PIVOT™

nienkämper

Tubular steel legs finished in brilliant mirror eco-chrome, steel hinge mechanisms and cross beams provide the Pivot™ with its rigid skeleton, ready for the nomadic world of training tables. The Pivot™ isn't all brawn, its rigidity is balanced with warm, rich veneers typical to the Nienkämper family of products. Or if the rugged nature is to show through and through, a wide variety of plastic laminates with impact resistant plastic edges are also available.

Standard features include: chrome legs, locking casters, 1" thick rectangular top, choice of veneer and solid wood edge or plastic laminate and plastic edge, a 5.25" tall fixed modesty panel completes the package. Options include: your choice of power/ data/ connectivity units, 1.25" thick tops and flush or inset leg placement.

PIVOT™ | BASE CONSTRUCTION

Constructed from 1 3/8" dia. steel tube and is available in "eco-metal" chrome plating*, powder coated silver or black. Table tops pivot on two robust steel hinges and are supported with steel cross beams. Table tops are locked in position while down with stainless steel slam catches. To unlock and flip table into the storage / moving position simply pull out the two ergonomic plastic handles and pivot downward. The table rolls on 4 swiveling / locking 3" dia. casters. Base, hinge, cross beam, release handles and casters are all integrated within the base structure.

*Eco-metal chrome plating is a new galvanic process which is completely free of chlorides and is 100% recyclable.

PIVOT™ | BASE POSITION

Bases are offered in two positions, flush and inset.

Flush leg position allows the user maximum knee space when tables are ganged together.

Inset leg position allow the maximum seating capacity when tables are ganged together by enabling seating on table seams.

PIVOT™ | STORAGE REQUIREMENTS

Table Length	2 Tables	4 Tables	6 Tables	8 Tables	10 Tables	12 Tables
floor space required when nested for table depths of 24" and 30" (L" x D")
