Hyperwork Education

3-IN-1 MultiCarrells

From libraries to computer rooms and offices to retail outlets, the **Hyperwork Education** 3-IN-1 MultiCarrels provide the ultimate combination of versatility, durability and value! With three worksurface heights, multiposition storage shelf and multiple wire management features, the MultiCarrels offer unmatched versatility. All surfaces are durable thermally fused laminate with scratch-resistant and impact resistant AdvantEdge edges made of 3mm PVC material. Choose from multiple laminate options. Leg levelers adjust to floor variations and are mounted with steel plates for enhanced strength. Easy assembly with hand screwdriver.

Cutouts in the back corners of the work surface and storage shelf route wires out-of-sight and to the power source. Additional pass-thru cutout in the inner leg of the Add-On MultiCarrel allows routing of wires from station to station, especially useful in computer networking.

The 3-IN-1 MultiCarrel is much more than a study carrel!
Worksurfaces can be installed at any of three heights:
- Desk 29"H
- Wheelchair 32"H
- Standing 39"H

Additional Features:
- Storage shelf locates above or below worksurface
- Cord manager cutouts in rear corners of worksurface and storage shelf
- Pass-thru cutout in leg of add-on units
- Peel-n-stick wire management channel included
