SYMPLICITY™ SANITIZING SOFTENER 550

Bacteriostatic Fabric Softener & Sanitizer

EPA registered concentrated liquid fabric softener and sanitizer formulated to provide residual activity against odor causing organisms residual self sanitizing activity against odor-causing Gram positive and Gram negative organisms under conditions of high relative humidity or wet contamination.This product inhibits the growth of organisms which act on urine to produce ammonia in diapers and wet bed linens It also softens clothes thereby eliminating chafing and static cling from nylons and synthetic fabrics.

Features

Extended Control - Residual self-sanitizing and bacteriostatic activity
SureConnect - No Contact, No Spills, enhances safety and more
EPA Registered Sanitizing Softener - prevents odors
Improved Results - Reduces static electricity and wrinkling
Liquid Concentrated formula – Economical, Saves Money
Short extraction time - Labor Saving

Available In:

4 - 1 Gal. Bottles Item #47904-00

55 Gal. Drum Item #47955-00

15 Gal. Drum Item #47977-00

5 Gal. Pail Natural Item #47978-00

Directions for Use

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.
This product is a concentrated formulation designed for use in commercial and institutional laundry operations by addition to the final rinse cycle. The residual self sanitizing activity reduces the number of odor causing bacteria from wet contamination.

Residual self-sanitizing level of bacterial control.
Add 5 fluid ounces of this product per 100 lbs. of dry laundry to the final rinse cycle water. At this rate, this product provides, to the fabric, a residual self sanitizing activity against odor-causing Gram positive and Gram negative organisms under conditions of high relative humidity or wet contamination.

Residual bacteriostatic level of bacterial control.
Add 20 fluid ounces of this product per 100 lbs. of dry laundry to the final rinse cycle water. At this rate, this product provides to the fabric, a residual bacteriostatic activity against odor-causing Gram positive and Gram negative organisms under conditions of high relative humidity or wet contamination. This product inhibits the growth of organisms which act on urine to produce ammonia in diapers and wet bed linens. It also softens clothes, thereby eliminating chafing and “static cling” from nylons and other synthetic fabrics. The use of this product will also help to improve ironing time.

Tech Specs

Color	Periwinkle
EPA Reg. No.	1839-108-4170
Fragrance	Fresh Floral
Solubility in Water	Yes
