[SpacePlanner] *Planning Library Spaces*

Brodart presents a dynamic new approach to planning library spaces with its exclusive SpacePlanner designs. Research has shown that the patron experience is often limited and leaves library spaces unexplored. The SpacePlanner concept can be utilized to influence patron behaviors by providing organic shelving shapes and colors to maximize the patron's library experience.

BookSpace *Unique and Modern Reading Environments*

BookSpace makes libraries and reading corners more exciting and child-centered with seating, play, and display features for interactive settings. Libraries have recognized that in addition to learning the mechanics of reading, children need motivation to read independently for their own pleasure. These settings have been created through research, which has proven that positive and imaginative ways of displaying books and shelving helps engage the young reader.
