers and keep them free-flowing. When added to water, it releases large amounts of heat and turbulence to liquefy, dissolve and loosen fats, oils, and other organic matter that typically clog drains and sewer lines. Even though it's extremely powerful, it will not harm drains, pipes, and septic systems. Danger: May be fatal if swallowed; may cause severe burns; vapor may be harmful.
