DWT 6035 Polyphosphate

- NSF/ANSI Std 60 Certified
- Reduces or Eliminates the Need for pH Adjustment
- Reduces Overall Treatment Costs

Description

Delta Chemical DWT 6035 is a liquid Polyphosphate scale and corrosion inhibitor used primarily in the protection of potable water distribution systems. DWT 6035 has been specifically formulated to provide excellent sequestering capabilities and for a wide range of general corrosion inhibition needs. When added to the water flow, DWT 6035 forms a stable, evenly distributed protective film on distribution piping and all surfaces.

Typical Properties

Appearance: Clear colorless liquid
% P-PO4: 34 - 36
Density: 1.64 – 1.74
pH: 10 - 12
Solubility: 100%
Crystallization Point: < 20 ° F
NSF/ANSI Std 60 MUL: 29.0 mg/L

Principal Uses

- Controls General Corrosion
- Sequesters Calcium, Iron & Manganese
- Prevents Scale Deposits

Product Safety Information

DWT 6035 is a non-hazardous material. However, caution should be taken to prevent ingestion, contact with skin and eyes. It is recommended that safety eye protection, gloves and other personal protection be worn when handling all chemicals.

Consult the product MSDS for specific information regarding safety and handling of this product.

Packaging and Shipping

DWT 6035 is available in:
- 30 gallon (350# net weight) N/R Poly Drums
- 55 gallon (640# net weight) N/R Poly Drums
- 275 gallon (3200# net weight N/R Totebins
- Bulk – Various Quantities

DOT: Not Regulated
See MSDS for additional information.
Consult the MSDS for additional information regarding this product.

Storage and Handling

Store in a cool, dry, well ventilated area away from incompatible materials. Keep containers closed when not in use.

Do not reuse containers. Empty containers retain product residues which can be hazardous. Follow all MSDS precautions when handling empty containers.
