TURBO

DIRECTIONS

DRAIN APPLICATIONS: For slow or clogged drain line add a small amount of **TURBO**. If the drain line is dry, add water to drain immediately after **TURBO** has been added. **For HVAC drain pains:** Turn unit off. Pour **TURBO** in area of build up and flush with water. Once clog is removed and area is clear of chemical and debris, turn unit on.

MULTI-UNIT HOUSING/MUNICIPAL HOUSING AUTHORITY USE: For preventative maintenance pour 2.5 lbs. in trouble areas on a regular basis to keep them free-flowing. (60 lbs. containers are available for larger drains.) For crisis management, it may be necessary to use 1 or more pails depending on the depth, width, amount of water and type of blockage. **TURBO** becomes activated by water. If the sewer system is dry, add water AFTER **TURBO** has been applied.

FOR USE IN INDUSTRY, FOOD PLANTS AND PACKAGING PLANTS: Where accumulating or organic matter may clog drainage systems, pour in **TURBO** adjusting quantity based on the clog in the drainage system. **TURBO** becomes activated by water. If the sewer system is dry, add water AFTER **TURBO** has been applied.
