PRODUCT DATA SHEET

CWT 8333 - COMPLETE COOLING WATER TREATMENT

GENERAL DESCRIPTION:

CWT 8333 is a concentrated cooling water treatment used as a scale retardant, antifoulant and corrosion inhibitor. CWT 8333 contains an efficient dispersant of common inorganic particulates found in cooling tower systems. CWT 8333 is authorized by the United States Department of Agriculture for use in federally inspected facilities.

PRODUCT CHARACTERISTICS:

Form ..... Light Golden Liquid
pH ..... Approximately 12.0
Density ..... 9.15 lbs./gallon

FEEDING:

CWT 8333 may be pumped directly from the shipping container into a recirculating cooling water line or fed directly to the tower basin. A proportional feed and bleed system controlled by a conductivity controller is recommended. Consult your service representative for specific recommendations.

PRECAUTIONS AND HANDLING:

Product is an alkaline material. Avoid contact with skin and eyes. Do not take internally. Protective gloves and chemical splash goggles are recommended. Wear impervious apron and boots to minimize potential contact. General ventilation is adequate, however, a NIOSH approved breathing apparatus should be used for exposures above OSHA threshold limit values. Consult material safety data sheet for more information.

PACKAGING:

55 GALLON DRUMS
30 GALLON DRUMS
5 GALLON PAILS
