DIRECTIONS:

MACHINE CLEANING: Vacuum carpet first. Dilute 4-6 ounces **MR C CARPET SHAMPOO** per gallon of water and pour into solution tank. The machine will dispense solution and scrub the carpet. Avoid soaking carpet. Recover solution and dirt from the carpet with the machine's built-in extraction system or by using a wet vacuum. The recovery tank should be checked. If there is an excessive suds build-up in recovery tank - add de-foaming compound. The amount of sudsing in the recovery tank will depend on water hardness. Allow carpet to completely dry. Then dry-vacuum entire area to restore carpet "fluff".

HAND CLEANING: Using same dilution rate as above, work solution into carpet using a brush or sponge. Wipe off immediately with clean dry cloth or sponge. Work only a small area at a time. Allow cleaned area to dry completely, then vacuum. **MR C** may also be used to clean soiled upholstery.

All responsibility for the proper use, storage, and handling of this product is the responsibility of the buyer. Casco Products Company, Inc. makes no other claims or warrantees, expressed or implied.
