DELTA BIOSPERSE

Organic Deposit Penetrant, Dispersant, Cleaner and Corrosion Inhibitor

Delta Biosperse is an organic deposit penetrant, dispersant, cleaner and yellow metal corrosion inhibitor. Used with a biocide provides for a BCP™ (Biofilm Control Program). Intended uses: circulating industrial water systems, such as cooling towers, closed loop cooling systems, and sump basins.
FOR INDUSTRIAL USE ONLY.
System maintenance dosage: Use 50 – 100 ppm on a product basis in slug dose, or at 5 – 30 ppm on a continuous dose basis (depending on blow down).
Surface fouling control may be monitored by measuring ATP before, during and after use of Delta Biosperse. Corrosion coupons or instantaneous corrosion monitor (LPR) should be used to determine inhibitor efficacy. Using bacterial enumeration methods (TBC) can show the efficacy of the Delta Biosperse.
Ingredients: Delta Biosperse (alkylamide hydrolysate)

WARNING

HAZARD STATEMENTS
Causes skin irritation. Causes serious eye irritation.

PRECAUTIONARY STATEMENTS:
Wash hands thoroughly after handling. Do not eat, drink or smoke when using this product. Wear protective gloves /protective clothing / eye protection / face protection.
IF ON SKIN: Wash with plenty of soap and water. If skin irritation occurs: Get medical advice/attention. Take off contaminated clothing and wash before reuse.
IF IN EYES: Immediately flush eyes with running water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.
Note: See Safety Data Sheet for further details regarding safe use of this product.
