CANNONIZE™

HVAC PAN STRIPS

CANNONIZE HVAC PAN STRIPS are for use in drain pans of many cooling units such as air conditioners, refrigerators and dehumidifiers. You may use CANNONIZE STRIPS in catch basins of any units where standing water could grow microbial, mold, algae, bacteria or viruses. Continuous use will prevent foul odors and drain line clogging caused by the build up of micro-organisms and other undesirables. The unique water activated time released design of this product provides automatic feeding for up to six months. One of the desirable characteristics of this product is the initial shock dose, which occurs during the first 48 hours, the product then settles down and controls “trickles” for the remainder of product life. Directions Install Cannonize strips in the evaporator drain pan and place it between the evaporator coil and the drain pan drain opening. Wash hands after handling.

AREAS OF USE

HOTELS/MOTELS
HOMES
OFFICE BUILDINGS
RESTAURANTS
HOSPITALS
SCHOOLS

APPLICATIONS

AIR CONDITIONERS
REFRIGERATORS
DEHUMIIFIERS

TECHNICAL DATA

FORM: Solid
ODOR: Fresh
COLOR: Yellowish
DETERGENCY: N/A
TOXICITY: N/A
WETTING ABILITY: None
STORAGE STABILITY: 1 Year +
COLD STABILITY: 32° F

FLASH POINN/A
FLAME EXTENSION: None
SOLUBILITY IN WATER: Time released
SPECIFIC GRAVITY: 1.00
% VOLATILE BY VOLUME: 0%
pH: 7
EVAPORATION RATE: 1
BIODEGRADABILITY: No
