Foam Control Agent

A silicone-based defoamer emulsion designed to weaken the structural integrity of bubbles, thus reducing foaming problems in a wide variety of applications.

- As little as 1 ounce (per 5 gallons capacity) added to recovery tanks of wet vacuums can help prevent costly equipment damage and decrease time spent emptying tanks.
- Safe & effective in hard or soft water, acid solutions, alkaline, or other areas where foam is a problem.
- ***Designed for use in recovery tanks of extractors, wet vacs, auto scrubbers, and other equipment.***

Formula Features:

- Silicone Based
- Versatile
- Helps Prevents Equipment Damage
- Concentrated

Applications:

- Designed to use in recovery tanks of extractors, wet vacs, auto scrubbers, and other equipment.
- Provides foam control in a wide variety of areas.

Usage Caution:

- NOTE: Avoid product contact on flooring; may cause hazardous slip conditions.
