DESCRIPTION

Digester Plus biologically breaks down and digests mixtures of organic greases, fats, protein materials, oil and other waste materials
Reduces organic solids to liquid, reduces overloading of systems, reduces maintenance costs, and eliminates odors.

Eliminates odors. Hydrolyzes Proteins. Reduces sludge volume. Hydrolyzes emulsified fats to fatty acids and alcohols. Reduces suspended solids. Promotes greater digestive capacity. Builds nutrients for the microbes. Increases liquification and gasification of organic wastes. Converts starches to fermentable sugars. Nutrient rich to stimulate the growth of microorganisms such as bacteria, fungi, and protozoa. Liquefies standard wastes.

DIGESTER PLUS

03-8053

Manufactured for
Liquid Solutions LLC
PO Box 677
Magee, MS 39111

Contains 15 Billion Bacteria per Gram

CAUTION:

Do not take internally. Store in a dry place.

KEEP OUT OF THE REACH OF CHILDREN

DIRECTIONS

Digesters: 1 lb per week for 1,000 Cu.Ft. Approximately 8,000 gallons

Trickling Filters: Use 3 lb per MGD flow Repeat at 48 Hr. intervals. Add into primary settling tank or into siphon tank.

Settling Tanks: Use 1 lb per 1,000 Cu. Ft. Approximately 8,000 gallons

Primary Digesters: 1 lb per 1,000 Cu Ft of sludge. Reduce the amount for economy gradually. Heavy layers of solid grease or scum may require initial shock dosage.
