Floating Grease Out

FRESH CITRUS FRAGRANCE

CLEANS
DEGREASES
REDUCES ODORS

NET CONTENTS: 5 GALLONS

This highly specialized citrus-based product is formulated to be a floating solvent system possessing degreasing and detergent properties which cleans the vertical surfaces of lift stations, wet wells and similar facilities. This product is added directly to lift station wet wells in its concentrated form for effortless cleaning. Cleaning and degreasing is accomplished by the rise and fall of the water level. As the water fluctuates, the cleaner removes the debris from the sides of the wet well. A secondary property of this unique product is its ability to "seal" or contain offensive odors which emit from the lift station.

DIRECTIONS FOR USE:

Four gallons should be added to lift station initially, followed by one gallon per week. For best results product should be added to wet well until a layer of 6 to 12 inches is floating on the surface.

As raw sewage flows into lift station wet wells to be pumped to treatment facilities, accumulations of sewage, grease, oils, fatty acids and calcium and magnesium soaps form deposits on the walls. These deposits reduce volume capacity of wet wells and by their natural decomposition process emit offensive odors. To return lift station to optimum efficiency this accumulation of debris must be removed or substantially reduced.

WARNING
Combustible liquid
Causes skin irritation
May cause allergic skin reaction
May cause drowsiness or dizziness

Precautions

Keep away from open flames, heat, sparks. No smoking. Avoid breathing mist, spray, vapors. Wash hands thoroughly after handling. Contaminated work clothing must not be allowed out of the workplace. Wear eye protection, protective glove, face shield.

If on skin: Wash with plenty of soap and water. If skin irritation or rash occurs, get medical advice. If inhaled: Remove person to fresh air and keep comfortable for breathing.
In case of fire: Use suitable ABC-powder to extinguish. Store in well-ventilated place. Keep container tightly closed. Dispose of contents/container to an approved waste disposal plant.

FIRST AID

Never give anything by mouth to an unconscious person. If you feel unwell, seek medical advice. (Show label where possible.) **Inhalation:** Allow victim to breath fresh air. Allow victim to rest. **Skin Contact:** Remove affected clothing and wash all exposed skin area with soap and water. If skin irritation occurs, get medical attention. **Eye Contact:** Rinse immediately with plenty of water. Obtain medical attention if pain, blinking or redness persist. **Ingestion:** Rinse mouth. DO NOT induce vomiting. Obtain emergency medical attention.

Precautions for Safe Handling

Wash hands and other exposed areas with mild soap and water before eating, drinking or smoking and when leaving work. Provide good ventilation in process area to prevent formation of vapor. No open flames. No smoking. Take precautionary measure against static discharge. Use only non-sparking tools. Avoid breathing mist, spray vapors.
