DEMAND BRILLIANCE.

36” Boom Forestry Head

Cut. Grind. Mulch.

Making the most out of everything you have is what we do at Diamond Mowers. The 36” Boom Forestry Head is just one of Diamond’s latest Made-In-The-USA innovations, turning trees into mulch while grinding stumps flush to the ground...all 10 times faster than a typical rotary head.

Safer than using a boom rotary, Diamond’s Forestry Head includes an open front exposing the blade to feed material quickly, while steel deflectors with full casing directs material down safely after it’s mulched.

PROUD TO BE MADE IN THE USA

We are a company built from the ground up on American values and a Midwestern work ethic. Our first job is to provide you with the toughest, smartest, most reliable and safest equipment needed to do your job better.

Demand Value. Demand Diamond.

36” BOOM FORESTRY HEAD

CUTTING POWER

Diamond’s unique design includes teeth on the perimeter of the blade, as well as cutting teeth and knives on the bottom of the disc to allow the head to come straight down on top of trees.

20 replaceable, hardened steel teeth cut cleanly and efficiently. With the ability to cut on all four sides, the teeth can be rotated for longer-lasting parts.

Patent pending, center-mounted teeth eliminate a dead spot that other equipment encounters, making Diamond’s Forestry Head faster and more effective. Two knives located in the center create additional mulching capacity, allowing the head to cut, grind and mulch with the entire blade.

This compact, boom-mounted forestry head is designed exclusively for brush cutting applications.

- Cuts up to 18” diameter
- Very fast production

  Up to 10x faster than a rotary head
- Cuts with both the perimeter and bottom surface
- Ability to mulch material
- Highly efficient, hardened steel, replaceable teeth
- Attaches to any Diamond or Tiger™ mid-mount boom or Diamond HD 3-Point boom

ONE-YEAR WARRANTY ON PARTS AND LABOR.
