Delta Chemical Corporation

P.O. Box 7430
Metairie, LA 70010
(504) 733-0630

DWT 7022

Blended Corrosion Inhibitor

DANGER!

Contains orthophosphoric acid and zinc chloride

Corrosive Causes burns. Inhalation of mists may cause mucous membrane and respiratory irritation and possibly nasal ulceration. May be harmful or fatal if swallowed. Prolonged inhalation exposure to mists or fumes may cause lung damage. Prevent contact with the eyes, skin and clothing. Avoid breathing mists or aerosols. Wear appropriate protective clothing and equipment. Use with adequate ventilation. Wash thoroughly with soap and water after handling. Keep containers closed when not in use. Empty containers retain product residues and are hazardous. Follow all MSDS precautions in handling empty containers. Keep out of reach of children. **For industrial use only. Before using, consult the Delta Chemical Corporation Material Safety Data Sheet for this product.**

FIREFIGHTING: Use media appropriate for surrounding fire. Cool fire exposed containers with water.

SPILL HANDLING: Evacuate spill area and keep unprotected personnel away. Wear appropriate protective clothing as described on MSDS. Dike and contain liquid. Carefully neutralize with soda ash. Exercise caution during neutralization since large amounts of heat may be generated. Collect neutralized liquid with an inert absorbent and place in appropriate containers for disposal. Wash spill area with water. Prevent spill from entering sewers and water courses. Report releases as required by local, state and federal authorities.

FIRST AID:

Eye: Immediately flush victim's eyes with large quantities of water for at least 15 minutes, holding the eyelids apart. Get immediate medical attention.

Skin: Immediately flush skin with plenty of water for 15 minutes for at least 15 minutes while removing contaminated clothing and shoes. Wash skin thoroughly with soap and water. Get medical attention. Launder clothing before re-use.

Ingestion: Do Not induce vomiting. Rinse mouth with water and give one glass of water to drink. Never give anything by mouth to an unconscious or convulsing person. Get immediate medical attention.

Inhalation: Immediately move victim to fresh air. If breathing is difficult, have qualified personnel administer oxygen. If breathing has stopped, administer artificial respiration. Get immediate medical attention.

USAGE:

Based on an evaluation of health effects, the level of PO4 in the finished drinking water should not exceed 10.0 mg/L and the level of Zinc in the finished drinking water should not exceed 2.0mg/L.

NFPA Rating: Health = 3 Fire = 0 Reactivity = 0

DOT Shipping Description: Corrosive liquid, acidic, inorganic, n.o.s. (Phosphoric Acid, Zinc Chloride), 8, UN3264, PG III
