CHERRY ZYME is a biodegradable preventative maintenance product that devours and deodorizers' exterior grease traps and lift stations. Because CHERRY ZYMES is non-acid and non-caustic it is ideally suited for removing heavy grease build up in grease traps and lift stations.
CHERRY ZYME devours hydrocarbons such as greases, fats, and oils found in grease traps. CHERRY ZYME also devours sugars, syrups, and slime that builds in soda fountain drains.

Additions made with injection pumps are 9-15oz per day on traps of 20 cubic feet or less. Manual additions to larger traps and to lift stations should be determined by your service tech. Size of system, rate of flow, as well as type and volume of contaminates are some of the factors which determine treatment rate.

CHERRY ZYME

03-8164

Manufactured for
Liquid Solutions LLC
PO Box 677
Magee, MS 39111

Grease Trap and Lift Station Degreaser and Deodorizer

For Commercial and Industrial use only.
