Vinyl Pro

INVISIBLE PROTECTIVE
COATING FOR:

VINYL, LEATHER, DASHBOARDS, PLASTIC
TIRES, RUBBER BUMPERS, CHROME

Excellent on All Seats and Dashes

Excellent for Boats!

UV Protectant

Great for Motorcycles

DESCRIPTION:
Protects against the sun's UV rays which dull, crack, harden or fade materials like vinyl (seats, dash, door panels, etc), rubber (tires, bumpers, seals, molding, etc), sealed wood, plastic, & leather. It also makes surface antistatic to repel dust and dirt.

DIRECTIONS:
Apply with cloth, sponge or spray directly on clean dry surface. Spray a light coat of product then remove excess with a clean, damp cloth and buff to a high luster. It is recommended that product be applied to one small area at a time and then buffed rather than attempting to spray an entire surface before removing excess and buffing. Luster and nonsoiling properties may be increased by applying additional coats of this product and buffing after each coat. To clean treated surfaces, wipe with a dry clean cloth.

AVAILABLE SIZES:
Quarts
One Gallon
Five Gallon Pail
Fifty-Five Gallon drum

SPECIFICATIONS:
Appearance.....Milky White
Fragrence.....Mild
pH.....7.5
Flash Point.....None
Solvents.....None
Prod. code#.....5114
