PRODUCT DESCRIPTION

Ensurinse Antibacterial Produce Wash contains natural and safe to use FDA affirmed GRAS ingredients designed to remove surface bacteria and contamination from raw fruits and vegetables.

When used as directed, Ensurinse Antibacterial Produce Wash is effective against the strains of bacteria that have been associated with food-borne illness such as Escherichia coli, Salmonella enterica, Listeria monocytogenes, and Staphylococcus aureus and is recommended for use on whole, cut, chopped, sliced and other processed produce.

DIRECTIONS FOR USE

Dilute 1.0 ounce of this product per 1 gallon of room temperature water. Soak fruits and vegetables for at least 5 minutes. Scrub or agitate, if necessary, any soils from the surface, drain produce, prepare and serve. Optionally, visibly soil laden produce may also be rinsed with fresh water prior to preparation and serving.

Storage: Do not store in food processing or food storage areas.
