GENERAL DESCRIPTION

Essentia is a complete collection of executive office furniture. Beginning with some basic shapes, numerous configurations are possible. The collection, made from reconstituted wood, is an attractive blend of materials as equally impressive as its main material – wood. The melding of wood, white lacquer, Soft-Touch leather and glass contribute to the distinction and style of the collection's surfaces and storage units.

Essentia offers a large variety of work surfaces and returns. The surfaces are either "floating" above storage units (supported by spacers) or supported by wood gables or metal legs.

The nesting of the main work surface with the return surface is a strong aesthetic element of the collection. The pedestals, credenzas, half-height storage units, cabinets, wardrobes, bookcases and wall-mounted or freestanding hutches are available in many configurations. A wall- or credenza-mounted work wall is also available. The accessory rail completes the work environment allowing the addition of shelves and accessories.

The Essentia collection offers various practical and functional components such as pigeon-hole units, electrical access, modesty panels and the Noki lock designed specifically the collection.

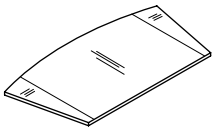
THE MATERIALS

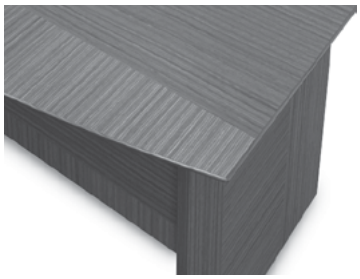
Reconstituted Wood

Classic, warm, noble and distinctive, the Essentia wood collection is also environmentally responsible in the use of reconstituted wood. These veneers are made from fast-growing wood, limiting excessive forest harvesting. Another major advantage is the lack of color variation between components allowing for continuity in the components and future additions. Because reconstituted veneers allow for the reproduction of rare essences, the Essentia collection is available in walnut, oak, teak and zebra wood grains. Essentia's 17 colors originate from these 4 essences as shown on the interior cover of this document. The colors have a semi-matte finish (15% gloss) for a contemporary, natural look. Wood is the main material on the components and the wood grain is positioned horizontally on the majority of the furniture's structural components.

Some of the components feature innovatively oriented veneer with what we call bidirectional wood grain. The great skills and experience of our specialists are revealed in designs using the same essence. This detail is found in the Duo wood gable, work surfaces, returns and modesty panels when specified.

Refer to the illustration next to the product description for wood grain orientation.





Bidirectional wood grain on the surface, gable and modesty panel.

Lacquer

The lacquer is an opaque white paint with a matte finish that is soft to the touch. The finish is very resistant to stains and scratches in the context of normal office work. It is available on surfaces, storage fronts and hutch doors as well as on modesty panels and hanging shelves.

Soft-Touch

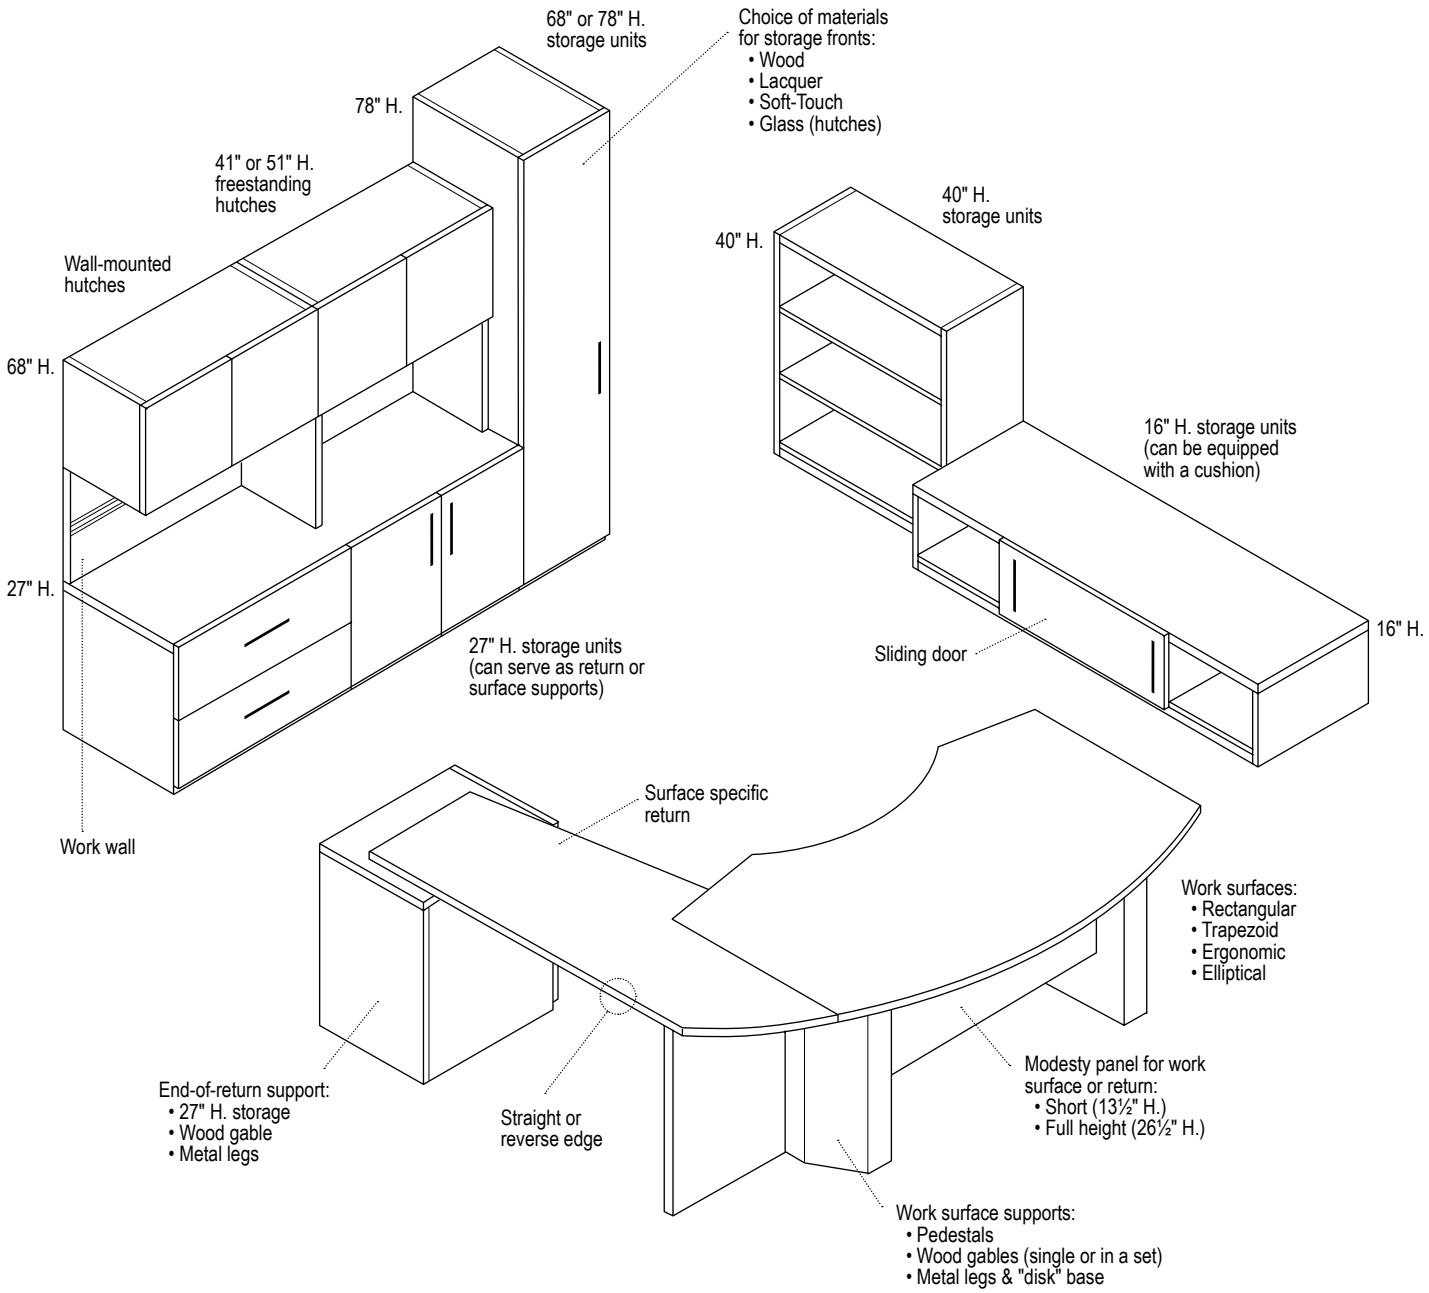
Soft-Touch is a vinyl fabric similar to leather while offering many undeniable advantages such as the ease of writing on paper on a surface or desk blotter covered with the material. It is also available on storage and hutch fronts. Beige topstitching is added on the majority of components for a high quality finishing touch. Soft-Touch is available in black, dark brown, terra cotta or cream. Its hand-crafted assembly may leave some wrinkles in the surface corners, these surfaces require extra cleaning attention.

Glass

The Essentia collection uses 6mm thick tempered glass with polished edges. The exposed surface of clear glass is acid treated resulting in a frosted look. The opposite side is painted white making it opaque. Glass is available on some surfaces, on hutch door fronts and 13½" H. modesty panels.

Soft-Touch with topstitching.

LE POSTE TYPE



SURFACES

MAIN SURFACES
Main work surfaces are available in four models in various dimensions:

❶ **Rectangular**
❷ **Trapezoid**
❸ **Ergonomic**
❹ **Elliptical**

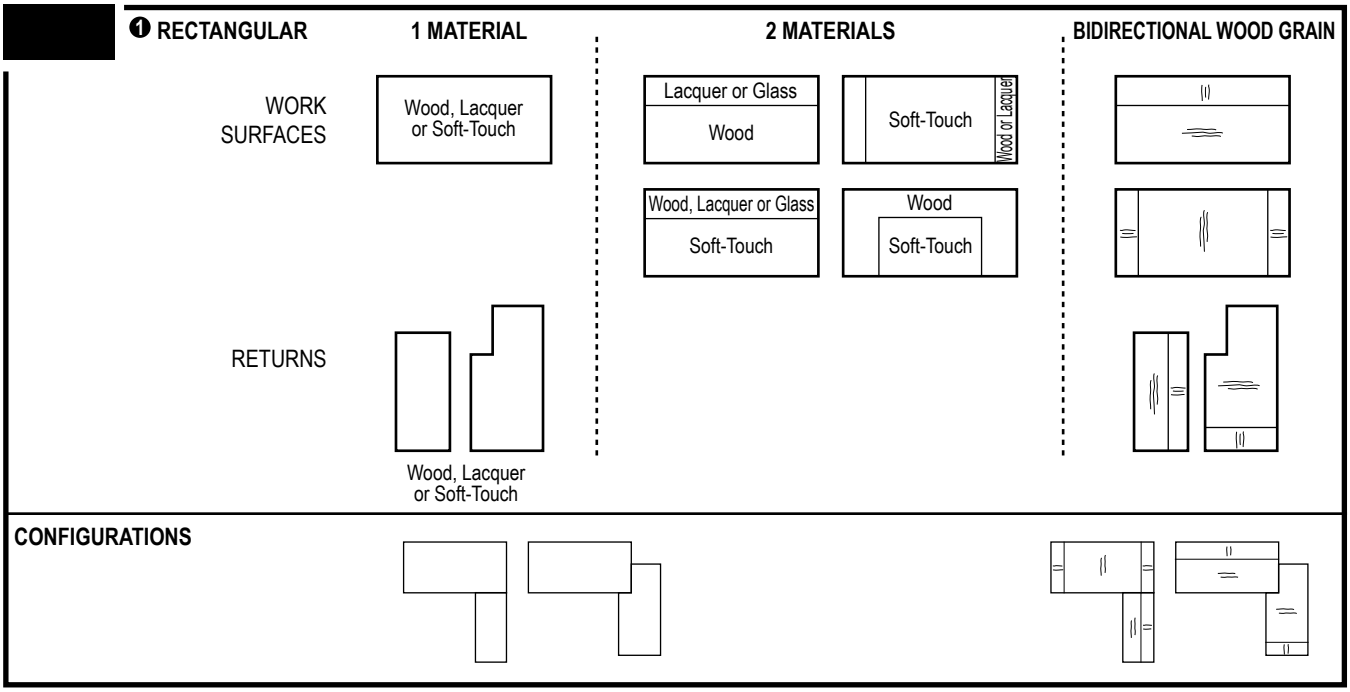
A round table is also available.

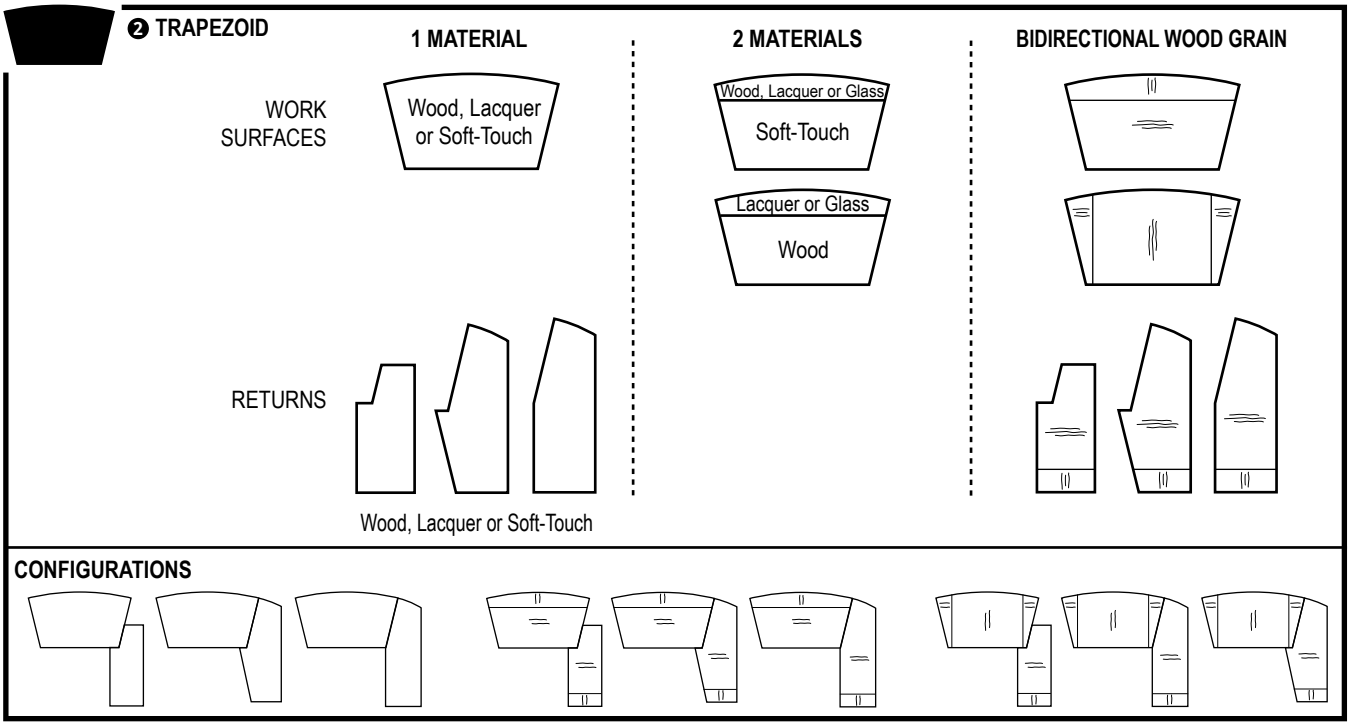
RETURNS
Each surface shape has its specific return in various dimensions. It is important to use the surface's specific return in the appropriate dimensions as specified in the price list.

MATERIAL COMBINATIONS
The Essentia collection concept is based on the combination of materials. The possible combinations are:

- Surfaces with 1 material
- Surfaces with 2 materials
- Surfaces with bidirectional wood grain

The combination choices as well as the wood grain orientation are predetermined for all surfaces, refer to the specifications in the price list.





SURFACES

EDGING

All surfaces are 1-1/8" thick. A straight or reverse edge is available on all work surfaces and returns except on glass surfaces where only the straight edge is available. Edging is found on all sides of the surface. The reverse edge can be installed beside another reverse edge. A “counter-profile” is not available.

Two side-by-side reverse edge surfaces.

❸ ERGONOMIC

	1 MATERIAL	2 MATERIALS	BIDIRECTIONAL WOOD GRAIN

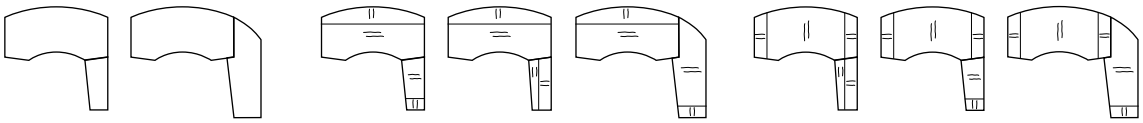
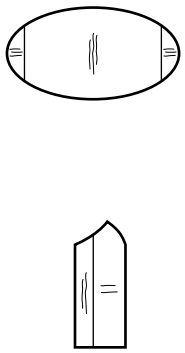
CONFIGURATIONS



❹ ELLIPTICAL

	1 MATERIAL	2 MATERIALS	BIDIRECTIONAL WOOD GRAIN
WORK SURFACES	Wood or Lacquer	Lacquer / Wood Wood or Lacquer / Soft-Touch	
RETURNS	Wood, Lacquer or Soft-Touch		

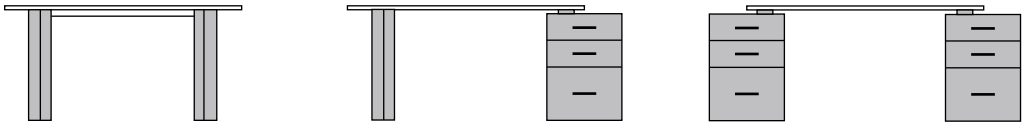


CONFIGURATIONS

GABLES & LEGS

BASES

Surfaces are supported by gables, legs or storage units with the help of surface support spacers. Many configurations are possible, such as:



4 legs (or 2 gables) | 2 legs (or 1 gable) & storage unit | 2 storage units

To ensure the best use of grommets and modesty panels, refer to the reference guide for positioning on the bases. This guide ensures that the ordered components are in the recommended dimensions (such as the modesty panel) for proper installation. Leg, gable and storage unit positions under the surface are predetermined.

The surfaces are not fitted with anchors and can be installed on the storage unit at any desired location regardless of the suggested plan. This can be advantageous for certain layouts where space is limited. IMPORTANT: In this case, the installation of a modesty panel as specified with the use of the reference guide (p.68 to 71) may get in the way of installed storage unit.

An installation guide is available and includes the positioning specifications for all components in the collection.

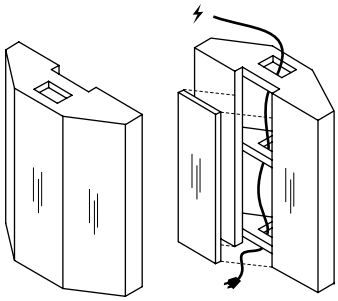
GABLE & LEG TYPES

Two models of wood gables are available for the main surfaces, one for the returns and three types of metal legs. Each leg and gable is attached by screws directly under the surface and come with adjustable levellers. The leg placement is predetermined to ensure compatibility with the other components such as modesty panels, grommets and multi-outlet modules. An installation guide is available.

WOOD GABLES

• ALTO GABLE

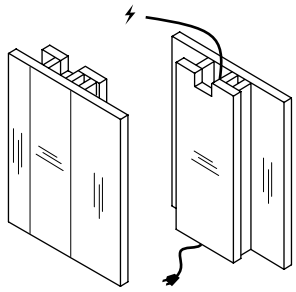
The Alto gable is made of wood veneer offered in a choice of the 17 colors from the Essentia collection. The wood grain direction is vertical and the gable is reversible. Available only in 24" wide, it can support the majority of main surfaces regardless of dimension but is not suited for returns or elliptical surfaces. The gable allows for cable routing and is equipped with a removable panel for easy access. A multi-outlet module (AC-EPUA) can be installed inside the gable, see Accessory price list.



Exterior view | Interior view

• DUO GABLE

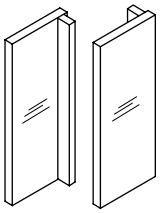
The Duo gable is made of wood veneer offered in a choice of the 17 colors from the Essentia collection with a refined bidirectional wood grain detail. It is available in widths of 30" (for surfaces 36" deep) and 24" (for surfaces 30" deep). This gable must be specified for the appropriate surface dimensions for maximum stability. The gable allows for cabling passage and is equipped with a removable panel for easy access. A multi-outlet module (AC-EPU) can be installed inside the gable, see Accessory price list.



Left Duo Gable | Right Duo Gable

• RETURN END GABLE

To support the end of a return without a pedestal, it is recommended to use a return end gable (p.67). The gable is made of wood veneer offered in a choice of the 17 colors from the Essentia collection. The wood grain direction is horizontal.



Left | Right

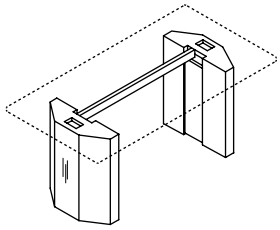
GABLES & LEGS

ALTO & DUO GABLE SETS

If a work surface is specified with gables at each end, it is important to choose the gable set by consulting pages 64 and 65 of the price list. Two gables will be delivered with a structural beam (to be installed between the gables) to ensure the stability of the gables and the attached surface. This beam is not necessary if one of the ends is supported by a pedestal. In this case, it is possible to purchase an individual gable, see pages 66 and 67.

Surface supported by 2 wood gables:
(Alto or Duo)

Specify the gable set (including beam), see pages 64 and 65.

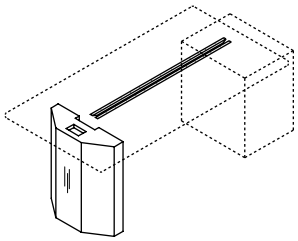


SINGLE GABLE AND PEDESTAL

Surface supported by a wood gable and a pedestal:

Specify the required individual base.

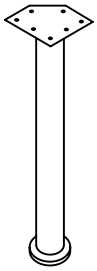
*A stiffener is recommended for all surfaces over 60", see pages 104 and 105.



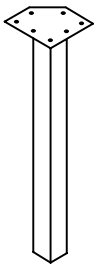
METAL LEG

A work surface can be specified with metal legs at each end or with another type of base at the opposite end. The round leg, the square leg, and the circular leg with “disc” base are available. As with the gables, the legs are equipped with adjustable levellers (5 in the case of the circular leg).

• ROUND LEG
The round leg has a diameter of 2½" and a leveller 4" in diameter and ¼" thick. It is available in silver. A top plate ensures stability and is attached directly under the surface with wood screws (included).



• SQUARE LEG
The square leg is 2½" x 2½" and is equipped with a black leveller 1½" in diameter. It is available in silver. A top plate ensures stability and is attached directly under the surface with wood screws (included).

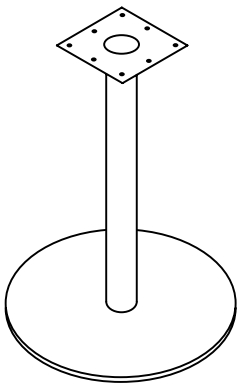


*The round and square legs are not recommended for surfaces over 78" and cannot be used with a full height modesty panel.

• CIRCULAR LEG WITH "DISC" BASE
The leg is composed of a 4" diameter tube with a 21" diameter circular “disc” base. It is available in 28" high (seated height) or 35" high (standing height). It is designed to support the elliptical work surface and is available in silver. A top plate ensures stability and is attached directly under the surface with wood screws (included).

A 4" diameter allows for the installation of the round multi-outlet module or round grommet (see page 23), as well as cable routing through the tube towards the base. Adjustable levellers (under the disc base) allow for cables to be routed through to the periphery of the base.

This leg is also included on the round tables on page 62. Dimensions vary depending on the diameter of the table.



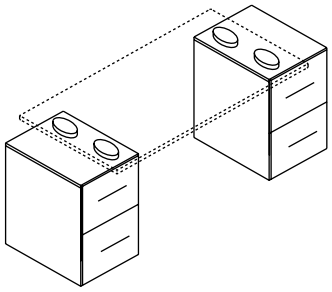
INSTALLATION ON A PEDESTAL OR CREDENZA

When a surface rests on a pedestal or credenza, a 1" space is created between the two by a surface support spacer allowing the surface to be attached to the storage unit. Two spacers are required to attach one end of a surface to the storage unit.

The spacer is made of MDF, painted silver. They are sold by the pair, see page 82.

Installation of the spacers is very simple. The steps are explained on page 33 and in the installation guide.

Important: If there is a modesty panel installed on the workstation, refer to the installation guide before attaching the spacers and the surface.



MODESTY PANEL

Different modesty panels can be added under the main work surface and returns. These panels are available in heights of 13½" (short) or 26½" (full height).

The panels are available in wood (horizontal or bidirectional wood grain) or in lacquer and are 11/16" thick.

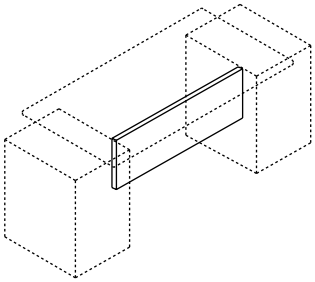
The 13½" high modesty panel for the main work surface is also available in glass with an anodized aluminum frame, 13/16" thick. The glass modesty panel is not available on returns.

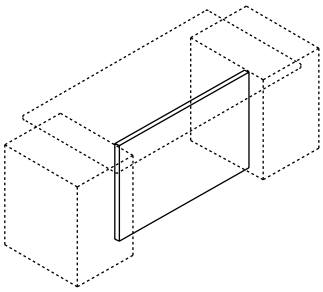
NOTE THAT ** The modesty length varies according to the surface shape as well as the type of base used under the surface.
In order to specify the correct panel, refer to the reference guide for modesty panels on pages 68 to 71.

The modesty panel is attached under the surface by screws (hardware included). The installation of a full height modesty panel requires the use of 2 extra "L" brackets at the base of the panel in order to attach it to the gables or pedestals. These brackets may be visible from the user side of the desk.

Depending on the configuration, a 1-1/8" space will be left under the surface and a small space near the gable, leg or pedestal, especially when using metal legs.

An installation guide is available for positioning the modesty panel in relation to the bases and built-in multi-outlet modules and grommets.

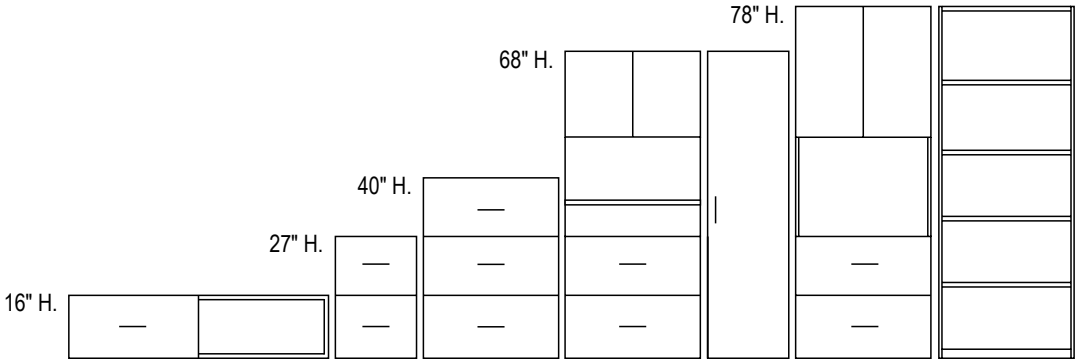




STORAGE - GENERAL INFORMATION

Many types of storage units are available in the Essentia collection:

- **Freestanding storage units:**
  - Low storage units (16" H.)
  - Pedestals & credenzas (27" H.)
  - Mid-height storage units & bookcases (40" H.)
  - Cabinets & bookcases (68" H. & 78" H.)
- **Freestanding & wall mounted hutches**



CONSTRUCTION

The storage units are made of a wood frame with 11/16" thick sides, bottom and back; the top and shelves are 1" thick. The frame's finish is available in the 17 finishes of the Essentia collection and the wood grain is horizontal on all sides. The interior frame of the drawers is made with natural finished maple.

The storage fronts are 5/8" thick but have a thin profile giving the illusion of a 3/8" thickness. All fronts for freestanding storage units are close to the ground (kick plate 1" H.) and the adjustable levellers are less visible. The glass door fronts (hutches) have an anodized aluminum frame. The visible contour on the door front is 1/8". The door with a glass front is 13/16" thick.

DRAWER SLIDES

Storage drawers are fitted with ball bearing slides and integrated dampers for gentle closing of the drawer. For pedestals with drawers 19" to 24" wide, the slides have an extension length of 21" and can support 100 lbs, in compliance with BIFMA Standards. For storage units with lateral drawers of 30" and 36" wide, the slides have an extension length of 16" and can support 130 lbs.

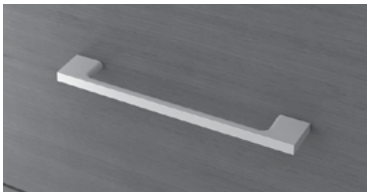
HINGES

The hinged doors on storage units and hutches are equipped with dampers that function the same as on the drawers. Depending on the height, two hinges or more are installed.

PULLS

All storage fronts, with the exception of the fronts of hutches, are equipped with pulls. The sliding door on freestanding storage units 60" and 72" in length exceptionally has two pulls. A choice of arched or straight pulls is available. The pulls are metal with a satin silver finish and are 192mm in length at the drill holes (7 ½").

Arched pull (PA)



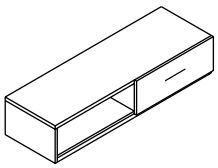
Straight pull (PT)

COUNTERWEIGHTS

A counterweight option is available on certain filing cabinets. This is a factory installed counterweight that protects the unit from tipping if overloaded. Refer to product description for availability.

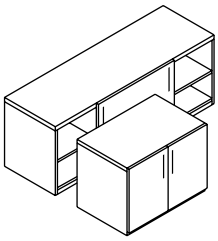
FREESTANDING STORAGE UNITS OVERVIEW

• 16" HIGH STORAGE UNITS



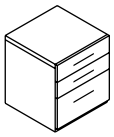
- Widths: 60" & 72"
- Depth: 24"
- Open or combined
- Fronts: drawer or sliding door
- Front finishes: wood, lacquer or Soft-Touch
- Cushion available for these units, see page 101.

• 27" HIGH STORAGE UNITS



- Widths: 30", 36", 60" & 72"
- Depth: 24"
- Open or combined
- Fronts: drawers, hinged doors or sliding door
- Front finishes: wood, lacquer or Soft-Touch
- Can be used as surface supports

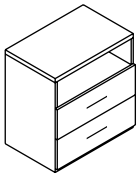
• 27" HIGH PEDESTALS



- Widths: 19" & 24"
- Depths: 24" & 30"
- Open or with box/file dawers
- Front finishes: wood, lacquer or Soft-Touch
- Can be used as surface supports*

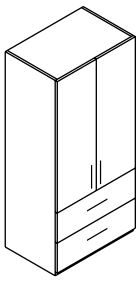
*Important: Rectangular surfaces 36” deep must be supported by a pedestal 30” deep. A pedestal 24” deep is not sufficient for this type of surface.

• 40" HIGH STORAGE UNITS



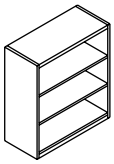
- Widths: 19", 30", 36" & 54"
- Depth: 24"
- Open or combined
- Fronts: drawers, hinged doors or sliding door
- Front finishes: wood, lacquer or Soft-Touch

• 68" & 78" HIGH CABINETS



- Widths: 19" & 36"
- Depth: 24"
- Combined, cabinet wth shelves and/or wardrobe
- Fronts: drawers, hinged doors or sliding door
- Front finishes: wood, lacquer or Soft-Touch
- The wardrobe has a coat hook and fixed upper shelf with 9" high storage space.

• 40", 68" & 78" HIGH BOOKCASES

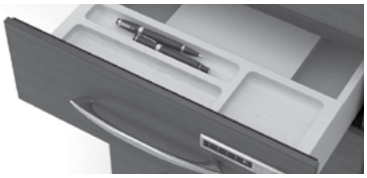


- Widths: 30" & 36"
- Depth: 15"

FREESTANDING STORAGE UNITS

PENCIL TRAY

A pencil tray is included in the top 6" drawer of storage units that have this type of drawer (one tray per storage unit). It is made of solid maple with a natural finish.



FRONTS

The storage fronts can be specified in wood, lacquer or Soft-Touch whereas the hutch fronts are also available in glass. A Soft-Touch front is always horizontally topstitched in beige at 3/8" from the top and bottom of the front.

Wood front

Lacquer front

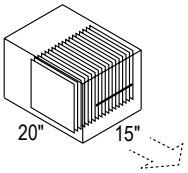
Soft-Touch front

FREESTANDING STORAGE UNITS - INTERIOR CAPACITY

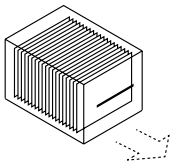
The file drawers allow for filing of letter or legal format documents. According to the width of the drawer, the following are examples of positioning for suspended files

19" WIDE STORAGE

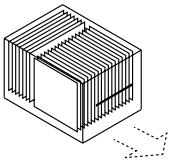
"Letter" size



"Legal" sizet

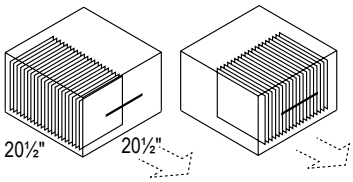


Combined "letter" & "legal" sizes

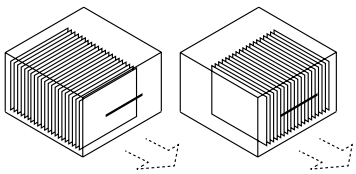


24" WIDE STORAGE

"Letter" size

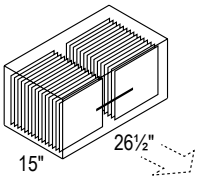


"Legal" size

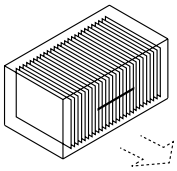


30" WIDE STORAGE

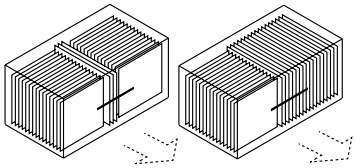
"Letter" size



"Legal" size

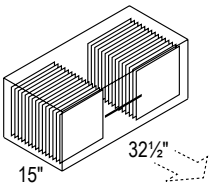


Combined "letter" & "legal" sizes

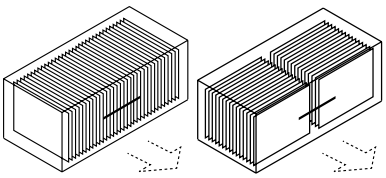


36" WIDE STORAGE

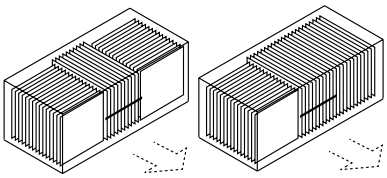
"Letter" size



"Legal" size



Combined "letter" & "legal" sizes



FREESTANDING STORAGE UNITS - NOKI ELECTRONIC LOCK

Storage in the Essentia collection is not automatically fitted with a lock. Artopex's Noki lock is offered as an option on the majority of storage units. There is no upcharge but it must be specified.

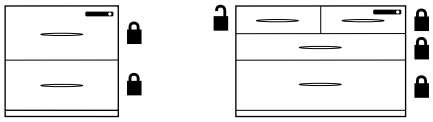
One lock can be installed per unit and depending of the storage configuration, it can lock either drawers or hinged doors. The lock option is not available on sliding or hutch doors.

Non-locking

Locking

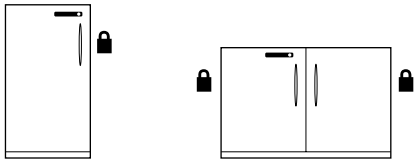
POSITION & LOCKING

• On a storage unit with many drawers, the lock is always installed on the right side of the top drawer allowing it to also lock the drawers below.



• On storage units with one or more hinged door (with no drawer), the position of the lock varies according to the unit but always locks both doors.

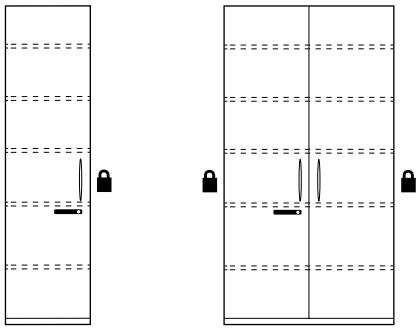
On storage units 27" and 40" high, the lock is installed above the pull. On a two-door unit, it is always on the left door.



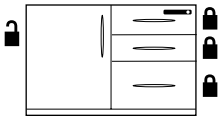
• On cabinets 68" and 78" high, the lock is installed under the pull. On a two-door unit, it is always on the left door.

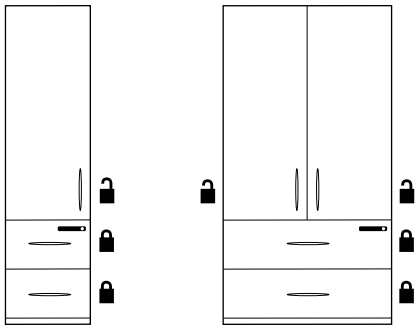
The lock is available as an option on cabinets* with interior shelves (half width + wardrobe or full-width shelves).

*The lock option is not available on the wardrobe cabinet (STW or SDW).



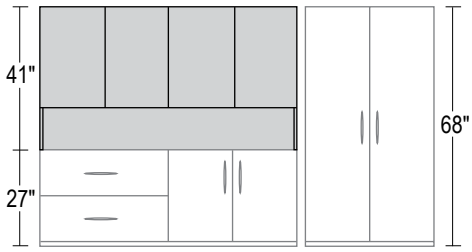
• On a combined storage unit with drawers and hinged doors, the lock is always installed on the right side of the top drawer. The lower drawers will lock but the door(s) will not.

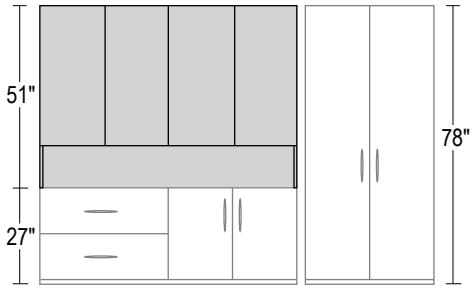




41" & 51" HIGH FREESTANDING HUTCHES

Freestanding hutches are installed on storage units 27" high preserving the total height indicated in the reference guide. If the storage unit has a top (p.83), the addition of a hutch will increase the total height by 2".





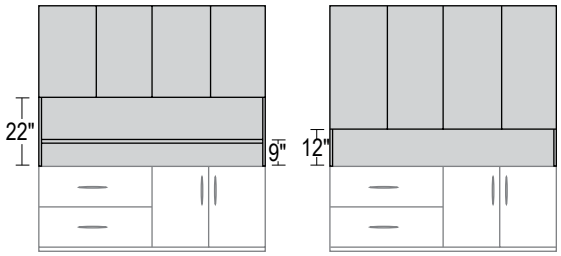
SPECIFICATIONS

- Widths: 15", 18", 30", 36", 60" & 72"
- Depth: 15" (16" including door), interior space: 14½"
- Open or combined
- Fronts: hinged doors (with damper) or sliding door
- Front finishes: wood, lacquer, Soft-Touch or glass (glass door fronts have an aluminum frame)
- Door heights (depending on hutch height): 20", 30" or 40"
- Pulls & lock not available

ACCESSORY BAR

A built-in accessory bar in equal length of the back is available as an option for hutches 30" to 72" in length. It is positioned at 9" above the bottom storage surface for all hutches where the shelf is no lower than 22".

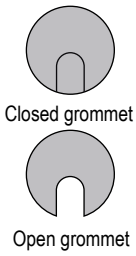
The anodized aluminum bar can support Artopex accessories and is available as an option with an upcharge.



Rail available Rail not available

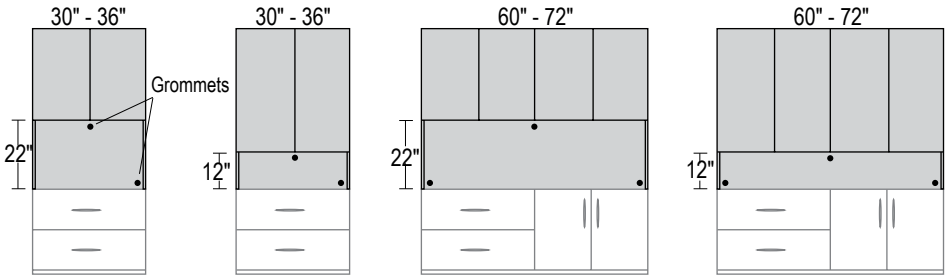
GROMMETS

Grommets are available as an option on freestanding hutches 30" to 72" long. They are round (1½"dia.) with a dark brown finish and a cap that can be closed when not in use. According to the size of the hutch, the number and placement of the grommets will vary:



Closed grommet

Open grommet



Center (top) & right (bottom) Center (top) & right (bottom) Center (top), left & right (bottom) Center (top), left & right (bottom)

GLASS DOORS

Glass fronts have an anodized aluminum frame. The visible contour on the door front is 1/8". The door with a glass front has a 13/16" total thickness.

20" HIGH WALL-MOUNTED HUTCHES

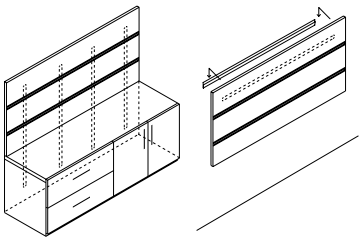
A wall-mounted hutch is attached to the wall with hardware allowing for some adjustment in case the wall is not perfectly straight.

SPECIFICATIONS

- Width: 30", 36", 60" & 72"
- Depth: 15" (16" including door), interior space: 14½"
- Open or combined
- Fronts: hinged doors (with damper) or sliding door
- Front finishes: wood, lacquer, Soft-Touch or glass (glass door fronts have an aluminum frame)
- Door height: 20"
- Pulls & lock not available

WORK WALL

The work wall is a 1" thick MDF panel with wood veneer. It can be added to a work station for hanging shelves and Artopex accessories (plastic or metal).

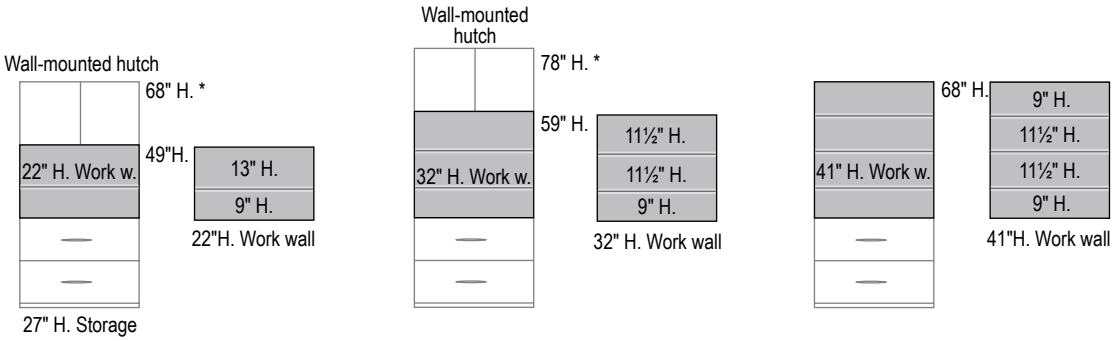


Work wall can be installed:
- On a 27" H. credenza (**CR** option)

or
- Wall mounted (**WM** option)

When attached to a credenza, the work wall is held in place by stiffeners installed at the back of the credenza. Note that it cannot be installed under a freestanding hutch.

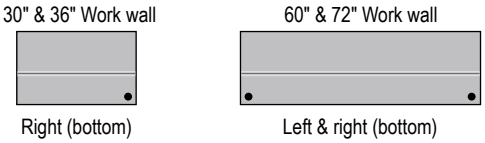
The work wall is available in 3 heights (22", 32" and 41") and 4 widths (30", 36", 60" and 72"). According to its height, one, two or three anodized aluminum accessory bars are built-in the full length of the work wall. The top and lower edges of the work wall have an edging the same color as the wood specified and the sides are covered with an aluminum trim hiding the ends of the accessory bar. The work wall is available in the collection's 17 wood colors.



* Total height: 27" H. storage + work wall + wall-mounted hutch

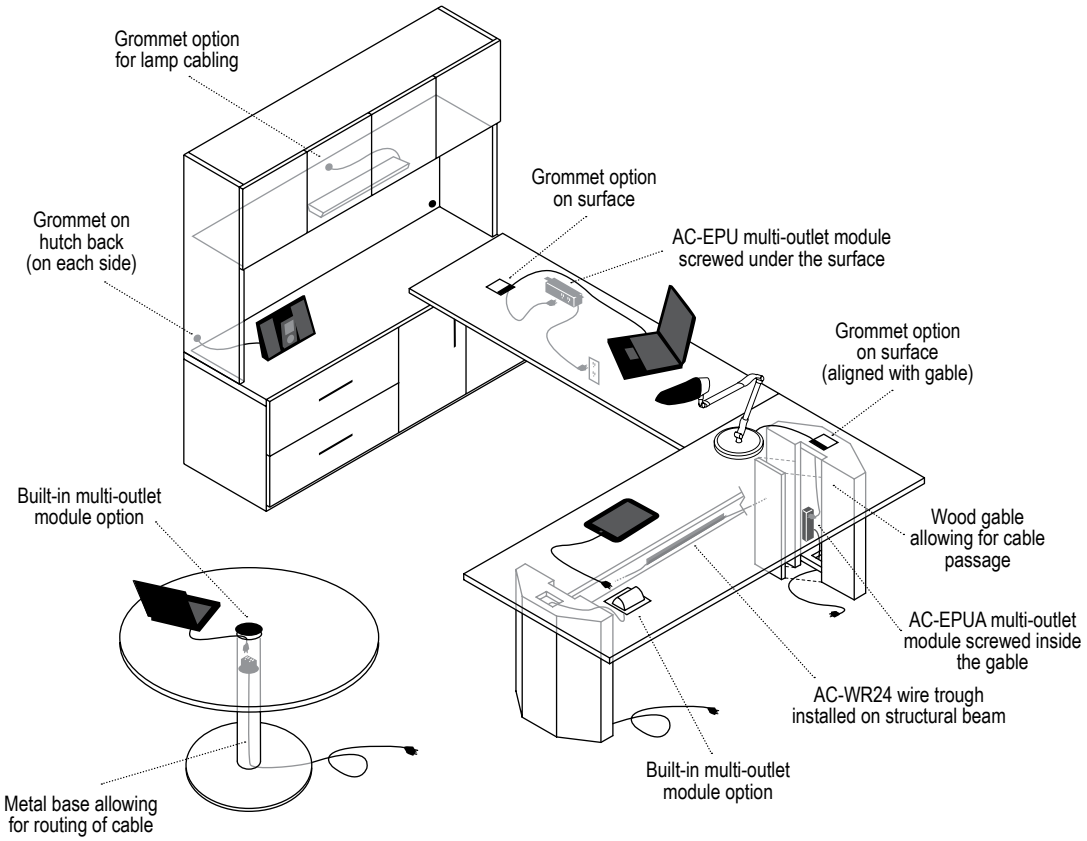
GROMMETS

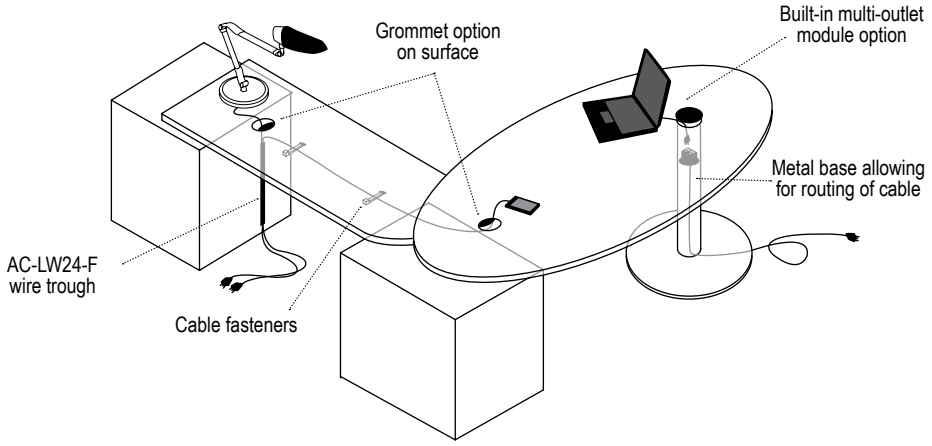
Grommets, identical to those for hutches, are available as an option on credenza mounted work walls. According to the width of the panel, one or two grommets are factory installed.



ELECTRIFICATION OF A WORK STATION

Many solutions are available for the electricity and cable management needs of an Essentia work station. The illustrations below present a summary of these solutions.





Wire troughs able to hold many wires (with self-adhesive back) are available as well as cable fasteners attached with screws. These allow for routing of wires under surfaces.

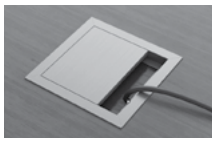
BUILT-IN GROMMETS & MULTI-OUTLET MODULES

The Essentia collection offers many solutions for electricity and cable management. The grommets and/or built-in multi-outlet modules are available for the majority of surfaces, refer to the Accessory price list.

The grommets and multi-outlet modules shown below are factory installed and cannot be ordered separately.
A movable multi-outlet module that is not built-in can be ordered separately and installed on-site, see following page.

GROMMETS ON A WORK SURFACE

The grommet can be specified for right or left installation. On rectangular, trapezoid and ergonomic surfaces, the grommet is square (4" x 4") with an aluminum satin finish and is positioned in relation to the wood gable. For elliptical surfaces, the grommet is round (2½"dia.) with a chrome satin finish.

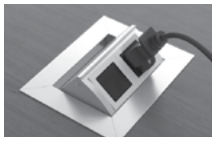


Square grommet
- Rectangular surface
- Trapezoid surface
- Ergonomic surface (codes GL1 & GR1)

Round grommet
- Elliptical surface *(codes GL2 & GR2)*

MULTI-OUTLET MODULE ON A WORK SURFACE

The built-in multi-outlet module can be specified for right or left installation. On rectangular, trapezoid and ergonomic surfaces, the multi-outlet module is square (4" x 5") with an anodized aluminum finish and access to the electricity and/or communication outlets is oriented towards the user. For elliptical and round surfaces, the module is round (4½" dia.) with a black cap. The addition of a modesty panel is recommended to conceal the module's wiring and electrical box mounted under the surface.



Square multi-outlet module
- Rectangular surface
- Trapezoid surface
- Ergonomic surface *(codes DL1 & DR1)*

- Dimensions: 4" x 5"
- One electrical outlet and one punch out for communication outlet
- Touch retractable
- Electrical cord: 72"
- UL certified
- Anodized aluminum

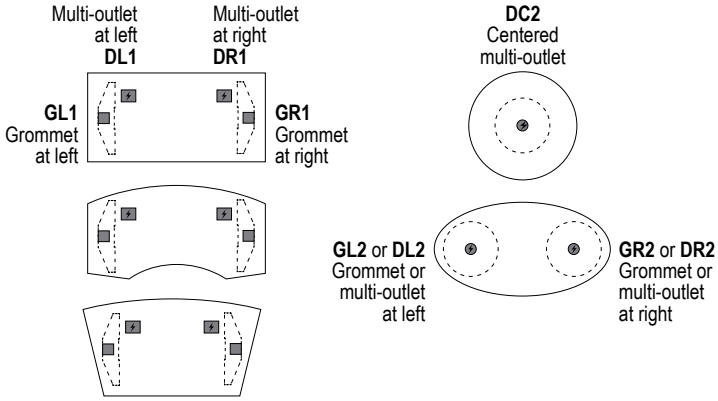
Round multi-outlet module
- Elliptical surface
- Round table *(codes DL2 ,DR2 & DC2)*

- Dimensions: 4¼" diameter under the surface (3½" dia. opening)
- Two electrical outlets and two communication outlets (category 5e, wires not included)
- Electrical cord: 72"
- UL certified
- Black

POSITION ON THE WORK SURFACE

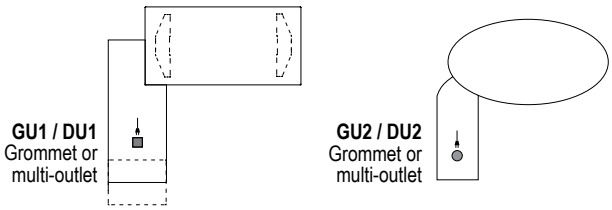
The exact position of the grommet or built-in multi-outlet module varies according to the shape and dimensions of the work surface. The opposite examples show the position of the grommets and multi-outlet modules in relation to the gables/legs and the end of the various surface shapes.

Only the round multi-outlet module is available on the round table and it is always centered on the table. The wiring is routed through the tube of the circular leg.



POSITION ON THE RETURN

Grommets and multi-outlet modules are also available on returns. They are positioned at the end of the return, thus the end of the work station. The multi-outlet module is installed facing the work surface as demonstrated in the opposite illustration.

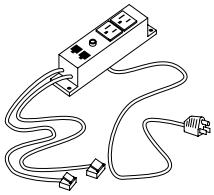


MOVABLE MULTI-OUTLET MODULE

AC-EPU MULTI-OUTLET MODULE

It is possible to order a module that can be installed directly under the surface or inside a Duo gable.

- Two electrical outlets, a 13 amp circuit breaker, a surge suppressor, a telephone jack (RJ-11) and a communication outlet (RJ45 category 5)
- Electrical cord: 108"
- Media cord: 162"
- CSA certified
- Black



For installation inside the Alto gable, it is important to specify the AC-EPUA that includes a special metal bracket required for installation.

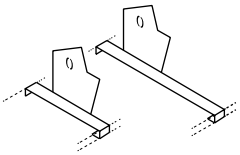
ACCESSORIES

HANGING SHELF

A shelf can be attached to the accessory bar on the back of hutches and on work walls. Depending on its length, the shelf has two to three supports (anodized aluminum). The shelf is 1" thick and available from 24" to 72" long and 6" or 10" deep. It always has a straight edge, and is available in wood (17 colors) or lacquer. In wood, the edge matches the surface of the shelf.

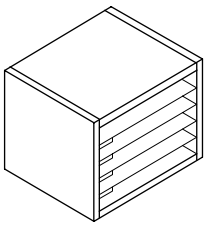
BOOKENDS

Bookends are available. Made of painted metal (Polar White 3002 or Silver 3090 finish), they can be attached to 6" and 10" deep shelves (as explained above). Sold in pairs.



PIGEON-HOLE UNITS

The pigeon-hole units are made of a wood frame 11/16" thick (17 colors) with metal shelf inserts (Polar White 3002 or Silver 3090 finish). The shelves have an integrated tab 2½" long for attaching labels (not included). Choice of letter or legal size (see page 103). The vertical space between the shelves is 2-3/8".



OTHER ACCESSORIES

Artopex has a variety of ergonomic accessories such as keyboard trays, lamps, letter trays, etc. Unless otherwise indicated, all Artopex accessories are compatible with the Essentia collection. Refer to the Accessory Price list.

COLORS & FINISHES

The following are the codes to be used in specifying color choices:
NOTE: Certain restrictions may apply for some components.
Always refer to the price list for restrictions.

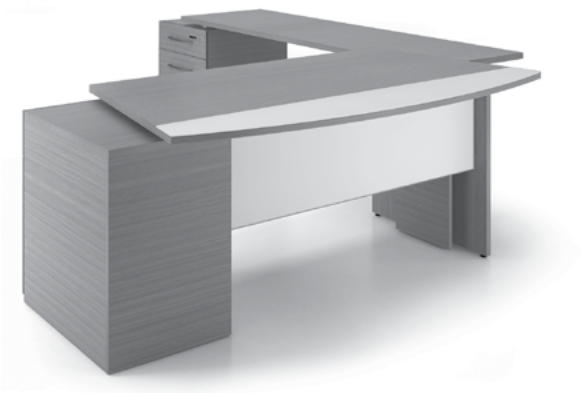
SPECIFICATION GUIDE



GUIDE FOR SPECIFYING AN "L" SHAPED WORKSTATION 27

- With RECTANGULAR work surface
- With TRAPEZOID work surface
- With ERGONOMIC work surface
- With ELLIPTICAL work surface

GUIDE FOR SPECIFYING A DESK (NO RETURN) 32

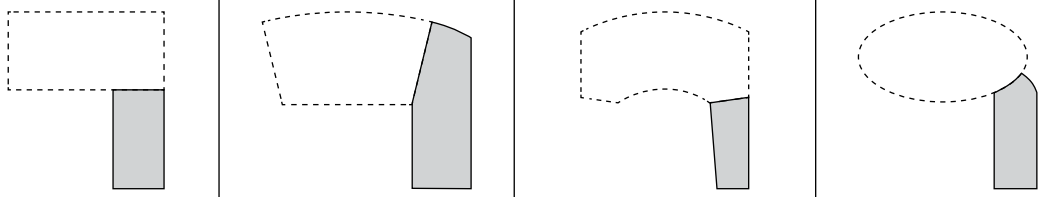
OTHER CONFIGURATIONS 32

GUIDE FOR SPECIFYING AN "L" SHAPED WORKSTATION (SURFACE AND RETURN)

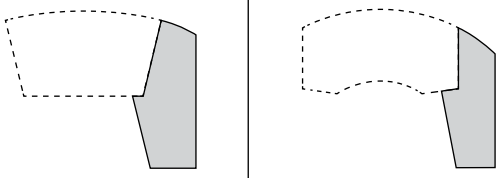
Step 1
Select the shape of **the work surface:**

Rectangular | **Trapezoid** | **Ergonomic** | **Elliptical**

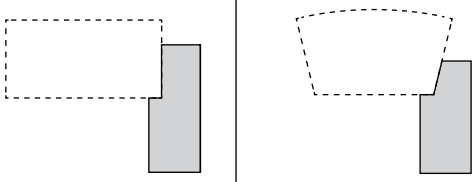
Step 2
Select the shape of **the return:**



Interior return | Exterior return | Interior return | Interior return



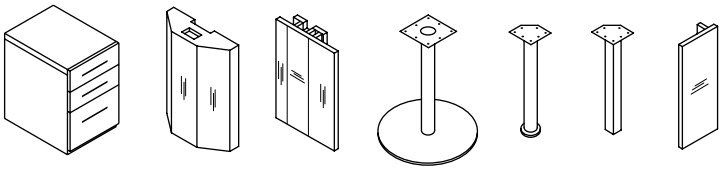
Nested exterior return (extended) | Nested exterior return (extended)



Nested exterior return | Nested exterior return

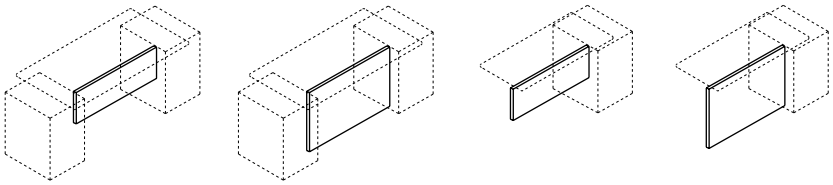
How to specify: Refer to **page 28** | How to specify: Refer to **page 29** | How to specify: Refer to **page 30** | How to specify: Refer to **page 31**

Step 3
Select **base**:



Certain restrictions apply in the choice of bases depending on the choice of surface and configuration of the workstation.

Step 4
Optional **modesty panel:**



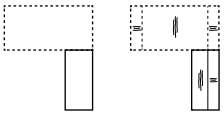
SPECIFICATION - "RECTANGULAR "

The guide below shows the procedure to follow for specifying an "L" shaped workstation with a rectangular main surface, a return, bases and modesty panel (if desired).

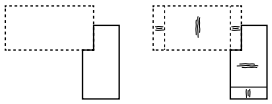
Step 1
Select the **work surface:**
(pages 37 - 42)

Step 2
Select the **return:**
(pages 38 - 40)

INTERIOR RETURN

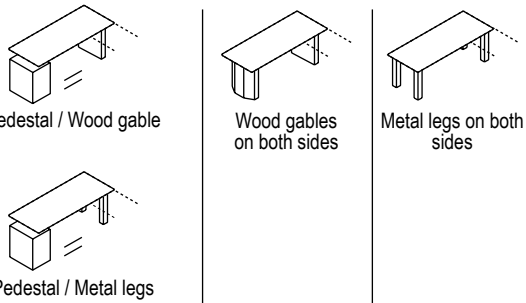


EXTERIOR RETURN

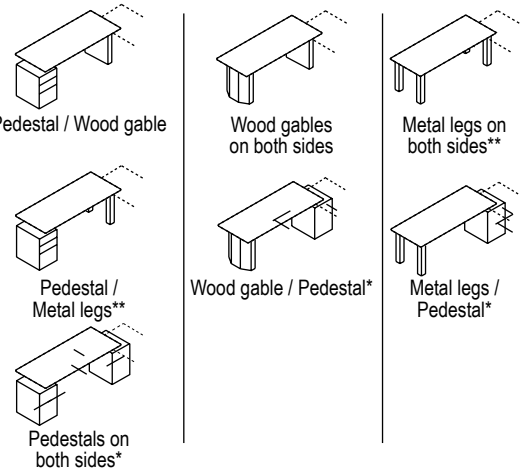


Step 3A
Select **base for work surface:**
(pages 64 - 67)

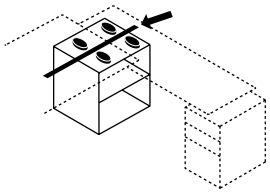
Bases for rectangular **surface** with **interior return**



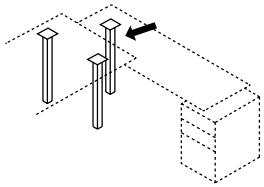
Bases for rectangular **surface** with **exterior return**



***Important:** If the surface and **exterior return** are supported by the same pedestal, order the AC-RSTi52 stiffener to join the 2 surfaces together.

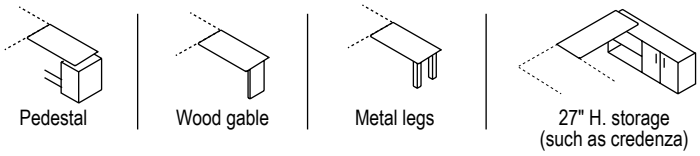


****Important:** If specifying 2 metal legs under the main surface, an additional metal leg must be ordered to support the **exterior return.**



Step 3B
Select **base for return:**
(page 66 - 67)

Bases for **interior or exterior returns**



Step 4
Optional **modesty panel:**
(pages 72 - 75)

Refer to the modesty panel reference guide (p.68) to determine the correct size to order.

SPECIFICATION - "TRAPEZOID"

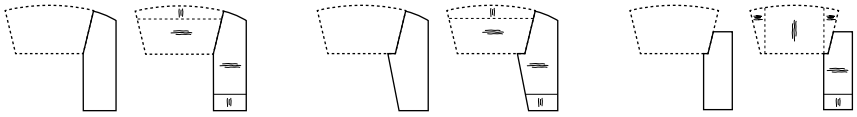
The guide below shows the procedure to follow for specifying an "L" shaped workstation with a trapezoid main surface, a return, bases and modesty panel (if desired).

Step 1
Select the **work surface:**
(pages 43- 48)

1 material | Bidirectional wood grain | 2 materials

Step 2
Select the **return:**
(pages 44 - 46)

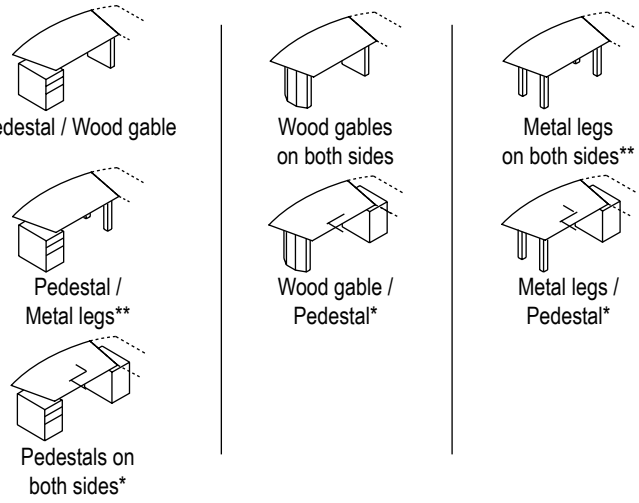
EXTERIOR RETURNS



1 material | Bidirectional wood grain | 1 material | Bidirectional wood grain | 1 material | Bidirectional wood grain

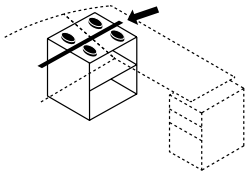
Step 3A
Select **base for work surface:**
(pages 64 - 67)

Bases for trapezoid **surface** with **exterior return**
(*Information below applies for all 3 types of trapezoid surface returns)

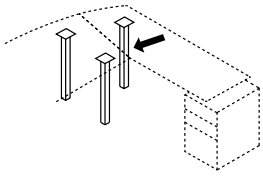


Pedestal / Wood gable | Wood gables on both sides | Metal legs on both sides**
Pedestal / Metal legs** | Wood gable / Pedestal* | Metal legs / Pedestal*
Pedestals on both sides*

***Important:** If the surface and exterior return are supported by the same pedestal, order the AC-RSTi52 stiffener to join the 2 surfaces together.

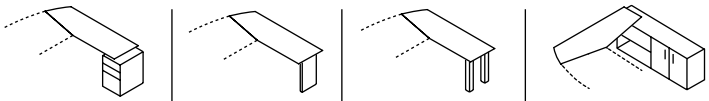


****Important:** If specifying 2 metal legs under the main surface, an additional metal leg must be ordered to support the **exterior return.**



Step 3B
Select **base for return:**
(pages 66 - 67)

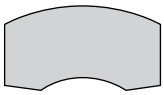
Bases **for exterior returns**



Pedestal | Wood gable | Metal legs | 27" H. storage (such as credenza)

Step 4
Optional **modesty panel:**
(pages 72 - 75)

Refer to the modesty panel reference guide (p.69) to determine the correct size to order.



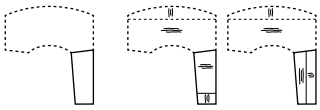
SPECIFICATION - "ERGONOMIC"

The guide below shows the procedure to follow for specifying an "L" shaped workstation with an ergonomic main surface, a return, bases and modesty panel (if desired).

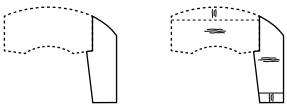
Step 1
Select the **work surface**:
(pages 49 - 55)

Step 2
Select the **return:**
(pages 50 - 53)

INTERIOR RETURNS

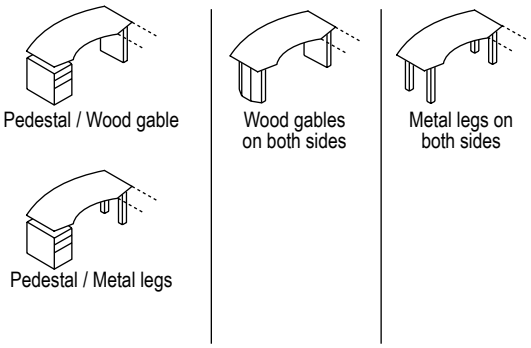


EXTERIOR RETURNS

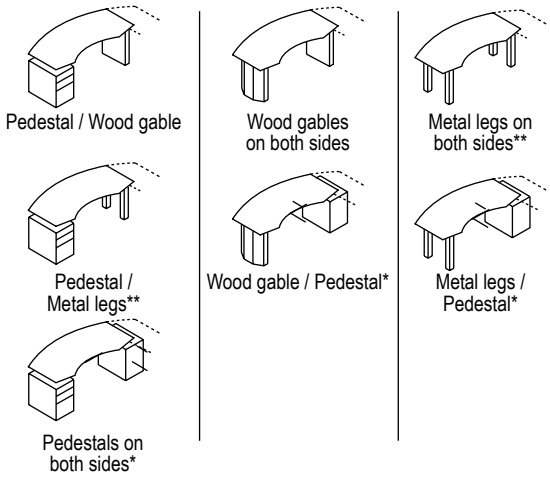


Step 3A
Select **base for work surface:**
(pages 64 - 67)

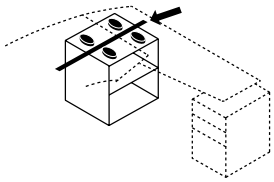
Bases for ergonomic **surface** with **interior return**



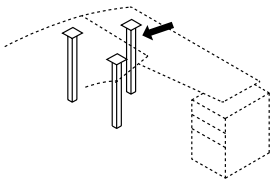
Bases for ergonomic **surface** with **exterior return**



***Important:** If the surface and exterior return are supported by the same pedestal, order the AC-RSTi52 stiffener to join the 2 surfaces together.

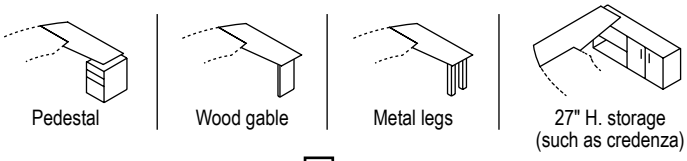


****Important:** If specifying 2 metal legs under the main surface, an additional metal leg must be ordered to support the **exterior return.**



Step 3B
Select **base for return:**
(pages 66 - 67)

BASES FOR INTERIOR OR EXTERIOR RETURNS



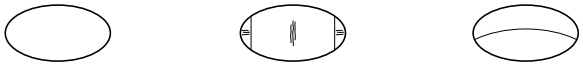
Step 4
Optional **modesty panel:**
(pages 72 - 75)

Refer to the modesty panel reference guide (p.70) to determine the correct size to order.

SPECIFICATION - "ELLIPTICAL"

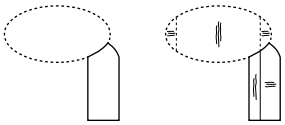
The guide below shows the procedure to follow for specifying an "L" shaped workstation with an elliptical main surface, a return, bases and modesty panel (if desired).

Step 1
Select the **work surface:**
(pages 56 - 61)



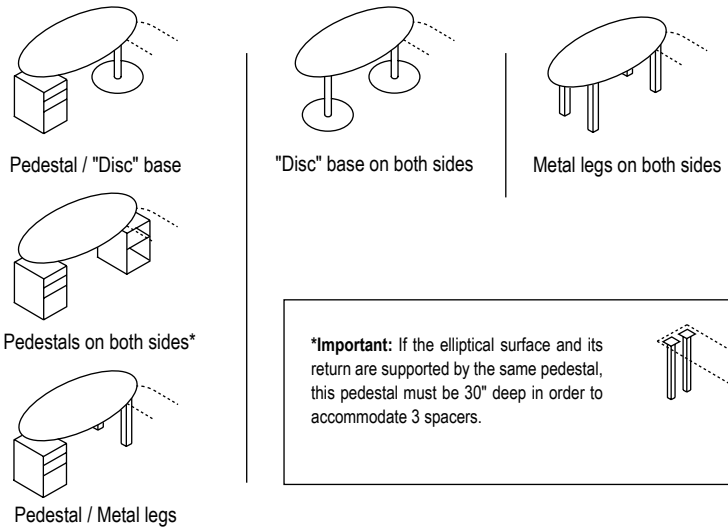
Step 2
Select the **return:**
(pages 57 - 59)

INTERIOR RETURNS

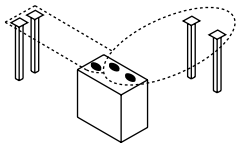


Step 3A
Select **base for work surface:**
(page 71)

BASES FOR ELLIPTICAL SURFACE WITH INTERIOR RETURN

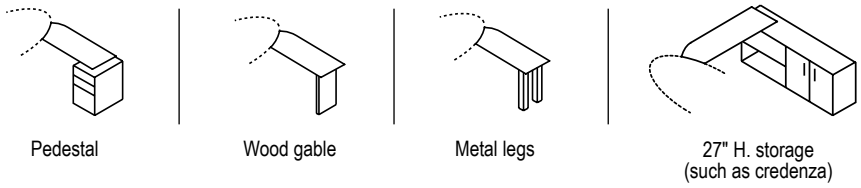


***Important:** If the elliptical surface and its return are supported by the same pedestal, this pedestal must be 30" deep in order to accommodate 3 spacers.



Step 3A
Select **base for work surface:**
(pages 66 - 67)

BASES FOR INTERIOR RETURN



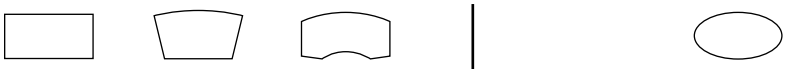
Step 4
Optional **modesty panel:**
(pages 72 - 75)

Refer to the modesty panel reference guide (p.71)
to determine the correct size to order.

GUIDE FOR SPECIFYING A DESK (NO RETURN)

The guide below shows the procedure to follow for specifying a desk with a rectangular, trapezoid, ergonomic or elliptical main surface, bases and modesty panel (if desired).

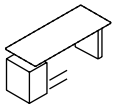
Step 1
Select the **work surface:**
(pages 37 - 61)



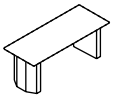
Rectangular | Trapezoid | Ergonomic | Elliptical

Step 2
Select **base for work surface:**
(pages 64 - 67)

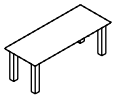
BASES FOR RECTANGULAR, TRAPEZOID OR ERGONOMIC SURFACES (RECTANGULAR SHOWN)



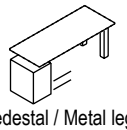
Pedestal / Wood gable



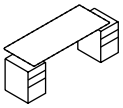
Wood gables on both sides



Wood gables on both sides

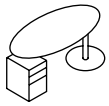


Pedestal / Metal legs



Pedestals on both sides

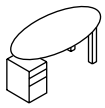
BASES FOR ELLIPTICAL SURFACES



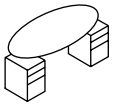
Pedestal / "Disc" base

"Disc" base on both sides

Metal legs on both sides



Pedestal / Metal legs



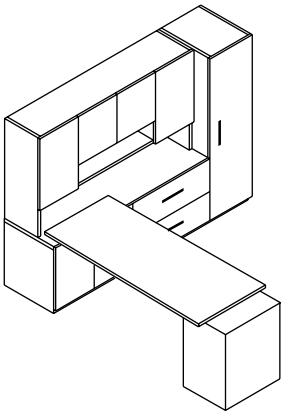
Pedestals on both sides

Step 3
Optional **modesty panel:**
(pages 72 - 75)

Refer to the modesty panel reference guide (p.68-71) to determine the correct size to order.

OTHER TYPES OF CONFIGURATIONS

Even though the previous pages present various configuration examples, many others are possible. The Essentia collection components were designed to allow the client to specify the layout of their choice. Typicals are presented on pages 35 and 36.



BASE INSTALLATION

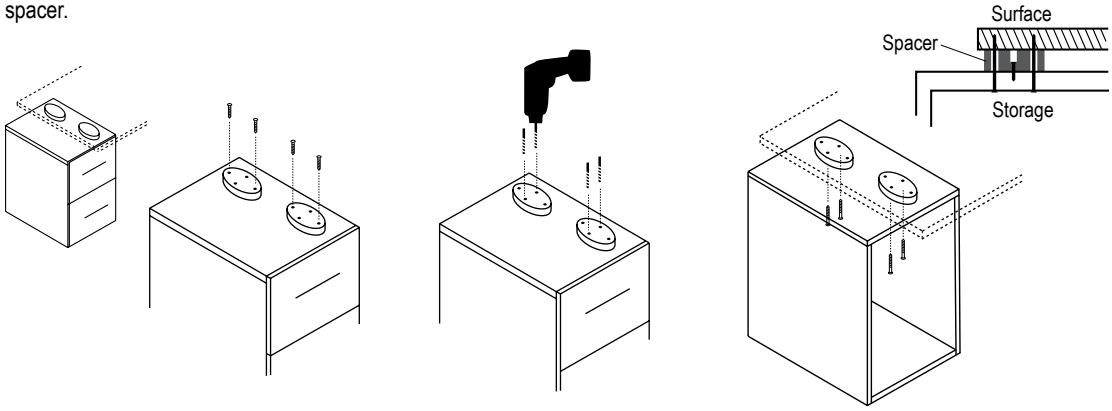
The following pages present an overview of the installation procedure to aid in visualizing the product once assembled as well as structural components that are not visible. For detailed explanations, refer to the Essentia installation guide available at www.artopex.com.

SURFACE SUPPORT SPACERS

Once their position is determined, the spacers are first attached to the storage unit by screws (included) from above using 2 of the 4 predrilled holes on the spacer.

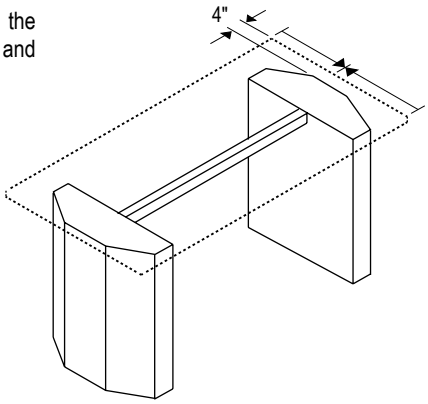
Two holes per spacer are then drilled on the top of the storage unit using the installed spacer's two unused predrilled holes.

With the surface in place, screws (3" max.) are then inserted from inside the pedestal by removing the drawers, if applicable.



WOOD GABLES

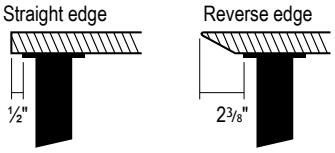
Under rectangular, trapezoid and ergonomic surfaces: regardless of the shape of the surface, the gable is centered widthwise under the surface and positioned at approximately 4" from the edge of the surface.

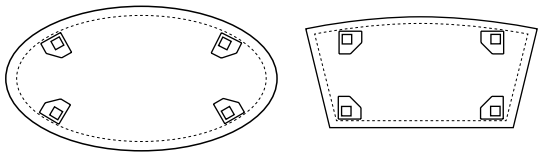


METAL LEGS

Under rectangular, trapezoid, ergonomic and elliptical surfaces:
The position varies depending on the edge chosen.

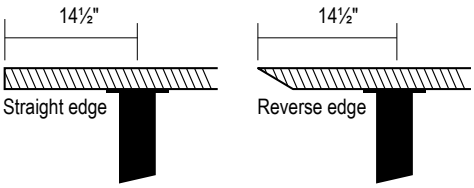
- Straight edge: The legs are ½" from the edge of the surface.
- Reverse edge: The legs are 2-3/8" from the edge of the surface.

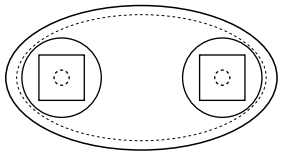




LEG WITH "DISC" BASE

The disc base is centered widthwise under the elliptical surface and the center of the base is 14½" from the edge of the surface.



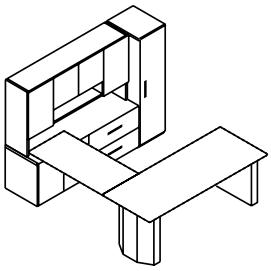


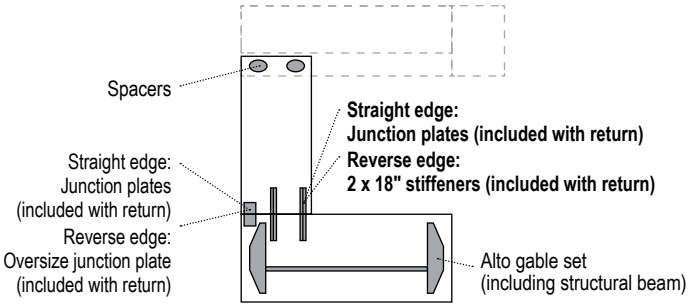
STRUCTURAL ELEMENTS

According to the workstation configuration, certain structural elements as well as hardware have a predetermined position to ensure stability. Some of these elements are included with the furniture order. For more information, refer to the product description.

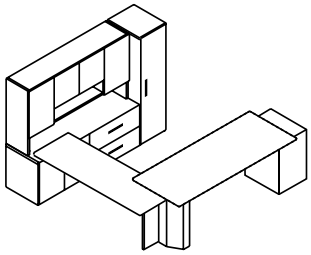
POSITION OF STRUCTURAL ELEMENTS AND HARDWARE

• Configuration: Surface with interior return

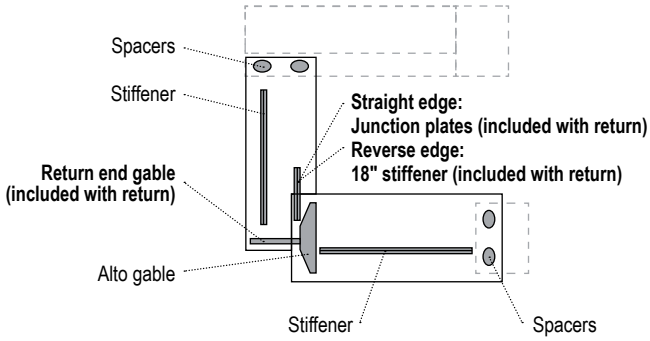


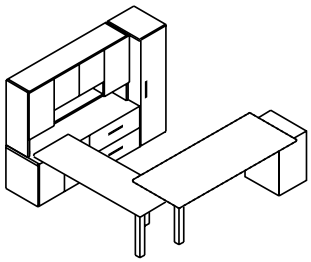


• Configuration: Surface with nested exterior return (short) (including structural beam)

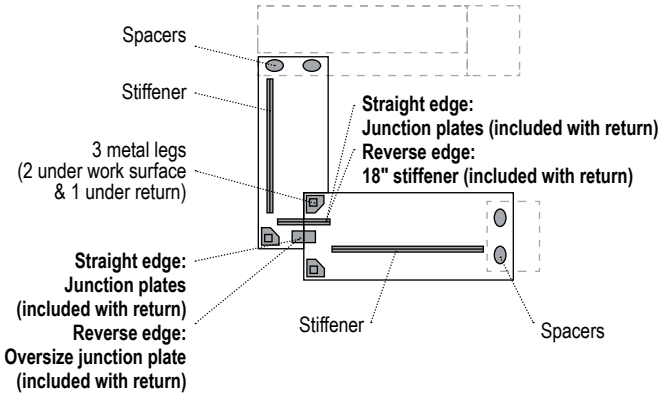


WOOD GABLES

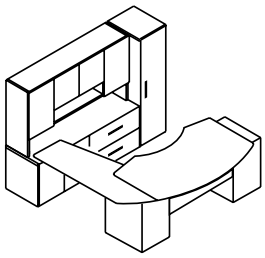


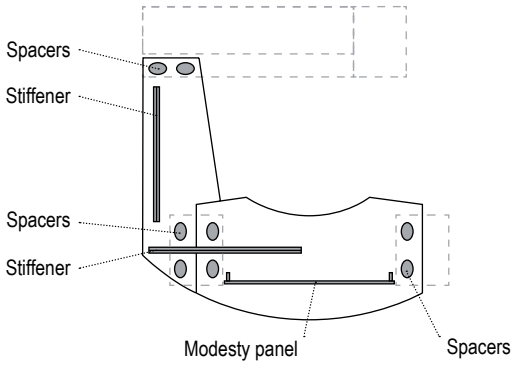


METAL LEGS

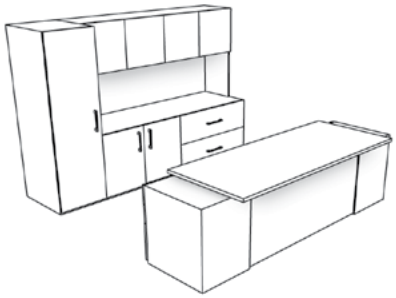


• Configuration: Surface with nested exterior return (extended)





RECTANGULAR SURFACE TYPICAL LAYOUTS



ESSENTIA - 001

gables and legs

price list

ALTO wood gables (sold in pairs)

Description

Alto wood gable set (gable is composed of a closed wood panel assembly with vertical woodgrain).
The set is comprised of two Alto gables and a structural beam of appropriate length to ensure the stability of the gable set assembly.
Gables allow for cable routing inside the structure (from top to floor) through the use of a removable section. The addition of the AC-EPUA multi-outlet module is possible (see Accessory price list). Use wire trough AC-WR24 to run cables along the structural beam.
It is possible to order this gable individually (see p.66-67) if the use of a pedestal as support is planned for the opposite end of the surface.
The modesty panel is sold separately, see p.15 for details.
Consult the Modesty Panels reference guide on pages 68 to 71 to determine the required modesty panel length.

gables and legs

price list

DUO wood gables (sold in pairs)

Description

Duo wood gable set (gable is composed of a narrow interior wood panel and a wider exterior wood panel).
The set is comprised of two Duo gables and a structural beam of appropriate length to ensure the stability of the gable set assembly.
Sets D1, D2 & D3 are comprised of 30" wide gables, sets D4 to D11 are comprised of 24" wide gables.
Gables have a bidirectional wood grain finish on the exterior panel (see drawing).
Gables allow for cable routing between the gable panels (from top to floor) through the use of a removable section. The addition of the AC-EPU multi-outlet module is possible (see Accessory price list). Use wire trough AC-WR24 to run cabling on the structural beam.
It is possible to order this gable individually (see page 66-67) if the use of a pedestal as support is planned for the opposite end of the surface.
The modesty panel is sold separately, see p.15 for details.
Consult the Modesty Panels reference guide on pages 68 to 71 to determine the required modesty panel length.

modesty panels

for work surfaces of 13½'' H.

price list

Description

Modesty panels for work surfaces. Available with wood finish (horizontal woodgrain), lacquer finish, glass (13½" H.) or bidirectional wood grain finish.

The panel is installed on to the work surface with metal brackets (included).

Consult the Modesty Panels reference guide on pages 68 to 71 to determine the required modesty panel length*.

* The required length varies according to the shape of the surface and to the type of support (gable, storage or legs) specified.

Modesty panels for returns are shown on page 74.

modesty panels

for work surfaces of 26½''H.

price list

Description

Modesty panels for work surfaces. Available with wood finish (horizontal woodgrain), lacquer finish, glass (13½" H.) or bidirectional wood grain finish.

The panel is installed to the work surface with metal brackets (included).

The 26½"H. panel must also be attached, near ground level, to the base of a wood gable or a pedestal.

The 26½"H. panel cannot be specified for a surface supported by metal legs.

Consult the Modesty Panels reference guide on pages 68 to 71 to determine the required modesty panel length*.

* The required length varies according to the shape of the surface and to the type of support (gable, storage or legs) specified.

Modesty panels for returns are shown on page 75.

Prices and Payment

All prices shown in this price list are suggested retail prices and are subject to change without notice. Prices do not include installation and shipping costs. Taxes are extra. These prices are guaranteed for 30 days from the date of quotation and are firm and final after acceptance of the order. Orders are invoiced at the time of shipment. Terms of payment are net 30 days from date of invoice. Any products sold by Artopex shall remain its property until fully paid in cash. In the event that the purchaser defaults in the payment of any sum due to Artopex, or in the event the purchaser's financial condition becomes unsatisfactory to Artopex, Artopex reserves the right upon notice to the purchaser, to differ or discontinue shipment of any goods or, to refuse any order until time as the default is corrected or the purchaser provides assurance of payment to Artopex.

Orders

Artopex requires that all orders be submitted in writing to avoid errors and/or duplication. The purchaser is responsible to submit complete orders. Incomplete or incorrect orders (finish colors missing…) will be processed upon reception of the complete information and normal production lead-time will be applied from the date that the complete information is received.

Acknowledgments

Orders will be acknowledged with Artopex acknowledgement forms governing the transaction. The details appearing on this acknowledgment will describe the items to be shipped to the purchaser and the ready to ship date (not the actual shipping date). It is the purchaser's responsibility to verify that the acknowledgment information is correct. If not, the purchaser must notify Artopex within 48 hours in writing. Failure to provide corrections within 48 hours could be subject to extra charges (see Changes and Cancellation).

Changes and Cancellations

Order cancellations or changes are subject to acceptance by Artopex. Special order items and fabric-covered items (standard or C.O.M. fabrics) already in production are not subject to change or cancellation under any circumstances.

A) Changes: Standard product already in production will be subject to a 25% modification surcharge. Changes to the shipping date must be taken into consideration.

B) Cancellations: Artopex reserves the right to invoice the purchaser for any items already in production at the cancellation date and for lost profit on the remaining items.

Storage

Artopex reserves the right to invoice the purchaser for storage charges in specific cases.

Shipping

A) Prices are F.O.B. factory, collect.

B) Artopex will choose the carrier unless otherwise specified by the purchaser. Goods will be handed over to the common carrier in good condition; Artopex liability ceases at this point. Shipping will be done at the purchaser's unloading dock. The purchaser should have an unloading dock able to accommodate 53' trailers and must supply the unloading personnel.

C) Claims: Artopex is not responsible for damage that occurs in transit or in storage. It is the purchaser's responsibility to examine goods upon receipt and to file any claims with the carrier. Failure to provide an adequate description of the lost items or damages to the carrier could result in the carrier refusal to honor the charges. It is the purchaser's responsibility to obtain information on the carrier's claim policies and to send any claims to the carrier. For other policies, contact Customer Service.

D) It is the purchaser's responsibility to file any claims even if the order has been shipped directly to the client.

Return of Goods

A) No merchandise may be returned without Artopex written consent and shipping instructions. If this procedure is not followed, the merchandise will not be accepted by the factory and will be reshipped collect without further notice.

B) Goods must be returned properly packaged and all boxes must be clearly marked with the authorization number.

C) Returns of items authorized by Artopex are subject to a charge of 25% plus freight (and customs, if applicable) and repair costs.

Product Specifications

Artopex reserves the right to modify the specifications of products, materials, design or accessories without notice.

Artopex also reserves the right to cease production of any product at any time. The products, accessories, materials and finishes as described in the price list prevail over the content of brochures or flyers. The weights and volumes shown on the price lists include packaging and are approximations.

Noki Lock

Mechanism and parts under warranty for 5 years, and 1 year warranty on labor.

Artopex Lifetime Warranty

Artopex warrants its products are free of defects in design, material and workmanship for as long as the original purchaser owns them.

If written notice of the defect is given to Artopex within the applicable warranty period, Artopex will repair or replace with comparable product, at Artopex's choice, without charge to the original purchaser, any part or product shipped after July 1st, 2001, which fails under normal use as a result of such defect.

This warranty provides limits on the following products :

- electrical components, which are warranted for (10) ten years from date of delivery,
- seating mechanisms, which are warranted for (5) five years of single shift usage from date of delivery,
- Artopex fabrics which are warranted for (5) five years from date of delivery,
- moving and high wear parts such as covering materials/finishes, arm rests, chair bases, foam, wood framed seating products, stacking chairs, glides, slides, casters, user-adjustable worksurface mechanisms, which are warranted for (5) five years of single shift usage from date of delivery,
- non-standard specials, which are warranted for (1) one year from date of delivery.

This warranty does not extend to :

- Customer's Own Material (C.O.M.) or finishes applied to Artopex products,
- ballast and light bulbs,
- products t hat have been modified or have not been installed or used according to Artopex application and installation guidelines.

On products warranted for a specified number of years of single shift usage, the warranty period will be reduced in a pro-rata manner when the products are used in a manner that exceeds the equivalent of a single shift forty (40) hour work week.

This warranty is the Customer's sole recourse for product defect. This warranty does not cover damage by a carrier in transit. Artopex makes no warranties, including the implied warranties of market value or utility for a particular purpose, other than the express warranties contained herein. There are no other warranties expressed or implied. Artopex shall not be liable for consequential or incidental damages arising from any product defect.
