GENERAL INFORMATION

TERMS AND CONDITIONS
Net 30 days on approved credit. A late payment charge of 1% per month will be applied on overdue invoices. This charge will be pro-rated to the number of days past 30 days that the invoice is overdue. All applicable sales taxes are extra. Prices include shipping to territorial warehouse. Distribution of this price list does not in itself constitute an offer to sell. Orders can be received only from authorized Krug dealers. Acceptance of any order and terms of sale may be established at the discretion of Krug. Deposits are required on orders received from new accounts as well as on large or special orders. Krug reserves the right to discontinue designs, or to change designs, construction, prices, or materials without notice.

ORDER ACKNOWLEDGEMENTS
Each order will be acknowledged via email or fax. This acknowledgement is the final agreement between Krug and the customer, superseding all previous communications regarding the purchase order. Where there is a discrepancy on a purchase order between a product code and a description, Krug will make every effort to resolve the discrepancy, but will be ruled by the product code ordered. Please check all acknowledgements for accuracy and advise Krug of any discrepancies with a purchase order.

CANCELLATION
A cancellation can be made only by expressed agreement with Krug. A cancellation fee may be incurred for restocking.

DIMENSIONS
Dimensions are in inches and approximate, and subject to change without notice. Contact Customer Service if dimensions are critical.

STORAGE CHARGES
Krug reserves the right to assess a nominal storage charge if a customer does not accept shipment of an order within a week of the ship date.

PRICING
Krug endeavors to ensure that all prices in this price list reflect accurately our current prices. However, errors do occur and will be rectified through notices to the field. Krug's website will always have the current list price. Krug reserves the right to acknowledge pricing that may be different from the price list.

Warranty
Krug warrants it's products to be free from defects in materials and workmanship for a period of 10 years from the date of purchase. This warranty is applicable to products in use by their original purchaser. This warranty does not apply to components and materials not manufactured by Krug: these are subject to the specific warranties of their manufacturers (if any). Repairs or replacement of any defect covered under this warranty by Krug will be made, at our option and method, at no charge to the original purchaser. Krug's judgement is final and binding with respect to the nature or cause of defects or damage, and the necessity or manner of repair or replacement.

This warranty does not apply to defects or damage resulting from:
- normal wear and tear occurring with the use of the product
- negligence, misuse, excessive use, alteration, improper cleaning or repair
- substitution or use of incorrect or unauthorized components or material
- handling or installation that is incorrect, or that causes damage or defect
- damage incurred by a freight carrier other than Krug
- wearing of finishes and fabrics, and normal variations in materials (including dye lot variations)
- properties of natural materials, including wood and leather
- exposure to environments with uncontrolled temperature and humidity (products must be transported, stored and used in climate-controlled conditions)

EXPORT PACKAGING
Krug is pleased to provide the option for export packaging on all our products, to provide additional protection from damage. Export packaging is provided at an upcharge of 5% of the net selling price per item. Export Packaging is STRONGLY RECOMMENDED for:

(A) all shipments outside of the lower 48 states and Canada
(B) all shipments that will be held in storage for an extended period prior to installation.

Important: Please note that Krug will not be responsible for damage claims on product shipped or stored in the above conditions but where export packaging has not been utilized.

Please contact Customer Service for specifications or any other assistance regarding export packaging.

FREIGHT TERMS AND CONDITIONS
1. All product is shipped FOB the Krug factory. Freight is either pre-paid to the destination (dealer's dock or territorial warehouse, where available) or not pre-paid, depending on established customer specific freight terms.

2. Docks at the selected delivery location must be equipped to handle a 53' trailer. If dock is inadequate for delivery by Krug, Krug will re-deliver to another location and any additional costs will be charged to the customer.

3. When a Krug territorial warehouse (where available) is selected as the default delivery location, Krug pays freight cost to the territorial warehouse only, and no further. The Customer is responsible for all charges from this point.

4. For all deliveries, it is understood that Krug or its agent is making a dock delivery only (equipped to handle a 53' trailer), and any further work of truck unloading, delivery beyond the dock, installation, and removal of packaging is not authorized or paid for by Krug.

5. Drop shipments to the installation site, and timed deliveries, are available on larger shipments (full truckloads or slightly less) at no additional charge. Drop shipments or timed deliveries for smaller shipments may not be available, or if available will require a surcharge. Deliveries on an after hours basis, or on weekends, or any other special requirements, may be subject to a surcharge. Location and contact information, and the requested time of delivery, are required at least one week prior to the acknowledged shipment date. If this information is not provided one week in advance, or if the location or time of the drop shipment is changed less than one week in advance, a surcharge may be applied, and/or the drop shipment may not be scheduled. For deliveries requested Monday to Thursday after 5:00 pm, please apply a surcharge of $250/shipment. For deliveries requested Monday to Friday before 7:00 am, please apply a surcharge of $250/shipment. For deliveries requested Friday (after 3:00 pm) or weekends, please apply a surcharge of $500/shipment. (local times).

6. For all deliveries - whether to the Customer location or drop shipment - any circumstances that result in the delay of our carrier (including unsuitable receiving facilities, or facilities not open or available), service charges will be applied at the rate of $75/hour. Where re-delivery is necessary because of these circumstances, the full cost re-delivery will be charged. If Less Than Truck Load is delivering, one hour is allocated to unload. Any additional time required to unload after the first hour is $75/hour.
If a Truck Load is delivering the order, three hours is allocated to unload. Any additional time required to unload is $75/hour. Direct deliveries to site for net orders are possible, must exceed $60,000 net, and accommodate 48-53' trailers. Krug is responsible for delivery to the approved delivery address. If an address change is required, this must be authorized by Krug 5 business days prior to ship date. Any additional delivery costs incurred after this time will be charged to the customer.

CUSTOMER SATISFACTION
It is the primary goal of Krug and our staff to ensure the complete satisfaction of our customers with our products and performance.
If a problem arises with a Krug product after the expiration of the limited warranty period, Krug will exercise its best efforts to achieve the satisfaction of the customer in a manner that is fair to all concerned.

DAMAGED SHIPMENTS
All Krug product is well engineered, carefully inspected, and expertly loaded onto our trucks at our Distribution Center. If you receive any damaged freight, we ask that you do not refuse the shipment. Krug is not responsible for damage to goods that occurs in transit or storage. It is the purchaser and/or receiver's responsibility to examine the goods upon receipt and to notify Krug of any damages, overages or shortages. Any discrepancies should be noted on the Bill of Lading. The delivering carrier will not accept responsibility for shortages or damages if signed "clear". Notification of concealed damage claims must be made to Krug Distribution within 5 days of delivery, along with digital pictures if available. All product and packaging must be available for inspection. Krug liability ceases after 5 business days and Krug will not be responsible for concealed damages if shipments are left unopened. Krug is not responsible for the condition of product that is stored or installed in an environment where temperature and humidity are not controlled.

Products must be opened and inspected on receipt, and any products not inspected when received, or held in storage, cannot be subjected to damage claims.

TESTING
All Krug Casegoods products meet or exceed the testing requirements of ANSI/BIFMA X5.5-2008 and/or X5.9 - 2012.

BIFMA INTERNATIONAL

FIELD PRODUCT REPORT AUTHORIZATION
Krug's written authorization, in the form of an FPR number, must be obtained prior to incurring charges of any kind if Krug is expected to pay these charges. This includes authorization for field repairs and replacements, installation and delivery charges. Krug reserves the right to have its representative inspect product related to any request for such authorizations, prior to that authorization being provided. Deductions from invoices paid for any charges to Krug, without prior written authorization in the form of an FPR, will not be accepted. Digital photographs may be required to complete the FPR process.

RETURNS
No merchandise may be returned without Krug's prior written consent. In the event of an authorized return, a Field Product Report (FPR) number will be issued, and a restocking charge will apply. Return transportation charges must be prepaid. Unauthorized returns will not be accepted and will be returned freight collect. All merchandise being returned must be properly packaged in its original or comparable replacement packaging to ensure protection of the product during handling and transportation. Returns on orders duplicated by the customer must be received in their original packaging to be accepted. Product being returned where Krug has authorized its liability for replacement or repair will be thoroughly inspected on its return, and the results compared to the reason for the return stated on the FPR. Any discrepancies, such as additional damage, signs of usage, missing parts, etc., will result in an adjustment to the amount of credit issued.

CARE AND MAINTENANCE
WOOD FINISH
Although Krug's extensive finishing process ensures a durable finish on all our products, there are several steps that can be taken to protect and prolong the life and beauty of the finish. Protect the top by placing felt pads on the bottom of any accessories and mechanical equipment. Rubber and oil will permanently mark surfaces. Use a desk pad to prevent possible damage and imprinting caused by writing instruments and sharp objects. Dust only with a clean, dry cloth, going with the grain. Clean any marks with a damp cloth, using a small quantity of mild soap or detergent. Do not use any wax-based polish, spray or silicone. Eventually, a film will build up and discolor the top. Do not place your furniture in a position of permanent exposure to direct sunlight.

LAMINATES
Clean plastic laminate surfaces with mild soap and warm water. Do not use steel wool, hot water, or any abrasive cleaning product.

PAINTED GLASS
To clean simply wipe with an ammonia based cleaner using a microfibre cloth. Do not use a coarse cloth or an abrasive cleaning products on painted surfaces to avoid scratching.

FABRIC UPHOLSTERY
Professional upholstery cleaning is recommended.

CUSTOM CAPABILITIES
Over 15% of our orders involve some type of custom work, and we invite our customers to make use of our extensive capabilities.

These include:
1) Dimensional customization of standard size products.
2) Custom finishes
3) For larger orders, completely custom designed products, as well as non-standard wood species can be specified.

Custom orders will require additional production lead times. Contact Customer Service for more information.

GRADED-IN UPHOLSTERY PROGRAMS

Krug has partnered with several textile brands to grade in their offerings, designed to provide a wide range of upholstery selections for our seating products.

Upholstery pricing and availability is subject to change without notice. We grade this upholstery according to the pricing of the fabric suppliers - when their pricing changes, the Krug grade may change.

When placing an order, a Krug customer must specify the complete upholstery number, along with the appropriate Krug model number and finish. Krug will supply the complete product at the prices listed. Orders specifying graded-in upholstery cannot be cancelled once the upholstery has been ordered.

Upholstery Grades
To determine the price of a product for graded-in upholstery, use the reference lists located on Krug's website under - Products - Textiles, to view the upholstery grade (1-9). Krug is not responsible for the discontinuation of this upholstery. Please contact Customer Service for information on upholstery not listed.

When two upholstery selections are specified for use on seating, the higher grade upholstery price will apply to the order.

High Performance upholstery; Polyurethane, Vinyl or Crypton, is particularly suitable for healthcare and other intensive-use environments.

Upholstery Samples
If you require additional samples or memos for presentation, please contact fabric supplier directly.

Flammability Standards
- Tunnel Test Surface Ratings Class A rating
- Class 1 UFAC
- Passes State of California Technical Bulletin CAL 117-2013

Please contact fabric supplier directly for further flammability information pertaining to specific upholstery.

Special Conditions
Acknowledgements will give the estimated delivery date of the finished product. Some upholstery is imported, and availability may affect estimated delivery time. For large projects, please contact fabric supplier directly for availability of yardage.

KRUGEXPRESS

PROGRAM DETAILS
KrugExpress orders are ready to ship by the date acknowledged. Delivery and shipping schedules may result in actual shipping of orders at a later date. Statutory holidays and scheduled factory vacations may add to acknowledged lead times of *KrugExpress* orders. Unless otherwise specified on the order, the customer's standard method of shipping Krug products will be utilized.

Available factory capacity for *KrugExpress* is filled by orders received on a "first come, first serve" basis. If the normal *KrugExpress* lead time is not available for your order because available capacity has been filled, you will be immediately advised of the earliest available ready-to-ship date. Please consult your Customer Service representative in advance if you wish to confirm the specific lead time availability for a *KrugExpress* order. Orders must be received by midnight of a given day for that day to be considered the official day the order is received. Order lead times are acknowledged from the date the order is received, but not including the date the order is received. *KrugExpress* orders must be "clean" when received in order to be considered officially received on a given day, and lead times will be acknowledged from the date orders are determined to be "clean". Changes to *KrugExpress* orders are not allowed under any circumstances. Orders for product on *KrugExpress* must clearly state: "*KrugExpress*".

***Some conditions apply. Please note PALETTE finishes are not available on *KrugExpress*.**

CASEGOODS PROGRAM
Orders for casegood products on the *KrugExpress* program may be subject to quantity maximums. Please contact Krug Customer Service for more information. Quantity maximums are dependent upon available capacity, in order to insure that we ship all orders on time. Only actual casegood pieces and conference tables tops and bases are considered "units". Items such as tasklights, tackboards, keyboard trays and drawers, electrical and wire management components, etc., are not considered under the quantity restrictions. For example, a typical office configuration that includes a desk, linking unit, credenza and hutch/overhead, equals a total of four units for the purposes of the quantity maximum. Only Krug In-stock panel fabric is available on the *KrugExpress* program. Only standard wood finishes are available for *KrugExpress* orders. Grommets can be specified in standard positions only. *KrugExpress* also includes all Krug seating and occasional tables as well as Krug conference products to complement this casegoods offering.

TACKBOARD FABRICS

KRUG PANEL FABRIC PROGRAM

Tackboards can be upholstered in COM material supplied by the customer, and in a selection of stocked tackboard fabrics supplied by Momentum. The in-stock Momentum fabrics are priced at Grade 1 and are available on Krug Express. They are 100% polyester. For additional information and color selections, please refer to our Panel Fabrics card and Krug's website.
www.krug.ca PRODUCTS / FABRICS / PANEL

The Momentum panel fabrics pass ASTM-E84-87 Fire Codes.
If memo samples are required please call Momentum at 1-800-366-6839.

CUSTOMER'S OWN MATERIAL - C.O.M.

Customer's Own Material (COM)

COM must be received three weeks prior to the acknowledged ship date. Orders with COM not received by the required deadline will be delayed.

A description of the fabric, including supplier name, fabric name and color number must be included with the purchase order.

When the COM fabric is received at Krug, it must be clearly identified with the fabric name and color, and tagged with name of the Krug customer and purchase order number. Krug will inspect all COM fabric when received to determine if it will be suitable for upholstery. Where Krug feels that the fabric or leather specified will compromise the quality or integrity of our products, customers will be contacted to direct these concerns. Further, Krug reserves the right to refuse to accept and use any COM fabrics or leathers that will compromise our products in any way that is unacceptable to Krug. Krug cannot assume responsibility for the durability or tailoring quality of customer's own material.

Yardage specified in this price guide is approximate. In the case of multiple product orders, multiply the number of items by the COM yardage specified to determine fabric required, unless otherwise indicated. Additional yardage may be needed if the material is less than 54" wide, or patterned or striped and requires matching. As fabric is applied horizontally, non-directional fabrics are recommended. COM fabrics are applied as they come off the roll unless otherwise specified. All striped fabrics will be applied vertically unless otherwise stated by the customer and after approval by Krug. It is the customer's responsibility to advise Krug if the upholstery is to be applied otherwise, and to advise Krug of any special upholstery instructions. Special instructions should be sent to Krug Customer Service, including a sample (or photocopy) of the fabric. Krug is not responsible for instructions sent with the fabric rolls, or for the method of upholstery if no instructions have been provided.

COM fabrics for tackboards may be specified in either Maharam or Momentum panel fabrics. Krug is not responsible for determining if a fabric is not ideal for tackboard application. Please contact Maharam at 1-800-645-3943 or Momentum at 1-800-366-6839 directly for more information about a specific fabric.

COM Shipping Procedures
For tackboard COM fabrics, please send fabrics to:
Krug Inc.
111 Ahrens Street
Kitchener, Ontario
Canada N2H 4C2
Attention: RECEIVER

All packages must be clearly marked "For Customs Clearance by Russell A. Farrow Custom Brokers". According to the North American Free Trade Agreement (NAFTA), goods shipped between the United States and Canada can qualify for exemption from all duties, or for a reduction in duties, if the goods can be proven to originate in either the United States, Canada or Mexico.

Canada Customs requires that a NAFTA Certificate of Origin and a Commercial Invoice be completed and sent with the fabric shipment. The Commercial Invoice must clearly state the description of the fabric, the selling price, the make-up or content, and the purchaser. The absence of these two documents will delay the shipments at the U.S./Canada border, thereby potentially delaying the customer order. If the total value of the shipment is less than $1200 U.S., Customs will accept a Low Value Statement of Origin in place of the NAFTA Certificate of Origin. The Low Value Statement must be signed by a representative of the exporting company. This statement may either be included on the commercial invoice or attached to the invoice.

Krug is happy to answer any questions or concerns about COM shipping procedures and the required documents. Please contact our Customs Specialist at 1.888.578.5784.

In-Stock Laminate
Krug's in-stock Laminates are available in 16 different laminate selections. There are 8 wood grain laminates, 4 solid color laminates in a selection of popular solid shades and 4 Exotic laminates offering a distinguished appearance. Minimum order quantities and extended lead times may apply for exotic laminate colors, please check with customer service. Polymer Edge will be selected to match the worksurface. Adesso is available in **Solid Laminate colors only.**

Non-Stocked Laminates
For specific lead time and application questions, please contact Krug Customer Service for your requirement. Upcharges will be applicable for non-stocked laminates, depending on their cost. Non-stock laminates may require a minimum order quantity, please contact customer service. Stocked polymer edges can be specified for use with non-stocked laminates.

The following plastic laminates are acceptable for application on Krug products as they feature a matte finish:

Nevamar	All plastic laminates with "T" in the suffix (i.e., MR2002T)
Wilsonart	All plastic laminates with "60" in the suffix (i.e., 4779-60)
Arborite	All plastic laminates with "CA" in the suffix (i.e., 1531-CA)
Pionite	All plastic laminates with "Suede" in the name (i.e., WW561 Suede)
Formica	All plastic laminates with "58" in the suffix (i.e., 756-58)

Arborite Laminates 1.800.996.0366
Pionite Laminates 1.800.746.6483
Nevamar Laminates 1.800.638.4380
Wilsonart Laminates 1.800.433.3222
Formica Laminates 1.800.367.6422

Additional plastic laminate codes may be acceptable for use on Krug furniture, however, they could be subject to an additional upcharge or extended lead time due to material complexity. High sheen plastic laminates are not acceptable for application on Krug furniture due to their inherent nature of scratching and marring during the production process.

Dual Laminates
Two laminate colors can be combined on the same unit, with one laminate color on the worksurface and another laminate on the rest of the unit, at no upcharge. Combinations of more than one laminate in the body of the unit are not available.

level® CERTIFICATION, AIR EMISSIONS AND FSC® CERTIFICATION

level® Certification
BIFMA's e3 Furniture Sustainability Standard is a voluntary, multi-attribute standard that measures the degree of sustainability of furniture. This standard evaluates product and company environmental attributes and compliance systems in a wide range of elements which include Materials, Energy & Atmosphere, Human & Ecosystem Health and Social Responsibility. Adesso products have earned level®, BIFMA's sustainability certification program for furniture, certification through third-party verification against the e3 standard.

Air Emissions
All Adesso products can be supplied with air-emissions certification. Contact customer service for information and upcharges.

FSC
www.fsc.org
FSC® C021699
The mark of responsible forestry

FSC®
In 2005, Krug received Forest Stewardship Council® (FSC®) Chain-of-Custody certification for our manufacturing facilities. The FSC® Chain-of-Custody tracks certified wood from seedling to final sale. It signifies that the growth, harvesting and production of goods are entirely achieved through responsible forestry, which guarantees a healthy supply of forest resources for generations to come. Adesso and other Krug products can be specified with one of two types of FSC® Certification:
(a) FSC®-certified (which includes FSC®-certified lumber, veneer and substrate material)
(b) FSC®-mix certified (which includes substrate material only, and is a lower cost option certification)
Both FSC® certification types may require upcharges, and often require additional lead time. Contact customer service for further information, pricing and leadtimes.

In addition, architects, designers, and building professionals can specify FSC®-certified products in order to achieve a point from the US. Green Building Council's Leadership in Energy and Environmental Design (LEED) Rating System.

VENEERS
Adesso veneers are quarter cut, except for White Oak, which is rift cut - both quarter cut and rift cut veneers provide a straight grain appearance. The grain direction of the veneers on vertical faces is horizontal - see page 13 for grain direction specifications.

NON-STANDARD VENEER SPECIES
In addition to range of standard wood species, Adesso can be made with virtually any commercially available veneers. Please contact customer service for information and pricing on wood species not included in Adesso's standard offering.

NATURAL CHARACTERISTICS OF WOOD
Wood is a natural product with inherent color variations that will never be fully mitigated by the finishing process. Please anticipate variation in colors within a single unit, from piece to piece, and from Krug wood finish samples. If a very close match is required, a sample must be provided with the order and an upcharge will apply. Exact color matches are not possible.

CUSTOM WOOD FINISHES
Add 10% list to your order for special finishes, minimum upcharge is $500 list per finish per order. (For example, on all orders up to $5000 list, an upcharge of $500 will apply, on orders $5000 and up add 10% list to your order.)

For orders with special finishes, a sample that is a minimum 3" by 3" must be received with the order. Special finishes may add additional lead time to production schedules.

Since wood is a natural product, some variations in grain, color and stain acceptance will occur. In our finishing processes, we try to minimize variations, but some variation between samples and finished goods should be anticipated.

ENDURAGUARD FINISH
Adesso Casegoods features the Krug Enduraguard finish, a proprietary catalyzed varnish formulation, that has repeatedly shown through independent laboratory testing to be the industry leader in durability and abrasion resistance. The Krug finish looks better longer than competitors and is uniquely suited to the demands of high traffic environments.

ADESSO | LAMINATES & POLYMER EDGES

IN-STOCK LAMINATE
Krug's in-stock laminates are available on Adesso worksurfaces in 4 solid laminate selections.
Polymer edge will be selected to match the laminate worksurface.

SOLID LAMINATE

NAME & NUMBER	POLYMER EDGE
Almond T445	Almond
Black T203	Black
Shadows T201	Fog
White D354-60	White

NON-STOCKED LAMINATES
For specific lead time and application questions, please contact Krug Customer Service for your requirement. Upcharges will be applicable for non-stocked laminates, depending on their cost. Non-stock laminates may require a minimum order quantity, please contact customer service. Stocked polymer edges can be specified for use with non-stocked laminates.

The following plastic laminates are acceptable for application on Krug products as they feature a matte finish:

Nevamar	All plastic laminates with "T" in the suffix (i.e., MR2002T)
Wilsonart	All plastic laminates with "60" in the suffix (i.e., 4779-60)
Arborite	All plastic laminates with "CA" in the suffix (i.e., 1531-CA)
Pionite	All plastic laminates with "Suede" in the name (i.e., WW561 Suede)
Formica	All plastic laminates with "58" in the suffix (i.e., 756-58)

Arborite Laminates 1.800.996.0366
Pionite Laminates 1.800.746.6483
Nevamar Laminates 1.800.638.4380
Wilsonart Laminates 1.800.433.3222
Formica Laminates 1.800.367.6422

Additional plastic laminate codes may be acceptable for use on Krug furniture, however, they could be subject to an additional upcharge or extended lead time due to material complexity. High sheen plastic laminates are not acceptable for application on Krug furniture due to their inherent nature of scratching and marring during the production process.

ADESSO | GUIDELINES AND PRICING METHODS

PRICING METHODS
Custom widths: Apply the price that is one standard size larger than the desired case size (but same depth).
Example: The required custom dimension is 74” x 30”. The first standard size above this is 78” x 30”, so in this case you would apply the price of the 78” x 30” unit.

Custom depths: Apply the price of the same unit one size deeper (but same width).
Example: The required custom dimension is 72” x 26”. The first standard size above this is 72” x 30”, so in this case you would apply the price of the 72” x 30” unit.

Custom width & depth: Apply the price of the same unit both one size wider and one size deeper.
Example: The required custom dimension is 74” x 26”. The first standard size above this is 84” x 30”, so in this case you would apply the price of the 84” x 30” unit.

ADESSO | EDGE PROFILE, PULLS & LOCKS

ADESSO EDGE PROFILE

Desks, Credenzas, Curvilinear Desks, Returns, Linking Units, Bookcases have profiles on all edges.

ADESSO PULL STYLE

Pulls are available in Clear Satin Anodized Aluminum. Adesso pulls are located on the top right corner of each drawer front and cover 2/3rds of the drawer front. Pulls on storage doors are placed in the top corner opposite the door hinges. Pulls are not available on storage doors above the worksurface. These cases will feature a touch latch operation.

ADESSO | GENERAL PRODUCT SPECIFICATIONS

WORK SURFACES
Tops are 1 1/2” thick veneered particle board & MDF core with face and back veneer.

MODESTY PANELS
Modesty panels are standard on all desks, and optional on shaped tops, returns, linking units and credenzas. Modesty panels are 3/4” thick, with the exception of linking unit modesty panels which are 1 1/8” thick.

VENEER
Adesso veneers are quarter cut, except for White Oak, which is rift cut - both quarter cut and rift cut veneers provide a straight grain appearance. The grain direction of the veneers on vertical faces is horizontal.

FINISH
A five step catalyzed varnish finish that when dry has a sheen value of 32°, is applied to all finished cases. A lower sheen topcoat, 20˚, can also be specified at standard pricing. All purchase orders must clearly note “lower sheen finish” in order to receive the optional selection.

LOCKS
Locks are provided as standard features on all pedestals, except bookcase pedestals, including those in desks, credenzas, and lateral file storage units. Satin Aluminum lock plugs are located on the fronts of all cases.

Locks are available on the bookcase doors at an upcharge of $105 list per set of (2) doors, please specify at time of order. Locks for bookcase doors are generally located on the top inside corner of the door front. Locks for hutch and overhead doors are generally located on the lower inside corners. Suites can be keyed alike at no upcharge, please specify on purchase order.

LATCHES
All hutch, overhead and bookcase hinged doors (above the worksurface height), are equipped with touch latches mounted inside the top edge of the door.

DRAWERS
Desk box drawers have fully progressive full extension slides and are load rated at 100 lbs. per drawer.
Desk file drawers have a load bearing capacity of 130 lbs per drawer.
All other pedestal file drawers have fully progressive, full extension slides and are load rated at 100 lbs. per drawer.
All file drawers are equipped for letter and legal filing.
All box and pedestal file drawer slides have an optional soft-closing feature. Lateral file drawers do not have this option.
All drawer interiors are veneer on plywood, constructed with finger dovetail joints.
All box/box/file pedestals in desks are supplied with one molded black pencil tray.

GLIDES
Adjustable glides are 1 1/4” long and allow for a range of adjustment of 1”. Glide inserts are installed at factory, glides need to be field installed.

METAL LEGS & DISC BASE
The metal legs and disc bases in Adesso have an Gloss Aluminum finish.

HINGES
Hinges on all hutch, overhead and bookcase doors are European style with 110 degree opening. All hinges are fully adjustable.

PULLS
Pulls are Clear Satin Anodized Aluminum. Pulls are supplied on all drawers, and doors below desk height.

TESTING INFORMATION
Adesso meets or exceeds the testing requirements of ANSI / BIFMA X5.5-2008 and/or X5.9-2012.

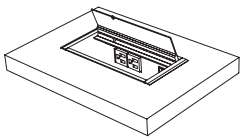
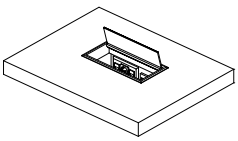
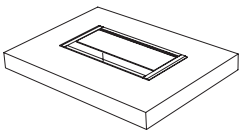
ADESSO | CONNECTIVITY



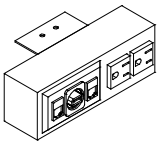
POWERPORT 1
A PowerPort is a unique worksurface mounted module that can be specified to a location that best serves the user's needs. It includes a UL approved electrical, voice and data power bar, containing two 115 - volt electrical simplex outlets which are accessible from the work surface, plus a utility outlet at the end for daisy chaining purposes. It also includes one RJ11 communication port and one RJ45 data port. The RJ45 port is cat 5/6 compatible.



POWERPORT 2
This unit is similar to PowerPort 1 with 2-simplex receptacles I-RJII & I-RJ45 but it also includes 1-USB type A/B port. (This power data module can be used for charging with a USB patch cord connected to a transformer. This provides the user a simple and convenient way to charge their electronic devises. Patch cords and transformer are conveniently available at most local electronic stores.)



PORT
A service module having no power bar will serve as a large grommet. A hinged lid easily enables the passage of several cables and devices.



UNDER MOUNT POWER DATA MODULE
The Power Data Module is mounted under the worksurface to provide connectivity to the user. The unit contains 2 simplex receptacles, 1 RJ11, 1 RJ45 and 1 USB Type A/B port. This power data module can be used for charging with a USB patch cord connected to a transformer. This provides the user a simple and convenient way to charge their electronic devises. Patch cords and transformer are conveniently available at most local electronic stores.

GROMMETS - Optional (Top Only)
All cases may be specified with one grommet in a standard position at no upcharge. A $105 list upcharge will apply to additional grommets in standard positions and for grommets requested in non-standard positions a $210 list upcharge will apply.

The grommet position must be indicated for each case on the order. Please specify location of grommet when ordering.

GROMMETS - Round
A round grommet in an aluminum finish with an open and shut mouse hole serves to provide cable passage for areas not requiring a large opening. The grommet position must be indicated for each case on the order. Please specify location of grommet when ordering.

Grommets can be field installed with a power drill, 60 mm hole saw. Please keep in mind the location of the grommets when specifying pier hutches for use with worksurfaces. For example, a paper manager on the left-hand side may be used with a "C", "BR" or "AR" grommet.

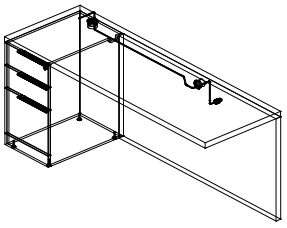
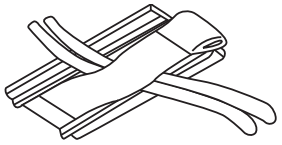
PEDESTAL ACCESS CABLE MANAGEMENT



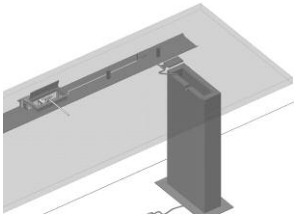
All Adesso casegood desks, returns and credenzas allow for wire management behind the pedestal drawers. Pedestal gables feature a standard cable management opening allowing access to the rear of the pedestal cavity. By specifying a wiring grommet in a standard AL or AR position (see grommet locations above) cable can be conveniently threaded behind the pedestal drawers and through the wire management access grommet.



Velcro Cable Manager
A velcro wire management strip is available to assist in containing the cables

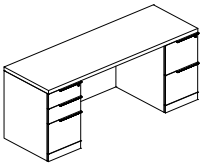
Cable Management PVC Trough
PVC Cable manager is used in credenzas, L and U workstations.

Cable Management for Runoffs
The Silver Metallic Trough is used to route cables from desk runoffs to credenza and out to the source.



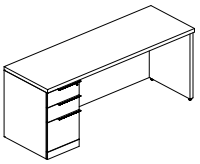
Cable Management with Runoff and Wood Base
This represents cables running from desk runoffs through the Silver Metallic Trough and into the wood/metal base to a floor monument source.

ADESSO | CREDENZAS



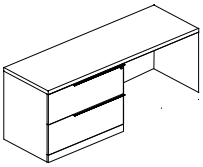
CREDENZAS - Desk Height
Adesso offers a wide variety of credenzas for use as stand alone storage pieces, part of a connected worksurface configuration, or behind a desk.

Choose from single or double pedestal options, with fixed or hinged modesty panel.

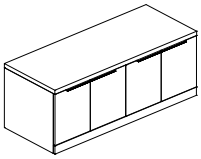


Modesty Panels
Credenzas with hinged modesty panels provide easy access to wall mounted electrical sources without wiring difficulties.

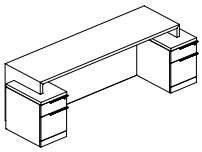
Credenzas with modesty panels have an added finished look, and all cases are available with a wiring grommet in a standard position for added cable management, please specify on your order. Wiring grommets can be specified above the pedestal location.



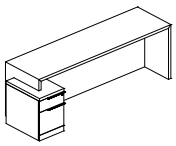
Pedestals
Adesso credenzas are available with single, lateral file, combination pedestals or bookcase pedestals.



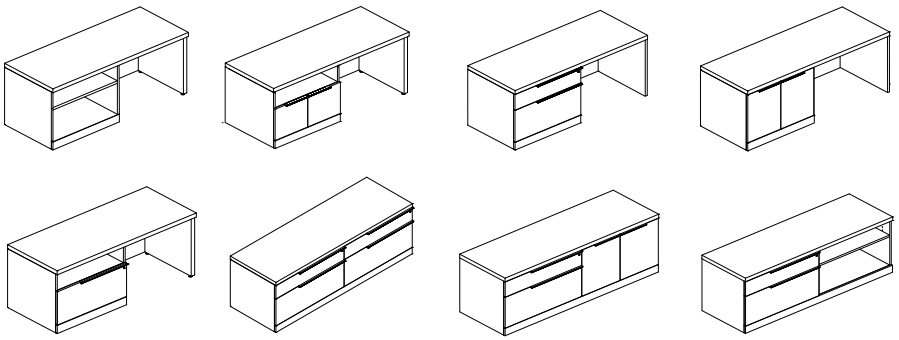
Full Face Credenzas
Full face credenzas are available in a variety of lateral file/bookcase & open bookcase combinations in 3/4 and full height cases



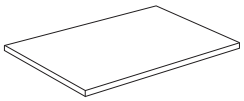
Extended Pedestals Credenzas
These are offered in both single & double pedestal options. Pedestals extend 6” beyond the end and front of the case.



Cedenzas - 3/4 Height
A large offering of Credenza sizes and configurations are available in single pedestal and full face versions



ADESSO | LINKING UNITS

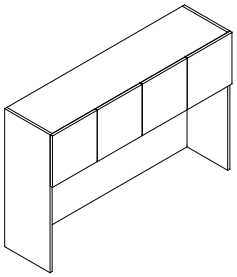


Linking Units
Adesso linking units are available in a range of sizes for ease of use in configuring a connected worksurface.

Linking Units are for use between desks and credenzas in creating a U-shaped configuration, and must be supported at both ends. They are available with or without modesty panels.

Linking Units, Tops and Returns
It is important that the main units (desk, credenza) to which the linking unit or return is being attached be in their final position and leveled. Units are connected with mending plates under the worksurface from the modesty to the end panels. Attach the mending plates under the worksurface, ensure cases are level and if necessary adjust the glides to achieve flush and firm joints before completing installation of mending plates to the modesty and end panels.

ADESSO | HUTCHES, OVERHEADS, & TACKBOARDS

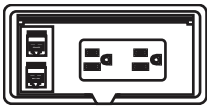


Hutches and Overheads
Adesso offers hutch and overhead options for use in a work area configuration.

All hutches and overheads include L.E.D. tasklights that are factory installed and require no field adjustment. Tasklights are mounted beneath the cabinet.

A variety of hutches are available with aluminum framed, back-painted white glass doors.

Doors
Doors are equipped with fully adjustable European style hinges. Locks are optional and can be specified at time of order for an upcharge of $105 per set of (2) doors. If an uneven amount of doors require locks, the lock on the single door is also $105. Locks are not available on glass doors.



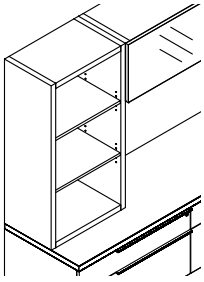
Hutch Power/ Data/ Voice Module
Access to power and data is made simple by using a hutch with a power/data/voice module built right into the tackboard. The module is fully installed at the factory but can be removed to connect data links on site. It features a flip door that retracts into the case of the unit when open.

Tackboards
All hutches come standard with grade 1 tackboards. For other tackboard grade pricing, see chart on page 74, please note, not all fabrics are suitable for tackboard application. Tackboard fabric selections should be supplied with the order information.

Tackboards are not included with overheads, see page 65 for pricing. Overhead tackboards include wall mounting hardware and instructions.

Only hutches and overhead tackboards in Krug panel fabrics are available on *KrugExpress.*

Wall Mounted Back-Painted Glass
Glass panels are 4mm tempered white back-painted glass with aluminum frame. Magnetic back-painted glass is also available. Back-painted glass is available in nine colors; White, Giada, Silk, Mandarino, Rosso, Pearl, Caffe, Black.



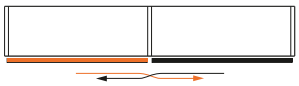
Piers
Piers are used in conjunction with overhead/hutches, glass wall panels & tackboards

L.E.D. Tasklights
Tasklights are included with hutches and overheads. On hutches, the tasklight cord is threaded behind the hutch though a standard access grommet on the upper right hand side of the back panel.

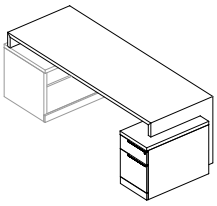
Tasklights are installed on the underside of overhead units. Cords run down the right hand side of the tasklight to the worksurface where they can be routed behind the worksurface top. The use of a wall mounted Overhead tackboard, back-painted glass wall panel or wood wall panel conceals the cord from view.

Installation
Hutch and overhead installation instructions are included with every case. All mounting hardware required is included with the product.

SLIDING DOOR WALL UNIT



Sliding door wall units feature a Coplanar mechanism, meaning - when the doors are closed the faces are flush, when a door is opened it moves forward in front of the other door.

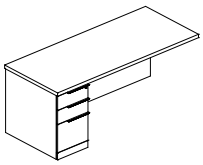


Drawers will be offered for letter and legal size filing. All units are equipped with file bars that are fixed in place for shipping.

DESK RUNOFFS & DESK PEDESTAL FILE DRAWERS

Filing Capacity
15” drawers:
21” of letter filing front to back or
12” of legal filling side to side
22” pedestal drawer depths allow only one row of side to side files.

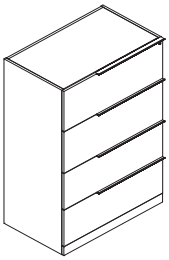
Weight capacity of pedestal file drawers is 100 lbs.



CREDENZA AND RETURN PEDESTAL FILE DRAWERS

Filing Capacity
15” drawers:
15” of letter filing front to back or
12” of legal filling side to side
16” pedestal drawer depths allow only one row of side to side files.

Weight capacity of pedestal file drawers is 100 lbs.



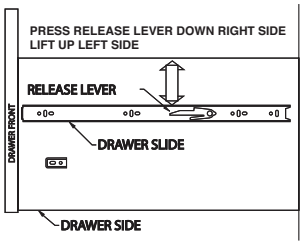
CREDENZA, RETURN OR STORAGE LATERAL FILE DRAWERS

Filing Capacity
30” wide drawers:
30” letter filing front to back, or
25” legal filing side to side
15” or legal filing front to back.

When filing front to back, 30” lateral file drawer widths allow two rows of letter filing, but only one row of legal file width.

Filing capacity
36” wide drawers:
30” letter filing front to back, or
36” legal filing side to side, or
30” legal filing front to back.

Weight capacity of lateral file drawers is 130 lbs.



Drawer Removal
Pull drawer and slide out to the full extension position. With index finger, lift up the release lever on the left and press down the release lever on the right side of the drawer (as shown).

Pull out the drawer with the attached drawer channel from the cabinet member.

To re-assemble, insert the drawer through the guide.

level® CERTIFICATION, AIR EMISSIONS AND FSC® CERTIFICATION

level® Certification
BIFMA's e3 Furniture Sustainability Standard is a voluntary, multi-attribute standard that measures the degree of sustainability of furniture. This standard evaluates product and company environmental attributes and compliance systems in a wide range of elements which include Materials, Energy & Atmosphere, Human & Ecosystem Health and Social Responsibility. Vestrada products have earned level®, BIFMA's sustainability certification program for furniture, certification through third-party verification against the e3 standard.

Air Emissions
All Vestrada products can be supplied with air-emissions certification. Contact customer service for information and upcharges.

FSC
www.fsc.org
FSC® C021699
The mark of responsible forestry

FSC®
In 2005, Krug received Forest Stewardship Council® (FSC®) Chain-of-Custody certification for our manufacturing facilities. The FSC® Chain-of-Custody tracks certified wood from seedling to final sale. It signifies that the growth, harvesting and production of goods are entirely achieved through responsible forestry, which guarantees a healthy supply of forest resources for generations to come. Vestrada and other Krug products can be specified with one of two types of FSC® Certification:
(a) FSC®-certified (which includes FSC®-certified lumber, veneer and substrate material)
(b) FSC®-mix certified (which includes substrate material only, and is a lower cost option certification)
Both FSC® certification types may require upcharges, and often require additional lead time. Contact customer service for further information, pricing and leadtimes.

In addition, architects, designers, and building professionals can specify FSC®-certified products in order to achieve a point from the US. Green Building Council's Leadership in Energy and Environmental Design (LEED) Rating System.

VESTRADA | FINISHES

WOOD FINISHES
Standard wood finishes are:

SPECIES	FINISH
Cherry	Light Cherry Natural Cherry American Cherry Medium Cherry Standard Cherry Imperial Cherry Appalachian Cherry Sable Cherry
Maple	Clear Maple Honey Maple Wheat Maple
Oak*	Light Oak Harvest Oak Mahogany Oak Medium Cherry on Oak Mellow Oak Walnut on Oak Espresso on Oak
Walnut	Natural Walnut Regular Walnut Mahogany on Walnut Dark Walnut Cordovan Walnut
Anigre	Clear Anigre Medium Anigre

*VESTRADA Oak veneers are rift cut.

PALETTE FINISHES
Standard solid color finishes are:

Black
White
Sand
Soft green
Steel blue
Slate
Please refer to VESTRADA brochure for color reference.

V-Beam
Standard finishes are:

Satin Aluminum
Matte Black

Wood is a natural product with inherent color variations that will never be fully mitigated by the finishing process. Please anticipate variation in colors within a single unit, from piece to piece, and from Krug wood finish samples. If a very close match is required, a sample must be provided with the order and an upcharge will apply. Exact color matches are not possible.

Custom Wood Finishes

Add 10% list per item for special finishes; minimum upcharge is $500 list per finish per order. (For example, on all orders up to $5000 list, an upcharge of $500 will apply, on orders $5000 and up add 10% list to your order.) For orders with special finishes, a sample that is a minimum 3" by 3" must be received with the order. Special finishes may add additional lead time to production schedules.

Since wood is a natural product, some variations in grain, color and stain acceptance will occur. In our finishing processes, we try to minimize variations, but some variation between samples and finished goods should be anticipated.

Birdseye Maple

Bookmatched Birdseye Maple veneer is available on VESTRADA at an upcharge of $50 list per square foot. Specify clearly on order. Birdseye Maple is recommended in clear finish only. Birdseye Maple only applies to tops.

Dual Finishes

Add 10% list per item if specifying dual finish.

Custom Palette Finishes

Custom palette finishes are available at an upcharge of 10% list and an additional 2 weeks lead time after final color approval.

WORKSURFACE EDGE PROFILE

All work surfaces are 1 1/8” thick, veneered Medium Density Fiberboard. Worksurface height tops have a chemically impregnated backer for additional strength. Profiled edges of worksurfaces have a .12” (3mm) wood banding with an undercut detail leaving a visible edge of 3/4”.
Vestrada comes standard with a tapered edge.
Desk work surfaces have an edge profile on front and rear sides. Ends are flat with no profile shape.

Run-off work surfaces such as Bullet and “P” shapes have an edge profile that extends around the curved section.
The remaining blunt end is flush with no profile shape.

Credenza, Returns and Linking tops have profile on the front side while all remaining edges, are flush with no profile

GRAIN DIRECTION
Vestrada grain direction runs left to right on all cases.
Providing a consistent wood grain direction is important in maintaining consistent color on adjacent work surfaces.
Such is the case with “L” or “U” configurations.

The above illustrations explain the grain direction on typical worksurfaces that run at right angles to one another.

V-BEAMS
Raised worksurfaces are supported by 2” high accent V-Beams. Each V-Beam is available in either silver or black finsh and is fixed to the underside of the worksurface. The V-Beam is undersized to the worksurface and is inset by 4” on all sides.

VESTRADA | DRAWER PULLS & LOCKS

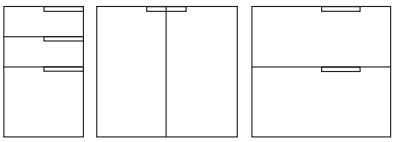
DRAWER PULLS
Two drawer pull options are available. Each metal pull is available in a Satin Aluminum or Matte Black finish. Both style and finish must be specified on order.

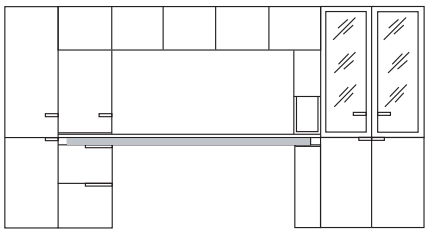
The Mazara pull is located asymmetrically on each face. Combinations of long and short pulls and their bias mounting locations add to the visual dynamic of Vestrada.

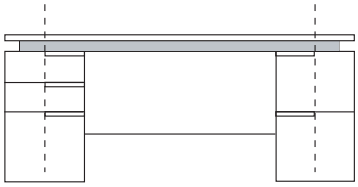
Mazara pulls are designed to be placed to the right of the center line regardless of the drawer width. Therefore, pulls on a 16” pedestal will extend to the outer edge while on a 24” pedestal, the pulls fall short of the edge.

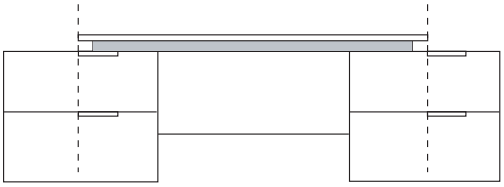
Mazara pulls when specified on factory assembled desks are located toward the kneespace rather than the typical right bias position as described above. Factory assembled desks include double pedestal desks with 16” or 24” wide pedestals.

Mazara









Factory assembled Desk Mazara pull locations.

Modularly shipped Mazara pull locations.

An alternative to the asymmetrically located pull, is the Fimosa pull, with a centered mounting location.

Figure A

LOCKS
Locks are provided as standard features on all pedestals, including those in desks, credenzas and lateral file storage units. Lock plugs for pedestals are located on the upper right hand corner of the top drawer. See Figure A, 1 above. Lock color will match pull color selection.

Locks are not available on glass doors or wood/glass door combinations. See Figure A, 2 above. Optional locks are available on wood doors for closed bookcases, hutches and overheads at an upcharge of $105 list per set of (2) doors. See Figure A, 3&4 above. If a hutch or overhead has an uneven amount of doors the single lock required is $56.

Lock plugs for bookcase wood doors are located on the top right hand corner of the door front.
Lock plugs for wood door overheads are located on the lower inside corners.

Suites can be keyed alike at no upcharge; please specify on your purchase order.

POWER MANAGEMENT

All worksurfaces may be specified with one rectangular plastic grommet in a standard location at no upcharge. A $114 list upcharge will apply to additional grommets and for all grommets requested in non-standard positions.

The grommet position must be indicated for each worksurface on order.

Rectangular Grommet
Standard plastic rectangular grommet is available in black or gray and has a dimension of: 4 1/8" x 2 11/16" at a list price of $100.
The grommet can also be field installed with power drill, 2 1/4" hole saw and rasp or saber saw. Template for drilling is available.

PowerPort
PowerPort is a unique, specially designed power and communications port. PowerPort is constructed of anodized aluminum and does double duty by providing a means of having wires pass through the worksurface while additionally providing a portal for power and communication connections. The PowerPort is available with or without a power bar and is not available for field installation.

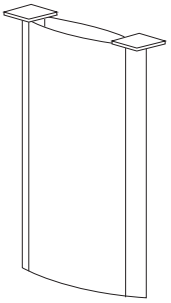
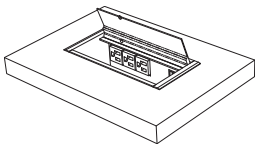
VESTRADA | WIRE MANAGEMENT



WORKSURFACE ELLIPTICAL BASE SUPPORTS

The Vestrada Elliptical base is a refreshing change from the standard supports offered in most casegood lines. End caps are made from aluminum and the body of the base is covered in either wood veneer or grade 3 palette panel fabric, and has Satin Aluminum end caps. Its design allows for not only a stylish look but provides for unseen wire management. By removing the veneer panels, access is gained to the interior where wiring can be routed from the worksurface to floor or wall receptacles.

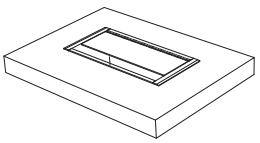
Small cut-outs at the top and bottom of the base along the inside center allow wires to be channeled down through the length of the base and into floor mounted power/data monuments.



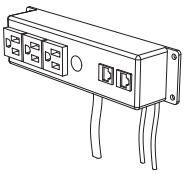
ELECTRICAL WIRE MANAGEMENT

The Vestrada system of wire management incorporates many features to simplify the process of connecting electrical and communication equipment.

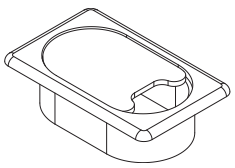
A PowerPort is a unique worksurface mounted module that can be specified to a location that best serves the users needs. It can be specified either with or without electrical or communication features or with a UL approved electrical and communications power bar.
A service module having no power bar will serve as a large grommet. A generous hinged lid easily enables the passage of several cables and devices which have large transformer plugs through the worksurface. See page 212 for PowerPort options.



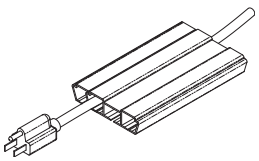
A plastic rectangular grommet in black or grey is also available. It has no optional electrical service, but serves to provide cable passage for areas not requiring a large opening. One rectangular grommet in a standard location accompanies any worksurface. For additional grommets see page 213 for pricing. Grommets can be field installed with a power drill, 2 1/4” hole saw and rasp or saber saw. Template for drilling is available.



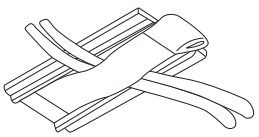
Beneath the worksurface is a series of wire management troughs that can be field installed. Every trough is divided into four separate channels, each with a flexible cover that permits easy insertion of wire cables. The supporting worksurface frame will be encountered at intersections of interconnecting tops. It will be necessary to “loop” any cabling below the frame and return it to the next series of wire management troughs. A velcro wire management strip is provided to assist in containing the cables as near the area where the cables are looped around the frame. (Only comes with PowerPorts).



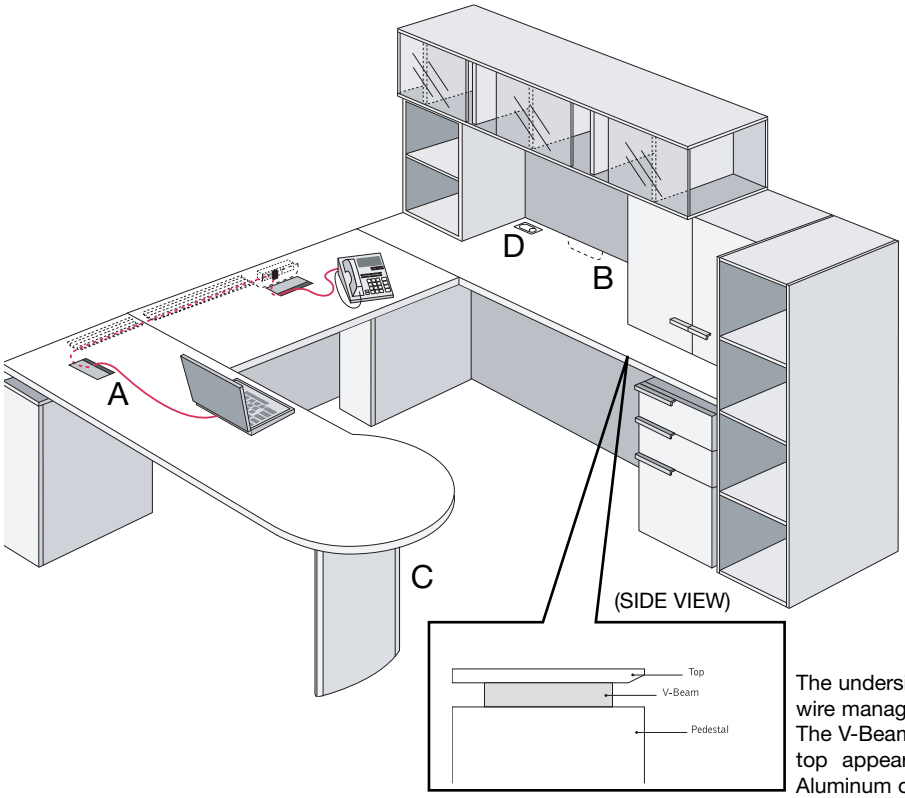
Double pedestal desks feature a wire management passage in the back of the pedestal for use when PowerPorts or rectangular grommets are located above pedestals.



Connecting to wall located outlets, requires passage through modesty panels. Hinged modesty panels feature a crescent shape cut-out. The wire management cut-out is also available on fixed modesty panels.



(A) The PowerPort worksurface module provides immediate plug-in capability for voice, data, and electrical connections, as well as cable storage .
(B) Hinged modesty panels with wiring cut-outs provide quick access for wiring to wall and floor monuments.
(C) Elliptical bases feature a removable veneer panel for wire management on both sides of the base.
(D) Rectangular plastic grommets in black or grey provide cable passage for black areas not requiring a large opening.



The underside of VESTRADA tops feature a concealed wire management cavity created by the V-Beam. The V-Beam also gives VESTRADA its unique floating top appearance. The V-Beam is available is Satin Aluminum or Matte Black.

LAMINATE WORKSURFACES

Laminate worksurfaces are available for the VESTRADA product line at an upcharge of 10% (a higher upcharge may apply to specially priced plastic laminates). See page 7 for a list of Krug standard laminates.

Where there are wood profile edges on worksurface tops, they will remain as wood profiles on laminate tops. Where there are flush edges, as in the backs of credenzas or link units, they will be self edged with laminate.

Krug will order and procure laminates. Purchase orders with a plastic laminate option must include:

Manufacturer's Name
Laminate Name
Laminate Number

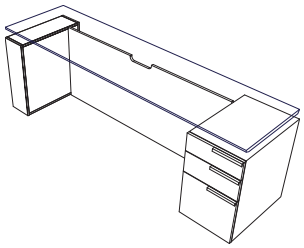
Laminate sheen level should not exceed 60° for maximum durability of work surfaces.

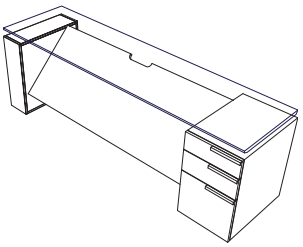
Please contact Krug Customer Service if ordering wood grain patterned laminate for VESTRADA product to ensure proper ordering procedure for grain direction.

Krug reserves the right to decline a laminate that may not be suitable for the application. Krug assumes no responsibility for the durability, consistent coloration or any other performance characteristic of a customer specified laminate.

Laminates will extend the normal lead-time, check with Customer Service for current scheduling information.

VESTRADA | MODESTY PANELS & PEDESTALS





MODESTY PANELS

VESTRADA modesty panels are available in a variety of styles and sizes with many unique features..

Floating modesty panels are available on all free standing and transitional Run-Off Desks and Table Desks.

Tempered glass face-mounted modesty panels are available on all double pedestal desks.

Wood face-mounted modesty panels are available on rectangular and bow-top double pedestal desks only.

Recessed modesty panels, available on desks, returns and credenzas are available in both 3/4 and full height versions. Recessed modesty panels are inset by 4.75” inches.

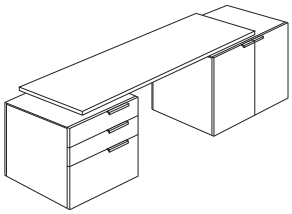
Hinged modesty panels are optional on all credenzas, returns and link units and feature a wire management cut-out in a top centered position to allow access to wall mounted power and data outlets.

The wire management cut-out option is available on returns and link units, and is standard on hinged modesty panels and credenzas with fixed modesty panels.

Floating Modesty Panel

Glass Face Mounted Modesty Panel

Wire Management Cut-out Standard on hinged modesty panels. Optional on fixed modesty panels.



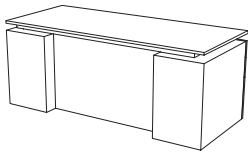
PEDESTAL OFFSETTING

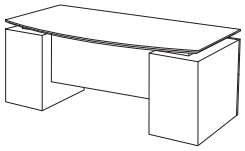
VESTRADA offers the unique and functional feature of offsetting pedestals when ordering modular product. This feature is available on VESTRADA desks, returns and credenzas. (please see modular pricing section for options).

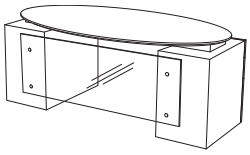
Pedestal offsetting provides the flexibility for more or less kneespace depending on the space constraints involved. Using either anti-skid tape (comes standard with all modular VESTRADA product to provide infinite off setting amount) or VESTRADA’s unique metal-to-metal fitments (provided for preset positions only. 2 per case regardless of width), tops can be placed over pedestals in a variety of locations at any time.

This feature not only provides solutions where space and comfort is required, but also gives each VESTRADA setting the unique style and design. Whether it is a dramatic 32” offset left and right pedestal credenza, or a classic 16” inset left and right pedestal credenza, VESTRADA gives every user the option to change as the workplace evolves.

Because tops must be under supported by at least 12” of pedestal, offsetting is only available when used in conjunction with 24, 32 and 36” wide pedestals (please see modular pricing section for options).







DESKS

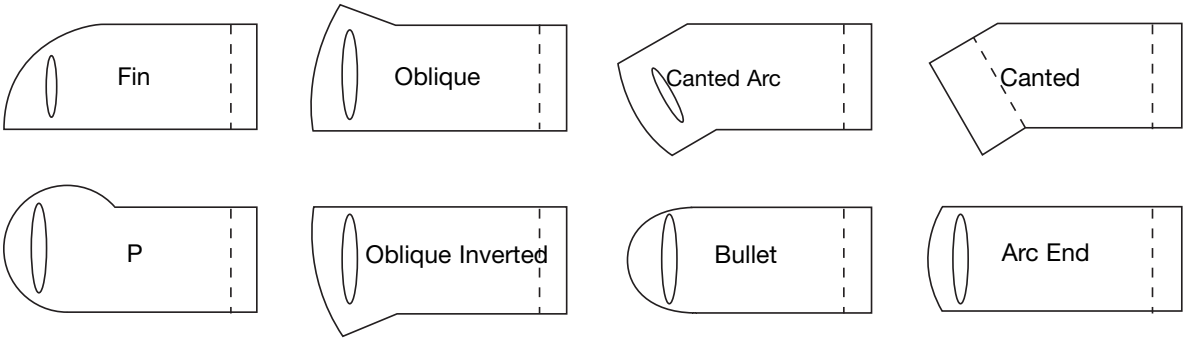
Single and double pedestal desks are available with rectangular, bow or elliptical top shapes.

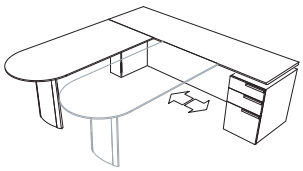
Vestrada desk compositions have numerous features that allow each user the ability to customize their workspace.

8 different top shapes, a huge selection of pedestal styles and sizes, and a unique modesty panel offering combine to make the Vestrada desk incredibly functional and stylish.

Additional features include a bow top option on rectangular desks as well as leather inserts, which are available on Rectangular or Bow-top desks. Please see Desk section for more information.

VESTRADA run-off desks are available in 8 unique shapes as shown below.





RETURNS & RUN OFFS

In terms of options and versatility, the Vestrada Return offering is second to none.

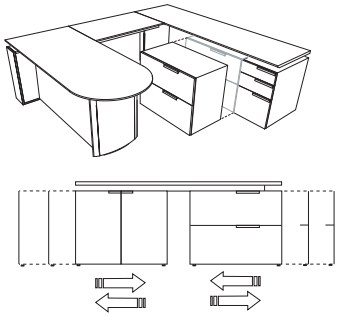
Basic pedestal returns, curvilinear returns with elliptical bases and sliding returns allow the user to move the return to various positions.
Please see pages 152-167 for options and pricing.

The TracDesk is a unique worksurface that moves along a track facilitated by a mobile elliptical base. Please see pages 168-169 for pricing and options.

TABLE DESKS

Table desks are available in rectangular and elliptical tops, which can accommodate pedestals on either side of its bases for storage.
Turn to page 149 for compatible pedestals.
Floating modesty panels are available on both size options. A bow top option is also available for the rectangular top.

VESTRADA | CREDENZAS & ACCESSORIES



CREDENZAS

VESTRADA credenzas offer a broad selection of storage solutions for any office.

Credenzas are available as full-face units, and units with fixed pedestals that are offset from the worksurface. Additionally, a select number of credenzas offer an added feature, pedestals that are movable. These pedestals can be moved laterally in relation to the worksurface. Moving a pedestal outward provides for more knee-space, while moving the pedestal inward will allow for more space around the unit.

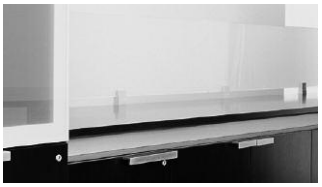
Credenzas in this line are available with inset pedestals, with inset and offset pedestal combinations, or as full face units. Credenzas can be specified using modular components (see pages 197-207) or as a factory assembled cases. Modular versions offer the option to move pedestals in toward the kneespace or away from the kneespace depending on space constraints.

ACCESSORIES

All upper storage configurations having a tackboard will provide an area for the support of convenience accessories.

An optional extruded aluminum rail is attached to the tackboard in a manner that leaves no visible screws. With the rail attached, suspension of each accessory is a simple manner of hooking onto the rail's edge. Each accessory can be removed or repositioned along the entire length of the rail at any time.

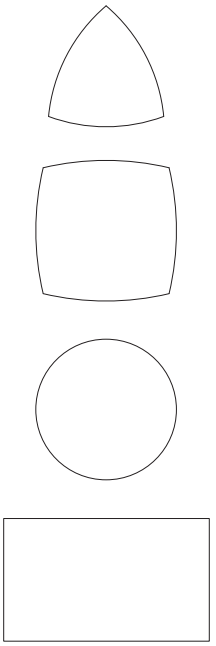
Accessories include a binder bin, flip sorter, paper tray, CD tray and file hanger.
Each item is construction of eighteen-gauge sheet metal and finished in a powder coated silver, to compliment all other metal finishes.



GLASS SCREENS

Glass screen dividers can be mounted to credenzas, returns or linking units to form a stylish visual barrier. The material selection for the screen is a 14" high, 6mm thick etched glass.

As a means of securing each panel to the work surface, metal screen holders are attached to the worksurface. Quantity varies by length, 2-4 brackets.



WORK / MOBILE WORK TABLES

Mobile tables are available in two heights in wood or paint. The lower height tables are designed to fit beneath standard worksurface heights. All mobile tables feature 3" locking casters to facilitate easy movement on any floor surface. Alternatively, stationary work tables are available with adjustable glides.

Glass tops are available for the Delta shape only. The 10mm thick tempered glass top is supported on three legs connected to a triangular metal frame.

Each leg is powder coated silver to complement all other metal components.

HUTCHES

VESTRADA hutches provide a traditional solution to overhead storage. See pages 243-245 for more information.

WORKWALL COMPONENTS

Workwall components provide custom overhead storage solutions. See pages 237-242 for Workwall component guidelines.

MODULE

An intrinsic design theme establishes the use of an 8” module throughout the product range.
This horizontal dimensional grid establishes a harmonious alignment of cabinet faces when cabinets are combined as a group. Horizontal alignment of drawer and door faces is maintained between cabinets. These properties ensure that the overall appearance of cabinets will be aligned with one another when combined into different settings.

To further reinforce a consistent appearance of this module, an 8” wide end support is used for supporting worksurfaces.

MODULARITY

VESTRADA has been designed for change with an enormous standard product offering and the ability to reconfigure and change-out components effortlessly. Pedestals are designed to be offset when space becomes constrained or increased. Metal-to-metal fitments and precise tolerances allow changes to be made quickly and easily without the need for an installer or confusing instructions. With features like TracDesk, mobile pedestals, and mobile work tables, the office can now adjust to the user rather than the user adjusting to the office. VESTRADA is flexible and ready for the changes and demands associated with the workplace – the way it should be.

LATCHES

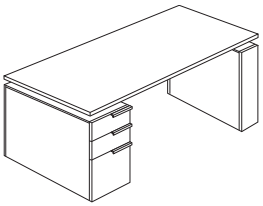
Hinged door overheads and 8” piers feature touch latches. All other hinged doors are self-closing with pulls.

GLIDES

Adjustable glides are installed at factory and are 1 1/4” long and allow for a range of adjustment of 3/4”.

HINGES

Hinged doors are European style with a 95 degree opening angle. Hinges on 8” pier cabinets providing end support have 83 degree hinges to prevent contact with adjacent cabinets or walls. All hinges are fully adjustable.



CODE DESCRIPTION

Left and right designations within model numbers are allocated as sitting at the case. e.g; The below image is a left handed pedestal.

TESTING INFORMATION

VESTRADA meets or exceeds the testing requirements of ANSI/BIFMA X5.5-1998.

VESTRADA | CUSTOM SIZING

VESTRADA CUSTOM SIZING
As you can see, the standard range of sizes and options in VESTRADA is huge. But it doesn't end there. Using the instructions below, you can customize the sizing of most components and price yourself. Custom-sized products may require an extended lead time if they have not been previously engineered.

Products that can be custom sized:

Desks	(excluding elliptical top desks and face-mounted modesty panels)
Table Desks	(excluding elliptical top desks)
Run-Off Desks	(excluding curvilinear shaped units with a non-standard radius)
Link Units	
Returns	
Run-Off Worksurfaces	
Kneehole Credenzas	
Shells	
Modular Tops	
Modesty Panels	
Run-Off Worksurfaces	(excluding curvilinear shaped units with a non-standard radius)
Kneehole Credenzas	
Shells	
Modular Tops	
Modesty Panels	(excluding face-mounted glass modesty panel)
Wood Door Overheads	
Wood Door WorkWalls	
Bookcases	
Wood Door Storage Units	

Custom widths: Apply the price of the same unit in the price list that is one standard size larger than the desired case size (same depth). For example: The required custom dimension is 74"x24". The first standard size above this is 80"x24", so in this case, you would apply the price of the 80"x24" unit.

Custom depths: Apply the price of the same unit one size deeper.
For example: The required custom dimension is 72"x26". The first standard size above this is 72"x30", so in this case, you would apply the price of the 72"x30" unit.

Custom width & depth: Apply the price of the same unit both one size wider and one size deeper.
For example: The required custom dimension is 74"x26". The first standard size above this is 80"x30", so in this case you would apply the price of the 80"x30" unit.

Products that cannot be custom sized:

Pedestals and Lateral Files	Paper Management Shelves	Non-standard radius tops
Glass door units	Glass Modesty Panels	Elliptical Desk tops

Note: When the widths and depths are customized, all pedestal and file dimensions remain standard.
For custom widths or depths greater than the maximum standard widths or depths, or for any other custom inquiry, please contact Customer Service.

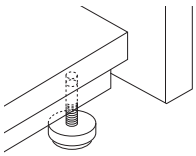
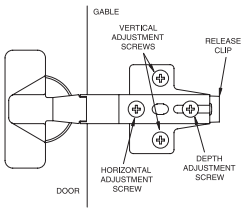
DRAWER REMOVAL
To remove pedestal drawers, open to the extended position, press down on the right side nylon release lever and pull the drawers up on left side lever at the same time. Continue pulling the drawer out of the case.



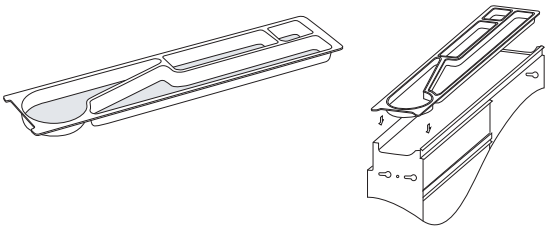
GLIDE ADJUSTMENT
Raise one corner of the unit at a time and adjust the glide to the desired height by turning the glide. Make sure unit is level after adjusting the glides. Please note that the maximum adjustment range of the glides is 3/4”.
When moving units after glides have been inserted, dial the glides to the lowest position to prevent damage to the case.



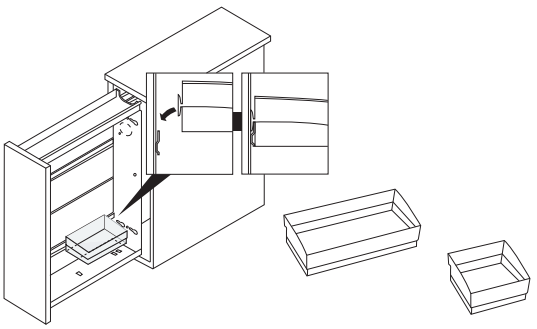
BOOKCASE OR HUTCH DOOR ADJUSTMENT
Hinges on all hutch and bookcase doors are designed to be adjusted for depth, horizontal and vertical adjustment by means of screws into the hinge mounting plates. To remove a door, squeeze the release clip and pull out the door, disconnecting the hinges.

VESTRADA | V-PED

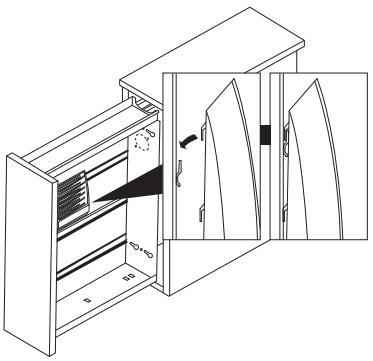
The VESTRADA V-Ped is a unique storage drawer consisting of components not normally found in casegoods pedestals. The unique vertical storage drawer is 8” wide and is available in conjunction with 16”, 24”, 32” pedestals. The interior is accessed by pulling the full vertical drawer face away from the pedestal body. The V-Ped cannot be used as a stand-alone pedestal, or ordered to be installed in the field. Please see below for a full breakdown of all components that come standard in V-Peds:



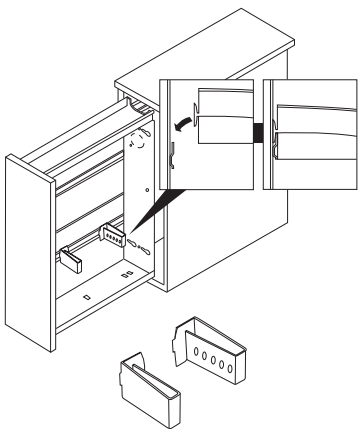
The top of the interior consists of a tray, into which a silver plastic pencil tray is fitted. This pencil tray is partitioned into four separate storage areas suitable for a variety of stationery needs.



The V-Ped comes equipped with 2 different sized translucent boxes, which can clip onto one of the 3 bars on the interior of the pedestal. The brackets clip onto the bars on the interior panel of the pedestal. The organizer boxes are an easy way to reduce clutter for stationery.



A translucent CD box holds several CD’s and clips onto the interior bars.



Translucent universal brackets are provided for holding any size of hanging files. Simply snap the brackets in place anywhere on the horizontal hanging bars inside the pedestal.

ORDERING NOTES:
Wire management cut-outs are standard on all corner credenza modesty panels.
The first dimension listed after the second"-" indicates connecting side dimensions, e.g. 81CC8036-24-L20R0 has a 20" connecting side.
Please note 24" BBF or FF/V-Ped is one component. V-Ped is always towards kneespace and is not available for field installation.
Corner Credenzas with V-Peds are NOT available on KrugExpress.

ORDERING PROCEDURES
To order, please specify the following:

1) Krug product model number
2) Wood species and finish, see page 124
3) Pull style and finish, see page 126
4) V-Beam color, see page 125
5) Grommet location and style if applicable

VESTRADA HUTCHES

Hutches include Halogen Lights that are factory installed and require no field adjustment.
Halogen Lights are mounted beneath the cabinet and hidden from view.

A tackboard in Grade 1 fabric is included with all Hutches.
Upcharges for higher graded fabrics are listed on page 245.
Tackboard fabric selections should be supplied with the order information. Palette options are listed on page 124.

Tackboards for Hutches are installed at the factory and require no additional set up on site.

Hutches over 84” in length are made in two pieces and require special installation.

Hutches are available with a finished inside back panel at standard list price, but must be clearly specified on order.
This option is available on Hutches up to 84” in length only. This option does not include a tackboard.

Locks are optional on wood hutch doors and can be specified at time of order for an upcharge of $100 list per set of (2) doors.

WORKWALL COMPONENTS | GUIDELINES

Unlike other Krug product lines, VESTRADA features the WorkWall as well as the traditional hutch.
WorkWalls are comprised of combination of overheads, worksurface piers and/or full height piers.
VESTRADA WorkWalls are available with an exceptional number of options and accommodate all standard credenza lengths.

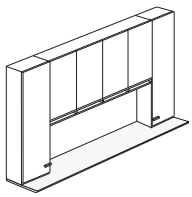
THE BASICS

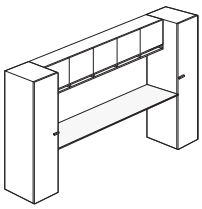
A WorkWall consists of 3 components: One Overhead and two storage Piers.
The Piers can either sit on the worksurface or extend to the floor.

There are 3 types of WorkWalls. These types are determined by the way the Overhead Unit is supported.

NOTE: Shaded horizontal tops in the drawings above represent Credenza tops.

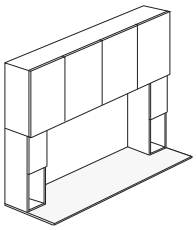
1. End supported WorkWalls*: Overhead is supported on both ends.

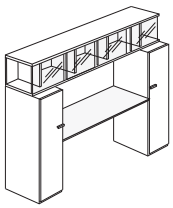


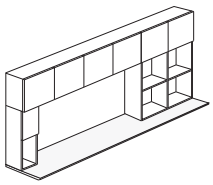


** WorkWalls that are End-Supported (as shown above) accommodate Paper Management Shelving.*

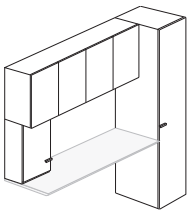
2. Under supported WorkWalls: Overhead is supported from underneath on both ends.

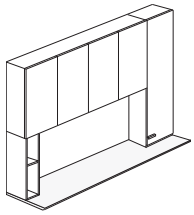






3. Under and end supported WorkWalls: Overhead is under-supported on one side and end-supported on the other side.





VESTRADA | WORKWALL COMPONENTS | GUIDELINES

The following are guidelines to bear in mind when building a WorkWall from components.

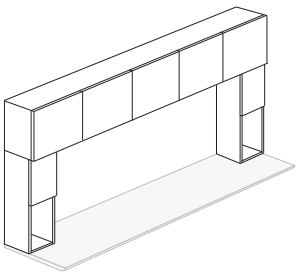
PIERS

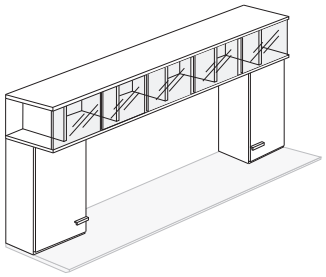
When supporting an Overhead in a WorkWall, there are some basic guidelines to follow:

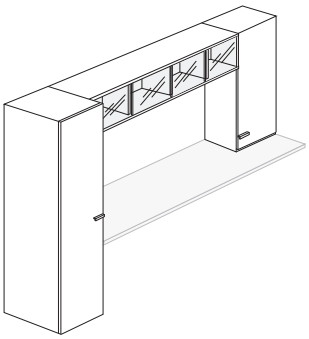
- Unless the Overhead is a Sliding Glass Door Overhead with open ends, any Overhead can be under-supported by 8” wide Piers as shown below/left.

- If the Overhead has open ends as shown below/center, it must be under-supported by a minimum of 16” wide Piers in order to sufficiently support the Overhead. Overheads with open ends can not be end-supported.

- 5 hi and 6 hi Storage Units can only be used as end-supporting Piers.
  4 hi Storage Units can only be under-supporting. Please see VESTRADA Price Guide for Storage options.







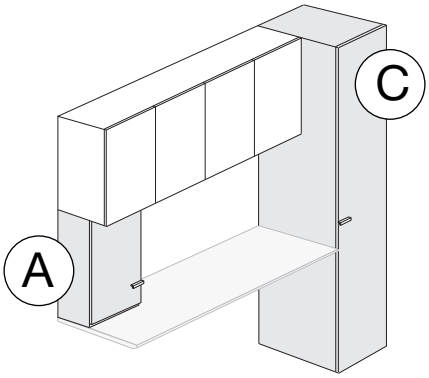
As mentioned in THE BASICS section, the Pier can either end or under-support the Overhead in a WorkWall.

In pages xx to xx, you will have a selection of Piers to choose from. Once you have selected the style and options for your Piers, you will need to specify the designation for each Pier in order to indicate how you would like to support your WorkWall.

For example, in the diagram shown below, we are showing a WorkWall that is both under and end-supported.
The codes for these designations are:

SUFFIXES FOR PIERS

LU – Left Pier / Under support
RU – Right Pier / Under support
LE – Left Pier / End support
RE – Right Pier / End support



In the example shown left the suffixes would be as follows:

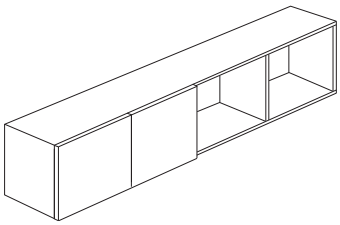
A : (Worksurface Pier) - LU Left Pier under support

C : (Storage Unit) - RE Right Pier end support

OVERHEADS

Overheads in this Addendum are only to be used in WorkWalls with supporting Piers.
For Wall Hung Overheads see page xx of the VESTRADA Price Guide.

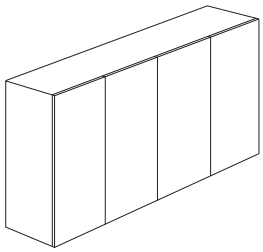
There are two different heights of Overheads in VESTRADA, single and double height.
Single height Overheads are available with the following options in wood or paint as shown on pages xx-xx:



- Hinged Doors
- Open
- Combination Open / Closed Hinged Doors
- Sliding Glass Door / Closed Ends
- Sliding Glass Door / Open Ends
- Aluminum Framed Glass Doors
- Combination Wood / Aluminum Framed Glass Doors

** Combination Sliding Glass / Open not available.*

Double height Overheads are available with the following options in wood or paint as shown on pages xx-xx.



- Hinged Doors
- Aluminum Framed Glass Doors
- Combination Wood / Aluminum Framed Glass Doors

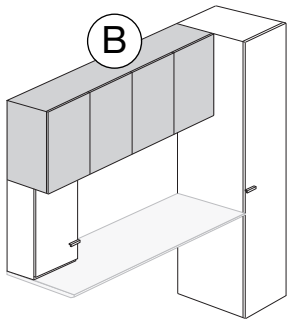
Therefore, Sliding Glass Doors are only available on single height Overheads, whereas Aluminum Framed Glass is available on single and double height Overheads.

As illustrated in the PIERS section, the user must indicate a suffix when ordering an Overhead for a WorkWall configuration. There is one exception to this: open ended Sliding Glass Door Overheads can only be under-supported by 16”or larger Piers.

For example, in the diagram shown below, we are showing a WorkWall with an Overhead that is both under and end-supported. The codes for all Overhead designations are:

SUFFIXES FOR OVERHEADS

LURU – Left Under and Right Under supported
LERE – Left End and Right End supported
LURE – Left Under and Right End supported
LERU – Left End and Right Under supported

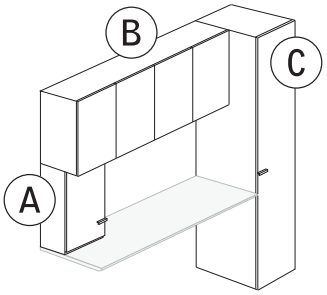


In the example shown left the suffixes would be as follows:

B: (Overhead)	-	LURE	Left Under supported / Right End supported

Piers and Overheads Summary

In conclusion, the suffixes for each component of the WorkWall line drawing are as follows:

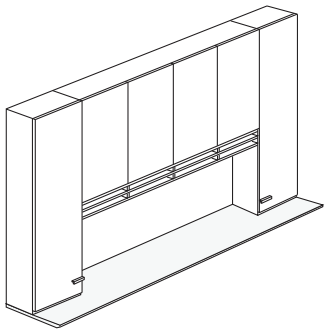


A - Desk Top Pier	- LU	Left Under Support
B - Overhead	- LURE	Left Under supported/Right End supported
C - Full Height Pier Storage Unit	- RE	Right End support

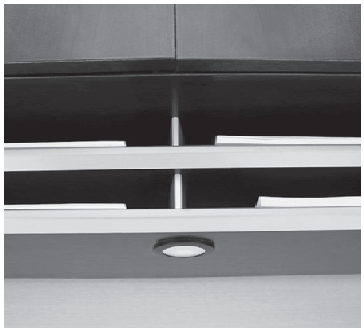
OVERHEAD PAPER MANAGEMENT

Paper management in VESTRADA can be specified in 1 or 2 tier versions. The general guideline for paper management is that the overhead, for which the paper management is being specified, must be end-supported on both ends. To specify paper management for your WorkWall, the overhead for which the paper management is to be added must be designated. A “PM” in the model number denotes that the overhead will be machined to accept paper management.
For example, if the model number for the overhead being specified is 81OH-641628 and the user requires paper management (either 1 or 2 tier), the model number would change to: 81OH-641628PMLERE
It is not necessary to designate on the overhead model number whether a 1 or 2 tier paper management unit is required. The type of paper management used is to be specified in the tackboard, halogen light model number (please see page 178). Depending on the size of WorkWall and location of piers and overheads, the paper management price will vary. For pricing on paper management options, please refer to the paper management upcharge/sizing chart on page xx.

**The machining for paper management cannot be done in the field.



TACKBOARDS, HALOGEN LIGHTS AND PAPER MANAGEMENT SHELVING



Tackboards and halogen lights (TBHL) need to be specified as a separate line item and are acknowledged separately on an order for WorkWall. A TBHL must be ordered to complete a WorkWall. The model number prefix for the tackboard, halogen light is TBHL.

When paper management is to be added, it must also appear in the tackboard, halogen light model number as they are all built as one part. The model number prefix for tackboard, halogen light and paper management tiers are:
(a) 81TBHLPM1–(for one tier paper management)
(b) 81TBHLPM2–(for two tier paper management)

Depending on the size of WorkWall and location of piers and overheads, the 81TBHL price will vary. For pricing and model numbers, please refer to the TBHL pricing chart on page XX.

LINKWALLS

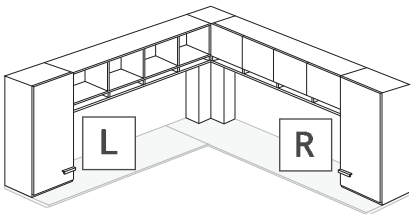
LinkWalls are WorkWall components that meet at a corner.
LinkWalls are comprised of two overheads that are end supported by a corner pier creating a corner solution.

Please follow these steps to specify your LinkWall from WorkWall components:

STEP 1: Choose your left pier.
• Designate under or end-supporting.

STEP 2: Choose your left overhead*
• Designate left end or under-supported.
• The right designation can only be end-supported.
• If specifying paper management add PM to overhead model number.
With paper management both sides must be end-supported.
*Sliding glass door overheads with open ends are not available in LinkWall configurations.

STEP 3: Specify corner pier - model number 81PRC-161640
• If paper management** is required specify 1 or 2 tier by adding PM1 or PM2 to the end of the pier model number.
**The 1 or 2 tier paper management can only be ordered if used on both sides of the LinkWall.



STEP 4: Choose your right overhead*
• Designate end or under-supported.
• The left designation can only be end-supported.
• If specifying paper management add PM to overhead model number.
With paper management both sides must be end-supported.
*Sliding glass door overheads with open ends are not available in LinkWall configurations.

STEP 5: Choose your right pier
• Designate under or end-supporting.

STEP 6: Specify tackboard - TBHL for both overheads
• Determine TBHL size.
If the overhead and piers are both end-supporting simply use the size of the overhead.
If a pier is under-supporting subtract the amount of the pier which sits underneath the overhead from the size of the overhead.
• If specifying paper management add PM1 or PM2 to TBHL model number and apply applicable upcharge to the price of the TBHL.

VESTRADA | HUTCH, TACKBOARDS, PAPER MANAGEMENT PRICING

Tackboard upcharges for hutches.
Use this chart to find the upcharge for tackboard fabrics graded 2–9 and add it to the cost of the hutch.

	FABRIC GRADES								
	2	3	4	5	6	7	8	9	com
64” hutch tackboard	122	262	386	516	640	762	885	1099	2.25
72” hutch tackboard	146	313	459	618	765	913	1061	1275	2.25
80” hutch tackboard	204	427	634	838	1044	1248	1452	1718	2.75
88” hutch tackboard	231	479	711	940	1172	1401	1630	1892	2.75
96” hutch tackboard	253	527	782	1033	1288	1542	1792	2079	3.00

On single piece hutches, the yardage requirement for two tackboards is the same as for one tackboard. Please keep this in mind when ordering more than one tackboard. For example, if the number of tackboards required is 7 and the COM requirement for 1 tackboard is 1.5 yards, the calculation for COM yardage is as follows: 4.5 yards are required for 6 tackboards + 1.5 yards for the 7th tackboard for a total of 6 yards. In the case of an even number of tackboards, divide the number of tackboards required by 2 and multiply that number by COM requirement on the chart.
The fabric must be at least 54” wide in order to qualify for this procedure. If the fabric is less than 54” wide, the COM yardage listed on the chart is the amount required for each tackboard.

* Palette Panel fabrics are Grade 3 fabrics.

A tackboard in grade 1 fabric is included in the price of the hutch.

Paper Management upcharges to be added to the price of the hutch.

level® CERTIFICATION, AIR EMISSIONS AND FSC® CERTIFICATION

level® Certification
BIFMA's e3 Furniture Sustainability Standard is a voluntary, multi-attribute standard that measures the degree of sustainability of furniture. This standard evaluates product and company environmental attributes and compliance systems in a wide range of elements which include Materials, Energy & Atmosphere, Human & Ecosystem Health and Social Responsibility. Virtu products have earned level®, BIFMA's sustainability certification program for furniture, certification through third-party verification against the e3 standard.

Air Emissions
All Virtu products can be supplied with air-emissions certification. Contact customer service for information and upcharges.

FSC

FSC® C021699
The mark of responsible forestry

FSC®
In 2005, Krug received Forest Stewardship Council® (FSC®) Chain-of-Custody certification for our manufacturing facilities. The FSC® Chain-of-Custody tracks certified wood from seedling to final sale. It signifies that the growth, harvesting and production of goods are entirely achieved through responsible forestry, which guarantees a healthy supply of forest resources for generations to come. Virtu and other Krug products can be specified with one of two types of FSC® Certification:
(a) FSC®-certified (which includes FSC®-certified lumber, veneer and substrate material)
(b) FSC®-mix certified (which includes substrate material only, and is a lower cost option certification)
Both FSC® certification types may require upcharges, and often require additional lead time. Contact customer service for further information, pricing and leadtimes.

In addition, architects, designers, and building professionals can specify FSC®-certified products in order to achieve a point from the US. Green Building Council's Leadership in Energy and Environmental Design (LEED) Rating System.

WOOD FINISHES

PALETTE FINISHES
Standard solid color finishes are:

Black
White
Sand
Soft green
Steel blue
Slate

Palette finishes are available on selected components in VIRTU as a special. please contact Customer Service for pricing and lead time requirements.

Wood is a natural product with inherent color variations that will never be fully mitigated by the finishing process. Please anticipate variation in colors within a single unit, from piece to piece, and from Krug wood finish samples. If a very close match is required, a sample must be provided with the order and an upcharge will apply. Exact color matches are not possible.

CUSTOM WOOD FINISHES
Add 10% net to your order for special finishes, minimum charge is $500 list per finish per order. (For example, on all orders up to $5000 list and upcharge of $500 list will apply, on orders $5000 and up add 10% net to your order.) For orders with special finishes, a sample that is a minimum 3” by 3” must be received with the order. Special finishes may add additional lead time to production schedules.

Since wood is a natural product, some variations in grain, color, and stain acceptance will occur. In our finishing processes, we try to minimize variations, but some variation between samples and finished goods should be anticipated.

BIRDSEYE MAPLE
Bookmatched Birdseye Maple veneer is available at an upcharge of $55 list per square foot. Specify clearly on order. Birdseye Maple is recommended in clear finish only. Birdseye Maple only applies to tops.

DUAL FINISH
Add 10% net per item if specifying dual finish.

CUSTOM PALETTE FINISHES
Custom palette finishes are available at an upcharge of 10% list and an additional 2 weeks lead time after final color approval.

VIRTU | POWER MANAGEMENT

POWER MANAGEMENT

ROUND GROMMET
A satin metallic round grommet with an open and shut mousehole serves top provide cable passage for areas not requiring a large opening. All cases can be specified with one grommet in a standard position at no upcharge. A $100 list upcharge will apply to additional grommets and for all grommets requested in non-standard positions. The grommet must be indicated for each case on the order.

Standard grommet sating metallic round, 60mm dia.

Standard grommets do not provide electrical service.

Grommets can also be field installed with a power drill, 60mm hole saw and rasp or saber saw. Please keep in mind the location of grommets when specifying paper managers or pier hutches for use with worksurfaces. For example, a paper manager on the left-hand side may be used with a ‘C’, ‘BR’ or ‘AR’ grommet.

POWERPORT
A PowerPort is a unique worksurface mounted module that can be specified to a location that best serves the user’s needs. It can be specified without any features or with a UL approved electrical, voice and data power bar.

A service module having no power bar will serve as a large grommet. A hinged lid easily enables the passage of several cables and devices, which have large transformer plugs through the worksurface. Please see page 335 for PowerPort option.

Please keep in mind the location of Power Ports when specifying paper managers or pier door hutches for use with worksurfaces. For example, a paper manager or pier on the left-hand side may be sued with a ‘C’, ‘BR’ or ‘AR’ PowerPort.

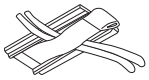
VIRTU | WIRE MANAGEMENT

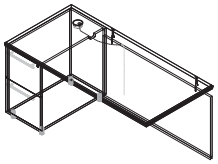
TROUGHS
Beneath the worksurface optional wire management troughs are available. Every trough is divided into four separate channels, each with a flexible cover that permits easy insertion of wire cables.



VELCRO STRIPS
A velcro wire management strip is available to assist in containing the cables.

ELLIPTICAL BASES
The elliptical base end caps are made from aluminum and the body of the base is covered in veneer. By removing the veneer panels, access is gained to the interior where wiring can be routed from the worksurface to floor or wall receptacles. Small cut-outs at the top and bottom of the base along the inside center allow wires to be channeled down through the length of the base and into floor mounted power/data monuments.

WIRE MANAGEMENT CAVITY
VIRTU casegood desks can be specified with a hidden wire management cavity, see page 38 for model numbers and pricing. The wire management cavity is accessed from the front of the desk by a hinged door and is completely concealed in the closed position. The wire management cavity includes a four-receptacle power bar mounted on the inside pedestal gable.



PEDESTAL ACCESS WIRING GROMMET - FACTORY ASSEMBLED CASES ONLY
All VIRTU casegood desks allow for wire management behind the pedestal drawers. Pedestal gables feature a standard cable management opening allowing access to the rear of the pedestal cavity. By specifying a wiring grommet in a standard AL or AR position (see grommet locations on pages 17-18), cable can be conveniently threaded behind the pedestal drawers and through the wire management access grommet.

HUTCH POWER/DATA/VOICE MODULE
Access the power and data is made simple by using a hutch with a power/data/voice module built right into the tackboard. The module is fully installed at the factory but can be removed to connect data links on site. It features a flip door that retracts into the case of the unit when open.

VIRTU | PRODUCT FEATURES

DESKS
Single and double pedestal desks are available with rectangular, bow top shapes.

36” deep desks and bow tops feature a guest side 6” overhang; 30” deep desks do not feature this overhang.

Additional features include a wood modesty or frosted acrylic recessed modesty panel, wire management pedestals and leather inserts, which are available on rectangular or bow top desks. Please see desk section for more information.

5 different curvilinear top shapes, with tapered legs or elliptical bases provide a wide selection of functional and stylish desks.

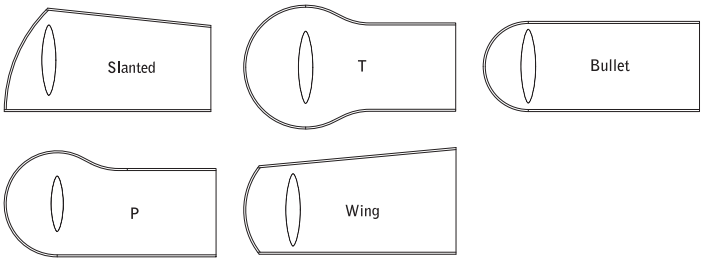


TABLE DESKS

Rectangular table desks are available with or without a partial fixed wood modesty panel, or casters.

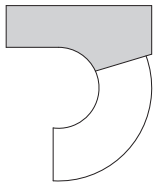
Crescent table desks are vailable with or without a partial fixed frosted acrylic modesty panel, or casters.

Table desks come standard with wire management aluminum legs finished in stain metallic.

RETURNS
Rectangular returns are only available with a full height fixed or hinged modesty panel, and a variety of standard pedestal options. Alternative pedestals, open returns and returns without modesty panels must be specified from the modular section as tops and pedestals.

Curvilinear returns are available in 5 shapes (same as curvilinear desks) with 3 base styles: tapered wood, tapered metal and elliptical base. Additional features include full wood modesty panels (elliptical bases only), partial floating wood, partial floating metallic and partial frosted acrylic modesty panels.

Crescent table returns are not stand-alone cases and must be specified with curved corner credenzas. Available with or without a fixed frosted acrylic modesty panel.



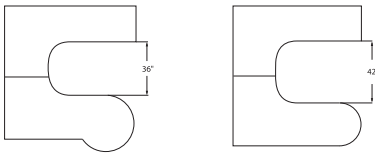
CREDENZAS
Single and double pedestals credenzas are only available with full height fixed or hinged modesty panels with a variety of standard pedestal options. Alternative pedestals, open credenzas and credenzas without modesty panels must be specified from the modular section as tops and pedestals.
Corner credenzas are not stand-alone cases and must be specified with crescent table returns, to create a Curved Crescent Unit. The credenza is available with a full height fixed of hinged modesty panel. The return is offset from the credenza to allow for a storage cabinet door to open. (Illustration at left, in shaded area.)

Full-face credenzas are available in a variety of lateral file/bookcase configurations and can be specified with a glass top or glass privacy screen.

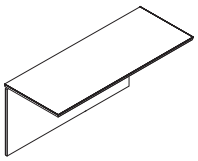
2 PIECE 'U' CONFIGURATIONS
VIRTU 2 piece 'U' configurations provide a practical and stylish 'U' shaped workspace, without the use of a linking unit.

The 2 piece configurations require a curved corner desk and a 48" corner credenza. These cases cannot be specified as stand-alone and must be combined to create the 'U' configuration.

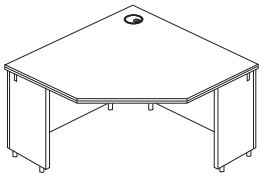
The curved corner desk in a 2 piece configuration can be specified as a bullet or 'P' top with 3 base styles: tapered wood, tapered metal or elliptical base. Additional features include full wood modesty panels (elliptical bases only), partial floating wood, partial floating perforated metallic and partial frosted acrylic modesty panels.



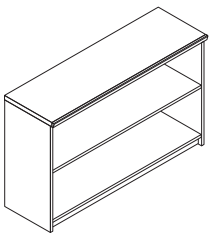
When a 'P' curved corner desk is specified in a 2 piece 'U', the user clearance between the worksurface is 36". When a bullet curved corner desk is specified in a 2 piece 'U', the user clearance between the worksurfaces is 42".



LINKING & CORNER UNITS
Linking units are for use between desks and credenzas in creating a U-shaped configuration, and must be supported at both ends. They are available with a fixed or hinged modesty panel.



A corner unit can be used in a U-shaped configuration, or it can be an integral part of an L-shaped work area with returns linked to either side. Corner units have a standard grommet included in the back corner for ease of cable management, and also have additional wire management access grommets in the half gables so that cables can be run to other areas of the connected worksurface. VIRTU casegood corner units accept 24" deep worksurfaces.



OVERHEADS
Single and double high wall mounted overheads come standard with fluorescent tasklights and mounting hardware.

Florescent tasklights are factory installed and require no field adjustment.
Options include wood or matte silver framed frosted glass doors and a wood or matte silver light rail. Tackboards are also available with wall mounted overheads.

Overheads feature a front profiled edge.

VIRTU | PRODUCT FEATURES

HUTCHES

Tasklights and a Krug panel fabric garde 1 tackboard come standard on all hutches.

Pier door options include open or closed wood. Pier doors are not available in glass. A wood or matte silver light rail and a voice power data module are also available.

These features are not available on every hutch. Please see hutch section, pages 119-126 for more information.

5-hi and 6-hi hutches come in a variety of combinations. The following chart outlines the number of doors per hutch size.

60-84” 4 doors
96” 6 doors

96” hutches will have double partition in the center.

Project 4 1/2-hi hutches are available with or without a pier.
Project hutches do not have overhead doors. The overhead is comprised of paper manager slots.
Hutches feature a front profile edge.

MODULAR
All VIRTU modular cases are ordered in components.
Boring for left and right configurations will be applied to all cases for easy re-configuring.

All modular cases come standard with connecting inserts and covers installed inside the end panels. these connectors are used to configure workstations without having to permanently modify the units with wood screws, and can be easily taken apart as needs of the workspace change. Cases ordered without modesty panels are manufactured to be non-handed and re-configurable.

A wide variety of modular tops, modesty panels and pedestals are available.

See pages 104-105 for modular guidelines and pages 106-113 for specifications and pricing.

If required, modular cases can be shipped assembled. Drawings are required for this option. please contact Krug Customer Service for more information.

MODESTY PANELS
VIRTU modesty panels are available in a variety of styles and sizes with many unique features.

Modesty panels are standard on all desks, returns, credenzas and optional on curvilinear tops and linking units.

Desk, credenza, return, linking unit, and curvilinear top modesty panels are 3/4” thick.

Full fixed wood modesty panel

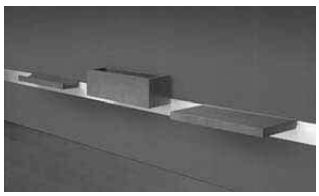
Full hinged wood modesty panel

The following lists the different modesty panels throughout VIRTU:

Full recessed wood and frosted acrylic modesty panels are available on rectangular desks.
Partial fixed wood modesty panels are available on table desks.
Partial fixed frosted acrylic modesty panels available on all crescent table desks and crescent returns.
Full fixed and hinged wood modesty panels are available on returns, credenzas and linking units.
Full fixed wood modesty panels are available on curvilinear desks and returns with elliptical bases only.
Partial floating wood, frosted acrylic perforated metallic modesty panels are available on curvilinear desks and returns with tapered legs, or elliptical bases.
•
•

VIRTU hinged modesty panels are removable to allow for complete access to building utilities.

VIRTU | ACCESSORIES | GLASS SCREENS



ACCESSORIES
VIRTU casegoods introduces Krug's initial collection of wood accessories. All hutches with a tackboard provide an area for the support of these convenient accessories.

An aluminum rail is available to support a variety of wood accessories, which include a paper tray, pencil shelf and accessory bin. The rail is attached to the tackboard leaving no visible screws. The accessories hook onto the rail edge and can be re-positioned along the length of the rail at any time.

GLASS SCREENS
Frosted glass screen dividers can be mounted to full face credenzas and credenzas with fixed modesty panels to form a stylish visual barrier. The material section for the screen is 14" high, 6mm thick acid etched glass. Glass screens are to be field installed. The accompanying worksurface will not be pre-drilled. 2-4 brackets will be supplied depending on the length of the screen.

Please note the following inset of the glass screen on a credenza of the same size:

Credenza Size	Glass Inset
96" & 72"	1" on each end
84"	3" on each end

VIRTU | GENERAL PRODUCT SPECIFICATIONS

PALETTE FINISHES
Palette finishes are available on selected components in VIRTU as a special. Please contact Customer Service for pricing and lead time requirements.

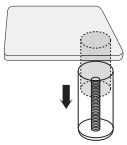
VENEERS
External face veneers are rift cut Red Oak, flat sliced Cherry, Walnut, Maple or Anigre bookmatched veneer.

FINISH
All finished surfaces are well sanded before applying finished materials. The procedure begins by applying a base color via an N.G.R. stain. A wash coat follows to further enhance the color. A filler coat is applied to fill open pores and wiped clean. A sealer coat is applied and scuff-sanded to prepare for the topcoat (finish). The final procedure is to apply a catalyzed varnish that, when dry, has a sheen value of 32°.

DRAWERS
Desk box and file drawers have fully progressive full extensions slides.
All drawer interiors are clear-finished birch on particleboard constructed with dowels. All file drawers are equipped for letter and legal filing.
All box/box/file pedestals in desks are supplied with one molded black pencil tray.

GLASS SURFACES
All vertical and horizontal glass surfaces are acid etched.

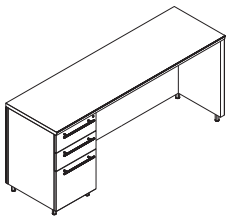
LEVELING LEG (STANCHIONS)
Standard on all desks, storage units, full-face credenzas and pedestals is a unique leveling leg - a satin metallic casing moves up to allow for access to a glide, then easily slides into place around the glide, concealing it from view. The guide can be adjusted 3/4", legs are 1 3/4" high.



HINGES
Hinges on all hutch, overhead and bookcase doors have a European style with 110° opening. All hinged are fully adjustable.

TASKLIGHTS
VIRTU florescent tasklights are elegantly slim.

CODE DESCRIPTION
Left and right designations within a model numbers are allocated as sitting at the case, e.g. the image to the right is a left handed pedestal.



TESTING INFORMATION
VIRTU casegoods meet or exceed the testing requirements of ANSI/BIFMA x5.5-1998.
VIRTU storage units meet or exceed the testing requirements of ANSI/BIFMA x5.9-04.

Wood Door Storage Units

Custom Width: Apply the price of the same unit in the price list that is one standard size larger than the desired case size (same depth).
For example: The required custom dimension is 74” x 24”. The first standard size above this is 78” x 24”, so in this case you would apply the price of the 78” x 24” unit.

Custom Depth: Apply the price of the same unit one size deeper.
For example: The required custom dimension is 72” x 26”. The first standard size above this is 72” x 30”, so in this case you would apply the price of the 72” x 30” unit.

Custom Width & Depth: Apply the price of the same unit both one size wider and one size deeper.
For example: The required custom dimension is 74” x 26”. The first standard size above this is 78” x 30”, so in this case you would apply the price of the 78” x 30” unit.

Products that cannot be custom sized:

Pedestals and Lateral Files
Paper Management Shelves
Non-Standard Radius Tops
Glass Door Units

NOTE: When the widths and depths are customized, all pedestal and file dimensions remain standard.
For custom widths or depths greater than the maximum standard widths or depths, or for any other custom inquiry, please contact Customer Service.

FILING INSTRUCTIONS

All file drawers will accept both letter and legal size filing.
All units are equipped with file bars to accommodate filing in either direction.

Desk Filing Capacity:

16” wide file drawers
21” of letter filing front to back, or
12” of letter filing side to side and 8” of letter filing front to back, or
12” of legal filing side to side and 5” of letter filing front to back

Weight capacity of the pedestal file drawers is 90 lbs.

Credenza and Return Pedestal Filing Capacity:

16” wide file drawers
20” of letter filing side to side, or
20” of legal filing side to side

Weight capacity of the pedestal file drawers is 90 lbs.

30” of letter filing front to back, or
25” of legal filing side to side, or
15” of legal filing front to back

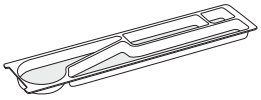
When filing front to back, 30” lateral file drawer widths allow two rows of letter filing, but only one row of legal width.

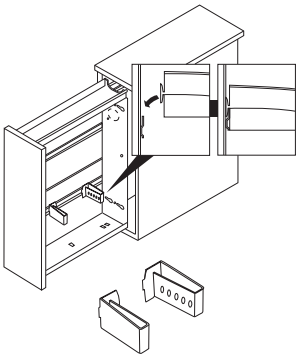
Weight capacity of the pedestal file drawers is 150 lbs.

Lateral File 36” Wide Drawers Filing Capacity:

30” of letter filing front to back, or
36” of legal filing side to side, or
30” of legal filing front to back

Weight capacity of the pedestal file drawers is 150 lbs.





ORGANIZATIONAL PEDESTAL

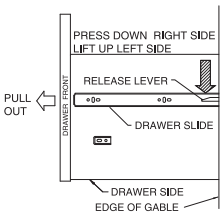
The unique vertical storage drawer is 8” wide and is available only in the specified organizational peds.

Pull the full vertical drawer face away from the pedestal body to access the interior. The top of the interior consists of a tray, into which a silver pencil tray is fitted. This pencil tray is partitioned into four separate storage areas suitable for a variety of stationery needs.

The organizational pedestal comes equipped with 2 different sized translucent boxes, which can clip onto one of the 3 bars on the interior of the pedestal. The brackets clip onto the bars on the interiorpanel of the pedestal.

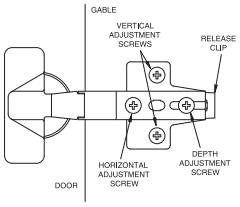
A translucent CD box holds several CDs and clips onto the interior bars.

Translucent universal brackets are provided for holding any size hanging files. Simply snap the brackets in place anywhere on the horizontal hanging bars inside the pedestal.



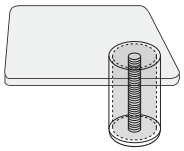
DRAWER REMOVAL

To remove pedestal drawers, open to extended position. Press down on the right side nylon release lever and lift up on left side release lever at the same time. Pull the drawer out of the case.



BOOKCASE OR HUTCH DOOR ADJUSTMENT

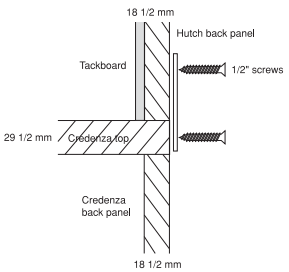
Hinges on all hutch and bookcase doors are designed to be adjusted for depth, horizontal and vertical adjustment by means of screws into the hinge mounting plates. To remove a door, squeeze the release clip and pull out the door, disconnecting the hinges.



GLIDE ADJUSTMENT
Raise one corner of the unit at a time and adjust the glide to the desired height by turning the glide in the hole. Make sure unit is level after adjusting the glides. Please note that the maximum adjustment range of the glides is 3/4”. When moving units after glides have been inserted, dial the glides to the lowest position to prevent damage.

CONNECTING WORKSURFACES
It is important that the main units (desk, credenza) to which the linking unit or return is being attached be in their final position and leveled.

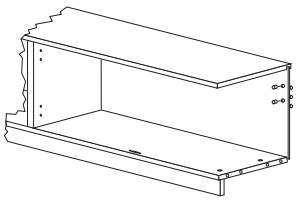
Locate the linking brackets under the main unit tops, per the installation sheet.



HUTCH INSTALLATION
Before installing the hutch, insure that the worksurface has been placed in the final position and leveled. The worksurface should then be moved out a sufficient distance to allow access to the back. It is recommended that the minimum amount of movement be used with the leveling glides extended to prevent damage to the glides.

The hutch comes with self-adhesive foam strips that must be applied to the bottom edge prior to placing the hutch on the credenza. The foam is best applied with the hutch lying on its back. Do not leave any gaps in the foam strip, in order to prevent scratches to the credenza top while placing the hutch.

Place the hutch securely on the worksurface making sure the hutch back panel is flush with the back edge of the case below. Try to minimize any movement of the hutch to prevent scratching. Use of a blanket on the front portion of the credenza is recommended.



WALL HUNG OVERHEAD UNITS
The wall mount overhead storage units must be installed on wall studs. The first step for installation is to locate the studs in the wall where the overhead is to be mounted.

Position the overhead hanger rail on the wall to ensure studs line up with pre-drilled holes in the hanger rail and mark the location on the wall. When mounting an overhead with 2 hanging rails, leave 1” between rails as clearance for the center gable. The 1st and 3rd holes from each end of each hanger rail must have fasteners installed. If studs do not align, then a toggle bolt style dry wall fastener must be used for each of these positions.

Fasteners are to be provided by the installer, so hole size will be determined by size of fastener chosen. If studs cannot be accessed, then appropriate fasteners as determined by building construction should be sued. Fasten the mounting rail to the wall ensuring that it is level.

Remove the black plugs located on the inside face of the back panel to gain access to the adjusting screws on the hanging brackets. Hang the overhead on the mounting rail. The hanging brackets provide vertical and plumb adjusting screws. Level the cabinet by using these screws. All brackets must be adjusted so that they all support the cabinet.

When leveling of the overhead is complete, insert the black plugs in the holes to cover the adjusting screws.

MODULAR | GUIDELINES

MODULAR COMPONENTS

VIRTU modular components provide the flexibility of customizing to the user's needs.

All modular cases are shipped in components and require field installation. If required, Krug can ship modular components assembled. Please contact Customer Service for more information if this option is desired. Drawings are required for modular orders.

Edge Profiles

VIRTU modular component edges are not coved. Therefore Krug recommends that only the Venosa or Fino edge be specified on modular tops.

''I'' - Vita

''H'' - Fino

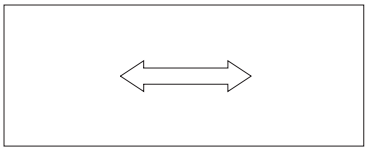
''L'' - Venosa

''P'' - Palermo

If a Vita or Palermo edge is specified on modular tops the edges of connecting tops will have a slight gap (indentation) between them as a result of the beveled edges.

Grain Direction

The grain direction on VIRTU modular tops runs the length of the worksurface.



ORDERING VIRTU MODULAR COMPONENTS

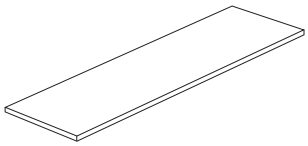
Modular desks, returns and credenzas are available. See page 106 for desk options. Follow the steps below when building modular returns and credenzas.

STEP 1

RETURN & CREDENZA TOPS

Determine the size of the top you require and find the corresponding model number (see page 107).

Example: A 72'' x 24'' rectangular top is listed as 62TP-7224



NOTE:
Please be aware that the following unsupported spans require additional support due to possible top deflection:

- An unsupported span greater than 48'' without a modesty panel will require a half gable. See page 111 for pricing.

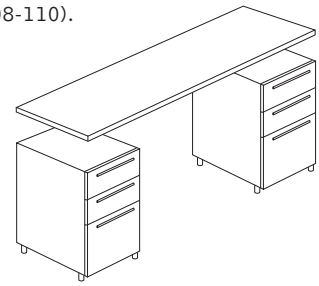
STEP 2

RETURN & CREDENZA PEDESTALS

Determine the pedestal type, width and depth required, and find the corresponding model number (see pages 108-110).
The pedestal(s) selected should be the same depth as the top that is ordered.
Modular credenza and return pedestals feature finished backs and unfinished tops.

Pedestals must be positioned entirely under the worksurface. Screws and installation instructions are provided with the pedestal.

Example: If a modular top is 24'' deep and requires 2 - 16'' 2 box, 1 file drawer, the pedestals are listed as:
62PFB-1624-F
62PFB-1624-F.



STEP 3

level® Certification
BIFMA's e3 Furniture Sustainability Standard is a voluntary, multi-attribute standard that measures the degree of sustainability of furniture. This standard evaluates product and company environmental attributes and compliance systems in a wide range of elements which include Materials, Energy & Atmosphere, Human & Ecosystem Health and Social Responsibility. Millennium products have earned level®, BIFMA's sustainability certification program for furniture, certification through third-party verification against the e3 standard.

Air Emissions
All Millennium products can be supplied with air-emissions certification. Contact customer service for information and upcharges.

The mark of responsible forestry

FSC®
In 2005, Krug received Forest Stewardship Council® (FSC®) Chain-of-Custody certification for our manufacturing facilities. The FSC® Chain-of-Custody tracks certified wood from seedling to final sale. It signifies that the growth, harvesting and production of goods are entirely achieved through responsible forestry, which guarantees a healthy supply of forest resources for generations to come. Virtu and other Krug products can be specified with one of two types of FSC® Certification:
(a) FSC®-certified (which includes FSC®-certified lumber, veneer and substrate material)
(b) FSC®-mix certified (which includes substrate material only, and is a lower cost option certification)
Both FSC® certification types may require upcharges, and often require additional lead time. Contact customer service for further information, pricing and leadtimes.

In addition, architects, designers, and building professionals can specify FSC®-certified products in order to achieve a point from the US. Green Building Council's Leadership in Energy and Environmental Design (LEED) Rating System.

MILLENNIUM | WOOD FINISHES

WOOD FINISHES
Standard wood finishes are:

SPECIES	FINISH
Cherry	Light Cherry Natural Cherry American Cherry Medium Cherry Standard Cherry Imperial Cherry Appalachian Cherry Sable Cherry
Maple	Clear Maple Honey Maple Wheat Maple
Oak*	Light Oak Harvest Oak Mahogany Oak Medium Cherry on Oak Mellow Oak Walnut on Oak Espresso on Oak
Walnut	Natural Walnut Regular Walnut Mahogany on Walnut Dark Walnut Cordovan Walnut

NATURAL CHARACTERISTICS OF WOOD
Wood is a natural product with inherent color variations that will never be fully mitigated by the finishing process. Please anticipate variation in colors within a single unit, from piece to piece, and from Krug wood finish samples. If a very close match is required, a sample must be provided with the order and an upcharge will apply. Exact color matches are not possible.

CUSTOM WOOD FINISHES
Add 10% net to your order for special finishes, minimum charge is $500 list per finish per order. (For example, on all orders up to $5000 list, an upcharge of $500 will apply, on orders $5000 and up add 10% net to your order.)

For orders with special finishes, a sample that is a minimum 3” by 3” must be received with the order. Special finishes may add additional lead time to production schedules.

Since wood is a natural product, some variations in grain, color, and stain acceptance will occur. In our finishing processes, we try to minimize variations, but some variation between samples and finished goods should be anticipated.

BIRDSEYE MAPLE
Bookmatched Birdseye Maple veneer is available on Millennium and Nexus at an upcharge of $50 list per square foot. Specify clearly on order. Birdseye Maple is recommended in clear finish only. Birdseye Maple only applies to tops.

DUAL FINISH
Add 10% net per item if specifying dual finish.

VENEER
Millennium veneer is flat cut.

PRICING METHOD

Custom widths: Apply the price of the same unit in the price list that is one standard size larger than the desired case size (but same depth). For example: The required custom dimension is 74” x 24”. The first standard size above this is 78” x 24”, so in this case, you would apply the price of the 78” x 24” unit.

Custom depths: Apply the price for the same unit one size deeper (but same width).
For example: The required custom dimension is 72” x 26”. The first standard size above this is 72” x 30”, so in this case, you would apply the price of the 72” x 30” unit.

Custom width & depths: Apply the price for the same unit both one size wider and one size deeper.
For example: The required custom dimension is 74” x 26”. The first standard size above this is 84” x 30”, so in this case, you would apply the price of the 84” x 30” unit.

Custom height of desk height cases: Add 18%. (31-32” HI)

MILLENNIUM | GENERAL PRODUCT SPECIFICATIONS

WORKSURFACES
Tops are made of 1 1/2” - 45 lbs. per cubic foot density particle board core with face and back veneer. All edges have 1 1/2” wide 3/4” thick solid Oak, Walnut, Cherry or Maple headers.

GABLES
Gables are 1 1/8” thick - 45 lbs. per cubic foot density particle board core, 3 ply. Edges are banded with veneer.

VENEER
External face veneers are #1 grade flat sliced Red Oak, Black Walnut, Cherry or Maple book-matched and of uniform color and grain pattern.

SOLIDS
All solids used shall be Appalachian Red Oak, American Black Walnut, Cherry or Maple kiln-dried by the manufacturer to a 6% moisture content, using U.S.D.A. Bulletin #FP-1136.

FINISH
All finished surfaces are well sanded before applying finishing materials. The procedure begins by applying a base color via an N.G.R. stain. A wash coat follows to further enhance the color. A filter coat is applied to fill open pores and wipe clean. A sealer coat is applied and scuff-sanded to prepare for the top coat (finish). The final procedure is to apply catalyzed varnish that when dry has a sheen value of 32°.

LOCKS
Locks are standard on all pedestals and storage unit lateral file drawers.
Locks are optional on door fronts and must be specified at time of order.

DRAWERS
Desk box drawers have fully progressive full extension slides and are load rated at 100 lbs. per drawer.
Desk files drawers have a load bearing capacity of 130 lbs. and box drawers have a load bearing capacity of 100 lbs.
Other pedestal file drawers have fully progressive, full extension slides and are load rated at 100 lbs. per drawer.
All drawer interiors are clear finished Birch on particle board constructed with dowels.
All file drawers are equipped for letter and legal filing.
All box/box/file pedestals in desks only are supplied with one matching pencil tray.

GLIDES
Adjustable glides are installed at factory and allow for 3/4” adjustment.

HINGES
Doors have a European style hinges with a 95° opening.

PULLS
Pulls are available in Satin Nickel, Matte Black, Polished Chrome, Black Chrome and Brushed Brass.
Please specify on your order.

TESTING INFORMATION
Millennium meets or exceeds the testing requirements of ANSI/BIFMA X5.5-2008

BIFMA
INTERNATIONAL

An edge detail profile must be selected for every Millennium product.
Millennium product is available in the following profile options:

Seville - contrasting crisp and rounded sculpted edge

Valen - transitional beveled edge

Torrens - softened square edge

Madrid - ribbon fluted edge

Barcelona - half round edge

Zamora - bull nose edge

Williamsburg - traditional edge

PROFILE LOCATIONS

Desk, Credenzas and Shells: profile is located on all sides
Curvilinear Shaped Tops: profile is located on all four sides
Bookcase and Storage Units: profile is located on all four sides
Hutches: profile is located on all three sides
Link Units, Curvilinear Returns and Returns: when units are connected to create a larger worksurface area, some profile options have coved edges to create a smooth transition from one surface to another.
The following profiles have coved edges on connecting ends of return and linking units: Seville, Valen, Barcelona, Williamsburg, Zamora
All other profile options will appear on all sides of the case, meeting each other face to face at worksurface connection points.

DRAWER PULLS
Pulls are available in Satin Nickel, Matte Black, Polished Chrome, Black Chrome, and Brushed Brass.
Pull color and style must be stated clearly on the purchase order.
Pulls are located on all drawer fronts, storage wood doors, and bookcase wood doors. Glass door bookcases feature the Luna knob in the same finish as pulls on the order. Glass door hutches and wood door hutches do not have pulls.

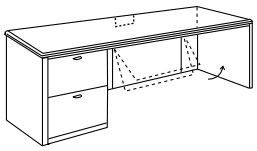
POWER DETAILS:
two Simplex outlets
15 Amp, 10 ft. cord

COMMUNICATION DETAILS:
one 6-pin and one 8-pin connector

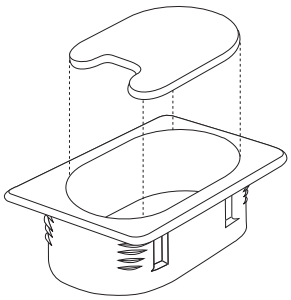


WIRE MANAGEMENT CUT-OUT AND HINGED MODESTY PANELS

Returns, link units and credenzas with fixed modesty panels can be specified with an 8” x 1 1/2” wire management cut-out. All hinged modesty panels feature a cut-out as a standard.

The discreet cut-out allows for clean and easy access to power, data and communication sources.

GROMMETS



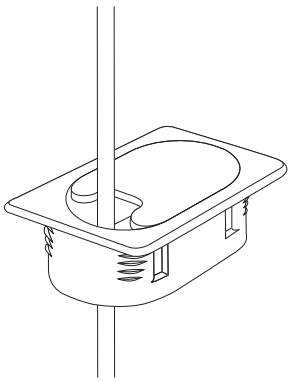
All cases may be specified with one grommet in a standard position at no upcharge.
A $105 list upcharge will apply to additional grommets in standard positions and for grommets requested in non-standard positions a $250 list upcharge will apply.

The grommet position must be indicated for each case on the purchase order.

Standard Grommet
Black or Grey, rectangular, 4 1/8” x 2 11/16”.

Please specify grommet color when ordering, Grommets can also be field installed with power drill, 2 1/4 hole saw and rasp or saber saw. Template for drilling is available.

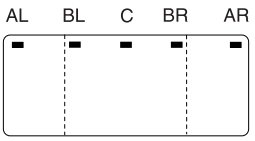
Please keep in mind the location of grommets when specifying paper managers for use with worksurfaces. For example, a paper manager on the left hand side may be used with a “C”, “BR” or “AR” grommet.

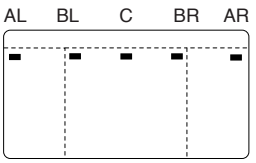


Please note grommet color on purchase order.

STANDARD GROMMET POSITIONS

Desks, Credenzas, Link Units & Returns



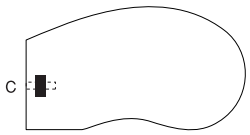


30” Deep Desks:
Position Code:
AL – left corner
BL – left end beside pedestal gable
C – center
BR – right end beside pedestal gable
AR – right corner

36” Deep Desks:
Position Code:
AL – left corner
BL – left end beside pedestal gable
C – center
BR – right end beside pedestal gable
AR – right corner

NOTE
Please do not specify grommets in the “C” position for 60-71” ganged pedestal returns and credenzas. In these cases, the “C” position is over the top of a pedestal.

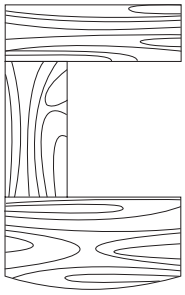
“BL” and “BR” are only available on tops 42” or longer.



CURVILINEAR TOPS

Position Code:
C – center
This key applies to all B, P, Q, and K shaped tops.
The support panel is notched out to accommodate wire management.

MILLENNIUM | LAMINATE WORKSURFACES

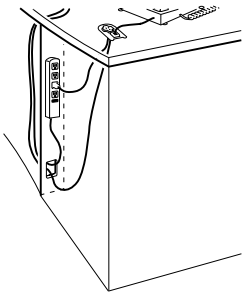


LAMINATE WORKSURFACES
Laminate worksurfaces are available at an upcharge of 10% (a higher upcharge may apply to specially priced plastic laminates). Where there are wood profile edges on worksurface tops, they will remain as wood profiles on laminate tops. Krug will order and procure laminates. Purchase orders with a plastic laminate option must include:

Manufacturer's Name
Laminate Name
Laminate Number

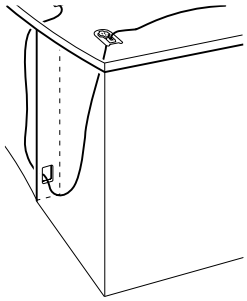
When specifying laminate worksurfaces, the grain direction is such that the grain pattern runs the length of each surface, as shown in the diagram on the left.
Please contact Krug Customer Service for questions pertaining to laminate grain direction.

MILLENNIUM | DESKS



DESKS WIRE MANAGEMENT CAVITY
Millennium desks can also be specified with a hidden wire management cavity (see pages 33, 34, and 36 for model numbers and pricing). This finished cavity is accessed from the front of the desk by a hinged door and is completely concealed in the closed position. The wire management cavity includes a four receptacle power bar mounted on the inside pedestal gable.

This feature allows the use of several powered items on the desk surface and greatly reduces the number of cables routed to the primary power source. The hinged cavity also effectively conceals all excess cables from view.

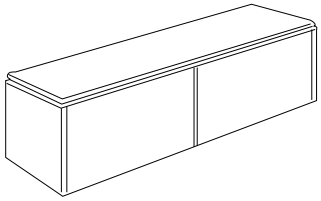


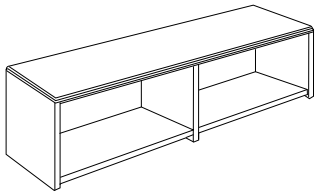
PEDESTAL ACCESS WIRING GROMMET
All Millennium desks allow for wire management behind the pedestal drawers. Pedestal gables feature a standard cable management opening allowing access to the rear of the pedestal cavity. By specifying a wiring grommet in a standard AL or AR position (see grommet locations on page 368), cable can be conveniently threaded behind the pedestal drawers and through the wire management access grommet.
Combined with our standard wire management cover (see page xx), all cables are neatly tucked out of view.

LEATHER INLAY
Optional leather inserts are available on any Millennium desk surfaces at a $1000 list upcharge. Please specify at time of order, including leather color.

BIRDSEYE MAPLE
Birdseye Maple Veneer is available on 6800 Millennium worksurfaces at an upcharge of $55 list per square foot. Birdseye Maple is recommended in a clear finish only. This option could extend regular lead times.

MILLENNIUM | OVERHEADS





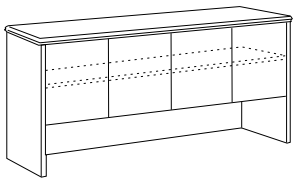
OVERHEADS

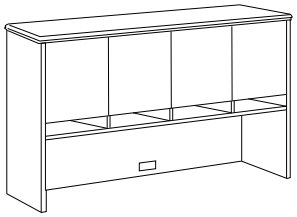
Overheads include tasklights that are factory installed and require no field adjustment. Tasklights are mounted beneath the cabinet and hidden from view. Cords run down the right hand side of the tasklight to the worksurface where they can be routed behind the worksurface top. The use of a wall mounted tackboard conceals the cord from view.

Tackboards must be ordered separately and can be specified in any fabric grade (1-9).

Wall mounted tackboards for overheads are supplied with all necessary hardware for installation.

Locks are optional on overheads and can be specified at time of order for an upcharge of $105 list per set of (2) doors.





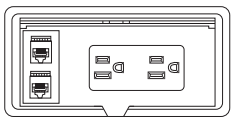
HUTCHES
Hutches include tasklights that are factory installed and require no field adjustment. Tasklights are mounted beneath the cabinet and hidden from view.
Glass doors on hutches are wood framed clear glass.

A tackboard in Krug Momentum Panel grade 1 fabric is included with every hutch. Upcharges for higher graded fabrics are listed on page 418. Tackboard fabric selections should be supplied with the order information, fabric options are listed on page 5 of this price guide. Tackboards for hutches are installed at the factory and require no additional set up on site.

Hutches over 84” in length are made in two pieces and require special installation.

Hutches are available with a finished inside back panel at standard list price, but must be clearly specified on order. This option is available on hutches up to 84” in length only. This option does not include a tackboard.

Locks are optional on overheads and can be specified at time of order for an upcharge of $105 list per set of (2) doors.

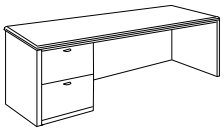


HUTCH POWER DATA OPTION
Access to power and data is made simple by using a hutch with a power data module built right into the tackboard. The module is fully installed at the factory but can be removed to connect data links on site. It features a flip door that retracts into the case of the unit when open. See page 428 in the grommets section for complete power specifications.

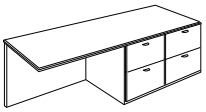
INSTALLATION
Hutch and overhead installation instructions are included with every case, but basic installation instructions can be found in this guide on page 371. All required mounting hardware is included with all hutches.

FILING INSTRUCTIONS

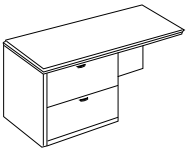
All file drawers will accept both letter and legal size filling. All units are equipped with file bars to accommodate either direction. File bars are shipped taped to the inside of the drawer for safety.



DESK PEDESTAL FILE DRAWERS
Filing Capacity:
25.5” of letter filing from front to back, or
12” of legal filing side to side
Pedestal drawer depths allow only one row of side to side files.
Legal files can be positioned in the side to side direction only.
Weight capacity of pedestal file drawers is 130 lbs.



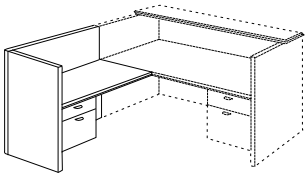
CREDENZA AND RETURN PEDESTAL FILE DRAWERS
Filing Capacity:
15” of letter filing from front to back, or
12” of legal filing side to side
Pedestal drawer depths can be positioned in the side to side direction only.
Weight capacity of pedestal file drawers is 100 lbs.



CREDENZA, RETURN OR STORAGE LATERAL FILE DRAWERS
Filing Capacity for 30” wide drawers:
30” of letter filing front to back, or
25” of legal filing side to side, or
15” of legal filing front to back
When filing front to back, 30” lateral file drawer widths allow two rows of letter filing, but only one row of legal file width.

Filing Capacity for 36” wide drawers:
30” of letter filing front to back, or
36” of legal filing side to side, or
30” of legal filing front to back

Weight capacity of lateral file drawers is 150 lbs.

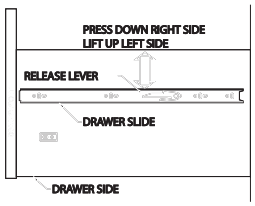


CONNECTING WORKSURFACES

It is important that the product is in its final position and the primary worksurface is leveled before connecting other joining pieces.

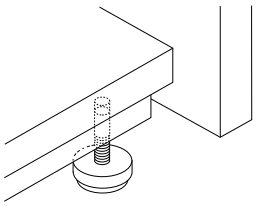
Detailed installation instructions are included with each unit, or available from Krug Customer Service.

Units are connected with mending plates under worksurfaces, and linking brackets on modesty and end panels. Locate connections and attach the mending plates under the worksurface. Level pieces if necessary by adjusting the glides to achieve flush and firm joints before completing installation of all hardware.



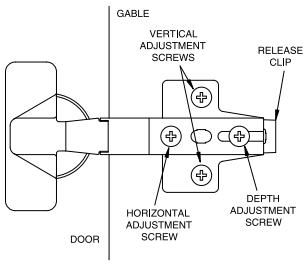
DRAWER REMOVAL

To remove pedestal drawers, open to the extended position, press down on the right side nylon release lever and pull the drawers up on the left side lever at the same time. Continue pulling the drawers out of the case.



GLIDE ADJUSTMENT

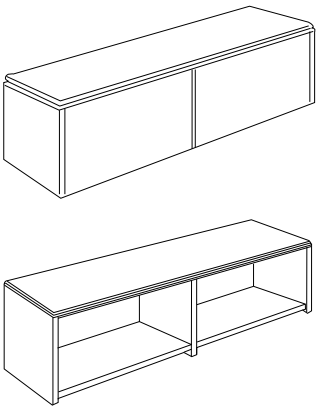
Raise one corner of the unit at a time and adjust the glide to the desired height by turning the glide in the hole. Make sure unit is level after adjusting the glides. Please note that the maximum adjustment range of the glides is 1 1/2”. When moving units after glides have been inserted, dial the glides to the lowest position to prevent damage to the case.



BOOKCASE OR HUTCH DOOR ADJUSTMENT

Hinges on all hutch and bookcase doors are designed to be adjusted for depth, horizontal and vertical adjustment by means of screws into the hinge mounting plates.

To remove a door, squeeze the release clip and pull out the door, disconnecting the hinges.



OVERHEAD INSTALLATION

The wall mount overhead storage units must be installed on wall studs. The first step for installation is to locate the studs in the wall where the overhead is to be mounted. Measure the stud center line location and use this measurement to mark the hole locations on the mounting rail and the overhead back. Drill clearance holes at the hole locations. Hole requirements will depend on the fasteners chosen by the installer. 2 1/2” x #10 wood screws are adequate if going into wood studs. If studs cannots be accessed, then appropriate drywall plugs or butterfly bolts should be used. We recommend 2 fasteners per stud.

Fasten the mounting rail to the wall ensuring that it is level. Hang the overhead on the mounting rail and then fasten it to the wall. This prevents accidental removal and also allows for some leveling adjustment.

On single piece hutches, the yardage requirement for two tackboards is the same as for one tackboard. Please keep this in mind when ordering more than one tackboard. For example, if the number of tackboards required is 7 and the COM requirement for 1 tackboard is 1.5 yards, the calculation for COM yardage is as follows: 4.5 yards are required for 6 tackboards + 1.5 yards for the 7th tackboard for a total of 6 yards. In the case of an even number of tackboards, divide the number of tackboards required by 2 and multiply that number by COM requirement on the chart. The fabric must be at least 54″wide in order to qualify for this procedure. If the fabric is less than 54″ wide, the COM yardage listed on the chart is the amount required for each tackboard.

COM Yardage Calculation Chart for Tackboards

Quantity of Tackboards Required (example: 60″)	Number of Yards Required per Tackboard (example: 60″)	Number of Yards Required in Total (example: 60″)
one	2 yards	2
two	2 yards	2
three	2 yards	4
four	2 yards	4
five	2 yards	6
six	2 yards	6
seven	2 yards	8
eight	2 yards	8

level® CERTIFICATION, AIR EMISSIONS AND FSC® CERTIFICATION

level® Certification
BIFMA's e3 Furniture Sustainability Standard is a voluntary, multi-attribute standard that measures the degree of sustainability of furniture. This standard evaluates product and company environmental attributes and compliance systems in a wide range of elements which include Materials, Energy & Atmosphere, Human & Ecosystem Health and Social Responsibility. Contour products have earned level®, BIFMA's sustainability certification program for furniture, certification through third-party verification against the e3 standard.

Air Emissions
All Contour products can be supplied with air-emissions certification. Contact customer service for information and upcharges.

FSC® C021699
The mark of responsible forestry

FSC®
In 2005, Krug received Forest Stewardship Council® (FSC®) Chain-of-Custody certification for our manufacturing facilities. The FSC® Chain-of-Custody tracks certified wood from seedling to final sale. It signifies that the growth, harvesting and production of goods are entirely achieved through responsible forestry, which guarantees a healthy supply of forest resources for generations to come. Virtu and other Krug products can be specified with one of two types of FSC® Certification:
(a) FSC®-certified (which includes FSC®-certified lumber, veneer and substrate material)
(b) FSC®-mix certified (which includes substrate material only, and is a lower cost option certification)
Both FSC® certification types may require upcharges, and often require additional lead time. Contact customer service for further information, pricing and leadtimes.

In addition, architects, designers, and building professionals can specify FSC®-certified products in order to achieve a point from the US. Green Building Council's Leadership in Energy and Environmental Design (LEED) Rating System.

CONTOUR | WOOD FINISHES

WOOD FINISHES
Standard wood finishes are:

SPECIES	FINISH
Cherry	Appalachian Cherry Imperial Cherry Medium Cherry Natural Cherry Standard Cherry American Cherry
Maple	Clear Maple Honey Maple Wheat Maple
Oak	Light Oak Harvest Oak Mahogany Oak Medium Cherry on Oak Mellow Oak Walnut on Oak Espresso on Oak

Wood is a natural product with inherent color variations that will never be fully mitigated by the finishing process. Please anticipate variation in colors within a single unit, from piece to piece, and from Krug wood finish samples. If a very close match is required, a sample must be provided with the order and an upcharge will apply. Exact color matches are not possible.

CUSTOM WOOD FINISHES
Add 10% net to your order for special finishes, minimum charge is $551 list per finish per order. (For example, on all orders up to $5513 list and upcharge of $551 list will apply, on orders $5513 and up add 10% net to your order.) For orders with special finishes, a sample that is a minimum 3” by 3” must be received with the order. Special finishes may add additional lead time to production schedules.
Since wood is a natural product, some variations in grain, color, and stain acceptance will occur. In our finishing processes, we try to minimize variations, but some variation between samples and finished goods should be anticipated.

BIRDSEYE MAPLE
Bookmatched Birdseye Maple veneer is available at an upcharge of $55 list per square foot. Specify clearly on order. Birdseye Maple is recommended in clear finish only. Birdseye Maple only applies to tops.

DUAL FINISH
Add 10% net per item if specifying dual finish.

GUIDELINES AND PRICING METHODS

PRICING METHOD
Custom widths: Apply the price of the same unit in the price list that is one standard size larger than the desired case size (but same depth).
For example: The required custom dimension is 74” x 24”. The first standard size above this is 78” x 24”, so in this case, you would apply the price of the 78” x 24” unit.

Custom depths: Apply the price for the same unit one size deeper (but same width).
For example: The required custom dimension is 72” x 26”. The first standard size above this is 72” x 30”, so in this case, you would apply the price of the 72” x 30” unit.

Custom width & depths: Apply the price for the same unit both one size wider and one size deeper.
For example: The required custom dimension is 74” x 26”. The first standard size above this is 84” x 30”, so in this case, you would apply the price of the 84” x 30” unit.

Custom Height of desk height cases: Add 18%. (31-32” HI)

WORKSURFACES
Tops are 1 5/16” thick veneered particle board core. Desks have profiled edges front and back, ends are flat.
Credenzas, have a profiled front edge only, end and back edges are flat. Returns and Link units have profiled front edge only and flat back edge. The ends are coved to mate with the profiles on the connecting cases.

MODESTY PANELS
Modesty panels are standard on all desks, and optional on returns, link units, credenzas, as well as on curvilinear tops with wood post legs. Modesty panels are not available in conjunction with curvilinear tops that have metal post legs.
Desks, credenzas, and curvilinear top modesty panels are 3/4” thick, and link unit modesty panels are 1 1/8” thick.
Optional wire management cut-outs are available on credenzas, returns, and link units.

VENEER
External face veneers are Rift Oak, Cherry or Maple bookmatched veneer.

FINISH
A five step catalyzed varnish finish that when dry has a sheen value of 32°, is applied to all finished cases.

LOCKS
Locks are standard on all pedestals and storage unit lateral file drawers.
Locks are optional on door fronts and must be specified at time of order.

DRAWERS
Drawer slides have ball bearing movement with positive outstep and hold in catch.
File drawers and box drawers have a load bearing capacity of 90 lbs.
Drawer interiors have Birch veneer sides with matching bottoms.
File drawers are available 15” for letter filing and 18” for legal filing.
All box/box/file pedestals in desks, corner credenzas and modular pedestals are supplied with matching pencil tray.

GLIDES
Adjustable glides are 1 1/4” long and allow for a range of adjustment of 3/4”. Glide inserts are installed at factory, glides need to be field installed.

HINGES
Hinges on all hutch, overhead and bookcase doors are European style with a 95° opening.
All hinges are fully adjustable.

PULLS
Two types of pulls are available; Elliptical Pull with Matte Black finish and the Sweep Pull with Satin Nickel, Polished Chrome and Matte Black finish.
Also available is a brushed brass traditional Westminster Pull with the traditional profile.
Pulls are supplied on all drawers.

TESTING INFORMATION
Contour meets or exceeds the testing requirements of ANSI / BIFMA X5.5-2008 & x5.9-2012.

A Westminster pull in an antiqued brass finish is standard on all products specified with the Westminster edge detail.

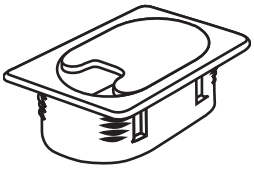
LOCKS
Locks are provided as standard features on all pedestals, except bookcase pedestals, including those in desks, credenzas and lateral file storage units. Lock plugs on desks are located in the kneespace on the pedestal side panel.

Locks are available on the bookcase doors at an upcharge of $105 list per set of (2) doors, please specify at time of order.

Lock plugs for bookcase doors are generally located on the top inside corner of door front.

Lock plugs for hutch and overhead doors are generally located on the lower inside corners.

Suites can be keyed alike at no upcharge, please specify on your purchase order.



RECTANGULAR GROMMETS
All cases may be specified with one grommet in a standard position at no upcharge. A $114 list upcharge will apply to additional grommets in standard positions and for grommets requested in non-standard positions a $263 list upcharge will apply.

The grommet position must be indicated for each case on the order.

Standard Grommet
Black, rectangular, 4 1/8” x 2 11/16”.

Grommets can also be field installed with a power drill, a 2 1/4” hole saw and a rasp or saber saw. Template for drilling is available.

Please keep in mind the location of grommets when specifying paper managers for use with worksurfaces.
For example, a paper manager on the left hand side may be used with a “C”, “BR” or “AR” grommet.

STANDARD GROMMET POSITIONS

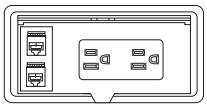
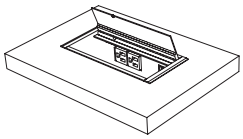
GROMMETS
Power and Communication Grommets
As companions to the standard grommets, the Contour product line incorporates various power and communication options. These items provide easy worksurface access for power, phone or data connections. Wire management raceways are also available for below surface mounting. All components must be specified for quantity and location. Refer to page 464 for pricing information.



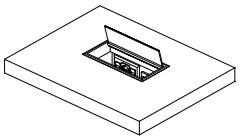
POWER / DATA / VOICE MODULE (SUPPLIED WITH WIRED HUTCHES)
Black, rectangular with flip down cover. Includes two power outlets, one voice port, and one data port.

Power Details:
two Simplex outlets
15 Amp, 10 ft. cord

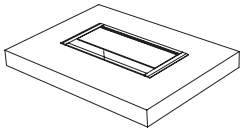
Communication Details:
one 6-pin and one 8-pin connector



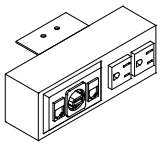
POWERPORT 1
A PowerPort is a unique worksurface mounted module that can be specified to a location that best serves the user's needs. It includes a UL approved electrical, voice and data power bar, containing two 115 - volt electrical simplex outlets which are accessible from the work surface, plus a utility outlet at the end for daisy chaining purposes. It also includes one RJ11 communication port and one RJ45 data port. The RJ45 port is cat 5/6 compatible.



POWERPORT 2
This unit is similar to PowerPort 1 with 2-simplex receptacles I-RJII & I-RJ45 but it also includes 1-USB type A/B port. (This power data module can be used for charging with a USB patch cord connected to a transformer. This provides the user a simple and convenient way to charge their electronic devises. Patch cords and transformer are conveniently available at most local electronic stores.)



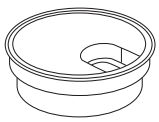
PORT
A service module having no power bar will serve as a large grommet. A hinged lid easily enables the passage of several cables and devices.



UNDER MOUNT POWER DATA MODULE
The Power Data Module is mounted under the worksurface to provide connectivity to the user. The unit contains 2 simplex receptacles, 1 RJ11, 1 RJ45 and 1 USB Type A/B port. This power data module can be used for charging with a USB patch cord connected to a transformer. This provides the user a simple and convenient way to charge their electronic devises. Patch cords and transformer are conveniently available at most local electronic stores.

ROUND GROMMETS - Optional (Top Only)
All cases may be specified with one grommet in a standard position at no upcharge. A $105 list upcharge will apply to additional grommets in standard positions and for grommets requested in non-standard positions a $263 list upcharge will apply.

The grommet position must be indicated for each case on the order. Please specify location of grommet when ordering.



GROMMETS - Round
A round grommet in an aluminum finish with an open and shut mouse hole serves to provide cable passage for areas not requiring a large opening. The grommet position must be indicated for each case on the order. Please specify location of grommet when ordering.

Grommets can be field installed with a power drill, 60 mm hole saw. Please keep in mind the location of the grommets when specifying pier hutches for use with worksurfaces. For example, a paper manager on the left-hand side may be used with a "C", "BR" or "AR" grommet.

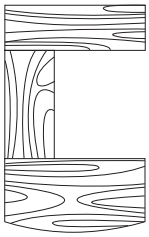
CONTOUR | LAMINATE WORKSURFACES

LAMINATE WORKSURFACES
Laminate worksurfaces are available for the Contour product line at no upcharge. Please see page 356 for complete laminate information. An upcharge may apply to specially priced plastic laminates.

Where there are wood profile edges on worksurface tops, they will remain as wood profiles on laminate tops.
Where there are flush edges, as in the backs of link units, there will be laminate self edges.
Please reference the illustration at the bottom of this page.

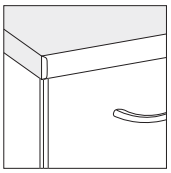
Krug will order and procure laminates. Purchase orders with a plastic laminate option must include:

Manufacturer's Name
Laminate Name
Laminate Number



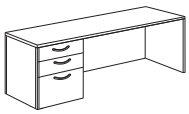
When specifying laminate worksurfaces, the grain direction is such that the grain pattern runs the length of each surface, as shown.

The grain direction exhibited above is different than the direction of the grain on veneered worksurfaces.
Please contact Krug Customer Service for questions pertaining to laminate grain direction.

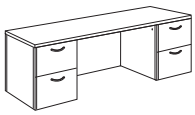


The diagram above illustrates the placement of laminate on Krug worksurfaces.
The shaded areas represent laminate, while the non-shaded area indicates the profiled wood edge.

CONTOUR | CREDENZAS

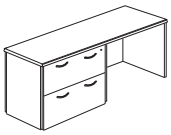


CREDENZAS
Contour offers a wide variety of credenzas for use as stand alone storage pieces, part of a connected worksurface configuration, or behind a desk.
Choose from single or double pedestal options, with or without fixed or hinged modesty panels.



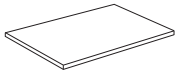
MODESTY PANELS
Credenzas without modesty panels provide easy access to wall mounted electrical sources without wiring difficulties, and are also a satisfying solution for the cost-minded customer.

Credenzas with modesty panels have an added finished look, and all cases are available with a wiring grommet in a standard position for added cable management, please specify on your order. Wiring grommets cannot be specified above the pedestal location.



PEDESTALS
Contour credenzas are available with single, lateral file or bookcase pedestals.

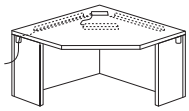
CONTOUR | LINKING UNITS & CORNER UNITS



Contour linking units and corner units are available in a range of sizes for ease of use in configuring a connected worksurface.

Linking units have coved ends, with grain direction running front to back.

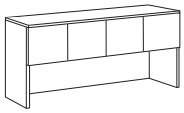
Linking Units
Linking units are for use between desks and credenzas in creating a U-shaped configuration, and must be supported at both ends. They are available with or without modesty panels.



Corner Units
A corner unit can also be used on a U-shaped configuration, or it can be an integral part of a L-shaped work area with returns linked to either side.

Corner units have a standard grommet included in the back corner for ease of cable management, and have additional wire management access grommets in the half gables so that cable can be run to other areas of the connected worksurface. This can be assisted by a cut length of wire management cover.

CONTOUR | HUTCHES, OVERHEADS & TACKBOARDS

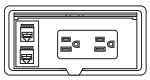


HUTCHES & OVERHEADS
Contour offers hutch and overhead options for use in a work area configuration.

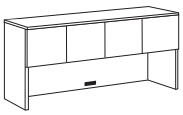
All hutches and overheads include tasklights that are factory installed and require no field adjustment.
Tasklights are mounted beneath the cabinet and hidden from view.

Selected hutches and overheads are available with wood framed frosted glass doors.

DOORS
Doors are equipped with fully adjustable European style hinges.
Locks are optional and can be specified at time of order for an upcharge of $105 per set of (2) doors. If an uneven amount of doors require locks, the lock on the single door is also $105.
Locks are not available on glass doors.



HUTCH POWER / DATA / VOICE MODULE
Access to power and data is made simple by using a hutch with a power/data/voice module built right into the tackboard. The module is fully installed at the factory but can be removed to connect data links on site. It features a flip door that retracts into the case of the unit when open.

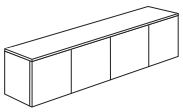


TACKBOARDS
A tackboard in Krug panel fabric is included with every hutch. Upcharges for higher graded fabrics are listed on page. 489. Please note, not all fabrics are suitable for tackboard application. Tackboard fabric selections should be supplied with the order information. See page 6 of this price guide.

Tackboards are not included with overheads and must be ordered separately, see page 486 for pricing. Overhead tackboards include wall mounting hardware and instructions. Tackboards for hutches are installed at the factory and require no additional set up on site.

Only hutches and overhead tackboards in Krug panel fabrics are available on *KrugExpress*.

CONTOUR | TASKLIGHTS & INSTALLATION



TASKLIGHTS
Tasklights are included with hutches and overheads and are installed before shipment.
On hutches, the tasklight cord is threaded behind the hutch through a standard access grommet on the upper right hand side of the back panel.

Tasklights are installed on the underside of overhead units. Cords run down the right hand side of the tasklight to the worksurface where they can be routed behind the worksurface top. The use of a wall mounted Overhead tackboard conceals the cord from view.

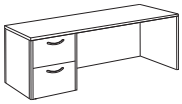
INSTALLATION
Hutch and overhead installation instructions are included with every case or can be found in this guide on page 459.
All mounting hardware required is included with the product.

CONTOUR | FILING INSTRUCTIONS

Drawers will be offered for letter and legal size filing.
All units are equipped with file bars that are fixed in place for shipping.

DESK PEDESTAL FILE DRAWERS
Filing Capacity:
15” drawers:
21” of letter filing front to back, or
12” of legal filing side to side
15” pedestal drawer depths allow only one row of side to side files.

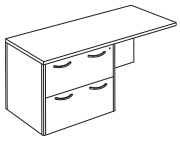
18” drawers:
21” of legal filing front to back
15” of legal filing side to side, one row and 15” of letter filing from side to side, one row and 9” of legal filing front to back.



Weight capacity of pedestal file drawers is 90 lbs.

CREDENZA AND RETURN PEDESTAL FILE DRAWERS
Filing Capacity:

15” drawers:
15” of letter filing front to back, or
12” of legal filing side to side
15” pedestal drawer depths allow only one row of side to side files.



18” drawers:
15” of legal filing front to back
15” of legal filing side to side
15” of letter size filing side to side, one row and 3” of legal filing front to back

Weight capacity of pedestal file drawers is 90 lbs.

CREDENZA, RETURN OR STORAGE LATERAL FILE DRAWERS
Filing Capacity:
30” wide drawers:
30” letter filing front to back, or
25” legal filing side to side, or
15” of legal filing front to back.

When filing front to back, 30” lateral file drawer widths allow two rows of letter filing, but only one row of legal file width.

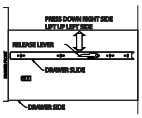
Filing Capacity:
36” wide drawers:
30” letter filing front to back, or
36” legal filing side to side, or
30” legal filing front to back.

Weight capacity of lateral file drawers is 135 lbs.

LINKING UNITS, TOPS AND RETURNS
It is important that the main units (desk, credenza) to which the linking unit or return is being attached be in their final position and leveled.

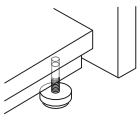
Units are connected with mending plates under worksurface and wood screws on modesty and end panels. Locate connections and attach the mending plate under the worksurface. Level pieces if necessary by adjusting the glides to achieve flush and firm joints before completing installation of hardware.

DRAWER REMOVAL



Pull drawer and slide out to the full extension position. With index finger, lift up the release lever on left side and press down the release lever on right side of the drawer (as shown).
Make sure that you do this to each side at the same time.
Pull out the drawer with the attached drawer channel from the cabinet member.
To re-assemble, insert the drawer through the guide of the stop bumper.

GLIDE ADJUSTMENT



Raise one corner of the unit at a time and adjust the glide to the desired height by turning the glide in the hole. Make sure unit is level after adjusting the glides.

Please note that the maximum adjustment range of the glides is 3/4”.

When moving units after glides have been inserted, dial the glides to the lowest position to prevent damage.

HUTCH INSTALLATION

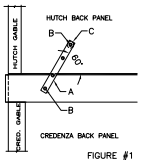


FIGURE #1

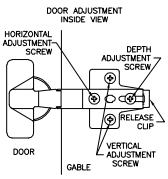
Before installing the hutch, ensure that the worksurface has been placed in the final position and leveled. The worksurface should then be moved out a sufficient distance to allow access to the back. It is recommended that the minimum amount of movement be used with the leveling glides extended to prevent damage to the glides.

The hutch comes with self-adhesive foam strips that must be applied to the bottom edge prior to placing the hutch on the credenza. The foam is best applied with the hutch lying on its back. Do not leave any gaps in the foam strip, in order to prevent scratches to the credenza top while placing the hutch.

Place the hutch securely on the worksurface. Try to minimize any movement of the hutch to prevent scratching. Use of a blanket on the front portion of the credenza is recommended.

Using the supplied hardware, screw the flat bracket to the credenza back panel at each end, using the 3/4” screws provided. Swing the bracket up to approximately 60° and screw through the bracket into the hutch back with the 1/2” screws. Tighten all screws. Move combined hutch and credenza back to final location. Check for level again and adjust as required.
Please note that hutches are shipped with tackboards and tasklights already installed.

DOOR ADJUSTMENTS



Hinges on all bookcase, overhead and hutch doors are designed to be adjusted for depth, horizontal and vertical alignment. This is easily done by adjusting the appropriate screw. See drawing.

To remove a door, push the release button and pull out the door, disconnecting the hinges.

OVERHEAD UNITS
The wall mount overhead storage units must be installed on wall studs. The first step for installation is to locate the studs in the wall where the overhead is to be mounted.

Position the overhead hanger rail on the wall to ensure studs line up with pre-drilled holes in the hanger rail and mark the location on the wall.

Drill holes at the marked hole locations. Fasteners are to be provided by the installer, so hole size will be determined by size of fastener chosen. If studs cannot be accessed, then appropriate drywall plugs or butterfly bolts should be used. If the end of the wall rail is further than 3” from a stud, toggle bolts must be fastened through holes 1 and 3. Fasten the mounting rail to the wall ensuring that it is level.

Remove the black plugs located on the inside face of the back panel to gain access to the adjusting screws on the hanging brackets. Hang the overhead on the mounting rail. The hanging brackets provide vertical and plumb adjusting screws. Level the cabinet by using these screws. All brackets must be adjusted so that they all support the cabinet.
When leveling of the overhead is complete, insert the black plugs in the holes to cover the adjusting screws.

level® CERTIFICATION, AIR EMISSIONS AND FSC® CERTIFICATION

level® Certification
BIFMA's e3 Furniture Sustainability Standard is a voluntary, multi-attribute standard that measures the degree of sustainability of furniture. This standard evaluates product and company environmental attributes and compliance systems in a wide range of elements which include Materials, Energy & Atmosphere, Human & Ecosystem Health and Social Responsibility. Artemis products have earned level®, BIFMA's sustainability certification program for furniture, certification through third-party verification against the e3 standard.

Air Emissions
All Artemis products are supplied air emissions certified. Contact customer service for information and upcharges.

FSC

FSC® C021699
The mark of responsible forestry

FSC®
In 2005, Krug received Forest Stewardship Council® (FSC®) Chain-of-Custody certification for our manufacturing facilities. The FSC® Chain-of-Custody tracks certified wood from seedling to final sale. It signifies that the growth, harvesting and production of goods are entirely achieved through responsible forestry, which guarantees a healthy supply of forest resources for generations to come. Artemis and other Krug products can be specified with one of two types of FSC® Certification:
(a) FSC®-certified (which includes FSC®-certified lumber, veneer and substrate material)
(b) FSC®-mix certified (which includes substrate material only, and is a lower cost option certification)
Both FSC® certification types may require upcharges, and often require additional lead time. Contact customer service for further information, pricing and leadtimes.

In addition, architects, designers, and building professionals can specify FSC®-certified products in order to achieve a point from the US. Green Building Council's Leadership in Energy and Environmental Design (LEED) Rating System.

WOOD FINISHES
Standard wood finishes are:

SPECIES	FINISH
Cherry	Light Cherry Natural Cherry American Cherry Medium Cherry Standard Cherry Imperial Cherry Appalachian Cherry Sable Cherry
Maple	Clear Maple Honey Maple Wheat Maple
Oak*	Light Oak Harvest Oak Mahogany Oak Medium Cherry on Oak Mellow Oak Walnut on Oak Espresso on Oak
Walnut	Natural Walnut Regular Walnut Mahogany on Walnut Dark Walnut Cordovan Walnut

Natural Characteristics of Wood
Wood is a natural product with inherent color variations that will never be fully mitigated by the finishing process. Please anticipate variation in colors within a single unit, from piece to piece, and from Krug wood finish samples. If a very close match is required, a sample must be provided with the order and an upcharge will apply. Exact color matches are not possible.

Custom Wood Finishes
Add 10% list to your order for special finishes, minimum upcharge is $500 list per finish per order. (For example, on all orders up to $5000 list, an upcharge of $500 will apply, on orders $5000 and up add 10% list to your order.)

For orders with special finishes, a sample that is a minimum 3” by 3” must be received with the order. Special finishes may add additional lead time to production schedules.

Since wood is a natural product, some variations in grain, color and stain acceptance will occur. In our finishing processes, we try to minimize variations, but some variation between samples and finished goods should be anticipated.

Dual Finishes
Add 10% list per item if specifying dual finish.

Palette Finishes
Artemis Casegoods are available fully finished in Palette solid color finishes at the same pricing as the Rift Oak pricing in the price list. Components can also be finished in a combination of wood and Palette finishes - for pricing and information on these combinations, as well as lead time information, please contact Customer Service. Palette finishes are not available on Krug Express Artemis Casegoods can also be specified with a combination of PALETTE finishes and veneer. For pricing and specific lead times, please contact Customer Service. Please note PALETTE finishes are not available on the *KrugExpress* Program.

PALETTE FINISHES
Standard solid color finishes are:

Black
White
Sand
Soft green
Steel blue
Slate

GENERAL PRODUCT SPECIFICATIONS

Work Surfaces
Tops are 1 1/4” thick veneered particle board core with face and back veneer. All worksurface height tops have profiled edges on all sides, except when using the M Profile in a Polymer Edge where the profile appears on the front and back sides only of desks. Credenzas, returns, and link units side and back edges are flush. All worksurface height tops have a chemically impregnated polycell backer for additional strength.

Modesty Panels
Modesty panels are standard on all desks, and optional on shaped tops, returns, linking units and credenzas. Modesty panels on credenzas are 1/2” thick, and linking unit modesty panels are 1 1/8” thick.

Metal Legs
The metal legs in Artemis have a silver metallic finish.

Veneer
External face veneers are rift cut Red Oak, and flat sliced Cherry, Maple and Walnut bookmatched veneer.

Finish
A five step catalyzed varnish finish that when dry has a sheen value of 35°, is applied to all finished cases.

Locks
Locks are standard on all pedestals and storage unit lateral file drawers. Locks are optional on door fronts and must be specified at time of order. Locks are not available on glass doors.

Latches
All hutch, overhead and bookcase doors are equipped with touch latches mounted inside the top edge of the door.

Drawers
Desk box and file drawers have fully progressive full extension slides and are load rated at 125 lbs. per drawer. All drawer interiors are birch components. All file drawers are equipped for letter and legal filing. All box/box/file pedestals in desks are supplied with one molded black pencil tray.

Glides
Adjustable glides are 1” long and allow for a range of adjustment of 1”. Glide inserts are installed at factory, glides need to be field installed.

Hinges
Hinges on all hutch, overhead and bookcase doors are European style with 110 degree opening. All hinges are fully adjustable.

Pulls
All pulls are die cast with a choice of silver metallic powder coat, and grey metallic powder coat finish options. Pulls are supplied on all drawers.

Testing Information
Artemis meets or exceeds the testing requirements of ANSI / BIFMA X5.5-2008 and/or X5.9-2004.

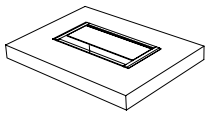
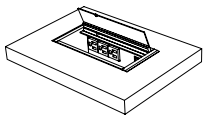
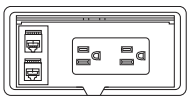
Grommets can be ÿeld installed with a power drill, 60 mm hole saw. Please keep in mind the location of the grommets when specifying paper managers or pier hutches for use with worksurfaces. For example, a paper manager on the left-hand side may be used with a “C”, “BR” or “AR” grommet.



PORT
A service module having no power bar will serve as a large grommet. A hinged lid easily enables the passage of several cables and devices.



POWERPORT
A PowerPort is a unique worksurface mounted module that can be speciÿed to a location that best serves the user’s needs. See page xx for Powerport options.



76PDVM Power/ Data/ Voice Module
This unit is also an option in the worksurface. It is CSA/UL approved, and includes 2 - 115 volt electrical outlets, plus 1 - RJ11 communication port and one RJ45 data port. It features a °ip door that retracts into the worksurface when open.

Hutch Power/ Data/ Voice Module
Access to power and data is made simple by using a hutch with a power/data/voice module built right into the tackboard. The module is fully installed at the factory but can be removed to connect data links on site. It features a °ip door that retracts into the case of the unit when open.

Please keep in mind the location of Powerports, Ports, and 76PDVM’s when specifying paper managers or pier door hutches for use with worksurfaces. For example, a paper manager or a pier on the left-hand side may be used with a “C”, “BR”, or “AR” Powerport.

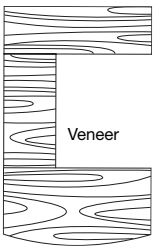
ARTEMIS | LAMINATE WORKSURFACES
L

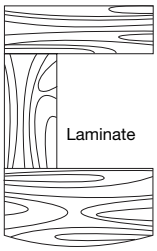
Laminate Worksurfaces
Laminate worksurfaces are available for the Artemis product line with two options - Laminate Tops with Wood Edge or Laminate Tops with Polymer Edge.

Krug will order and procure laminates. Purchase orders with a plastic laminate option must include:

Manufacturer's Name
Laminate Name
Laminate Number

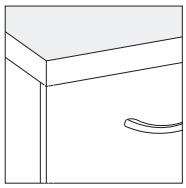
When specifying laminate worksurfaces, the grain direction is such that the grain pattern runs as shown in the diagrams below. Please note, in veneer grain direction runs lengthwise on desks and credenzas and front to back on returns and linking units. In laminate the grain direction runs lengthwise on all components.



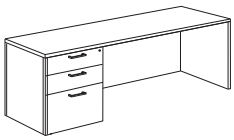


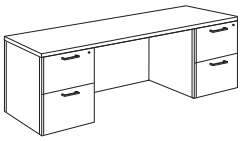
Please contact Krug Customer Service for questions pertaining to laminate grain direction.

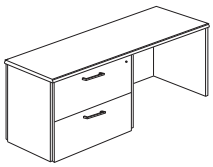
The diagram below illustrates the placement of laminate on Krug worksurfaces.
The shaded areas represent laminate, while the non-shaded area indicates the proÿled wood edge or polymer.



CREDENZAS







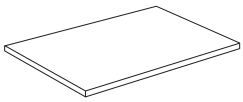
Credenzas
Artemis offers a wide variety of credenzas for use as stand alone storage pieces, part of a connected worksurface conÿguration, or behind a desk.

Choose from single or double pedestal options, with ÿxed or hinged modesty panel.

Modesty Panels
Credenzas without hinged modesty panels provide easy access to wall mounted electrical sources. Credenzas with modesty panels have an added ÿnish look, and all cases are available with a wiring grommet in a standard position for added cable management, please specify on your order. Wiring grommets can be speciÿed above the pedestal location.

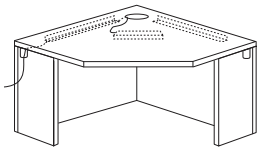
Pedestals
Artemis credenzas are available with single, lateral ÿle, combination pedestals or bookcase pedestals.

1



Artemis linking units and corner units are available in a range of sizes for ease of use in configuring a connected worksurface.

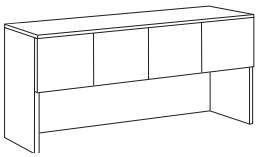
Linking Units
Linking Units are for use between desks and credenzas in creating a U-shaped configuration, and must be supported at both ends. They are available with or without modesty panels.



Corner Units
A corner unit can also be used on a U-shaped configuration, or it can be an integral part of a L-shaped work area with returns linked to either side.

Corner units have a standard grommet included in the back corner for ease of cable management, and have additional wire management access grommets in the half gables so that cable can be run to other areas of the connected worksurface. This can be assisted by a cut length of wire management cover.

HUTCHES, OVERHEADS, & TACKBOARDS

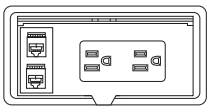


Hutches and Overheads
Artemis offers hutch and overhead options for use in a work area configuration.

All hutches and overheads include tasklights that are factory installed and require no field adjustment. Tasklights are mounted beneath the cabinet and hidden from view.

Selected hutches and overheads are available with silver metallic framed frosted glass doors.

Doors
Doors are equipped with fully adjustable European style hinges. Locks are optional and can be specified at time of order for an upcharge of $105 per set of (2) doors. If an uneven amount of doors require locks, the lock on the single door is $56. Locks are not available on glass doors.

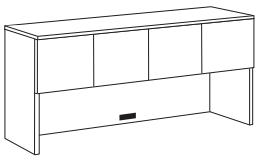


Hutch Power/ Data/ Voice Module
Access to power and data is made simple by using a hutch with a power/data/voice module built right into the tackboard. The module is fully installed at the factory but can be removed to connect data links on site. It features a flip door that retracts into the case of the unit when open.

Tackboards
Please note, not all fabrics are suitable for tackboard application. Tackboard fabric selections should be supplied with the order information.

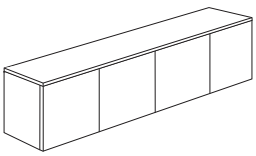
Tackboards are not included with overheads, see page 584 for pricing. Overhead tackboards include wall mounting hardware and instructions. Tackboards for hutches are installed at the factory and require no additional set up on site.

Only hutches and overhead tackboards in Krug panel fabrics are available on *KrugExpress.*



Tasklights
Tasklights are included with hutches and overheads. On hutches, the tasklight cord is threaded behind the hutch though a standard access grommet on the upper right hand side of the back panel.

Tasklights are installed on the underside of overhead units. Cords run down the right hand side of the tasklight to the worksurface where they can be routed behind the worksurface top. The use of a wall mounted Overhead tackboard conceals the cord from view.



Installation
Hutch and overhead installation instructions are included with every case or can be found in this guide on page 515. All mounting hardware required is included with the product.

ARTEMIS | FILING INSTRUCTIONS

Drawers will be offered for letter and legal size ÿling. All units are equipped with ÿle bars that are ÿxed in place for shipping.

Desk Pedestal File Drawers

Filing Capacity:

15” DRAWERS:
21” of letter ÿling front to back or
12” of legal ÿlling side to side
22” pedestal drawer depths allow only one row of side to side ÿles.

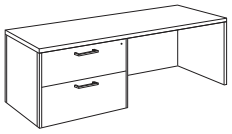
Weight capacity of pedestal ÿle drawers is 90 lbs.

Credenza and Return Pedestal File Drawers

Filing Capacity:

15” DRAWERS:
15” of letter ÿling front to back or
12” of legal ÿlling side to side
16” pedestal drawer depths allow only one row of side to side ÿles.

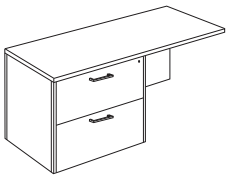
Weight capacity of pedestal ÿle drawers is 90 lbs.



Credenza, Return or Storage Lateral File Drawers

Filing Capacity:

30” WIDE DRAWERS:
30” letter ÿling front to back, or
25” legal ÿling side to side
15” or legal ÿling front to back.

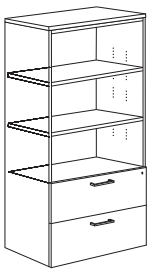


When ÿling front to back, 30” lateral ÿle drawer widths allow two rows of letter ÿling, but only one row of legal ÿle width.

Filing capacity:

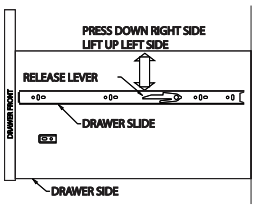
36” WIDE DRAWERS:
30” letter ÿling front to back, or
36” legal ÿling side to side, or
30” legal ÿling front to back.

Weight capacity of lateral ÿle drawers is 135 lbs.



Linking Units, Tops and Returns
It is important that the main units (desk, credenza) to which the linking unit or return is being attached be in their ÿnal position and leveled.

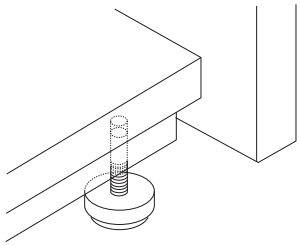
Units are connected with mending plates under the worksurface and from the modesty and to the end panel off the connecting units. Attach the mending plates under the worksurface, level cases if necessary by adjusting the glides to achieve °ush and ÿrm joints before installation of mending plates to modesty and end panels .



Drawer Removal
Pull drawer and slide out to the full extension position. With index ÿnger, lift up the release lever on the left and press down the release lever on the right side of the drawer (as shown).

Pull out the drawer with the attached drawer channel from the cabinet member.

To re-assemble, insert the drawer through the guide.



Glide Adjustment
Raise one corner of the unit at a time and adjust the glide to the desired height by turning the glide to the hole. Make sure unit is level after adjusting the glides.

Please note that the maximum adjustment range of the glides is 1 1/4".

When moving units after glides have been inserted, dial the glides to the lowest position to prevent damage.

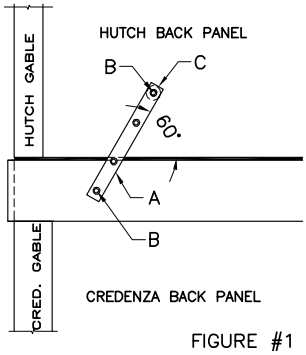


FIGURE #1

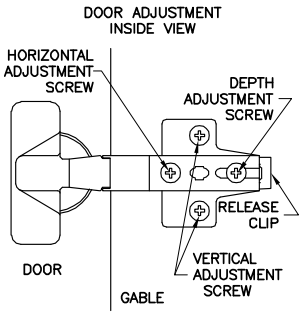
Hutch Installation
Before installing the hutch, insure that the worksurface has been placed in the ÿnal position and leveled. The worksurface should then be moved out a sufÿcient distance to allow access to the back. It is recommended that the minimum amount of movement be used with the leveling glides extended to prevent damage to the glides.

The hutch comes with self-adhesive foam strips that must be applied to the bottom edge prior to placing the hutch on the credenza. The foam is best applied with the hutch lying on its back. Do not leave any gaps in the foam strip, in order to prevent scratches to the credenza top while placing the hutch.

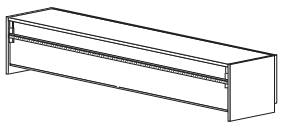
Place the hutch securely on the worksurface. Try to minimize any movement of the hutch to prevent scratching. Use of a blanket on the front portion of the credenza is recommended.

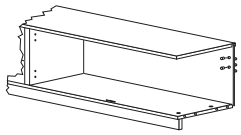
Using the supplied hardware, screw the °at bracket (A) to the top of the credenza at each end, using the 3/4" screws (B). Swing the bracket up to approximately 60° and place the supplied washer (C) behind the top hole in the bracket. Screw through the bracket and washer into the hutch back with the 3/4" screws (B). Tighten all screws. Move combined hutch and credenza back to ÿnal location. Check for level again and adjust as required.



Door Adjustments
Hinges on all bookcase, overhead and hutch doors are designed to be adjusted for depth, horizontal and vertical alignment. This is easily done by adjusting the appropriate screw. See drawing.

To remove a door, pull the release clip and pull out the door, disconnecting hinges.





Overhead Unit
The wall mount overhead units must be installed on wall studs. The ÿrst step for installation is to locate the studs in the wall where the overhead is to be mounted.

Position the overhead hanger rail on the wall to insure studs line up with pre-drilled holes in the hanger rail and mark the location on the wall.

Drill holes at the marked hole locations. Fasteners are to be provided by the installer, so hole size will be determined by size of fastener chosen. If studs cannot be accessed, then appropriate drywall plugs or butter°y bolts should be used. If the end of the wall rail is further than 3" from a stud, toggle bolts must be fastened through holes 1 and 3. Fasten the mounting rail to the wall insuring that it is level.

Remove the black plugs located on the inside face of the back panel to gain access to the adjusting screws on the hanging brackets. Hang the overhead on the mounting rail. The hanging brackets provide vertical and plumb adjusting screws. Level the cabinet by using these screws. All brackets must be adjusted so that they all support the cabinet.

When leveling of the overhead is complete, insert the black plugs in the holes to cover the adjusting screws.

Installation instructions included with each case must be followed exactly.

ORDERING NOTES:
Credenzas have the option of pulls instead of the standard touch latch doors. To select this option, please change the prefix in the model number from "76" to "77" ie: 77C7220XLXRX. Please refer to page 510 for pull orientation below the worksurface. Locks are available on wood doors for an upcharge of $105 list.
The 15 open/lateral file module can be used in place of the 16 box/file at the same price.
The 18 open/closed bookcase module can be used in place of the 11 closed module at the same price.

ORDERING PROCEDURES
To order, please specify the following:

1) Krug product model number
2) Wood species and finish
3) Wood edge detail-M,D or T see page 509
4) Pull style and color.
5) Grommet location and style if applicable

* Indicates model illustrated by the line drawing.

level® CERTIFICATION, AIR EMISSIONS AND FSC® CERTIFICATION

level® Certification
BIFMA's e3 Furniture Sustainability Standard is a voluntary, multi-attribute standard that measures the degree of sustainability of furniture. This standard evaluates product and company environmental attributes and compliance systems in a wide range of elements which include Materials, Energy & Atmosphere, Human & Ecosystem Health and Social Responsibility. Artemis Laminate products have earned level®, BIFMA's sustainability certification program for furniture, certification through third-party verification against the e3 standard.

Air Emissions
All Artemis products are supplied air emissions certified. Contact customer service for information and upcharges.

FSC® C021699
The mark of responsible forestry

FSC®
In 2005, Krug received Forest Stewardship Council® (FSC®) Chain-of-Custody certification for our manufacturing facilities. The FSC® Chain-of-Custody tracks certified wood from seedling to final sale. It signifies that the growth, harvesting and production of goods are entirely achieved through responsible forestry, which guarantees a healthy supply of forest resources for generations to come. Artemis and other Krug products can be specified with one of two types of FSC® Certification:
(a) FSC®-certified (which includes FSC®-certified lumber, veneer and substrate material)
(b) FSC®-mix certified (which includes substrate material only, and is a lower cost option certification)
Both FSC® certification types may require upcharges, and often require additional lead time. Contact customer service for further information, pricing and leadtimes.

In addition, architects, designers, and building professionals can specify FSC®-certified products in order to achieve a point from the US. Green Building Council's Leadership in Energy and Environmental Design (LEED) Rating System.

LAMINATES

Krug defines **"Laminate"** as Low-Pressure Laminate or LPL. Artemis Laminate Casegoods are constructed using low-pressure laminate. High pressure worksurfaces are also available when specified.

In-Stock Laminate
Krug's in-stock Laminates are available in 16 different laminate selections. There are 8 wood grain laminates, 4 solid color laminates in a selection of popular solid shades and 4 Exotic laminates offering a distinguished appearance. Minimum order quantities and extended lead times may apply for exotic laminate colors, please check with customer service. Polymer Edge will be selected to match the worksurface.

ARTEMIS LAMINATE | GENERAL PRODUCT SPECIFICATIONS

Work Surfaces
Laminate worksurfaces are 1-1/4" thick, and have thermally fused laminate applied to particle board core. High Pressure plastic Laminate (HPL) worksurfaces are 1-1/8" thick, and have plastic laminate applied to particle board core, with a laminate backer. All worksurface height tops have profiled edges on all sides, except when using the M profile in a polymer edge on a laminate top. In this case the profile appears on the front and back sides only on desks. On credenza, return, linking unit, and 2 hi storage unit tops the side and back edges are not profiled (see page 639).

Modesty Panels
Modesty panels are standard on all desks, and optional on shaped tops, returns, linking units and credenzas.

Metal Legs
The metal legs in Artemis Laminate have a silver metallic finish.

Locks
Locks are standard on all pedestals and storage unit lateral file drawers. Locks are optional on door fronts and must be specified at time of order. All lock cores are silver. Locks are not available on glass doors.

Latches
Bookcase doors are equipped with touch latches mounted inside the top edge of the door when no pulls are specified. Pier hutches have an option of a pull on the pier door only, touch latched will not be provided.

Drawers
Desk box and file drawers have fully progressive full extension slides and are load rated at 125 lbs. per drawer. All drawer interiors are maple print components with a 1/4" matching laminate bottom. All file drawers are equipped for letter and legal filing. All box/box/file pedestals in desks are supplied with one molded black pencil tray.

Glides
Adjustable glides are 1-1/2" long and allow for a range of adjustment of 1 1/4".

Hinges
Hinges on all hutch, overhead and bookcase laminate doors are European style with 165 degree opening. Frosted glass doors have 105 degree opening. All hinges are fully adjustable.

Pulls
All pulls are die cast with a choice of silver metallic powder coat and grey metallic powder coat finish options. Pulls are supplied on all drawers.

Metal Cabinets
Steel frame construction is welded and channels are formed in key areas for strength. Inner frame is 20 gauge metal. Fronts, tops, outer panels are 20 and 22 gauge steel. **Standard PAINT FINISH** • Silver Metallic Powder Coat • Additional colors are available upon request.

Testing Information
Artemis Laminate meets or exceeds the testing requirements of ANSI / BIFMA X5.5-2008 and/or X5.9-2004.

Artemis Metal Pedestals will be supplied with a finger pull as standard. Diana, Hera and Sono pulls can be specified for metal drawer fronts at no up-charge. Athena pulls will not be available on metal fronts.

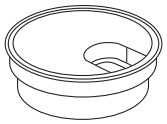
Locks
Locks are provided as standard features on all pedestals, except bookcase pedestals, including those in desks, credenzas, and lateral file storage units. Satin Aluminum lock plugs are located on the fronts of all cases.

Locks are available on the bookcase doors at an upcharge of $105 list per set of (2) doors, please specify at time of order. Lock plugs for bookcase doors are generally located on the top inside corner of the door front. Lock plugs for hutch and overhead doors are generally located on the lower inside corners. Suites can be keyed alike at no upcharge, please specify on purchase order.

ARTEMIS LAMINATE | POWER MANAGEMENT

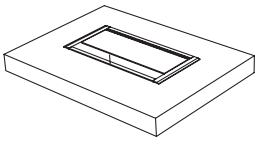
GROMMETS - Optional (Top Only)
All cases may be specified with one grommet in a standard position at no upcharge. A $105 list upcharge will apply to additional grommets in standard positions and for grommets requested in non-standard positions a $263 list upcharge will apply.

The grommet position must be indicated for each case on the order. Please specify location of grommet when ordering.

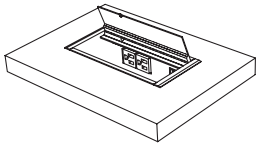


GROMMETS - Round
A round grommet in a satin metallic finish with an open and shut mouse hole serves to provide cable passage for areas not requiring a large opening. The grommet position must be indicated for each case on the order. Please specify location of grommet when ordering.

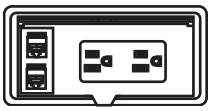
Grommets can be field installed with a power drill, 60 mm hole saw. Please keep in mind the location of the grommets when specifying paper managers or pier hutches for use with worksurfaces. For example, a papermanager on the left-hand side may be used with a “C”, “BR” or “AR” grommet.



PORT
A service module having no power bar will serve as a large grommet. A hinged lid easily enables the
passage of several cables and devices,



POWERPORT
A PowerPort is a unique worksurface mounted module that can be specified to a location that best serves the user’s needs. It can be specified without any features or with a UL approved electrical, voice and data power bar, see page 688 for PowerPort options.



76PDVM (Power/ Data/ Voice Module)
The worksurface mounted 76PDVM can be specified to a standard location that best serves the user’s needs. It is CSA/UL approved, and comes with 2 - 115 volt electrical convenience outlets, 1 - RJ 11 communication port, and 1 - RJ 45 data port.

Please keep in mind the location of Powerports, Ports, and 76PDVM’s when specifying paper managers or pier door hutches for use with worksurfaces. For example, a paper manager or a pier on the left-hand side may be use with a “C”, “BR”, or “AR” Power port.

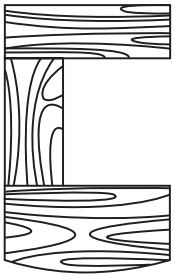
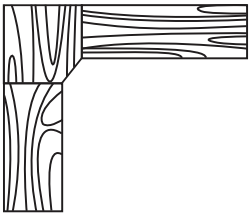
ARTEMIS LAMINATE | LAMINATE WORKSURFACES

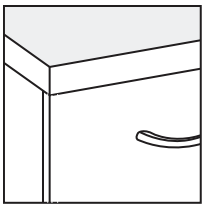
Laminate Worksurfaces
Standard Artemis laminate casegoods will have low pressure laminate worksurfaces and a low pressure laminate chassis. Optional high pressure laminate worksurfaces are available.

Worksurfaces are available with the following options:
1) Laminate with Polymer Edge
2) High Pressure Laminate **(HPL**) with Polymer Edge.





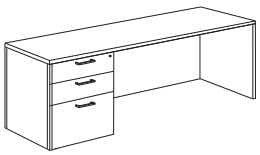
The grain direction runs lengthwise on all worksurfaces .



The diagram below illustrates the placement of laminate on Krug worksurfaces.
The shaded areas represent laminate, while the non-shaded area indicates the polymer edge.

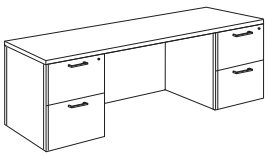
Grain Direction: All components have vertical grain direction except, there will be a horizontal grain on hutch back panels, half modesty panels on desk returns, returns with curvilinear tops, and credenza shell backs. Desk shells, desk returns, gallery desks and linking units incorporate split panels in order to maintain vertical grain direction.

ARTEMIS LAMINATE | CREDENZAS



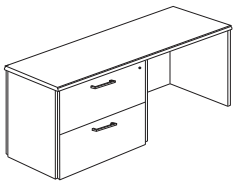
Credenzas
Artemis Laminate offers a wide variety of credenzas for use as stand alone storage pieces, part of a connected worksurface configuration, or behind a desk.

Choose from single or double pedestal options, with fixed or hinged modesty panel.



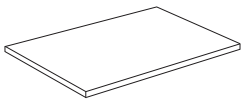
Modesty Panels
Credenzas with hinged modesty panels provide easy access to wall mounted electrical sources without wiring difficulties.

Credenzas with modesty panels have an added finished look, and all cases are available with a wiring grommet in a standard position for added cable management, please specify on your order. Wiring grommets can be specified above the pedestal location.



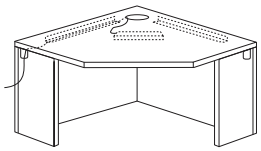
Pedestals
Artemis Laminate credenzas are available with single, lateral file, combination pedestals or bookcase pedestals.

ARTEMIS LAMINATE | LINKING & CORNER UNITS



Artemis Laminate linking units and corner units are available in a range of sizes for ease of use in configuring a connected worksurface.

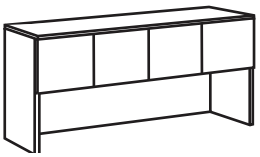
Linking Units
Linking Units are for use between desks and credenzas in creating a U-shaped configuration, and must be supported at both ends. They are available with or without modesty panels.



Corner Units
A corner unit can also be used on a U-shaped configuration, or it can be an integral part of a L-shaped work area with returns or linking units linked to either side.

Corner units have a standard grommet included in the back corner for ease of cable management, and have additional wire management access grommets in the half gables so that cable can be run to other areas of the connected worksurface. This can be assisted by a cut length of wire management cover.

ARTEMIS LAMINATE | HUTCHES, OVERHEADS, & TACKBOARDS



Hutches and Overheads
Artemis Laminate offers hutch and overhead options for use in a work area configuration.

All hutches and overheads include tasklights that are factory installed and require no field adjustment. Tasklights are mounted beneath the cabinet and hidden from view.

Selected hutches are available with silver metallic framed frosted glass doors.

Doors
Doors are equipped with fully adjustable European style hinges. Locks are optional and can be specified at time of order for an upcharge of $105 per set of (2) doors. If an uneven amount of doors require locks, the lock on the single door is $56. Locks are not available on glass doors.

Hutch Power/ Data/ Voice Module
Access to power and data is made simple by using a hutch with a power/data/voice module built right into the tackboard. The module is fully installed at the factory but can be removed to connect data links on site. It features a flip door that retracts into the case of the unit when open.

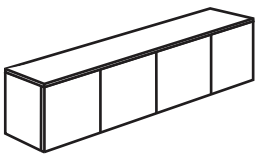
Tackboards
Please note, not all fabrics are suitable for tackboard application. Tackboard fabric selections should be supplied with the order information.

Tackboards are not included with overheads, see page 679 for pricing. Overhead tackboards include wall mounting hardware and instructions.

Only hutches and overhead tackboards in Krug panel fabrics are available on *KrugExpress.*

Tasklights
Tasklights are included with hutches and overheads. On hutches, the tasklight cord is threaded behind the hutch though a standard access grommet on the upper right hand side of the back panel.

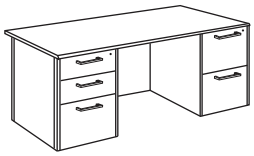
Tasklights are installed on the underside of overhead units. Cords run down the right hand side of the tasklight to the worksurface where they can be routed behind the worksurface top. The use of a wall mounted Overhead tackboard conceals the cord from view.



Installation
Hutch and overhead installation instructions are included with every case or can be found in this guide on page 645. All mounting hardware required is included with the product.

ARTEMIS LAMINATE | FILING INSTRUCTIONS

Drawers will be offered for letter and legal size filing. All units are equipped with file bars that are fixed in place for shipping.

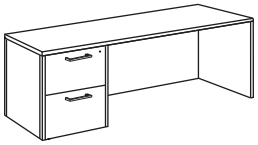


Desk Pedestal File Drawers

Filing Capacity:

15” drawers
21” of letter filing front to back or
12” of legal filling side to side
22” pedestal drawer depths allow only one row of side to side files.

Weight capacity of pedestal file drawers is 125 lbs.



Credenza and Return Pedestal File Drawers

Filing Capacity:

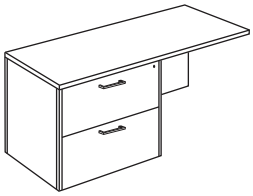
15” drawers
15” of letter filing front to back or
12” of legal filling side to side
16” pedestal drawer depths allow only one row of side to side files.

Weight capacity of pedestal file drawers is 125 lbs.

Credenza, Return or Storage Lateral File Drawers

Filing Capacity:

30” wide drawers:
30” letter filing front to back, or
25” legal filing side to side
15” or legal filing front to back.

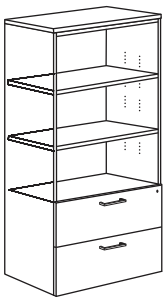


When filing front to back, 30” lateral file drawer widths allow two rows of letter filing, but only one row of legal file width.

Filing capacity:

36” wide drawers:

30” letter filing front to back, or
36” legal filing side to side, or
30” legal filing front to back.



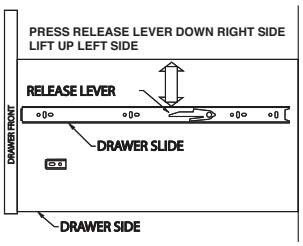
Weight capacity of lateral file drawers is 135 lbs.

Linking Units, Tops and Returns

It is important that the main units (desk, credenza) to which the linking unit or return is being attached be in their final position and leveled.

Units are connected with mending plates under the worksurface from the modesty to the end panels. Attach the mending plates under the worksurface, ensure cases are level and if necessary adjust the glides to achieve flush and firm joints before completing installation of mending plates to the modesty and end panels.

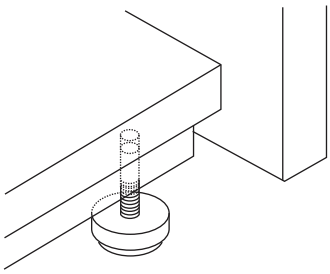
Drawer Removal



Pull drawer and slide out to the full extension position. With index finger, lift up the release lever on the left and press down the release lever on the right side of the drawer (as shown).

Pull out the drawer with the attached drawer channel from the cabinet member.

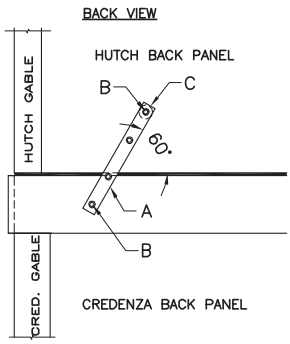
To re-assemble, insert the drawer through the guide.



Glide Adjustment
Raise one corner of the unit at a time and adjust the glide to the desired height by turning the glide in the hole. Make sure unit is level after adjusting the glides.

Please note that the maximum adjustment range of the glides is 1 1/4” on all laminate units. The maximum adjustment range of the glides is 1 5/8” for metal pedestals, 5/8” for metal bookcases and 7/8” for metal storage cabinets.

When moving units after glides have been inserted, dial the glides to the lowest position to prevent damage.

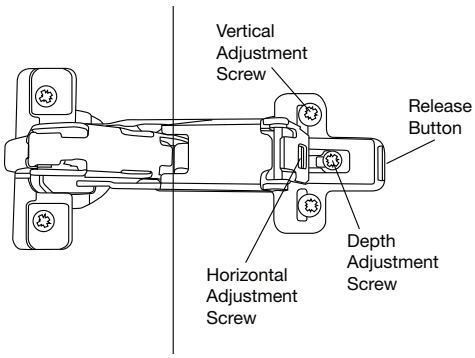


Hutch Installation
Before installing the hutch, insure that the worksurface has been placed in the final position and leveled. The worksurface should then be moved out a sufficient distance to allow access to the back. It is recommended that the minimum amount of movement be used with the leveling glides extended to prevent damage to the glides.

The hutch comes with self-adhesive foam strips that must be applied to the bottom edge prior to placing the hutch on the credenza. The foam is best applied with the hutch lying on its back. Do not leave any gaps in the foam strip, in order to prevent scratches to the credenza top while placing the hutch.

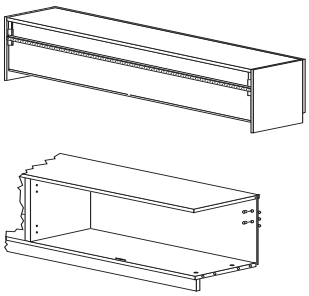
Place the hutch securely on the worksurface. Try to minimize any movement of the hutch to prevent scratching. Use of a blanket on the front portion of the credenza is recommended.

Using the supplied hardware, screw the flat bracket (A) to the top of the credenza at each end, using the 3/4” screws (B). Swing the bracket up to approximately 60° and place the supplied washer (C) behind the top hole in the bracket. Screw through the bracket and washer into the hutch back with the 3/4” screws (B). Tighten all screws. Move combined hutch and credenza back to final location. Check for level again and adjust as required.



Door Adjustments
Hinges on all bookcase, overhead and hutch doors are designed to be adjusted for depth, horizontal and vertical alignment. This is easily done by adjusting the appropriate screw. See drawing.

To remove a door, pull the release clip and pull out the door, disconnecting hinges.



Overhead Units
The wall mount overhead units must be installed on wall studs. The first step for installation is to locate the studs in the wall where the overhead is to be mounted.

Position the overhead hanger rail on the wall to insure studs line up with pre-drilled holes in the hanger rail and mark the location on the wall.

Drill holes at the marked hole locations. Fasteners are to be provided by the installer, so hole size will be determined by size of fastener chosen. If studs cannot be accessed, then appropriate drywall plugs or butterfly bolts should be used. If the end of the wall rail is further than 3” from a stud, toggle bolts must be fastened through holes 1 and 3. Fasten the mounting rail to the wall insuring that it is level.

Remove the black plugs located on the inside face of the back panel to gain access to the adjusting screws on the hanging brackets. Hang the overhead on the mounting rail. The hanging brackets provide vertical and plumb adjusting screws. Level the cabinet by using these screws. All brackets must be adjusted so that they all support the cabinet. When leveling of the overhead is complete, insert the black plugs in the holes to cover the adjusting screws.

Installation instructions (included with each case) must be followed exactly.

level® CERTIFICATION, AIR EMISSIONS AND FSC® CERTIFICATION

level® Certification
BIFMA's e3 Furniture Sustainability Standard is a voluntary, multi-attribute standard that measures the degree of sustainability of furniture. This standard evaluates product and company environmental attributes and compliance systems in a wide range of elements which include Materials, Energy & Atmosphere, Human & Ecosystem Health and Social Responsibility. Nexus products have earned level®, BIFMA's sustainability certification program for furniture, certification through third-party verification against the e3 standard.

Air Emissions
All Nexus products can be supplied with air-emissions certification. Contact customer service for information and upcharges.

FSC

FSC® C021699
The mark of responsible forestry

FSC®
In 2005, Krug received Forest Stewardship Council® (FSC®) Chain-of-Custody certification for our manufacturing facilities. The FSC® Chain-of-Custody tracks certified wood from seedling to final sale. It signifies that the growth, harvesting and production of goods are entirely achieved through responsible forestry, which guarantees a healthy supply of forest resources for generations to come. Nexus and other Krug products can be specified with one of two types of FSC® Certification:
(a) FSC®-certified (which includes FSC®-certified lumber, veneer and substrate material)
(b) FSC®-mix certified (which includes substrate material only, and is a lower cost option certification)
Both FSC® certification types may require upcharges, and often require additional lead time. Contact customer service for further information, pricing and leadtimes.

In addition, architects, designers, and building professionals can specify FSC®-certified products in order to achieve a point from the US. Green Building Council's Leadership in Energy and Environmental Design (LEED) Rating System.

NEXUS | GENERAL INFORMATION

NEXUS | WOOD FINISHES

WOOD FINISHES
Standard wood finishes are:

SPECIES	FINISH
Cherry	Light Cherry Natural Cherry American Cherry Medium Cherry Standard Cherry Imperial Cherry Appalachian Cherry Sable Cherry
Maple	Clear Maple Honey Maple Wheat Maple
Oak*	Light Oak Harvest Oak Mahogany Oak Medium Cherry on Oak Mellow Oak Walnut on Oak Espresso on Oak
Walnut	Natural Walnut Regular Walnut Mahogany on Walnut Dark Walnut Cordovan Walnut
Anigre	Clear Anigre Medium Anigre

NATURAL CHARACTERISTICS OF WOOD
Wood is a natural product with inherent color variations that will never be fully mitigated by the finishing process. Please anticipate variation in colors within a single unit, from piece to piece, and from Krug wood finish samples. If a very close match is required, a sample must be provided with the order and an upcharge will apply. Exact color matches are not possible.

CUSTOM WOOD FINISHES
Add 10% net to your order for special finishes, minimum charge is $500 list per finish per order. (For example, on all orders up to $5000 list, an upcharge of $500 will apply, on orders $5000 and up add 10% net to your order.)

For orders with special finishes, a sample that is a minimum 3” by 3” must be received with the order. Special finishes may add additional lead time to production schedules.

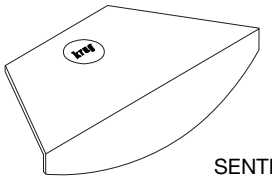
Since wood is a natural product, some variations in grain, color, and stain acceptance will occur. In our finishing processes, we try to minimize variations, but some variation between samples and finished goods should be anticipated.

BIRDSEYE MAPLE
Bookmatched Birdseye Maple veneer is available on Millennium and Nexus at an upcharge of $50 list per square foot. Specify clearly on order. Birdseye Maple is recommended in clear finish only. Birdseye Maple only applies to tops.

DUAL FINISH
Add 10% net per item if specifying dual finish.

VENEER
Nexus veneer is Rift cut..

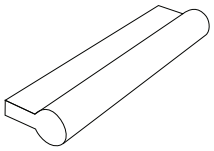
DRAWER PULLS
Two drawer pull styles are available: Sentra and Axis.



SENTRA

Sentra is available in the following finish options:

Matte Black
Satin Nickel
Polished Chrome
Brushed Brass



AXIS

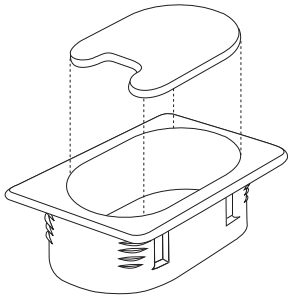
Axis is available in the following finish options:

Matte Black
Matte Silver

Pulls are located on all drawer fronts. Bookcase doors do not have pulls.

Orders will <u>not</u> be entered until a pull and pull finish is specified.

LOCKS
Locks are provided as standard features on all pedestals, including those in desks, credenzas and lateral file storage units. Lock plugs for pedestals are located on the upper right hand corner of the top drawer. Doors on bookcases, hutches and overheads are provided with touch latches. Optional locks are available for closed bookcases, hutches and overheads at an upcharge of $105 list per set of (2) doors. Lock plugs for bookcase doors are located on the top inside corner of door front. Lock plugs for hutch and overhead doors are located on the lower inside corners. Suites can be keyed alike at no upcharge, please specify on your purchase order.



GROMMETS
All cases may be specified with one grommet in a standard position at no upcharge. A $114 list upcharge will apply to additional grommets in standard positions and for grommets requested in non-standard positions a $275 list upcharge will apply.
The grommet position must be indicated for each case on the order.

Standard Grommet
Black or Grey, rectangular, 4 1/8” x 2 11/16” Please specify grommet color on purchase order when ordering. Grommets can be field installed with power drill, 2 1/4 hole saw and rasp or saber saw. Template for drilling is available.

Please keep in mind the location of grommets when specifying paper managers for use with worksurfaces. For example, a paper manager on the left hand side may be sued with a ‘C’, ‘BR’ or ‘AR’ grommet.

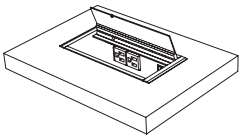
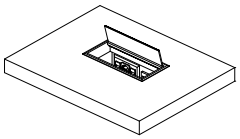
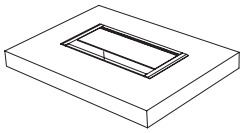
NEXUS | CONNECTIVITY



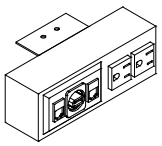
POWERPORT 1
A PowerPort is a unique worksurface mounted module that can be specified to a location that best serves the user's needs. It includes a UL approved electrical, voice and data power bar, containing two 115 - volt electrical simplex outlets which are accessible from the work surface, plus a utility outlet at the end for daisy chaining purposes. It also includes one RJ11 communication port and one RJ45 data port. The RJ45 port is cat 5/6 compatible.



POWERPORT 2
This unit is similar to PowerPort 1 with 2-simplex receptacles I-RJII & I-RJ45 but it also includes 1-USB type A/B port. (This power data module can be used for charging with a USB patch cord connected to a transformer. This provides the user a simple and convenient way to charge their electronic devises. Patch cords and transformer are conveniently available at most local electronic stores.)



PORT
A service module having no power bar will serve as a large grommet. A hinged lid easily enables the passage of several cables and devices.



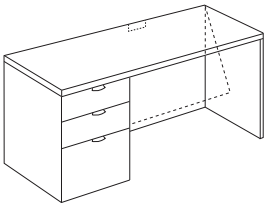
UNDER MOUNT POWER DATA MODULE
The Power Data Module is mounted under the worksurface to provide connectivity to the user. The unit contains 2 simplex receptacles, 1 RJ11, 1 RJ45 and 1 USB Type A/B port. This power data module can be used for charging with a USB patch cord connected to a transformer. This provides the user a simple and convenient way to charge their electronic devises. Patch cords and transformer are conveniently available at most local electronic stores.

GROMMETS - Optional (Top Only)
All cases may be specified with one grommet in a standard position at no upcharge. A $105 list upcharge will apply to additional grommets in standard positions and for grommets requested in non-standard positions a $275 list upcharge will apply.

The grommet position must be indicated for each case on the order. Please specify location of grommet when ordering.

GROMMETS - Round
A round grommet in an aluminum finish with an open and shut mouse hole serves to provide cable passage for areas not requiring a large opening. The grommet position must be indicated for each case on the order. Please specify location of grommet when ordering.

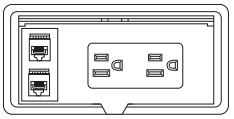
Grommets can be field installed with a power drill, 60 mm hole saw. Please keep in mind the location of the grommets when specifying pier hutches for use with worksurfaces. For example, a paper manager on the left-hand side may be used with a "C", "BR" or "AR" grommet.



WIRE MANAGEMENT CUT-OUT AND HINGED MODESTY PANELS

Returns, link units and credenzas with fixed modesty panels can be specified with an 8" x 1 1/2" wire management cut-out. All hinged modesty panels feature a cut-out as a standard.

The discreet cut-out allows for clean and easy access to power, data and communication sources.

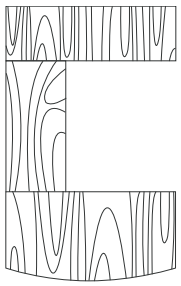


R / DATA / VOICE MODULE (SUPPLIED WITH WIRED HUTCHES)

rectangular with flip down cover. Includes two power outlets, one voice port, and one data port.

R DETAILS:
nplex outlets
, 10 ft. cord

COMMUNICATION DETAILS:
one 6-pin and one 8-pin connector



LAMINATE WORKSURFACES

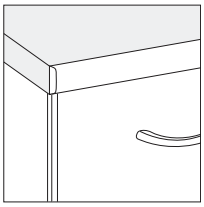
Laminate worksurfaces are available for the Nexus line at an upcharge of 10% (a higher upcharge may apply to specially priced plastic laminates).

Where there are wood profile edges on worksurface tops, they will remain as wood profiles on laminate tops.

Where there are flush edges, as in the backs of link units, there will be laminate self edges. Please reference the illustration at the bottom of this page.

Krug will order and procure laminates. Purchase orders with a plastic laminate option must include:

Manufacturer's Name
Laminate Name
Laminate Number



When specifying laminate worksurfaces, the grain direction is such that the grain pattern runs the length of each surface, as shown in the diagram on the left.

Please contact Krug Customer Service for questions pertaining to laminate grain direction.

The diagram on the left illustrates the placement on Krug worksurfaces. The shaded areas represent laminate, while the non-shaded area indicates the profiled wood edge.

NEXUS | NON-STANDARD PRODUCT GUIDELINES FOR PRICING

PRICING METHOD

Custom widths: Apply the price of the same unit in the price list that is one standard size larger than the desired case size (but same depth).
For example: The required custom dimension is 74” x 24”. The first standard size above this is 78” x 24”, so in this case, you would apply the price of the 78” x 24” unit.

Custom depths: Apply the price for the same unit one size deeper (but same width).
For example: The required custom dimension is 72” x 26”. The first standard size above this is 72” x 30”, so in this case, you would apply the price of the 72” x 30” unit.

Custom width & depths: Apply the price for the same unit both one size wider and one size deeper.
For example: The required custom dimension is 74” x 26”. The first standard size above this is 84” x 30”, so in this case, you would apply the price of the 84” x 30” unit.

Custom height of desk height cases: Add 18%. (31-32” HI)

OTHER PRICING METHODS

Grommets in non-standard positions, **add:**	$275 list
To remove hutch or overhead doors, **deduct:**	4% list
Bookcases with optional pull out printer shelf at standard shelf height, **add:**	$165 list
Bookcases with optional vent in back (includes 2 vents and 1 grommet), **add:**	$210 list

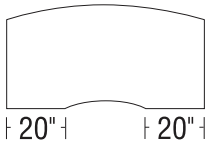
2 lateral file and 3 or 4 closed shelves - convert to half open, half wardrobe, **add:**	15% list
To remove storage doors for open shelves, **deduct:**	4% list
Angire, **add:**	20% list on Maple pricing

EXCEPTIONS TO THE PRICING METHODS ABOVE

Sizes larger than the largest shown Price List.
Non-standard extension on drawer slides.
Non-standard drawer depths in standard depth pedestals.
Glass door - any style.
Glass - face mounted modesty panels.
Perforated modesty panels.
Cases with curvilinear tops where the radius becomes non-standard.
A/V cabinets.
Any case with flipper doors.

Please contact Specials Coordinator or Krug Customer Service at 1.888.578.KRUG if you require assistance.

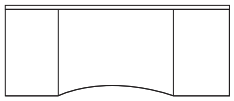
PLEASE NOTE: Cases with non-standard features do not apply to the rules above.
Contact Krug Customer Service if you require assistance.



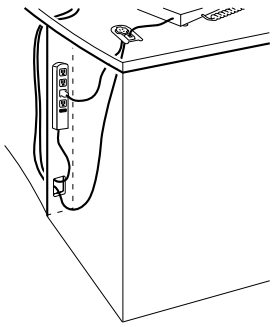
CURVE OPTION ON DESKS

Please note that the curve option on desk tops will only accommodate 20” deep run-off options.

Nexus has a selection of 20” returns and transitional link units compatible with this desk shape.



CURVED MODESTY PANEL OPTION
A curved modesty panel can be specified on any desk in any size at no additional upcharge. The arc of the curve is 2 1/4” at its highest point.



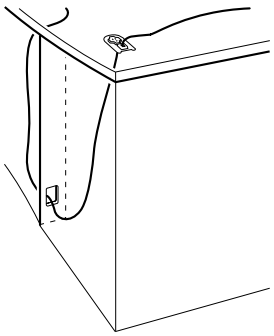
WIRE MANAGEMENT CAVITY

Nexus desks can also be specified with a hidden wire management cavity. Please contact customer service for more information.

This finished cavity is accessed from the front of the desk by a hinged door and is completely concealed in the closed position. The wire management cavity includes a four receptacle power bar mounted on the inside pedestal gable.

This feature allows the use of several powered items on the desk surface and greatly reduces the number of cables routed to the primary power source. The hinged cavity also effectively conceals all excess cables from view.

The wire management cavity can only be specified behind a desk pedestal, not on the open side of a single pedestal desk.

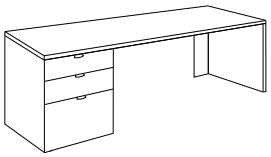


PEDESTAL ACCESS WIRING GROMMET

All Nexus desks allow for wire management behind the pedestal drawers. Pedestal gables feature a standard cable management opening allowing access to the rear of the pedestal cavity. By specifying a wiring grommet in a standard AL or AR position (see grommet locations on page 709), cable can be conveniently threaded behind the pedestal drawers and through the wire management access grommet.

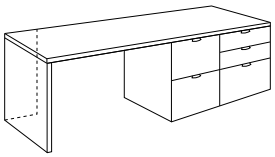
Combined with our standards wire management cover (see page 763), all cables are neatly tucked out of view.

NEXUS | CREDENZAS



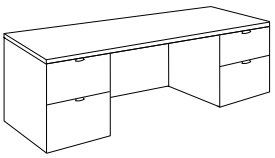
Nexus offers a wide variety of credenzas for use as stand alone storage pieces, part of a connected worksurface configuration, or behind a desk.

Choose from single, double and ganged options, with modesty panels or without.



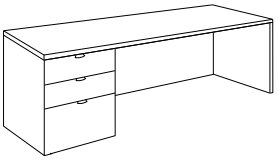
MODESTY PANELS

Credenzas without modesty panels provide easy access to wall mounted electrical sources without wiring difficulties, and are also a satisfying solution for the cost-minded customer.



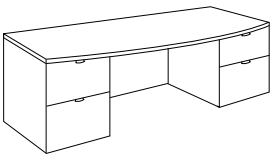
Credenzas with modesty panels have an added finished look, and all cases are available with a wiring grommet in standard position for added cable management, please specify on your order.

Wiring grommets are not available on 20” x 24” cases above a pedestal.



PEDESTALS

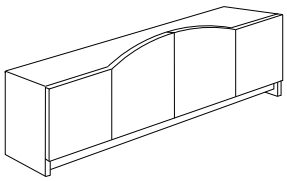
Nexus credenzas are available with single, ganged, lateral file or bookcase pedestals.



BOW FRONT CREDENZAS

Bow front credenzas are meant to be used as stand alone units and cannot be used in a U-shaped configuration to another unit. The bow front overhang on the front edge is 1.5” at its largest point.

NEXUS | HUTCHES, OVERHEADS & TASKLIGHTS



TASKLIGHTS

Tasklights are included with hutches and overheads and are installed before shipment. On hutches, the tasklight cord is threaded behind the hutch through a standard access grommet on the upper right hand side of the back panel. This access grommet is hidden from view behind the installation tackboard.

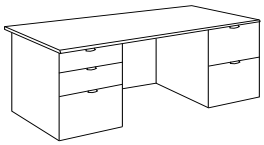
Tasklights are installed on the underside of the overhead units. Cords run down the right hand side of the tasklight to the worksurface where they can be routed behind the worksurface top. The use of a wall mounted overhead tackboard conceals the cord from view.

INSTALLATION

Hutch and overhead installation instructions are included with ever case or can be found in this guide on pages 717-718. All mounting hardware required is included with the product.

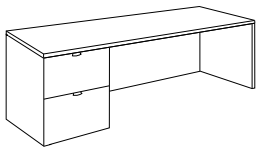
NEXUS | FILING INSTRUCTIONS

All file drawers will accept both letter and legal size filling. All units are equipped with file bars to accommodate either direction. File bars are shipped taped to the inside of the drawer for safety.



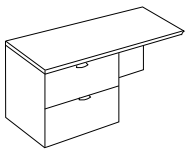
DESK PEDESTAL FILE DRAWERS

Filing Capacity:
21” of letter filing from front to back, or
12” of legal filing side to side
Pedestal drawer depths allow only one row of side to side files.
Legal files can be positioned in the side to side direction only.
Weight capacity of pedestal file drawers is 100 lbs.



CREDENZA AND RETURN PEDESTAL FILE DRAWERS

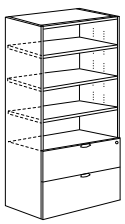
Filing Capacity:
15” of letter filing from front to back, or
12” of legal filing side to side
Pedestal drawer depths allow only one row of side to side files.
Legal files can be positioned in the side to side direction only.
Weight capacity of pedestal file drawers is 100 lbs.



CREDENZA, RETURN OR STORAGE LATERAL FILE DRAWERS

Filing Capacity for 30” wide drawers:
30” of letter filing front to back, or
25” of legal filing side to side, or
15” of legal filing front to back

When filing front to back, 30” lateral file drawer widths allow two rows of letter filing, but only one row of legal file width.



Filing Capacity for 36” wide drawers:
30” of letter filing front to back, or
36” of legal filing side to side, or
30” of legal filing front to back

Weight capacity of lateral file drawers is 150 lbs.

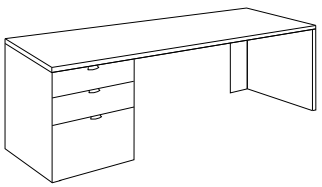
NEXUS | RECONFIGURABILITY

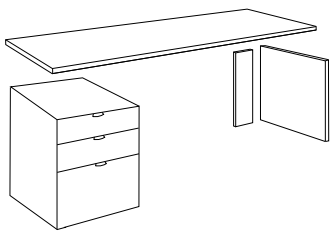
Several Nexus products have been designed to afford the customer flexibility for reconfiguration in the future.

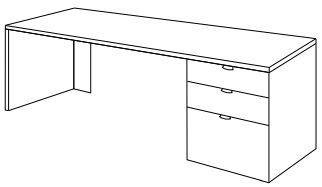
All cases are provided with standard connecting inserts and covers installed inside the end panels. These connectors are used to configure workstations without having to permanently modify the units with wood screws, and can be easily taken apart as needs of the work space change.

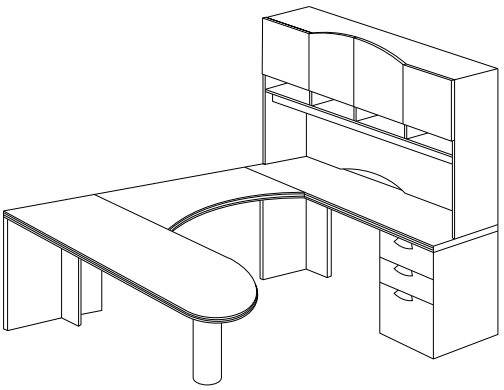
Returns and credenzas ordered without modesty panels are manufactured with metal to metal fitments to be non-handed and reconfigurable.

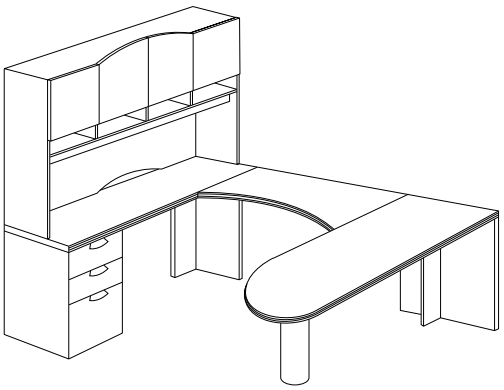
A selection of modular tops, end panel supports, and pedestals are available on pages 759-761 to create modular configured workstations.











CREATING MODULAR PRODUCTS

Modular pedestals are the same depth as modular tops and have finished sides and backs. They are a complete end support, and cannot be combined with an L-based support at the same end.

An L-base support is used at an open end only.

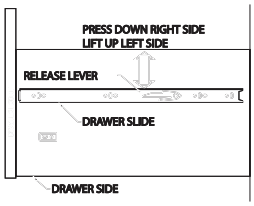
Nexus modular products are not available with modesty panels.

LINKING UNITS, TOPS & RETURNS

It is important that the main units (desk, credenza) to which the linking unit or return is being attached be in their final position and leveled.

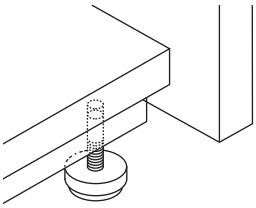
Locate the linking brackets under the main unit tops, 6” and 18” from the main unit gables, with 1 1/2” protruding beyond the edge of the top. Using two screws per bracket (provided), attach the brackets to the main unit top. Please note that the screws are inserted with a hex key (not included).

Rest the linking unit/top or return on the brackets, ensuring that the piece is square to the main unit(s). Level the piece if necessary by adjusting the glides to achieve flush and uniform joints. Using the remaining screws, attach the bracket to the linking unit/top or return.



DRAWER REMOVAL

To remove pedestal drawers, open to the extended position, press down on the right side nylon release lever and pull the drawers up on left side lever at the same time. Continue pulling the drawer out of the case.

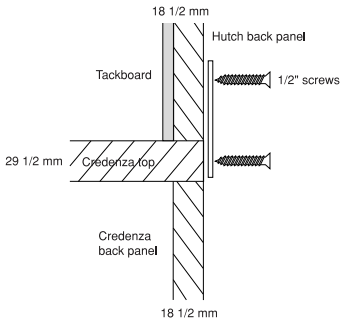


GLIDE ADJUSTMENTS

Raise one corner of the unit at a time and adjust the glide to the desired height by turning the glide in the hole. Make sure unit is level after adjusting the glides.

Please note that the maximum adjustment range of the glides is 1/2”.

When moving units after glides have been inserted, dial the glides to the lowest position to prevent damage.

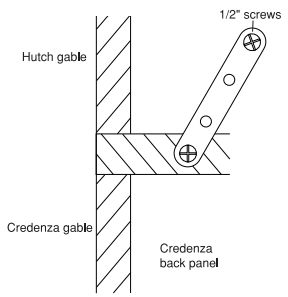


HUTCH INSTALLATION

Before installing hutch, ensure that the worksurface has been placed in the final position and leveled. The worksurface should then be moved out a sufficient distance to allow access to the back. It is recommended that the minimum amount of movement be used with the levelling glides extended to prevent damage to the glides.

The hutch comes with self-adhesive foam strips that must be applied to the bottom edge prior to placing the hutch on the credenza. The foam is best applied with the hutch lying on its back. Do not leave any gaps in the foam strip. This will prevent scratches to the credenza top while placing the hutch.

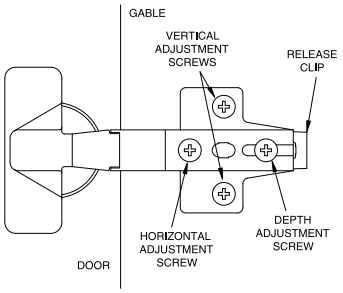
Place the hutch on the worksurface making sure the hutch back panel is flush with the back panel of the case below. Try to minimize any movement of the hutch to prevent scratching. Use of a blanket on the front of the credenza is recommended.



:H INSTALLATION (CONTINUED)

the supplied hardware, screw the flat bracket to the credenza back panel at each end, using 4" screws provided. Swing the bracket up to approximately 60° and screw through the bracket ıe hutch back with the 1/2" screws. Tighten all screws. Move combined hutch and credenza :o final location. Check for level again and adjust as required.

ɜ note that hutches are shipped with tackboards and tasklights already installed.

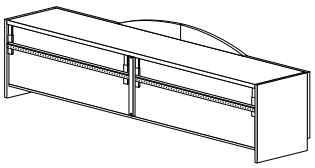


ɔJUSTMENTS

ı all bookcase, overhead and hutch doors are designed to be adjusted for depth, horizontal :al alignment. This is easily done by adjusting the appropriate screw, see drawing.

ɜ a door, squeeze the release clip and pull out the door, disconnecting the hinges.

ɜ on hutches, overheads and storage units all use magnetic touch latches.

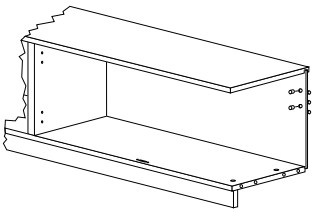


OVERHEAD UNITS

The wall mount overhead storage units must be installed on wall studs. The first step for installation is to locate the studs in the wall where the overhead is to be mounted.

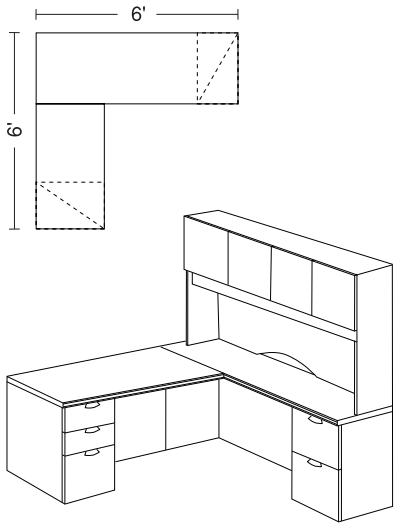
Position the overhead hanger rail on the wall to ensure studs line up with pre-drilled holes in the hanger rail and mark the location on the wall. When mounting an overhead with 2 hanging rails, leave 1 1/2" between rails as clearance for the center gable.

Drill holes at the marked hole locations. Fasteners are to be provided by the installer, so hole size will be determined by size of fastener chosen. If studs cannots be accessed, then appropriate drywall plugs or butterfly bolts should be used. Fasten the mounting rail to the wall ensuring that it is level.



Remove the back plugs located on the inside face of the back panel to gain access to adjusting screws on the hanging brackets. Hang the overhead on the mounting rail. The hanging brackets provide vertical and plumb adjusting screws. Level the cabinet by using the screws. All brackets must be adjusted so that they all support the cabinet.

When leveling of the overhead is complete, insert the black plugs in the holes to cover the adjusting screws.



This compact workstation is a practical solution for a smalls workspace area. it could be enhanced by a number of the mobile work units to increase the storage space or worksurface area in the future.

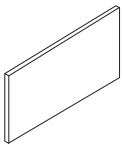
TACKBOARD UPCHARGES

Tackboard upcharges for hutches and wall units



All hutches and wall units include a tackboard and come standard with a Krug panel grade 1 fabric. Use this chart to find the upcharge for tackboard fabrics graded 2–9 and add it to the cost of the hutch or wall unit.
Grading information can be found on age 6 of the price guide.

	2	3	4	5	6	7	8	9	yardage

Please see page 82 in the Millennium product section for ordering information on tackboard organizer rails and accessories.

On single piece hutches, the yardage requirement for two tackboards is the same as for one tackboard. Please keep this in mind when ordering more than one tackboard. For example, if the number of tackboards required is 7 and the COM requirement for 1 tackboard is 1.5 yards, the calculation for COM yardage is as follows: 4.5 yards are required for 6 tackboards + 1.5 yards for the 7th tackboard for a total of 6 yards. In the case of an even number of tackboards, divide the number of tackboards required by 2 and multiply that number by COM requirement on the chart. The fabric must be at least 54″wide in order to qualify for this procedure. If the fabric is less than 54″ wide, the COM yardage listed on the chart is the amount required for each tackboard.

COM Yardage Calculation Chart for Tackboards

Quantity of Tackboards Required (example: 60″)	Number of Yards Required per Tackboard (example: 60″)	Number of Yards Required in Total (example: 60″)
one	2 yards	**2**
two	2 yards	**2**
three	2 yards	**4**
four	2 yards	**4**
five	2 yards	**6**
six	2 yards	**6**
seven	2 yards	**8**
eight	2 yards	**8**
nine	2 yards	**10**
ten	2 yards	**10**

level® CERTIFICATION, AIR EMISSIONS AND FSC® CERTIFICATION

level® Certification
BIFMA's e3 Furniture Sustainability Standard is a voluntary, multi-attribute standard that measures the degree of sustainability of furniture. This standard evaluates product and company environmental attributes and compliance systems in a wide range of elements which include Materials, Energy & Atmosphere, Human & Ecosystem Health and Social Responsibility. Stratford products have earned level®, BIFMA's sustainability certification program for furniture, certification through third-party verification against the e3 standard.

Air Emissions
All Stratford products can be supplied with air emissions-certification. Contact customer service for information and upcharges.

FSC® C021699
The mark of responsible forestry

FSC®
In 2005, Krug received Forest Stewardship Council® (FSC®) Chain-of-Custody certification for our manufacturing facilities. The FSC® Chain-of-Custody tracks certified wood from seedling to final sale. It signifies that the growth, harvesting and production of goods are entirely achieved through responsible forestry, which guarantees a healthy supply of forest resources for generations to come. Stratford and other Krug products can be specified with one of two types of FSC® Certification:
(a) FSC®-certified (which includes FSC®-certified lumber, veneer and substrate material)
(b) FSC®-mix certified (which includes substrate material only, and is a lower cost option certification)
Both FSC® certification types may require upcharges, and often require additional lead time. Contact customer service for further information, pricing and leadtimes.

In addition, architects, designers, and building professionals can specify FSC®-certified products in order to achieve a point from the US. Green Building Council's Leadership in Energy and Environmental Design (LEED) Rating System.

STRATFORD | GENERAL PRODUCT SPECIFICATIONS

WORKSURFACES
Tops are made of 1 1/4” - 42 lbs. per cubic foot density particle board core with face and back veneers. All edges have 1 1/8” wide 1” thick solid Cherry or Walnut headers.

DRAWER FRONTS AND DOORS
48 lbs. per cubic foot density Medium Density Fiberboard with face and back veneer.

GABLES
Gables are 3/4” or 1 1/8” thick - 45 lbs. per cubic foot density particleboard core, 3 ply. Edges are banded with veneer. Bottom edges of 1 1/8” gables are banded with polyvinyl chloride edge banding.

VENEER
External face veneers are flat sliced Black Walnut or Cherry bookmatched and of uniform color and grain pattern.

SOLIDS
All solids used shall be American Black Walnut or Cherry kiln-dried by the manufacturer to a 6% moisture content, using U.S.D.A. Bulletin #FP-1136.

FINISH
All surfaces to be finished are well sanded before applying finish materials. The procedure begins with the application of a base color via a Non-Grain Raising stain. Next a wash coat is applied to seal the NGR stain and ensure an even colored finish. The a filler coat is applied and hand wiped to fill the open pores in the wood surface and further enhance the depth color. A sealer is applied and scuff sanded to prepare the surfaces for the top coat (finish). The final procedure is to apply a coat of 52° sheen catalyzed varnish to protect the surfaces and add luster.

LOCKS
Locks are standard on all pedestals and storage unit lateral file drawers.
Locks are optional on door fronts and must be specified at time of order.
Locks are not available on glass doors.

STRATFORD | FINISHES

WOOD FINISHES
Standard wood finishes are:

SPECIES	FINISH
Cherry	Light Cherry Natural Cherry American Cherry Medium Cherry Standard Cherry Imperial Cherry Appalachian Cherry Sable Cherry
Walnut	Natural Walnut Regular Walnut Mahogany on Walnut Dark Walnut Cordovan Walnut

NATURAL CHARACTERISTICS OF WOOD
Wood is a natural product with inherent color variations that will never be fully mitigated by the finishing process. Please anticipate variation in colors within a single unit, from piece to piece, and from Krug wood finish samples. If a very close match is required, a sample must be provided with the order and an upcharge will apply. Exact color matches are not possible.

CUSTOM WOOD FINISHES
Add 10% net to your order for special finishes, minimum charge is $500 list per finish per order. (For example, on all orders up to $5000 list, an upcharge of $500 will apply, on orders $5000 and up add 10% net to your order.)

For orders with special finishes, a sample that is a minimum 3” by 3” must be received with the order. Special finishes may add additional lead time to production schedules.

Since wood is a natural product, some variations in grain, color, and stain acceptance will occur. In our finishing processes, we try to minimize variations, but some variation between samples and finished goods should be anticipated.

DUAL FINISH
Add 10% net per item if specifying dual finish.

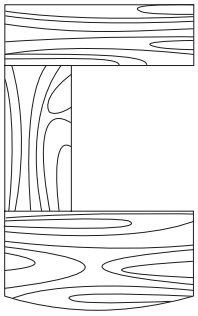
STRATFORD | LAMINATE WORKSURFACES



LAMINATE WORKSURFACES

Laminate worksurfaces are available at an upcharge of 10% (a higher upcharge may apply to specially priced plastic laminates).

Where there are wood profile edges on worksurface tops, they will remain as wood profiles on laminate tops.

Where there are flush edges, as in the backs of link units, there will be laminate self edges. Please reference the illustration at the bottom of this page.

Krug will order and procure laminates. Purchase orders with a plastic laminate option must include:

Manufacturer’s Name
Laminate Name
Laminate Number

When specifying laminate worksurfaces, the grain direction is such that the grain pattern runs the length of each surface, as shown in the diagram on the left.

Please contact Krug Customer Service for questions pertaining to laminate grain direction.

STRATFORD | NON-STANDARD PRODUCT GUIDELINES FOR PRICING

PRICING METHOD

Custom widths: Apply the price of the same unit in the price list that is one standard size larger than the desired case size (but same depth).

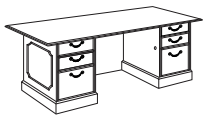
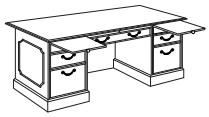
Breakfront Modesty Panel
All single pedestal and double pedestal desks have a breakfront modesty panel on the guest side of the desk. The dimension of recess is 4 1/2”.



Oversized Top Option
The oversized top option increases the overhang on the left and right sides of desks to 4 1/2” on each end, the guest and user side overhang remain unchanged.



Center Drawer Option
Desks specified with the optional locking center drawer include the following features:
– center drawer lined with burgundy felt and a pencil tray.
– a pull out dictation slide in each pedestal
– a central locking system activated by a single lock located on the center drawer front
Recent modifications:
– dictation slides are flush with drawer fronts and feature molding detail
– center drawer extends to underside of top with the lock on the drawer front

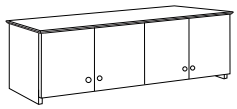
STRATFORD | OVERHEADS & HUTCHES

OVERHEADS

Overheads include tasklights that are factory installed and require no field adjustment. Tasklights are mounted beneath the cabinet and hidden from view. Cords run down the right hand side of the tasklight to the worksurface where they can be routed behind the worksurface top. The use of a wall mounted tackboard conceals the cord from view.

Tackboards must be ordered separately and can be specified in any fabric grade (1-9). Wall mounted tackboards for overheads are supplied with all necessary hardware for installation.

Locks are optional on overheads and can be specified at time of order for an upcharge of $105 list per set of (2) doors.

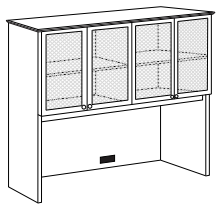


HUTCHES

Hutches include tasklights that are factory installed and require no field adjustment. Tasklights are mounted beneath the cabinet and hidden from view.

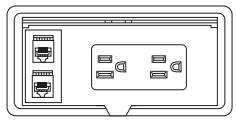
A tackboard in grade 1 fabric is included with most hutches, see the hutch product section for specific products. Upcharges for higher graded fabrics are listed on page 804. Tackboard fabric selections should be supplied with the order information, fabric options are listed on page 5 of this price guide.

Tackboards for hutches are installed at the factory and require no additional set up on site.



POWER/DATA/VOICE GROMMET

Access to power and data is made simple by using a hutch with a power/data/voice module built right into the tackboard. The module is fully installed at the factory but can be removed to connect data links on site. It features a flip door that retracts into the case of the unit when open. See page 805 in the grommets section for complete power specifications.



INSTALLATION

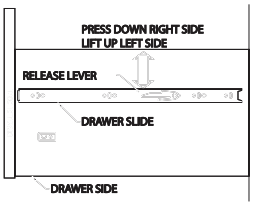
Hutch and overhead installation instructions are included with ever case, but basic installation instructions can be found in this guide on page 787. All required mounting hardware is included with all hutches.

CONNECTING WORKSURFACES

It is important that the product is in its final position and the primary worksurface is leveled before connecting other joining pieces.

Detailed installation instructions are included with each unit, or available from Krug Customer Service.

Units are connected with mending plates under worksurfaces, and linking brackets on modesty and end panels. Locate connections and attach the mending plate under the worksurface. Level pieces if necessary by adjusting the glides to achieve flush and firm joints before completing installation of all hardware.



DRAWER REMOVAL

To remove pedestal drawers, open to the extended position, press down on the right side nylon release lever and pull the drawers up on left side lever at the same time. Continue pulling the drawer out of the case.

GLIDE ADJUSTMENTS

Raise one corner of the unit at a time and adjust the glide to the desired height by turning the glide in the hole. Make sure unit is level after adjusting the glides.

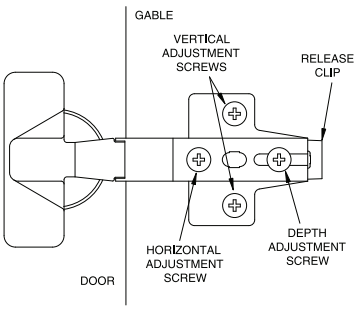
Please note that the maximum adjustment range of the glides is 1/2”.

When moving units after glides have been inserted, dial the glides to the lowest position to prevent damage to the case.

BOOKCASE OR HUTCH DOOR ADJUSTMENT

Hinges on all hutch and bookcase doors are designed to be adjusted fro depth, horizontal and vertical adjustment by means of screws into the hinge mounting plates.

To remove a door, pull the release clip away from the case, disconnecting the hinges.



OVERHEAD INSTALLATION

The wall mounted overhead storage units must be installed on wall studs. The first step for installation is to locate the studs in the wall where the overhead is to be mounted. Measure the stud center line location and use this measurement to mark the hole locations on the mounting rail and the overhead back. Drill clearance holes at the hole locations. Hole requirements will depend on the fasteners chosen by the installer. 2 1/2” x #10 wood screws are adequate if going into wood studs. If studs cannot be accessed, then appropriate drywall plugs or butterfly bolts should be used. We recommend 2 fasteners per stud.

Fasten the mounting rail to the wall ensuring that it is level. Hang the overhead on the mounting rail and then fasten it to the wall. This prevents accidental removal and also allows for some leveling adjustment.

ORDERING NOTES:
In the 20" deep knee hole credenzas and/or shells the pencil drawer cannot be used. The oversized top option is only available on stand-alone double pedestal credenzas and cannot be used in conjunction with any other run-off connecting worksurfaces. Specifying the oversized top option increases the top width, increasing the left and right overhang measurement to 4 1/2". The fron and rear overhang remains unchanged. Laminate worksurfaces are available at a 10% upcharge.

Use this chart to find the upcharge for tackboard fabrics graded 2–9 and add it to the cost of the hutch.
Fabric grades can be referenced on page 5.

On single piece hutches, the yardage requirement for two tackboards is the same as for one tackboard. Please keep this in mind when ordering more than one tackboard. For example, if the number of tackboards required is 7 and the COM requirement for 1 tackboard is 1.5 yards, the calculation for COM yardage is as follows: 4.5 yards are required for 6 tackboards + 1.5 yards for the 7th tackboard for a total of 6 yards. In the case of an even number of tackboards, divide the number of tackboards required by 2 and multiply that number by the COM requirement on the chart. The fabric must be at least 54″ wide in order to qualify for this procedure. If the fabric is less than 54″ wide, the COM yardage listed on the chart is the amount required for each tackboard.

COM Yardage Calculation Chart of Tackboards

Quantity of Tackboards Required (example: 60″)	Number of Yards Required per Tackboard (example: 60″)	Number of Yards Required in Total (example: 60″)

two	2 yards	2
three	2 yards	4
four	2 yards	4
five	2 yards	6

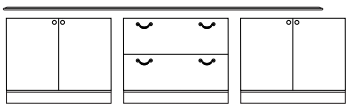
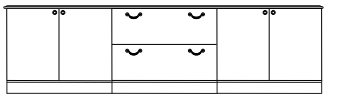
STRATFORD

Ordering modular storage with 98TP tops
30″ high modular storage units are created by combining 98TP modular tops and modular bases. The top profile on a 98TP matches that of all other 30″ high Stratford products including desks and credenzas. For example:

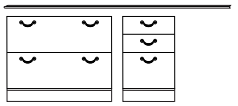


One 98TP-9024 modular top.
Two 98STM-302430-11 modular bookcase pedestals.
One 98STM-302430-01 modular lateral file pedestal.

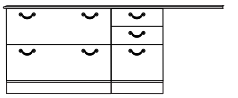


The modular components can be used together to create a variety of custom storage.

Ordering modular storage with 98TPR tops
30″ high modular run-off units are created by combining 98TPR modular tops and modular bases.
For example:



One 98TPR-6624 modular top.
One 98STM-302430-01 modular lateral file pedestal. One 98P-162430-4F modular B/B/F pedestal.



The modular components can be used together to create a variety of custom run-off units.
