ALGA BLUE

E INGREDIENT:
yethylene(dimethyliminio)ethylene-
thyliminio)ethylene dichloride] 5.0%
INGREDIENTS 95.0%
OTAL 100.0%

KEEP OUT OF REACH OF CHILDREN

CAUTION

FIRST AID
Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for further treatment advice.
Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center for treatment advice.
Call poison control center or doctor immediately for treatment advice. Have person sip a glass of water, if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.
Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artifical respiration, preferably by mouth-to-mouth if possible. Call a poison control center or doctor for further treatment advice.
duct container or label with you when calling a Poison Control Center oing for treatment.

To Control Algae, Bacteria, & Fungi In Recirculating Commercial & Industrial Water Cooling Towers Industrial Air Washing SystemsSump or Water Collection Trays Of Air Wash Systems

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: harmful if swallowed. Avoid breathing vapors. Avoid contact with skin, eyes, or clothing. Wash thoroughly with soap and water after handling.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish. Keep out of lakes, streams, or ponds. Do not discharge effluent containing the product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. Fir guidance contact your State Water Board or Regional Office of the EPA.

DIRECTIONS FOR USE

GENERAL CLASSIFICATION: It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

ALGA BLUE used to control algae, bacteria, and fungi in recirculating commercial and industrial water cooling towers. Prior to its use, systems must be cleaned to remove algal growth, microbiological slime, and other deposits. An initial slug addition of 13.5 to 36.3 fluid ounces of ALGA BLUE per 1000 gallons of water to provide a concentration of 96 to 240 parts per million of ALGA BLUE based on the total weight of water in the system is recommended. Repeat initial dosage until control is evident. Subsequent slug additions of 3.6 to 36.4 fluid ounces of ALGA BLUE per 1000 gallons of water (24 to 240 parts per million of ALGA BLUE) should be employed every 2 to 5 days, or as needed. The frequency of addition depends upon the relative amount of bleedoff and the severity of the microbiological problem. Slug additions should be made in the sump of water cooling towers. ALGA BLUE is used to control bacteria in industrial air-washing systems that maintain effective mist eliminating components. Prior to its use be cleaned to remove bacterial slime and other deposits. An i 49.95 to 83.25 fluid ounces of per 1000 g recommended. Repeat initial dosage until control is evident. additions of 33.75 to 83.25 fluid ounces of pe water should be employed each 1 to 5 days, or as needed. addition depends upon the relative amount of bleedoff and sever problem. Slug additions may be made to the sump or to the wat of the airwash system.
