TOSHIBA

BUILT-IN APP CLOUD STORAGE (SCAN/PRINT)

- **The cloud storage acts as central information repository for users to directly scan, save, retrieve and print to and from the One Drive™, Google Drive™ and Dropbox™ cloud storages via Toshiba e-BRIDGE Next MFP**
- **Embedded OCR converts documents to Microsoft Office file formats and searchable PDF files, making it easy to find the necessary data from a large amount of electronic data**

YOUR CHALLENGES

The working environment is constantly evolving towards a paperless office to digitize hardcopy documents. However, cloud storage users are demanding for an application that simplifies workflow which allows them direct-access to print and scan via the MFPs without operating mobile devices and computers.

OUR SOLUTION

Toshiba's Built-in App Cloud storage is a convenient and hassle-free approach which acts as a bridge connecting the electronic documents in the cloud storage and MFPs. Users are able to access documents easily from the cloud storage to print or scan with Toshiba e-BRIDGE Next MFP.

YOUR BENEFITS

The total cost of ownership is important to help users determine their needs of investing an additional hardware. Thus, Toshiba introduces this MFP to significantly reduce the total cost of ownership. No database server needs to be maintained in each office. With this easy solution, users can scan and store paper documents in the cloud by operating the MFP. Additionally, it also enables users to direct print and share electronic documents anytime, anywhere without limitation even while away from the desk.

WHERE TO USE

Toshiba's Built-in App (*) Cloud Storage can be integrated seamlessly with the latest Toshiba MFP in the following settings:

- Business centers (convenient store, print services)
  - Reduce TCO, diversify business, scalable service
- Shared or mutual services
  - Accessibility, simplify workflow
  - Remote data sharing among branch offices

(*) e-BRIDGE Plus for Google Drive, e-BRIDGE Plus for One Drive and e-BRIDGE Plus for Dropbox.
