Tip: Modular table power kits require either a 20-amp plug infeed or hardwire infeed to power the tables. A 20-amp plug infeed can only be used with Circuit 1 receptacles, and the hardwire infeed can be used with either or both, Circuit 1 and Circuit 2 receptacles. Both infeeds have a color coded female modular connector that must plug into the matching color coded male infeed connector on the modular power kits.

Tip: When the factory-installed flex ganger option is specified, the flex gangers will be installed in the end-to-end ganging configuration. If side-to-side or end-and-side ganging is required, change the position of the flex gangers at time of installation. All flex ganger locations are pre-drilled for simple re-location when desired.

Tip: When bar gangers are specified, they are shipped with the table. The inserts for all bar gangers are standard on all tables.

Tip: 48" x 24" and 48" x 30" tables accommodate center grommet only.

Tip: When three grommets are specified, grommets will be located left, right, and center.
