RED LINE LUBE™

NON-MELT GREASE SPRAY™

RED LINE LUBE is a high pressure lubricant that seeks hard to reach areas for tough, long lasting grease protection. RED LINE LUBE sprays out as a thick liquid which transforms into a grease in one to two minutes. Cured lubricant can withstand heat up to 500ºF, moisture, acids, high pressure and is highly rust resistant. A high pressure additive reduces wear and prolongs operational life of all machinery. Temperatures above 375ºF may require reapplication. Work part to distribute product evenly over entire surface. Spray as necessary to insure full coverage.
