AFIX COLLECTION

Hi5 FURNITURE SUPPORTS YOU FROM DESIGN THROUGH INSTALL

From small classrooms to large tiered lecture halls, Hi5's team of experts can provide both specification and installation assistance. Hi5 takes great care to insure your tables are the perfect fit for your project needs. We educate and guide our customers on how to best meet power and IT requirements, and we create the hard-copy install materials needed for a successful product installation. Your contractor, installation crew, electrician, and end user will be pleased with the quality of both our product and service.

AFIX CUSTOMIZATION IS STANDARD

Hi5 understands that each room and lecture hall is unique. We help bring your ideas to life by facilitating custom requests. Accessories such as power boxes, cord management, and modesty panels are fully customizable. We offer a variety of material options such as laminate, perforated metal, and veneer. We also provide finish matching for paint, veneer stain-to-match, and custom edge treatments. If you can dream it and design it, we can build it.

FREESTANDING SEATING VERSES ATTACHED SEATING

Freestanding seating allows almost unlimited options for your fixed-table application. Chairs with casters, four-leg bases, sled bases, and chairs with or without arms are all equally at home with Hi5's aFIX tables. Keeping the seating mobile and moveable provides opportunity for collaboration between people seated in each row and the rows behind them. Freestanding chairs also allow individual freedom to move and adjust the chair as needed for better comfort. In addition, the space between rows in an aFIX installation is larger on average than in a fixed-seating/fixed-table application, providing more space per person and enhanced circulation clearance.

BASE ASSEMBLY TO THE FLOOR

ROUND BASE

BOAT SHAPED BASE

The AFIX Round Base has a 2.5" diameter opening to route power and AV cords.

The Boat Base has a 1.8" x 3.8" oval opening to route power and AV cords.

aFIX round bases allow for maximum leg space on 18" or 20" deep tables. Laminate modesty panels come standard as 14" high

aFIX round base offers optional wire holes to access floor boxes

aFIX round base with decorative cover

AFIX ROUND BASES

aFix round bases allow for maximum leg space between bases and have either a black form fitted plastic cover or steel cover. The form fitted steel cover finish can match or contrast with your base paint finish.

aFIX options include wire access holes, power boxes, wire management, modesty panels and ADA height adjustable bases.

Height-adjustable bases meet ADA while providing power and modesty panels.

aFIX boat-shaped base offers ample space to route power and AV cables inside it. These bases can support up to 36" deep table tops and come in 29", 36" and 42" heights

AFIX BOAT SHAPED BASES

The aFIX 3" x 8" boat-shaped base offers a generous integrated raceway for electrical connections and includes a removable access panel. All aFIX table tops and modesty panels are drawn and fastened together to give the appearance of a continuous row.

aFIX boat bases manage cords horizontally and vertically

The aFIX boat-shape base includes a removable access panel to allow electrical J-boxes to mount inside the closed base
