X-ICE® Concentrated Chemical Ice-Melting Pellets

Read the entire label before using this product. • Si usted no entiende esta etiqueta, pida a alguien que sepa inglés que se la explique completamente antes de usar este producto.

This product is a concentrated chemical pellet that quickly melts ice and snow without injuring vegetation when used as directed. Does not cause concrete to chip or crumble*. This product melts ice and snow off sidewalks, driveways, loading docks, parking lots, and streets up to 8 times faster than rock salt**. Works effectively at temperatures as low as -25°F. Even more effective at 25°F to 30°F

*While this product is specially inhibited not to damage concrete, it is important to use the product according to label directions. The cycle of re-freezing and thawing by natural elements can damage concrete. The use of any ice-melting compound may accelerate this process. New (less than 6 month old) and poor-quality concrete are more susceptible to natural freeze-thaw damage as well as chemical ice melters.

**Maximum advantage over rock salt occurs at +10°F.

Suitable for use as an ice melting compound in non-processing areas of U.S. Federally inspected meat and poultry plants.

DIRECTIONS FOR USE: CAUTION: Do not spread with bare hands, as severe dehydration of the skin may result.

NOTE

1. Ice melting compounds may cause surfaces to become slippery; therefore, the use of appropriate floor mats is recommended in building entryways.
2. Use just enough to melt the ice. Do not over-apply. Overuse may result in burned turf.
3. May be corrosive to some unpainted metals.

Apply with a fertilizer spreader, shovel, coffee can or similar device. Sprinkle pellets on ice and snow areas. The amount required will vary with the air temperature and the thickness of the ice. Where salt damage is no problem, product can be mixed with salt to help the salt work faster. It can also be mixed with sand or other abrasives.

STORAGE: Store in a cool, dry area. Any ripped or torn container should be closed immediately to prevent caking of the product.

WARNING

CAUSES SERIOUS EYE IRRITATION • HARMFUL IF SWALLOWED • MAY CAUSE DAMAGE TO ORGANS THROUGH PROLONGED OR REPEATED EXPOSURE

Contains Calcium chloride. Wear protective gloves, protective clothing and eye protection. Wash face, hands and any exposed skin thoroughly after handling. Do not eat, drink or smoke when using this product. Do not breathe dust.

FIRST AID: IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists, get medical attention. **IF SWALLOWED:** Rinse mouth. DO NOT induce vomiting. Call a physician if unwell.
