Product Data Sheet

PRODUCT:	**DWT 7022**	
NAME:	Zinc Orthophosphate	
GENERAL DESCRIPTION:	DWT 7022 is a liquid Zinc Orthophosphate corrosion inhibitor used primarily in the protection of potable water distribution systems. DWT 7022 has been specifically formulated to provide a balanced ratio of zinc to orthophosphate for a wide range of corrosion inhibition needs. When added to the water flow, DWT 7022 forms a stable, rapid forming, evenly distributed protective film on distribution piping and all surfaces.	
TYPICAL PROPERTIES:	Appearance: % Zn: % O-PO4: Density: pH: Freeze Point: NSF/ANSI STD 60 MUL:	Water white to light straw liquid 6-8 20-22 1.28-1.36 <1.0 <-30˚C 23.0 mg/L
PRINCIPAL USES:	• Reduces Lead and Copper Residuals • Maintains High “C” Factor in Syatem • General Corrosion Control • Protects Asbestos/Cement Pipe • Reduces THM Potential	
PRECAUTIONS AND HANDLING:	DWT 7022 is an acidic material and caution should be taken to prevent ingestion, contact with the skin and eyes. It is recommended that safety eye protection, gloves and other personal protection be worn when handling all chemicals. Store in a cool, dry, well ventilated area away from incompatible materials. Keep containers closed when not in use. ***Consult the product SDS for more specific information.***	
PACKAGING:	30 gal. Poly Drum, 55 gal. Poly drum, 300 gal. Tote, 330 gal. tote **DO NOT REUSE CONTAINERS**
