VERSAPRO™

Lightweight, high-performance and dual-certified rescue wear

LION®

ready for action

VERSAPRO™

Why VersaPro?

According to the NFPA, in 2013, fire departments in the U.S. responded to over 1.2 million fires. That may sound like a lot, but it's a mere 4% of the more than 31 million total calls that fire departments received. That's why LION introduced the VersaPro.

The VersaPro is the perfect garment for non-fire calls and to reduce wear and tear on structural turnout gear. This dual-certified, NFPA 1951 and 1977 garment offers more protection than a station uniform, but is less cumbersome than structural turnouts for non-structural calls. Its ground-breaking **Sigma™** fabric is soft, yet strong and durable.

VersaPro's Key Benefits & Features

VERSAPRO GARMENT SPECS
