Product Data Sheet

PRODUCT:	**DWT 7055**	
NAME:	Zinc Orthophosphate	
GENERAL DESCRIPTION:	DWT 7055 is a liquid Zinc Orthophosphate corrosion inhibitor used primarily in the protection of potable water distribution systems. DWT 7055 have been specifically formulated to provide a balanced ratio of zinc to orthophosphate for a wide range of corrosion inhibition needs. When added to the water flow, DWT 7055 forms a stable, rapid forming, evenly distributed protective film on distribution piping and all surfaces.	
PRODUCT CHARACTERISTICS:	Appearance: % Zn: % O-PO4: Density: pH: Freeze Point: NSF/ANSI Std 60 MUL:	Water White to Light Straw Liquid 8.0 – 10.0 44.0 – 46.0 1.56 - 1.64 <1.0 <-30˚C 18.0 mg/L
PRINCIPAL USES:	• Reduces Lead and Copper Residuals • Maintains High "C" Factor in System • General Corrosion Control • Protects Asbestos/Cement Pipe • Reduces THM Potential	
PRECAUTIONS AND HANDLING:	DWT 7055 is an acidic material and caution should be taken to prevent ingestion, contact with skin and eyes. It is recommended that safety eye protection, gloves and other personal protection, gloves and other personal protection be worn when handling all chemicals. Store in a cool, dry, well ventilated area away from incompatible materials. Keep closed when not in use. ***Refer to SDS sheet for further information***	
PACKAGING:	30 gal. Poly Drum, 55 gal. Poly Drum, 275 gal Tote **DO NOT REUSE CONTAINERS**
