ALGA RED

ACTIVE INGREDIENTS

Disodium cyanodithioimidocarbonate 3.68%
Potassium N-methyldithiocarbamate 5.07%
INERT INGREDIENTS 91.25%
TOTAL 100.00%

EEP OUT OF REACH OF CHILDREN

DANGER

FIRST AID

d eye open and rinse slowly and gently with water for 15-20 minutes.
nove contact lenses, if present, after the first 5 minutes, then continue
ing eye.
l a poison control center or doctor for further treatment advice.

e off contaminated clothing.
se skin immediately with plenty of water for 15-20 minutes.
l a poison control center for treatment advice.

l poison control center or doctor immediately for treatment advice.
ve person sip a glass of water, if able to swallow.
not induce vomiting unless told to do so by the poison control center or
r. ● Do not give anything by mouth to an unconscious person.

ve person to fresh air.
erson is not breathing, call 911 or an ambulance, then give artifical
piration, preferably by mouth-to-mouth if possible.
l a poison control center or doctor for further treatment advice.

NOTE TO PHYSICIAN:

damage may contraindicate the use of gastric lavage.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

sive. Causes irreversible eye damage and skin burns. May be
hrough skin. Harmful if swallowed. Do not get in eyes, on skin, clothing. Wear goggles or face shield and rubber gloves and protective clothing. Prolonged or frequently repeated skin contact may cause allergic reaction in some individuals. Wash hands before eating, drinking or using tobacco or using the toilet. Remove contaminated clothes and wash before reuse.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or other waters unless in accordance with the requirements of an National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewage systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

COOLING WATER SYSTEMS: ALGA RED is used to inhibit the growth of microorganisms in industrial, commercial and institutional cooling water systems. In noticeably fouled systems, ALGA RED should be added at a rate of 6.9 to 13.9 fl. oz. of ALGA RED per 1000 gallons of system water (56-115 ppm) until control is evident. Subsequent additions of ALGA RED should be made to the system as needed at a rate of 2.3 to 13.9 fl. oz. of ALGA RED per 1000 gallons of system water (20-115 ppm) to maintain control. The frequency of treatment depends upon the severity of the microbiological problem. For best results the system should be cleaned prior to treatment. **Not for use in once-through cooling systems.**

INDUSTRIAL WATER PURIFICATION SYSTEMS: ALGA RED is used to control microbiological fouling in industrial water purification systems including reverse osmosis systems, filters, clarifiers and ion exchange equipment. For off-line treatment, ALGA RED should be fed at a concentration of 24.5 to 49.0 fl. oz. per 1,000 gallons of water (200-400 ppm) for 4 to 8 hours. For on-line maintenance treatment, dosing of 4.9 to 9.8 fl. oz. ALGA RED per 1,000 gallons of water (40-80 ppm) for 6 to 12 hours should be made once a week or as needed to maintain control. **Not intended for use in potable water systems. Not registered for this use in California.**

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or dispos

PESTICIDE STORAGE: Do not expose to extreme temperatu
than five drums high. Drums should be opened in well-ventila
damaged drums should be placed in overpack drums for disp
absorbed in sawdust or sand and disposed of in a sanitary lar
closed when not in use.

PESTICIDE DISPOSAL: Pesticide wastes are toxic. Improp
pesticide, spray mixture, or rinsate is a violation of Federal
cannot be disposed of by use according to label instruction
Pesticide or Environmental Control Agency, or the Hazardous
at your EPA Regional Office for guidance.

CONTAINER DISPOSAL: METAL: Triple rinse (or equivalent
cling or reconditioning, or puncture and dispose of in a sanita
procedures approved by sate and local authorities.
PLASTIC: Triple rinse (or equivalent). Then offer for recycling
puncture and depose of in a sanitary landfill by incineration,
and local authorities, by burning. If burned, stay out of smok
