BIG RED is a concentrated blend of emulsifiers, surfactants and acids that is specially formulated for the HVAC industry.

Atmospheric fallout and other airborne impurities collect on exposed metal causing oxidation. This oxidation impedes heat transfer which reduces the units ability to operate effectively.

BIG RED will penetrate and remove oxidation and other impurities which will allow the system to operate at a peak performance level. This will also aid in extending the useful life of the system.

FOR INDUSTRIAL, INSTITUTIONAL AND COMMERICAL USE ONLY.

BIG RED

03-6460-5

Manufactured for
Liquid Solutions LLC
PO Box 677
Magee, MS 39111

Cooling Tower / HVAC Cleaner, De-Scaler & Inhibitor

Designed to remove scale deposits from Cooling Tower Systems, Heat Exchangers, Evaporators & A/C Units

KEEP OUT OF THE REACH OF CHILDREN

DIRECTIONS FOR USE:

BIG RED is a concentrated product designed to dilute 50/50 with water. Wet down area to be cleaned then spray diluted product onto surface. Apply liberally to insure area is saturated. Allow BIG RED to remain in contact with area for 3 to 5 minutes before rinsing thoroughly with water. Make sure all product residue is completely rinsed off.

CAUTION: BIG RED has a very high acid content. Proper personal protective clothing should be worn. Avoid contact with skin and eyes. Wear rubber gloves and eye protection when using product.
Seek medical attention if irritation persists.
