Details

JUMBO BARREL STRAINER 6.0"NHF SWIVEL HANDLE
JUMBO BARREL STRAINER 6.0"NH - Heavy duty barrel strainer gives maximum flow capability. The impact resistant polymer won't dent when dropped and won't corrode even in contaminated water. The wavy straining pattern resists debris sucking flat against the holes. 240 holes total 48 square inches of flow area. An oversize loop makes tying off the strainer easy. The coupling is made from hard anodized aluminum and rotates easily on a polymer bearing ring. 6.0"NH (150 mm) female short handle coupling is standard.

Weight: 3.940 lbs (1.787 kg)

PRODUCT SERIES OVERVIEW

- TFT's Jumbo Barrel Strainers are produced from lightweight nylon, incorporate a unique coupling attachment system, and are designed for high volume water flow operations. Available in black or high visibility yellow, these strainers are easily stored in compartments or pre-connected to hose lines, and are designed for 2 ½", 4", 5", or 6" lightweight hard suction lines.

- The Low Level / High Volume Strainer provides flow performance up to 1500gpm will minimal loss and incorporates a unique swiveling design that holds the strainer flat on the bottom of the tank maximizing available water flow. The low level design prevents unwanted whirlpools which can cause a loss of prime, as well as allowing water to be drafted to within only a few inches of depth utilizing all available water.
