Use TOP HAT in Lift Stations to eliminate excessive FOG build-up on side walls and float controls.
TOP HAT will not emulsify but will float on top of scum mat to remain in contact with FOG for an extended time.

Pump station volume down to the top of pumps or as low as safely possible. Add TOP HAT in sufficient quantity to cover scum mat with a 2-3 inch layer of product. Approximately 5 to 15 gallons, depending on size.
As water level rises TOP HAT will begin to soften the harden FOG. TOP HAT can be pumped or drip fed into well as a daily preventative maintenance measure.

TOP HAT

03-8461-

Manufactured for
Liquid Solutions LLC
PO Box 677
Magee, MS 39111

Floating Degreaser
For Wet Wells Lift Stations and Grease Traps

KEEP OUT OF THE REACH OF CHILDREN

TOP HAT when used in a grease trap will provide an odor blanket on top of grease layer. Because it floats it will not move grease downstream as water flows out.

TOP HAT is for Commercial, Industrial, and Institutional only. Keep This Out Of The Reach Of Children. TOP HAT vapors are combustible, Do Not Cut or Drill Container

Avoid contact with skin, eyes, and clothing. In case of contact flush eyes with water for 15 minutes. Remove contaminated clothing. If irritation persists, seek medical attention. Only induce vomiting at the instruction of a physician.

In case of spill, do not use water. Absorb with inert material then dispose in chemical waste container.
