Grip™ Table design: Troels Grum-Schwensen

"The Grip™ Table is a new design inspired by tight rope walkers who balance by means of a long pole – thus gravity challenging balance. Grip™ gets more stable the more weighted it becomes. Gravity becomes a fellow player in the locking construction with which the table is assembled. The position of the table legs can be easily changed depending on the requirements of each situation. At the centre of the table structure there is a strong floating beam which has the unique ability of creating a long freestanding table."

Table Styles

Grip™ Tables are available in 2 distinct styles: Collaborative and Conference.

Collaborative style tables have 1 piece, 1" thick tops and the bases positioned close to the table ends for stand alone applications and under the seams for ganged. These tables can be placed end to end to produce long runs of continuous table with the use of rail linking devices. A small gap between the joined tops provides a visual detail to better define the space.

Tables are available in rectangular shape only, 4 depths and 10 lengths and are best suited for a training room or open office floor plan application.

Conference style tables are stand alone tables with a 1.25" thick, multiple section tops and bases that are positioned to allow seating at the end of the table.

Conference style GripTM tables are available in rectangular, super ellipse and boat shapes.

Tables are available in 4 depths and 12 lengths for most shapes.

Glass tops with interlayer and subtop available for select sizes.

Please call customer services at 1-800-668-9318 for details.

Grip™ | Connectivity & Wire Management Details

Connectivity - Edge Power

Edge power connectivity solutions are provided by the use of a central power channel mounted below the top on both user sides. Data, power and a variety of connectivity options are available according to your needs. Call customer service to discuss your specific requirements. Units available pre-wired only, anodized silver and in 2 lengths: 13.6” / 47.2”.

See page 21 for pricing of power connectivity.

Expandable cable conduit

Linked cable conduit

Cables are gathered and directed to the floor with either an expandable or linked cable conduit. The repositionable mount enables the conduit to be easily positioned anywhere along the support rail. Both solutions accommodate core drills with their large base ring. Both models are available in black, silver and clear.

See page 25 for pricing of cable conduits.

Connectivity - Surface Mounted

Surface mounted connectivity solutions are provided by the use of SIMPLE Pop Up Forums located a minimum of 10" apart from centre of table. Surface mounted power units cannot be centered on the table top. Data, power and a variety of connectivity options are available according to your needs. Call customer service to discuss your specific requirements. Units available pre-wired and hard-wired from 2 port to 4 port configurations.

See page 22-23 for pricing of power connectivity.
