Wood Surface Cleaning

Wood furniture should be cleaned with a damp, soft cloth, wiping in the direction of the wood grain. Wood surface should then be dried with a dry, soft cloth. Custom Wood Stains and Finishes

Nevers offers the capability of matching your custom stains or finishes. Virtually any wood finish or color sample can be matched to your specifications. A finish sample or stain sample is required from the customer before the process of matching approval can begin. The upcharge for custom finishes varies with the type of finish and also with the quantity ordered. Please contact Customer Service for pricing. For custom stain match – any order under $5000 list there is a $270 net upcharge.

Note: COLOR VARIATION WILL OCCUR IN THE GRAIN OF ALL WOOD SPECIES.
This is an inherent characteristic caused by the annual growth rings found in all hardwoods and the manner in which the boards and veneers are cut across these growth rings. In some species, this color variation is very subtle. In other species this color variation is obvious and at times radical.

The process of finishing hardwood veneers determines whether these variations are enhanced or subdued. Natural finishes will show color variations in the grain and enhance the beauty of the wood to its fullest extent. Other stains and finishes tend to blend in these variations to some extent dependent upon the depth of color and the particular method of application.

Standard Laminates

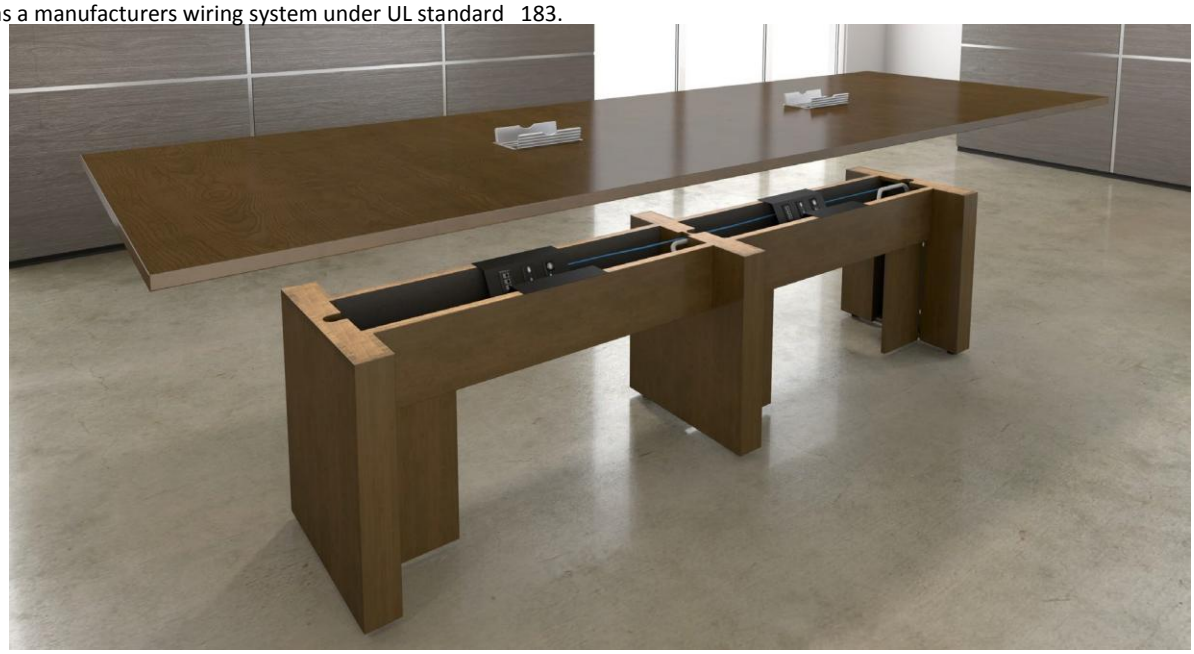
Understanding Nevers Meeting Link™

Nevers offers pre-configured Meeting Link™ solutions for all tables. This is an easy, trouble free method to specify power, data, voice and AV connections. Nevers proprietary technology centers use modular power connectors, are daisy chainable and are ideal for all installations where multiple electrical outlets connect to a single power infeed. They are available in single or multiple circuits. It is listed as a manufacturers wiring system under UL standard 183.



Technology centers are installed in the table base system before the top is placed on. This provides a convenient, well lit work area.

Jumnpers allow multiple technology centers to be connected (daisy chain) together using a single power feed.

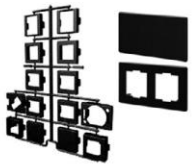
Power, data, voice and AV cables come through the floor box to feed the entire table.

Receptacles simply snap in with a positive locking tab feature that assures positive contact to the power blocks. Receptacles are labeled I, II, III and IV to denote which circuit the receptacle is keyed for. Nevers ships Circuit I receptacles as standard.

When ordered with power option, all wood bases receive an access door. All wood bases have cutouts in the bottom to accommodate floor core monuments and offer a spacious open cavity for cable routing and storage.

Duplex receptacles can be installed on both sides of the power block; this allows for equipment to be plugged in and mounted underneath the table. Additional duplexes must be ordered, see page 62 for ordering information.

The infeed snaps into the power block of the first technology center. The power blocks come pre-installed in the technology centers from the factory. There are four connection points on each power block, this allows for the infeed and jumpers to daisy chain multiple power blocks.



Each technology center comes standard with decora style openings for telecom plates with data, voice and AV ports. Nevers technology centers come standard with generic adaptor plates and connecting adaptor jacks that accept most common data and voice ports.

The technology center doors come pre-installed from the factory. The table top is placed on the base system after the technology integration is complete. This prevents damage to the table top attributable to third party contractors.

Nevers Meeting Link: How to Order

Step One: Determine your power/data/voice/AV requirements.

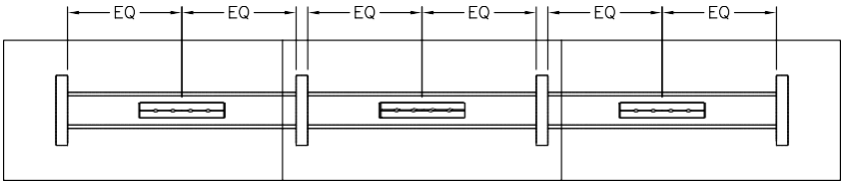
Heavy Capacity: PV1 - provides 1 outlet for every 1-2 people.

Medium Capacity: PV2 - provides 1 outlet for every 2-3 people.

Light Capacity: PV3 - provides outlet for every 3-4 people.

Step Two: Determine the quantity of technology centers required for your table.

Nevers Meeting Link™ technology centers are positioned centered between the bases. If your table has 3 bases, you will need 2 technology centers, 4 bases needs 3 technology centers, etc.



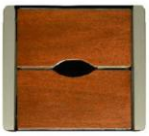
Step Three: Choose your door type and metal color.

Door Type Options: Metal or Wood
*Grain direction on wood doors will run opposite of the grain on the table top.

Metal Color Options: Silver or Black

Door Type: Metal
Metal Color: Silver

Door Type: Metal
Metal Color: Black



Door Type: Wood
Metal Color: Silver

Door Type: Wood
Metal Color: Black

Step Four: Choose your infeed type.

Multiple Circuit Hardwire: Activates all four circuits and has a flexible conduit. This must be installed by a certified electrician. (UL Listed)

Single Circuit Plug In: Activates only circuit I and has a 52" cord that plugs into a standard 120V/20A outlet. (UL Recognized)

Note: The maximum quantity of receptacles that Nevers ships per circuit is 12. If you require more receptacles, a second single circuit plug-in infeed or a multiple circuit hardwire infeed must be used.

City of Chicago: For the city of Chicago, Nevers offers a metal junction box and mounting bracket to replace the power block and allow the technology centers to be hardwired in the channel. All other electrical wiring and receptacles must be furnished separately by your electrician.

Note: Other metropolitan areas may have special electrical requirements as well. Nevers recommends consulting a local electrical contractor for proper code compliance information.

Step Five: Determine if you have any additional power/data/voice/AV requirements.

Additional infeeds, duplex receptacles, telecom plates and grommets can be found on page 62.

Note: Nevers recommends consulting an audio/visual (AV) integrator for assistance with data/voice planning.
