spotzyme plus

DUAL-ENZYME PRETREATMENT/ SPOTTER

Product Properties

COLOR:	Clear Colorless
ODOR:	Lavender
VISCOSITY:	10 cps
pH:	8.0
SPECIFIC GRAVITY:	1.09
FOAMING:	Moderate
DETERGENCY:	Good
ACTIVE AGENT:	Dual Proteolytic Enzymes

Description

This dual-enzyme based spot remover removes protein-based soils under a wide range of use conditions and gives superior cold temperature results. Attacks the stain, not the fabric, to remove both fresh and "set" stains. Effective against a variety of soils including eggs, mustard, grass, blood, fecal matter, etc. A key part of an effective spot removal program.

Features...Benefits

Broad Effectiveness .....Saves Linen Costs
Neutral pH .....Safer to Use
Dual Enzyme System .....Improved Performance
Removes Fresh and "Set" Stains .....Labor Saving
Does Not Attack Linens .....Saves Linen Costs

Directions

LAUNDRY PRESPOTTER: Spray this product directly onto protein based stains, such as those from eggs, chocolate, blood, fecal matter, and grass. Allow spotter to penetrate and saturate stain at least 15 minutes before laundering goods. After appropriate contact time, load linens into machine and launder as usual.

WHEN USED AS A PRESOAK: Fill soak bin half full with room temperature water. Add product at a rate of 1/2 cup pergallon of water in soak bin. Place stained linens in soak bin. For light stains, allow 1 hour contact time. For heavier stains, allow to soak overnight. Change solution daily.

CARPET SPOTTER: Blot up liquids before applying this product. Apply to soiled area and allow 15 minutes to 1 hour contact time. Blot up with clean toweling and shampoo carpet according to regular procedure. Do not add other products to this prespotter. Doing so may destroy the enzymatic activity and impair results.

Safety Information

KEEP OUT OF REACH OF CHILDREN

CAUTION. Eye and skin irritant. Avoid contact with eyes or skin. Do not take internally. In case of contact with eyes, flush with plenty of water and seek medical attention if irritation persists. In case of contact with skin, wash with soap and water. Remove and wash contaminated clothing before reuse. If swallowed, give milk or water to dilute. Seek medical attention.
