General Use

Carpet Spot Remover

DIRECTIONS FOR USE

1. Always pretest for color fastness in an inconspicuous area before applying spotting solution. Test with full strength product and allow to remain for at least three minutes. If color loss or fading occurs, do not proceed.

2. For best results use as a RTU and always spot clean as soon as possible. Lightly apply spotter to soiled area (do not use as spray), agitate with the blunt end of carpet brush or spoon and blot dry with a clean, white towel. A wet vacuum extraction is recommended in place of blotting if available.

3. If spot is not removed, repeat prior step.

4. Rinse & blot dry between steps and as a final step. A final rinse with clear water is recommended until rinse solution is clear/clean.
