P-AWAY MANGO

Enzymatic Concentrate

PUBLIC RESTROOMS
KITCHENS
KENNELS
SEPTIC TANKS
DRAIN LINES
FABRIC SAFE

P-away quickly eliminates a wide range of malodors through bio-enzymatic action that consumes the source of the odors. This non-toxic, biodegradable concentrate is packed with enzyme-producing bacteria and powerful fragrances. It is effective against malodors caused by pet accidents, urine, vomit, decomposing food, water and smoke damage, and many others. Excellent for use in grease traps and drains.

Directions:
Shake before use. Remove odor source as best possible before treating.
General Cleaning: Dilute 2 to 4 oz. per gallon of warm water when applying with a mop or sponge. Remove solids before applying product.
Carpet Spills: Pretest for color fastness. Absorb as much of spill as possible before spraying solution directly onto the affected area. On tough spills/stains, cover treated area with damp cloth overnight to prevent evaporation - then continue with carpet cleaning.
Carpet/Rug Shampoo: Pretest for color fastness. Dilute 1 to 2 oz. per gallon of shampoo solution. Saturate area and extract. May need to repeat for heavily stained areas.
Restroom Odors: Dilute 2 to 4 oz. per gallon of mop water. Spray solution directly onto the floor or wall and around toilets for tough odors. Do not mist up in the air.
Plumbing/Drain Maintenance: Add 4oz. daily until drains run freely and are odor free.
Garbage Cans: Spray directly into the garbage can daily to eliminate odors at the source.
Dumpsters: Pour 8 oz. in to dumpster daily.
Grease Traps: Pour 16-20 oz. of concentrate per day in to drain leading to trap.
Septic Tanks: Dilute 32 oz into 32 oz. of water monthly.
