CONTRACT SECTION III

PRODUCT PROTECTION GUARANTEES:

School districts have "automatic" product protection recourse against suppliers for product safety. According to federal regulations, the supplier whose name and address appear on the package is the responsible party. Contractors are expected to take immediate action to correct any situation in which product integrity is violated.

CONTRACT SECTION IV

PRODUCT REQUIREMENTS

GROUP F - PRODUCE

Terms of Reference Specific to Produce

Procedures

It is not necessary for bidders to fill in prices on the following list, which is submitted only for the purpose of indicating the types of items normally used in the school food service program. To submit a bid, a dealer only indicates the unit fees, for full and broken cases, on Sheet 2, Section I, and calculates total costs by multiplying the quantities indicated by the fees to obtain a grand total.

Quantities and Items

Bidders can discern from the attached list which items are normally delivered to schools in full case quantities and broken case lots. Once a bid is awarded, contract distributors can determine the items required and approximate dates of use by examining menus provided by the school district. A final determination of items will depend on market and product conditions, at the time purchases are made by the dealer.

Orders can be firmed up at least one week in advance of delivery. Distributors should, however, call the school district food service supervisor 48 hours in advance of delivery to confirm the order and discuss any variables which may exist.

Contractor's Assistance

Under this type of contract, the distributor serves as produce buyer for the school district. He is, therefore, obligated to work on behalf of the school district with respect to the following:

- a) Determine order-by-order the manner in which certain products, such as cabbage and apples, will be used so that purchases can be made accordingly.
- b) Select products from those available which will provide the best value for the use intended, in accord with market conditions.
- c) Select stone fruits, melons, etc. with respect to maturity which will provide the most effective "ripeness" at time of usage.
- d) Select products which can be delivered in optimum "condition" particularly with respect to maturity level, decay, trim, appearance and color.

With a high level of mutual cooperation between a school district and a contract distributor, produce of high value and acceptance can be constantly made available to children at modest cost.

Buy American

- a) Purchase requirements. When purchasing food products with Federal funds, whenever possible, recipient agencies shall purchase only food products that are produced in the United States (U.S.). Food products produced in the U.S. means:
 - 1) An unmanufactured food product produced in the U.S.; or
 - 2) A food product manufactured in the U.S. primarily using food grown in the U.S.
- b) Exceptions: The purchase requirements described in paragraph (a) of this section shall not apply in instances when the recipient agency determines:

- 1) Recipients have unusual or ethnic food preferences which can only be met through purchases of products not produced in the U.S.;
- 2) The product is not produced or manufactured in the U.S. in sufficient and reasonably available quantities of a satisfactory quality;
- 3) The cost of U.S. produced food products is significantly higher than foreign products.

Geographic Preference

The Desoto County School District encourages all bidders to honor our geographic preference of Mississippi grown products. Additional preference is given to products grown within a 100 mile radius of our school district. Products with a reasonable probability of being obtained from Mississippi growers are designated in Section IV with an M following the item number. (ex: 11M)
