WET-SHINE FLOOR SEALER-FINISH

The easiest floor care ever. Eliminates the need of two different products. WET-SHINE seals and finishes floors at the same time keeping dirt, soil, and spills locked out. No matter how often you scrub, the finish stays bright and glossy like it was newly applied.

WET-SHINE is so clear and colorless when dry that it won't discolor the whitest of floor coverings. So tough it shields against black heel marks and scuffs. Safe--it's slip resistant. Economical--the gloss lasts so much longer.

Ideal for spray buffing. Add equal parts of water to WET-SHINE and use in the conventional spray-buff method.

This product utilizes the most advanced formulation in chemical technology to provide the most beautiful results with the least effort.

WET-SHINE

FLOOR

SEALER-FINISH

a liquid polymer floor finish that gives a glossy, transparent protective coating over vinyl tile, terrazzo, linoleum and hardwood floors

SELF POLISHING---DETERGENT RESISTANT NON-YELLOWING

CAUTION: KEEP OUT OF REACH OF CHILDREN

DIRECTIONS FOR USE:

WET-SHINE is a superb liquid finish that is designed to provide brilliant floors with a minimum of maintenance.

Clean and strip floors in the conventional manner. On initial application of WET-SHINE, use two thin coats, allowing for complete drying between coats. Apply with long gentle strokes in the same direction and avoid creating foam with applicator. NO BUFF-ING NECESSARY. However, to develop hardness and greater brilliance, the floor may be buffed 48 hours after application.

Regular maintenance requires that the floor be damp mopped periodically to make the shine last longer. You may either dry-buff or spray-buff occasionally to bring back the "wet-look". As the finish begins to wear in spots, there is no need for stripping. Just clean floor and apply one coat of **WET-SHINE** as needed. No "wax-buildup" will occur with this product.
