# Lifetime Warranty

**Allsteel Inc. warrants its products to be free from defects in material and workmanship for as long as the original purchaser owns them, except as set forth below.**

Allsteel shall repair or replace with comparable product (at Allsteel's discretion), free of charge, any Allsteel product or component manufactured after January 29, 2017, that fails under normal commercial office use.

**This warranty is subject to the following provisions:**

Some natural variations occurring in wood, leather, or other natural materials are inherent to their character and not considered defects. Allsteel does not warrant the colorfastness or matching of colors, grains, or textures of these materials. Additionally, a Customer's Own Material (COM) selected by, and used at the request of, a user is not warranted.

**The materials and components listed below are covered according to the following schedule from the date of sale:**

- Wood products and electrical components (lamps and ballasts are not covered), seating controls, pneumatic cylinders, glides, casters and polymer-based components, and foam — 12 years
- Wood seating, stacking chairs, Sum® AutoFit® technology, and laminates — 10 years
- User-adjustable worksurface mechanisms, tablet arm mechanisms, interior wood-framed seating and lounge products, occasional tables, Mimeo™ mesh, Quip™ mesh, Scout® mesh, panel and seating upholstery fabrics, and other covering materials — 5 years
- Marker board surfaces and upholstery on Gather™ products — 3 years
- #19®, Access™, Acuity®, Clarity®, Inspire®, Lyric™, Quip, Relate®, Scout, Seek®, Sum, and Trooper® asynchronous and synchro-tilt models are warranted for multiple shifts and users up to 300 lbs. Mimeo is warranted for multiple shifts and users up to 350 lbs. Lyric Large & Tall is warranted for multiple shifts and users up to 400 lbs. Trooper Large & Tall is warranted for multiple shifts and users up to 500 lbs. All other Allsteel chairs and components are warranted for single-shift, 40-hour workweek usage.

- #19 chair, including components and material, is warranted for as long as the original purchaser owns the chair.
- #19, Access, Acuity, Clarity, Lyric, Relate, and Seek mesh/carriers and Mimeo and Quip carriers are considered structural chair components and as such are warranted for as long as the original purchaser owns the chair.
- Undercabinet LED light — fixture warranted for 3 years; power supply warranted for 1 year
- Link™ LED light — 5 years
- Wand™ LED Light — fixture warranted for 5 years; power supply warranted for 3 years
- Beyond™ Movable Walls — 10 years; moving parts such as door hardware and door mechanisms — 5 years; customer's own hardware — supplier warranty

**This warranty does not apply to:**

- Normal wear and tear over the course of ownership, including fabric puddling
- Damage from sharp objects (e.g., writing utensils, heeled shoes, scissors, jewelry, keys)
- Modifications or attachments to the product not approved by Allsteel
- Products not installed, used, or maintained in accordance with product instructions and warnings
- Products used for rental purposes
- Damage caused by the carrier in-transit, which is handled under separate terms
- Third-party products. Allsteel, to the extent possible, will pass through to the original purchaser (and process claims under) any warranty provided by manufacturers of undercabinet lighting, ergonomic work tools, or other third-party products supplied by Allsteel.

**TO THE EXTENT ALLOWED BY LAW, ALLSTEEL MAKES NO OTHER WARRANTY, EITHER EXPRESS OR IMPLIED, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. ALLSTEEL WILL NOT BE LIABLE FOR ANY CONSEQUENTIAL OR INCIDENTAL DAMAGES.**

This warranty applies only to products sold within the United States of America and the Commonwealth of Canada.

Your Allsteel Dealer is our mutual partner in supporting your warranty requests. To obtain service under this warranty, please contact your Allsteel Dealer.

## COM Program

Allsteel understands that customers may at times want to specify fabrics outside of Allsteel's standard fabric offering. Our COM program was designed to make specifying COMs on Allsteel products a simpler, friendlier, and hassle-free process. This process is simple and easy to use, and is described below under "Allsteel to Supply (ATS)." If a Dealer wishes to manage the COM process themselves, they can do so by following guidelines under "Dealer to Supply (DTS)". **ATS is the preferred method for all COM fabrics.** With ATS, Company will provide acknowledgment based upon planned date of receipt of COM fabric and manage the entire process. DTS is allowed if it is not a partnership fabric or if Company does not have access to the supplier. **DTS may cause order delays and is strongly discouraged.** Find out more about Allsteel's COM process by emailing our COM Department at [allsteelcomteam@allsteeloffice.com](mailto:allsteelcomteam@allsteeloffice.com).

### Allsteel to Supply (ATS):

1. Select the fabric you wish to use and check the COM Search on Synergy. You need the COM supplier's name, fabric pattern name, and color name to search for approved fabrics.
2. If your fabric is listed as an approved fabric, you may place your order directly with Allsteel Customer Support. Please use the fabric code (e.g., S216426XP) from the COM Test Request on your order in the place of the standard fabric code. **Make sure to mark on the top of the order "Allsteel to Supply."** If your fabric is not listed as approved, you will need to select the "Request COM Test" link on the COM Search website. Allsteel will arrange to obtain test fabric and you will be notified of the results within 3 to 5 working days of receipt of the test yardage by Allsteel.
3. If the fabric is approved, you will receive an email summary from Allsteel with the correct price grade and fabric code for order purposes. Written COM price quotes hold pricing for 90 days after issue date.
4. Once the fabric has been approved by Allsteel, enter your order directly with Allsteel Customer Support. Allsteel will purchase all COM fabric directly from the COM suppliers and schedule for production.

In the event that the Dealer decides to cancel a COM fabric order, the Dealer is responsible for the cost of the fabric plus a handling charge that is equal to 10% of the fabric cost.

### Dealer to Supply (DTS):

1. Select the fabric you wish to use and check the COM Search on Synergy or call Allsteel Customer Support to see if the fabric you have chosen has already been tested and approved on the product you are interested in.  
  
You need to have the COM supplier's name, fabric pattern name, and color name for this inquiry.
2. If your fabric is listed as approved, and it is not a Partnership fabric, you may request a "Dealer to Supply" code and estimate the yardage required by using the yardage

requirements listed in the price list by model. For questions please contact Allsteel Customer Support.

3. If your fabric is not listed as already tested and approved, you will need to complete a COM Test Request on Synergy. You will need to arrange for the test fabric to be sent to:

HNI Fabric Testing  
Attn: COM Dept.  
2210 2nd Avenue  
Muscatine, IA 52761

Allsteel requires 3 yards of fabric and 2 memo samples for each panel system fabric being tested; and 4 - 8" x 8" memo samples for all seating testing. You will be notified of the test results within 3 to 5 working days of receipt of the test yardage by Allsteel.

4. Make sure to use a "Dealer to Supply" COM code (e.g., S216426ZP) and place your order directly with Allsteel Customer Support.
5. All "Dealer to Supply" orders will be charged Grade 4 pricing for seating, Grade 3 for Gather, and Grade D pricing for panels. Dealers will pay for the COM fabric separately.
6. All "Dealer to Supply" fabric must be sent on a fabric roll.
7. Place your fabric order directly with the COM Supplier with instructions for the fabric to be sent on a fabric roll to:

**HNI Textile Distribution Center**  
**COM Production Yardage — PO Number**  
Docks 20-22  
301 Mulberry Avenue  
Muscatine, IA 52761

Information that **MUST** be included in the packing slip attached to the fabric:

1. Dealer's Purchase Order number to Allsteel
2. Allsteel's Tracking number for the COM fabric
3. Dealer Name
4. Yards of Fabric

If the fabric shipment does not match the correct fabric and yardage, Allsteel will notify the Dealer for resolution.

If Allsteel receives fabric with incorrect labeling that cannot be linked to an Allsteel furniture order, Allsteel will hold the fabric for up to 7 days, while the COM Expeditor attempts to identify the order. After 7 days, Allsteel will return the fabric to sender. There are no exceptions to this policy.

Any cancelled orders are subject to cancellation charges up to the full value of the Allsteel product cancelled. Allsteel will determine the actual cancellation charge at the time the cancellation is requested.

8. For additional details on "Dealer to Supply" fabric refer to your Allsteel terms and conditions.

**Additional Policy Information:**

The company assumes no responsibility for the overall appearance, flammability, normal durability, colorfastness, or any other quality standards. The Company reserves the right to reject a COM if the quality of the COM is not satisfactory for the product. Should this occur, the customer will be notified with an explanation within 7 working days of receipt of test materials.

The company is not responsible for fabric that has become obsolete at the COM supplier, that is of poor quality, or that is delivered late to the manufacturer from the COM supplier. Excess yardage will be disposed of at Allsteel's discretion.

All cancellations or changes to COM orders are subject to Company approval. Because of the nature of COM, special fabrics, finishes, and structural modifications, products ordered as specials and then cancelled prior to shipment are subject to cancellation costs up to the full value of the product cancelled. The company determines the actual cancellation charge at the time the cancellation is requested. Upon approval, a cancellation number is issued to the Customer.

Purchase orders will not be accepted or entered unless the testing process is complete with positive results.

If all testing has been previously completed, re-testing is only necessary if fabric is to be used on a different product, or pattern direction has changed from that previously approved.

Previous test results can be obtained by a customer on the COM Search on Synergy or by calling Allsteel Customer Support. COM testing will require 3-5 working days from receipt of test yardage.

COM testing will require 3-5 working days from receipt of test yardage.

All COM fabric will be applied to seating and panel systems Pattern Cut unless Railroad Cut is requested and approved on the COM Test Request. Any fabrics approved as a width pass, the dealer is responsible for clarifying Railroad Cut on orders containing items that are too large to support the Pattern Cut of a fabric application (any items larger than 48" high or wide).

**Fire Retardant**

The Dealer is responsible for ensuring that the COM fabric is certified to meet all flame retardant requirements.

*For more information, please contact Allsteel Customer Support.*

**YARDAGE REQUIREMENTS FOR FABRIC WITH REPEATS — FOR USE ON GATHER™ PRODUCTS**

Fabric Width	Plain Fabric	2" – 14" Repeat	15" – 19" Repeat	20" – 27" Repeat	28" – 36" Repeat
54"	0	+15%	+20%	+25%	+30%
53"	+6%	+19%	+24%	+28%	+36%
52"	+13%	+23%	+28%	+33%	+38%
51"	+19%	+26%	+31%	+36%	+41%
50"	+25%	+30%	+35%	+40%	+45%
49"	+30%	+35%	+40%	+45%	+50%
48"	+35%	+40%	+45%	+50%	+55%
47"	+45%	+50%	+55%	+58%	+65%

Depending upon the pattern repeat, it may be necessary to pattern cut the fabric. This will require 10% additional fabric.

To calculate multiple repeats (vertical and horizontal), add each repeat for total yardage required. For example for a fabric width of 54": 7" vertical requires 15%, 15" horizontal requires 20% total additional yardage required equals 35% (15% + 20%). Therefore, if your chair requires 2 yards of fabric, multiply 2 by 35%. Then 2.7 yards will be yardage required.

## Special Paint & Stain Policy

Allsteel at its own discretion may modify its standard products with non-standard paint and stain colors to meet specific needs. Dealer is required to submit a special paint or stain request via the COM Search on Synergy. A sample of the non-standard paint or stain color desired will be required for matching. Pricing, lead time, and order information will be provided at the time of approval.

- For each new requested stain or paint, there will be a \$500 net fee to cover supplier costs to match the special item.
- For existing, previously-approved stains or paints, there is no \$500 matching fee, however, there is a sample chip fee of \$175 net for stains and \$100 net for paints.
- Samples, preferably at least 3" x 5" chips, of the exact color desired should be sent to the Allsteel Tailored Products Group. Paint matches require (3) sample chips and stain matches require (3) sample chips. Please mail these sample chips to the address below and reference the Special Item Request Number from Tailored Solutions.

### Allsteel Inc.

Attn: Tailored Products Group  
2210 Second Avenue  
Muscatine, IA 52761

- Allsteel will color match the sample and send control samples to the address provided in the request. Dealer will review Allsteel's color match and approve by signing the back of the sample chip. Send the signed sample back to the Allsteel Tailored Products Group.
- Special paints will be assigned a paint price grade.
- Orders will not be accepted until Allsteel receives the Dealer's written approval on the color match.
- Extended lead times will apply on orders containing special paints or stains.
- Due to manufacturing techniques, materials, and quality issues, some exclusions will apply and some matches may be declined.

### Important Notes

- Natural veneer is subject to nature's quality control. Differences in grain and color are naturally occurring variations and cannot be controlled by the manufacturer and cannot be considered as product defects. Natural veneer has the characteristics and beauty of a living organism; with its own variations of grain, growth, and color patterns. For these reasons, Natural veneer is preferred by many for its warmth and personal characteristics.
- Color changes will occur over time when wood is exposed to light. For this reason, when new product is ordered as an addition to existing product, there will be color variances between the old and new product. Please remember when specifying new product that although the species of veneer will be the same, additional product is being manufactured from a different tree. It may take several months for the new furniture to mature to the color level of existing product. Even with this maturation process the additional product will not be an exact match.

## Special Laminate Policy

The Company at its own discretion may modify its standard products with non-standard laminates to meet specific needs. Contact the Allsteel Tailored Products Group for pre-approved Wilson Art laminates and pricing for special laminates. When requesting a special laminate please supply manufacturer, along with name and pattern number of laminate.

- Extended lead times will apply on orders containing special laminates.
- Due to manufacturing techniques, materials, and quality issues, some product exclusions will apply and some requests may be declined.

# Everyday Advantage®

## Program Terms for Everyday Advantage

1. Orders must clearly state “Everyday Advantage Order” and include the appropriate Everyday Advantage contract number:
  - Everyday Concensys® Std-0131, Everyday Concensys Canada-0133
  - Everyday Optimize™/Terrace® Std-0125, Everyday Optimize/Terrace Canada-0127
  - Everyday Concensys Gov-0132
2. Orders must contain only Everyday Advantage products. Choose the correct contract in your electronic ordering system by selecting the panel system, (Concensys or Optimize/Terrace) then add other desired products. If no systems product is being ordered, either contract can be selected.
3. Everyday Advantage orders are not eligible for bid pricing.
4. The complete Concensys, Optimize, and Terrace systems lines; and all of Approach™ desking and storage. This program also includes Access™, Inspire®, Lyric™, Mimeo™, Nimble®, Quip™, Relate®, Seek®, Scout®, Sum®, Tolleson, and Trooper® seating. Altitude®, Aware®, and Merge® tables are available, along with Align™ Lockers and metal storage, and the complete Essentials™ storage line. In addition, Extensions™ ergonomic accessories and lighting are part of the offering.
5. Orders received for the program must only contain Everyday Advantage identified product. Products included in an order that are not part of the program will cause the whole order to be acknowledged as regularly manufactured products.
6. All textiles and finishes are available, but some may have extended lead times.
7. Everyday Advantage orders are not limited to a minimum or maximum.
8. All orders ship based on standard lead times. Large-quantity orders of like products may be subject to longer lead times.
9. Standard freight terms apply.
10. If driver assistance is needed, standard driver assist charges will be added at time of order entry.

*Allsteel Inc. reserves the right to amend or terminate this program at any time with 30 days written notice. Allsteel is not liable for service delays caused by force majeure (circumstances beyond Allsteel's control).*

A full gallery of typicals from each Allsteel system can be found on our website: [www.allsteeloffice.com/TypicalsGallery](http://www.allsteeloffice.com/TypicalsGallery). Each typical includes a complete BOM with current pricing, downloadable CAD files, and PDFs of each drawing.

### Optimize "U" Station 8' x 8'

Provides seated privacy with ample storage and worksurface space.

### Optimize "L" Station 7' x 6'

Storage tower allows lower panel height for an open feeling.

Visit [www.allsteeloffice.com/TypicalsGallery](http://www.allsteeloffice.com/TypicalsGallery) to view these typicals and more.

**Workstations made easier.**

Whether you're outfitting a call center, creating teaming areas, replacing a reception desk, or adding new stations for managers, Allsteel can help you make the most of your office with Optimize. By bringing together panels, worksurfaces, and storage in one cohesive offering, we've made it easy for you to create efficient, well-designed spaces. All you have to do is configure these quality components to fit the needs of everyone in your office. Let us show you how.

**Optimize makes a good first impression.**

In areas open to the public, choose panels, worksurfaces, and storage to define space and keep projects organized. In this reception/shared workspace, a transaction countertop welcomes guests and worksurfaces below provide ample space for computers and paperwork.

**We help you put it all together.**

An open configuration with lower panels and a small footprint is perfect for people who perform the same function and need to share information throughout the day. Optimize benching can utilize tool rails and monitor arms to keep items off the desktop. An integrated D-shaped worksurface makes it easy for workers to come together to collaborate and then quickly return to their personal work areas.

**As work changes, Optimize changes with you.**

Optimize helps workers adjust workstyles throughout the day, from concentrated work to team brainstorming. In team areas, each person can have ample privacy, roomy storage with overhead bins, as well as a spacious worksurface for individual tasks. When it's time to collaborate, a table within the workspace and mobile pedestals that double as seating make it easy to come together.

**Make the most of your space.**

With Optimize panels, worksurfaces, and storage, you can create stations that feel like private offices. Higher panels promote privacy along the aisle while glass stackers near windows bring natural light into the space. Plenty of enclosed, lockable storage above and below the worksurface holds sensitive information. A U-shaped worksurface arrangement creates a natural conference area to accommodate conversations with team members or clients.

# Panels

## Frame Dimensions (Actual)

**Depth:** 2⅝" (use 2¼" to calculate intersections in length of panel run)

**Widths:** 20", 24", 30", 36", 42", 48", 60", 72"

**Heights:** 34¼", 41¾", 49¼", 64¼" (with levelers fully retracted)

**Leveling Glides:** 2⅝" range

**Stacking Panels:** 15"H fabric and glass, 30"H glass

**Frameless Glass Screens:** 7½"H, 15"H

## Tackable and Non-Tackable Panels (pages 18-19)

- Specifications: 4-sided, welded tubular steel panel frame.
- Panel frames include and are shipped with base pathway covers installed. Top trim is specified separately for all panel frames.
- Hardware included with connector kits.
- Available in 4 heights and 8 widths — add ⅜" for each panel vertical end trim.
- Panel frames can be leveled up to 2⅝". Actual panel height varies depending on position of leveling glides.
- Direct connections between same height frames in a continuous run are accomplished with provided hardware. There is no incremental increase in dimension along the run.
- For adequate stability, one of two methods of stabilization shown on page 17 must be adhered to.
- Due to depth of panel, back-to-back data modules should not be used in the base. Optional 3-hole kickplates are available.
- Add 2¼" to panel run for each "L", "T", "X", or extended straight connector ("S").
- Acoustical panels meet BIFMA recommendations.
- Fabric selection for 72"W panels is limited. Available 72"W panel fabrics are flagged with a "W" on the inside back cover of this price list.

### Building Vertically with Optimize Panels

**Stacking Frame Connection**  
Glazed panels only in top position

### Building Horizontally with Optimize Panels

**Method 1—Opposing Returns**

**Method 2—Single-Sided Returns**

Important planning guidelines: For adequate stability, one of two methods of stabilization must be adhered to:

#### Method 1 — Opposing returns

- A parent run must be a minimum of 48" and a maximum of 144" between return panels.
- The parent run must have a minimum of two 24"W return panels running in opposing directions on each end of run.
- Return panels must not be any more than 30" shorter in height than parent run.
- When using 120° connectors, 12" must be added to length of return panels as determined by methods 1 and 2.

#### Method 2 — Single-sided returns

- A parent run must be a minimum of 48" and a maximum of 144" between return panels.
- The parent run must have a minimum of two return panels extending in one direction. Stack-ons may require additional length. See chart.
- Return panels must not be any more than 30" shorter in height than parent run.

### Stacking Tackable and Glazed Panels (pages 18 and 20)

- When adding stacking panels, remove the top trim from the structural panel, and install top trim on top of the stacking panel.
- Stacking connection provides a solid connection, allowing the stacking frame to accept hang-on components, per Optimize configuration guidelines at left.
- Includes attachment hardware. Specify connectors separately.
- Only one stacking glazed panel can be added to top position of any Optimize panel of same width from 20"W to 72"W up to a maximum combined height of 80".
- End trim is specified in full end height to include height of base panel + stacking panel.
- Guidelines for using overhead storage with stacking frames are given on page 71.
- Stacking glazed panels feature clear or frosted tempered safety glass inserts (specified). Glass frame is painted to match trim.
- Stacking frames can be added to the top of same width 35"H, 50"H, and 65"H base panels up to 80"H; added to 42 1/2"H panels up to 72 1/2"H.
- Slot modularity will be lost on stacker used with 42 1/2"H panels. If panel mounting slots are not being used, this is not an issue.
- Do not combine differing frame widths in a single stack. No spanning multiple frames.
- Stacking frames cannot be used as base frames.
- Fabric selection for 72"W panels is limited. Available 72"W panel fabrics are flagged with a "W" on the inside back cover of this price list.

### Tackable Glazed Panels (page 20)

- Available 50"H and 65"H with 15"H clear or frosted tempered safety glass inserts (specified).
- Glass frame is painted to match trim.
- Top trim is specified separately.
- Cannot stack on glazed panels.
- Fabric selection for 72"W panels is limited. Available 72"W panel fabrics are flagged with a "W" on the inside back cover of this price list.

### Glass Panel Mounted Screens (page 21)

- Frameless insert integrated into the base panel frame top trim.
- Replaces top trim on structural or stacking tackable frame.
- It is possible to span multiple frames when the combined frame width is equal to the panel mounted screen width.
- Cannot do variable height, must go on highest panel(s).
- Panel mounted screens are non-structural. Do not hang or stack on top of panel mounted screens.
- Available in 3/8" thick clear or frosted glass.
- To be included in overall height of panel with a maximum combined height of 80".

### Door Panel Frame (page 21)

- The 80"H door panel frame includes 42"W frame, 36"W laminate door, hinges, and attaching hardware. Top trim is specified separately.
- See illustration at right.
- Lockset with knob or lever ordered separately.

### Optimize Sliding Doors and Mounting Kits (pages 17 and 21)

- Optimize sliding doors are available in 50"H, 65"H, and 80"H.
- See illustration and specification information on page 17.

### Method 2 – Single-sided Returns

Single-Sided Panel Run	Minimum Return Panels Total (X+Y)	Minimum Return Panels Total (X+Y) with Stack-ons
48"-108"	84"	84"
114"-120"	84"	96"

# Panels & Connectors

## Optimize™ — Working with Panels & Connectors

GSA Reference Page

### Connectors and Trim

#### Inline Connector Kit (page 22)

- Inline connections between panels in a continuous run are accomplished with an inline connector kit. There is no incremental increase in dimension along the run.
- Inline connector kits include all parts required for connecting two panels of same height together.
- Kit includes inline connector strap, hardware, and glide tower to glide tower screw.
- Order panel end trim kits to finish the end of every panel run (except when attaching panels to permanent walls).

Extended Straight "S" Connector Kit

#### "L", "T", "X", "S", "B", and "C" Connector Kits (page 22)

- "L", "T", "X", "B", and "C" connector kits are used when connecting panels at intersecting runs. For "L", "T", and "X" connector kits, add 2 1/4" to the total length of the panel run for each intersection, whether located in the middle or at the end of the run.
- Includes top cap, connectors, vertical cover(s), and attaching hardware.
- Extended straight connector kit "S" can be used to keep continuous runs dimensionally consistent with opposing panel runs which incorporate "T" or "X" intersections.
- Add 2 1/4" to the length of the run for every extended straight connector used.

#### Multiple-Height Connections (page 22)

- Multiple-height connections also utilize standard "L", "T", "X", and "S" connectors, in the height of the tallest panel. (See examples 1-4 at left.)

#### Panel End Trim (page 23)

- End vertical trim cover (includes top cap — adds 3/8" to run).
- Order to finish the end of every panel run (except when attaching panels to permanent walls).

#### Variable Height Connector Kits — Post Trim (page 23)

- Includes connectors, vertical cover, and attaching hardware.
- Order one per each panel height change in an "L", "T", "X", or "S".

#### Inline Variable Height End Trim Finish Kits (page 23)

- End vertical cover (includes top cap).
- High-low "H" covers the exposed end of a panel when joining panels in-line of differing heights. Optimize profile adds 3/8" to length of panel run.
- Order one per each panel height change in an in-line connection.
- At the end of a panel run use panel end trim.

#### Wall Mount Kits (page 23)

- Wall mount kits provide a means to affix a panel run to a permanent building wall.
- Includes top cap. (Color must be specified.)
- Connector adds 1" to length of panel run.
- Anchor devices are not supplied with the wall mount kit. Refer to Optimize Installation Instructions for appropriate hardware.

#### 2-Way 120° Connector Kits (page 23)

- Includes top cap, connectors, vertical cover, and attaching hardware.

#### 3-Way 120° Connector Kits (page 23)

- Includes top cap and connectors.

In variable height "T" connections as shown above, you would use the connectors as indicated.

Base connectors (includes base pathway) must be specified at base regardless of full height or segmented connection.

Example above represents Optimize variable height connection for 65"H to 50"H.

The sliding doors must be specified with specific mounting kits for each door ordered. With a Frosted Translucent insert and your choice of Core or Select paint, the sliding door will create a unique look for any office environment.

The sliding doors are available in 50", 65", and 80"H models and can mount to 30", 36", 42", and 48"W panels. They accommodate a 36"W opening and are 42"W, nominally. The doors ship from the factory non-handed and become handed when field installed to fit the scope of the project. The handle pulls located on each side of the door are color matched to the trim to create a uniform style. And with the threshold free design, the sliding door offers better aesthetics and safety by eliminating the potential for tripping.

### General Guidelines for Use of Sliding Door (page 21)

- The system requires the ordering of both a door and a mounting bracket kit.
- All doors are 42" wide to accommodate a 36"W opening and are non-handed.
- A mounting bracket kit must be ordered for each door corresponding to the mounting panels width (30", 36", 42", or 48"W). Kits available in Core and Select paint.

### General Guidelines for Layout Planning of Sliding Door

- Stability guidelines must be followed when specifying a sliding door. (Refer to page 15). The sliding door system was designed to close an opening in a run of parallel panels. Doors mounted to long runs of panels without floor support, ties to worksurfaces, or return panels may seem less stable.
- If the door is used to close an opening (A) where the panel opposite the door is at 90°, there will be a gap equal to the panel thickness between the door and the panel end when closed.
- When planning the layout, care must be taken if the plan includes a door mounted on a panel that is less than 42"W. If the panel is at a corner (B), the door will protrude into the aisle or next workstation when in the open position.
- If back-to-back doors are mounted on panels (C) that are less than 42"W they will interfere with each other if both are open at the same time.
- The door is attached at the base of the panel at any end position with a wrap around bracket. Bracket kits are ordered in conjunction with appropriate end trim profiles. The slots at the base of the panel must be clear (D) and cannot be utilized by worksurface supports or panel hung components.
- If the door is mounted to a panel run that is positioned adjacent to a wall (E) or an inside 90° angle and there is not a 42" clearance between the track and the wall/inside 90° the assembly of the first stop will be difficult and plans will need to be modified for the assembly.
- If a door is closing an opening of a workstation that includes a "T" connector in the opposite wall, an extended straight connector may need to be used to maintain the 36" required opening.

# Electrical & Data

Optimize features capabilities for cable management, including electrical, voice, and data. The 8-wire electrical system can be integrated at base pathway. The frame allows voice and data cables to be routed horizontally in the base pathway.

## Electrical Systems

## Optimize Electrical Systems

Optimize offers a choice of four electrical systems:

- Four-circuit, 3 + 1
- Four-circuit, 2 + 2
- Three-circuit, separate neutrals
- Eight circuits; two four-circuit systems provided back-to-back.
- See pages 26-27 for a detailed explanation of each electrical system.
- All four systems utilize an 8-wire electrical system, rated at 20 amps per circuit (15 amps Canadian).
- Optimize panels and electrical components are UL Listed. Electrical components are also CSA certified.
- Installation and use of the electrical system, the number of receptacles used on a given circuit, and connections to the building power supply should be in compliance with all local and national electrical codes.

**Caution: Electrical equipment cords or extension cords MUST NOT BE ROUTED through panels.**

## Hardwire Junction Box – New York Code (page 33)

- Hardwire (New York Code) junction box (model A871400) is used when local electrical codes require hardwire entry.
- For use in panels 30"W to 72"W.
- When used in 30"W and 36"W panels, power can be routed only in one direction.
- When used in 42" and wider panels, an electrical pass-thru cable or harness for that panel width can be used to route power back in the opposite direction.
- Unit must connect to a power or pass-thru harness positioned in the base pathway area of an adjacent panel.
- Customer to furnish all cabling and wiring from power entry to power source.
- Junction box can be positioned at any duplex receptacle location.

## Hardwire Wiring Harness – Chicago Code (page 33)

- Hardwire (Chicago Code) wiring harnesses and snap connectors are not allowed in Chicago — base pathways must be comprised of all metallic components.
- The base pathway junction box (model A871500) clips direct into receptacle locations for single sided applications.
- Customer must furnish conduit, wiring, and designer-type receptacles for the base pathway.
- Power entry can be routed from the ceiling, via an Optimize power pole, or from the floor into a junction box (model A871500).

## Electrical In-Feeds

- Power in-feed cables deliver power from building to panel's electrical system.
- In-feed cables are housed in conduit to separate electrical system from communications and data lines.
- Select quantity of base or ceiling in-feed cables depending on individual power requirements.

## Base Pathway Power In-feed (page 33)

- Sealtight base pathway power in-feed mounts into any receptacle position in the base pathway area.
- A heavy rubber sheathing shields conduit, allowing in-feed to be exposed.

## Ceiling Power In-feed (page 33)

- Ceiling power in-feed connects to a prewired electrical harness in the base pathway, traverses through an adjacent panel, and terminates in the junction box at the top of the integrated power pole.
- Use integrated power pole model P278PP.
- Most codes allow flex conduit to be exposed after installation. Verify code requirements before ordering for exposed application.

## Integrated Power/Communication Pole (page 33)

- Integrated power pole accommodates ceiling power in-feed and communication/data lines.
- Provide capacity for routing power in-feed and cables to the base pathway of a panel.
- Conduit of the in-feed cable serves as the division of electrical and communications cabling.
- Installs into 42½"-65"H or 15"H stacking 90°, "T", and "X" connections.
- Integrated power pole includes trim kit.
- Single cavity with removable cover.
- Field-cut to desired length.
- Outside Dimension: 2" square.
- When using a ceiling power in-feed, consider that the in-feed must connect into an electrical harness located in an adjacent panel. (See page 33 for cable capacity.)
- To power the prewired electrical system, from a ceiling power source, a ceiling in-feed cable, Model A871912, A871912C, A871912A, A871912AC, A871918, A871918C, A871918A, or A871918AC must be purchased separately.
- For applications requiring longer integrated power poles, a 156"H model is available.

Integrated Power and Communications Pole

# Electrical & Data

**To Order:**

1. Determine which electrical system you will use after consulting your electrician and computer support personnel:
  - The four-circuit system (4-Hot/2-Neutral/2-Ground)
    - 3 + 1 option
    - 2 + 2 option
  - The three-circuit system (3-Hot/3-Neutral/2-Ground)
  - The eight-circuit system (back-to-back four-circuit systems)
2. Determine location, quantity, and circuit of duplexes.
3. Determine the appropriate choice and use of isolated, isolated/dedicated, and separate neutrals circuits.
4. Specify appropriate power harnesses\* and pass-thru cables.\*
5. Determine the location, quantity, and type of power in-feed needed.

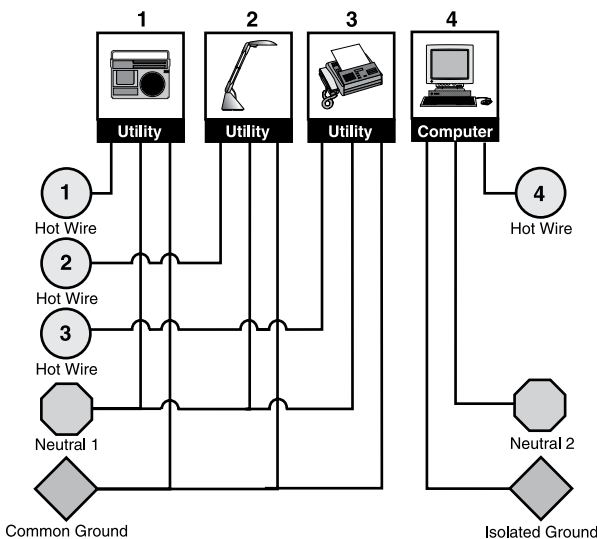

\* Select power harness models (A8712XX), pass-thru cables (A8710XX), and pass-thru harness (A8711XX) with the last two digits corresponding with the panel width into which the component is to be positioned. The initial cable length can be stretched approximately 3" to transverse "T", "X", "L", and extended straight connectors.

**Flexconnect™ Electrical System Options**

The four-circuit, eight-wire electrical system is widely specified and trusted by hundreds of thousands of end-users. This proven system delivers four circuits for every power infeed in either a 3 + 1 or 2 + 2 configuration. The isolated/dedicated circuits are ideal for sensitive computing equipment, while the common circuits are suitable for faxes, copiers, task lights and other peripherals. Both the 3 + 1 and 2 + 2 systems use the same pre-wired components, making it easy to adjust as electrical needs change.

You can also choose a three-circuit, eight-wire system that has a dedicated neutral for every hot circuit. The three-circuit components have model numbers with an "A" suffix and appear in a gray box in this pricer.

**Four-circuit, 3 + 1 Receptacle Option**

The 3 + 1 option is the electrical standard used on Allsteel systems for many years in most installations. This wiring option provides three utility circuits plus an isolated/dedicated circuit for more sensitive equipment. Circuit 2 (one of the 3 common circuits sharing a neutral wire) cannot be used with single-phase building electrical supply.

**Four-circuit, 2 + 2 Receptacle Option**

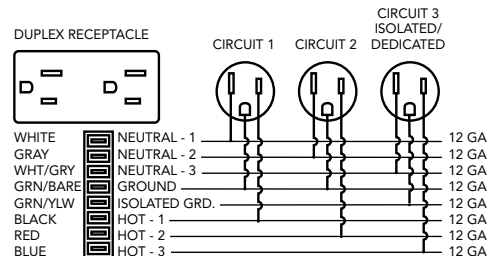

The 2 + 2 option is a wiring option that provides two utility circuits and two isolated circuits for more extensive computer usage applications.

## Three-circuit, separate neutrals

The three-circuit, separate neutrals configuration is a wiring option that provides separate neutrals for each of the three circuits. Two circuits share a common ground, and one circuit is isolated/dedicated. The three-circuit components have model numbers with an "A" suffix.

## Optimize System Receptacle Usage

Two 8-wire, 20 amp (15 amp Canadian) electrical systems are offered					
Electrical System	Circuitry	Receptacle Capacity			
Four-circuit 4-Hot/2-Neutral/2-Ground	3 + 1	Common Circuit-1 A871501	Common Circuit-2 <sup>(1)</sup> A871502	Common Circuit-3 A871503	Iso/Dedicated Circuit-4 A871504
	2 + 2	Common Circuit-1 A871501	Common Circuit-2 A871502	Isolated Circuit-3 A871506	Isolated Circuit-4 A871504
Three-circuit 3-Hot/3-Neutral/2-Ground	w/separate neutrals	Common Circuit-1 A871501A	Common Circuit-2 A871502A	Iso/Dedicated Circuit-3 A871503A	N/A

(1) Circuit 2 (one of the 3 common circuits sharing a neutral wire) cannot be used with a single-phase building electrical supply.

## Notes:

- Four-circuit components and three-circuit components (with suffix "A") cannot be used together.
- Components of the two systems are keyed differently to prevent components of one system being connected to components of another system.
- Allsteel Model Numbers are printed on the UL labels, and components are color-coded to provide visual identification of the different components.
- Four-circuit components have black plastic parts.
- Three-circuit components have rust-colored terminal ends and receptacle backs are rust colored.

## Typical power usage by the most commonly specified office equipment.

## Duplex Receptacles

15 amp Receptacle

20 amp Receptacle  
(Required by some large copiers.)

## Power Harnesses, Pass-Thru Harnesses, and Dual Electrical Harnesses

Electrical power harnesses are used to distribute power in Optimize panels. Harness power blocks snap directly onto brackets in base pathway. Power blocks on electrical power harness and pass-thru harness accept duplex receptacles.

Electrical Power Harness

Electrical Pass-Thru Harness With Power Block

Electrical Pass-Thru Harness Without Power Block

Dual Electrical Eight-circuit Power Harness Kit

All electrical power harnesses and pass-thru harnesses (except 20"W) will stretch 3½", allowing them to span "T", "X", "120°" intersections, and "S" extended straight connections.

Note: "T" intersections require a minimum of one power harness and "X" intersections requires a minimum of two power harnesses.

Requires minimum of one power harness.

Requires minimum of two power harnesses.

Use of a ceiling in-feed at this location requires an additional power harness.

### Electrical Power Harnesses (page 32)

- Electrical power harnesses are used to distribute power in panels.
- Optimize electrical can only be located at base pathway.
- Specify harness length to match panel width.
- 24" power harness accepts one receptacle on each side of the harness, all other length power harnesses have power blocks to accept four duplex receptacles (two on each side of panel).
- Connectors at both ends of power harnesses allow power distribution in either direction.
- Harness power blocks snap directly onto brackets in base pathway.
- Use of a ceiling in-feed requires one additional harness.

### Electrical Pass-thru Harness With Power Block (page 32)

- Electrical pass-thru harness with power block have capacity to handle one duplex receptacle on each side of the panel when exposed.
- Specify harness length to match panel width or combined panel widths.
- Power harnesses accept one duplex receptacle per panel side.
- Note: "T" intersections require a minimum of one power harness and "X" intersections requires a minimum of two power harnesses.
- All electrical power harnesses and pass-thru harnesses with power block will stretch 3½", allowing them to span "T", "X", "A" intersections, and "S" extended straight connections.

### Electrical Pass-thru Harnesses Without Power Block (page 32)

- Specify harness length to match panel width or combined panel widths.
- Electrical pass-thru cables distribute power through any panel(s) where receptacles are not required. Cable length cannot be stretched.

### Dual Electrical Eight-Circuit Power Harness Kits (page 32)

- Kit provides back-to-back four-circuit systems giving double the capacity of harness and pass-thru cables.
- Specify harness length to match panel width.
- Requires two four-circuit in-feeds.
- Uses four-circuit receptacles.
- Models must be positioned back-to-back in the panel — single-side use is not permitted.
- Components can only be routed in a single run — a single run can branch to single panel runs at "T" and "X" junctions.
- Standard four-circuit pass-thru cables (A8710xx) can be used in between power harnesses. Two are required in the back-to-back configurations.
- Models can be connected to standard four-circuit power harnesses and pass-thrus, although it is not recommended because of possible circuit number ambiguity.
- Two power in-feeds are required to connect the back-to-back runs. Power A8719xx must be connector to a power block at the end of a run.
- Data faceplates and terminals cannot be positioned in a panel into which back-to-back power harnesses are installed
- Power in-feeds A8719xx must be routed from a panel wherein no power harness is positioned, into an adjacent panel where a power harness is positioned and connected to the end of a power block.

## Receptacles

Duplex Receptacle

Parchment — P93 .....	Muslin — EU
Platinum Metallic — PR2 .....	Loft — EV

Pull-Up Receptacle

Power/Data Dome

## Duplex Receptacles (page 33)

- Duplex receptacles snap into power blocks of power harnesses or pass-through harnesses with blocks.
- Duplexes are available in multiple colors. See inside front cover for finishes.
- Each receptacle is labeled to indicate which circuit it will be connected to: 1, 2, 3, or 4.
- Duplexes are model specific to support either 3+1 and 2+2 electrical in-feed; or have an "A" suffix and are design to support a three-circuit separate neutral electrical in-feed.

## Pull-up Receptacle (page 34)

- Mounts in worksurface grommet holes, providing three receptacles to the worksurface.
- Integral 15 amp circuit breaker and 6' cord w/plug included.
- Pull up receptacles may interfere with the placement of pedestals
- Included grommet may not match Allsteel worksurface grommets.

## Power/data Dome (page 34)

- Fits into existing grommet hole (HPL only) to provide two surface mounted simplex receptacles and two data ports.
- Mounts in worksurface grommet holes or into field-cut, 2¼" diameter hole.
- 6' black power cord.
- May interfere with the placement of optional pedestals.
- Unit has two receptacles to the worksurface plus data ports.
- Includes adapters to allow us of commercially available data terminals or blanks to fill unused openings.
- Many of the AMP, AT&T, Krone, Leviton, and most commercial data terminals can be used.
- Data terminals must be of a design that will snap into .695 x .650, .590 x .790, or .590 x .750 openings in .064 maximum thick faceplate.
- For additional corded with plug solutions see page 107.

## Data Components

Voice/Data Receptacles

ATADF3

ATADF4

AMP Components

Base Pathway Cover

## Data Faceplates (page 34)

- Optimize not only provides space for large volumes of voice and data cables, it also offers several means of mounting commercially available voice and data components.
- Commercially available modular data faceplates can be mounted in vacant base receptacle openings.
- Due to panel depth, back-to-back data modules should not be used at the base on Optimize.

## AMP® NETCONNECT® Components (page 34)

- AMP NETCONNECT® Components are supported by AMP's 25 year warranty, including reconfiguration.

## Optimize Base Pathway Covers (page 34)

- Features an additional knockout (offset) for improved utilization of power and data. Knockouts are 2.700" W x 1.377" H up to 60" W.
- Due to panel depth, back-to-back data modules should not be used in the base on Optimize.

### Cable and Wire Management

Cable Management Tray

Wire Management Channel

Cord Retainer Clip

Wireway Grommet

Receptacle Cover

Cord Organizer

#### Cable Management Tray (page 34)

- Attaches under the worksurface to contain cables.
- Metal tray shelf is 4" deep. Can hold electrical power strip and/or surge protector.
- 24" and 36" lengths, use multiple units for larger worksurfaces.
- Attachment hardware included, specify paint color.

#### Wire Management Channel (page 34)

- Self adhesive backing to attach to panels and underside of worksurfaces.
- Flexible strips allow cabling to enter/exit and can be contained inside the 2-cavity profile.
- Each cavity provides space for a maximum of six .22" dia. cables. Total capacity = 1 sq. in.

#### Cord Retainer Clip (page 34)

- Provides confinement of vertical electrical/data wiring.
- 1½"H cord clips snap into vertical panel slots to contain cords.
- 4 clips are provided standard with each task light cord.
- Package of 50. Available in Black only.

#### Wireway Grommet (page 34)

- Fits into any receptacle opening.
- Used when routing wires through receptacle opening.

#### Replacement Receptacle Cover (page 34)

- Fits into unused receptacle opening in base raceway.
- Package of 25. Specify paint color.

#### Cord Organizer (page 34)

- Attaches to bottom of worksurface.
- 4"W x 7/8"D, made from sheet metal.
- Top sits flush with worksurface if mounted to worksurface.
- 4 cable cut outs: 2 – .250" diameter and 2 – 0.147" diameter; .250" diameter cut outs are centered between the .147" diameter cut outs.

### Lighting

Task Lights

LED Undercabinet Light

#### Task Lights (page 116)

- Task lights can be recessed under storage cabinets or storage shelves, panel-hung, or freestanding.
- Three styles of recessed task lights in four sizes are available to correspond to cabinet or shelf width.
- All styles have 9' power cords in black, connected in the right rear corner.
- All models feature electronic ballast for longer bulb life and cooler operating temperature.
- Task lights with a fused plug to meet Chicago electrical code are also available.

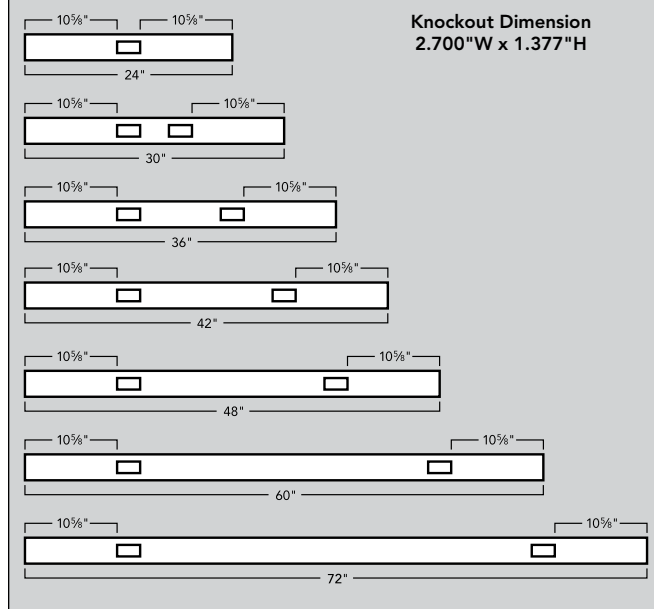

**Recommendation:** Provide a separate circuit for task lights for proper long-term operation without RF interference to computers that may be in use.

#### LED Undercabinet Light (page 117)

- LED undercabinet light can be mounted beneath overhead cabinets with wood screws or magnets.

#### Base Pathway Receptacle Locations

#### Circuit Usage

##### Strategy 1

##### Circuits to Equipment

Assign specific uses for each of the circuits:

- For example, in a four-circuit system:  
Circuit 1 — Calculators, fans, etc.  
Circuit 2 — Task lights (could be wired to wall switch)  
Circuit 3 — CRT or flat screen monitors  
Circuit 4 — CPUs

##### Strategy 2

##### Circuits to Workstations

Assign specific workstations to each of the three available circuits. Use circuit 4 for power-sensitive electronic equipment.

**Placement of pedestals and lateral files** may render some duplex locations inaccessible. Pedestal placement may also affect compatibility with pull-up receptacles.

#### Lay-in Cable Capacity

- The base pathway allows continuous voice and data lines to run through and between panels without interruption.
- Lay-in is provided for environments where systems furniture or cabling are subject to frequent change.
- Optimize base pathway accepts up to 77 voice/data cables (.25\"/>
- When electrical system shares base pathway, the cable capacity in Optimize is reduced to 25 cables (2.03 sq. in.).
- Cable capacity of the Optimize integrated power pole is 3.3 sq. in. for a total capacity of 34 cables of .25\"/>
- Cable capacity of the power pole/communication pole Model A870070 is 4.5 sq. in.
- Cables can enter/exit panel through underside of base pathway on frames.

**Note:** Cable quantities listed are at 60% fill ratio.

For specification information see pages 24-31.

Add Suffix "N" to model number for no grommets or scallops, no upcharge.

### Laminate with Flat Edge

### Laminate with T-Mold Edge

# Worksurfaces

## Optimize™ — Working with Worksurfaces and Supports

GSA Reference Page

Worksurfaces are 1¼" thick with particle board core and with top surfaces finished in high-pressure laminate (HPL). Bottom surfaces are covered with a backer sheet. Worksurfaces can be panel hung or used in freestanding applications. Modesty panels and appropriate supports are required to configure freestanding Cadence® desks.

### Worksurfaces

- **Laminate tops** offer flat or T-mold edge trim in twenty standard colors (customer specified) to match solid or woodgrain laminates and to complement patterned laminates.
- Threaded-metal inserts are standard in worksurfaces for ease of installation and a positive fit.

- **Optional wider width primary worksurfaces** are available for use with Optimize panel runs having a "T" or "S" connection — upcharge applies.

- **Wire management grommets** are standard in most worksurfaces and specified in plastic or metal. Metal grommets are available in oval or square.
- Rectangular worksurfaces over 36" W have two grommets. Peninsula and corner worksurfaces have one. Corner cove worksurfaces have two grommets. D-Shaped worksurfaces and countertops do not have grommets.
- Grommets on standard systems worksurfaces are located 2 7/8" from side edges and 3 5/8" from back edge.
- Add Suffix "S" for scallop wire management detail for flat edge rectangular models only — no upcharge.
- Add Suffix "N" to a model number for no scallops or grommets — no upcharge.

### Supports

Worksurfaces can be configured at 29½" H with end-panel supports and in-line support panels, or at various heights on 1" increments using specific product configurations.

#### Worksurface support options include:

- Support column\*
- Flat brackets
- External support channel
- Worksurface bracket kits
- Height adjustable mechanisms
- Cantilever brackets
- In-line support legs\*
- End-panel supports\*
- Support storage units\*
- Pedestal-to-panel attachment kit\*
- Desk-to-panel attachment kit\*
- Corner desk leg
- Bridge and return kits
- Modesty panels
- Gussets

\*Units provide floor support.

#### Support Guidelines — See Drawings on page 39

- Panel mounted worksurface runs 96" and greater need floor support for improved stability when overheads are not used.
- When using overheads in panel mounted worksurface run applications 72" and greater, floor support\* is required. (See list at left.)
- When using overheads at the end of a panel run, floor supports\* are required.
- Worksurface bracket kit should be used to tie panels to worksurface for added stability.
- A return panel at the end of a panel run can be substituted with one of these floor supports: storage, open or closed end support panel, O-leg.

*continued on next page*

*continued from previous page*

- Cantilever brackets cannot be used at the end of a worksurface panel run in place of a return panel or floor support.
- Worksurface runs greater than 60"W require an external worksurface support channel when a center support cantilever cannot be used. It is recommended for spans greater than 48"W. See pages 45 and 57.

- Support channel may interfere with mounting of some CPU holders and keyboard supports.
- Cantilevers are recommended in place of an external worksurface support channel where feasible.
- Cadence Desking configurations utilize modesty panels and gussets in place of external support channels for worksurfaces up to 72"W. See pages 47-55.

Worksurface bracket kit should be used to tie panels to worksurface for added stability

Cantilevers are recommended in place of an external worksurface support channel where feasible.

### Cantilevers

Worksurface runs greater than 72" require floor support. Example: support pedestal or support leg. When the panel width matches the worksurface depth, worksurface brackets should be used at the end of runs. Cantilevers can and should still be used in the middle of a worksurface run 72" or less for proper support and to help prevent worksurface bowing. See examples below.

**Example A:** Cantilevers are allowed because worksurface is not greater than 72" W.

30"D x 48"W Worksurface and 42"W Return Panels

**Example B:** Cantilevers are allowed because worksurface run is not greater than 72" W.

30"D x 72"W Worksurface and 42"W Return Panels

**Example C:** Cantilevers are used at both ends of 84" run. Support leg is used at center of run.

30"D Worksurface and 42"W Return Panels

**Example D:** Worksurface bracket kits are used at the end of runs where panel widths match worksurface depths. Cantilevers are used where worksurface depth does not match panel width and for center support on worksurface runs that are not greater than 72" W. For worksurface runs greater than 72" W floor support is required.

30"D Worksurfaces and 30"W Return Panels

# Worksurfaces

## Optimize™ — Working with Worksurfaces and Supports

GSA Reference Page

### Worksurfaces with Flat or T-Mold Edge

#### Primary Worksurfaces (page 56)

- Primary worksurfaces are available in 20", 24", and 30" depths up to 96"W. Worksurface spans greater than 72" require floor support.
- Nominal worksurface width is equal to nominal panel width.
- Wire management grommets standard, one for widths up to 36", two on widths 42"W and greater. Add "N" suffix for no grommets.
- Laminate flat edge worksurfaces can be specified with scallop wire management detail with no upcharge by adding suffix "S" to the model number.
- Center support bracket included on 54"W-60"W. Other support hardware is ordered separately.
- Worksurfaces greater than 60"W require a cantilever bracket for center support in panel mounted applications. Specify 18" cantilever on 20"D, and 24" cantilever on 24"D and 30"D worksurfaces.
- Width must correspond with panel width(s). For worksurface to span a "T" or extended straight connection add upcharge and suffix "TM" to model number for flat edge or suffix "T" for T-mold edge worksurfaces.
- Primary worksurfaces can be used with a modesty panel and appropriate supports to configure freestanding desk(s). Refer to Working With Cadence®, pages 47-55.
- The 9120 Program can be used to order HPL particle board rectangular worksurfaces in any non-standard width and depth in 1/8" increments up to a maximum of 120"W x 36"D. See pages 64-65.

#### Wave Worksurfaces (page 57)

- Wire management grommets standard, one for widths up to 36", two on widths 42"W and greater.
- Worksurfaces greater than 60"W require a 24" cantilever bracket for center support in panel mounted applications.

#### Bow-Front Worksurfaces (page 57)

- Two wire management grommets standard.
- Can be used with a modesty panel and appropriate supports to configure freestanding desk. Refer to Cadence pages 47-55.

#### Corner Worksurfaces (page 58)

- One wire management grommet.
- Corner worksurfaces with woodgrain laminate have grain direction diagonal to adjacent worksurfaces.
- Rear corner left-handed support bracket included. Worksurface bracket kit (order separately) required at junction where a panel is wall-mounted to a permanent wall and wall track stanchion is not positioned in the right-hand corner.

#### 120° Corner Worksurfaces (page 58)

- Standard with one wire management grommet in corner location.
- Rear support bracket included (left-handed). Worksurface bracket kit (order separately) required at junction where a panel is wall-mounted to a permanent wall and wall track stanchion is not positioned in the right hand corner.

#### 60° Pie Worksurface (page 58)

- Order support column and two flat brackets separately.

#### Corner Shelf (page 58)

- Diagonal leading edge = 10 1/2"; diagonal depth = 22 1/2".
- Includes panel attachment brackets.

#### Corner Cove Worksurfaces (page 59)

- Two wire management grommets standard.
- Rear corner support bracket included with all surfaces. Worksurface bracket kit (order separately) required at junction where a panel is wall-mounted to a permanent wall and wall track stanchion is not positioned in the right-hand corner. All other support hardware is ordered separately.
- Can be used with a modesty panel and appropriate supports to configure freestanding desk(s). Refer to Cadence pages 47-55.
- Worksurfaces greater than 60"W require a cantilever bracket for center support in panel mounted applications. Specify 24" cantilever on 24"D and 30"D worksurfaces.

### Worksurfaces with Flat or T-Mold Edge

#### Peninsula, P-Shaped, and Jetty Worksurfaces (page 60)

- Wire management grommets standard.
- Support column ordered separately, column includes panel support brackets T6BK.
- Can be used with a modesty panel and appropriate supports to configure freestanding desk(s). Refer to Cadence® pages 47-55.

#### Boomerang Worksurface (page 60)

- Wire management grommet standard.
- Support column ordered separately, column includes panel support brackets T6BK.

#### Reef Worksurface (page 61)

- Wire management grommets standard.
- Support column ordered separately, column includes panel support brackets T6BK.

#### Quarter-Round Worksurfaces (page 61)

- Use to connect two 90° panel-attached worksurfaces.
- Order support column and two flat brackets separately.

#### D-Shaped Worksurfaces (page 61)

- Order support column and two 24"D in-line support legs separately.
- Not recommended for use with T6CB24L or T6CB24R for shared applications.
- Includes attachment bracket.

#### Countertops (page 62)

- Mounting brackets and attaching hardware ordered separately.
- Countertops are flush with panel top cap.

#### Countertop Brackets (page 62)

- Countertop brackets must be ordered separately. Models P51500 and P51500-42 each contain one right-hand and one left-hand bracket.
- Specify paint color.
- Model P51500 brackets are for 35"H or 50"H panels. Model P51500-42 brackets are for 42½"H panels.
- Order two model P51500 or P51500-42 for straight countertops. Order three model P51500 or P51500-42 for corner countertops.

#### Height-Adjustable Worksurfaces

- For freestanding applications, see height-adjustable tables in the Seating, Collaboration, and Tables Price List.

#### Non-Standard Worksurface Sizes (pages 64 and 65)

- The 9120 Program can be used to order particle board rectangular worksurfaces in any non-standard width and depth in ½" increments up to a maximum of 120"W x 36"D.
- Other modification requests should be made through Allsteel Tailored Products Group.

### Worksurface Supports

End-Panel, Closed End,  
and Open End Supports

Support Legs

Support  
Columns

Handed  
Cantilever Brackets

Non-Handed  
Cantilever Brackets

#### End Supports and Bracket Kits (page 67)

- End-panels are 1½" thick. For use in place of panels at the end of worksurface runs.
- Levelers provide 1½" vertical adjustment.
- Must be connected into panel slots for panel hung applications.
- Straight worksurfaces adjacent to 120° connections must be supported by full end-panels.
- 11"D end-panel models for use with D-shaped worksurfaces or curvilinear shaped worksurfaces in freestanding applications.
- Panel mounted end-panel supports are ordered for right- or left-handed application.
- Open end panel supports are non-handed and are only for panel mounted applications.
- End-panel models can be converted to freestanding with removal of panel mount bracket. End-panel bracket kit converts freestanding end-panel support model to panel mounted.

#### Support Legs and Bracket Kit (page 67)

- Support legs are 1½" thick. Leg portion is 12¾"D. Supports the junction of two worksurfaces.
- Non-handed for use at either end of worksurface.
- Provided with flat bracket.
- Worksurface in-line support legs are used to support worksurfaces only in a shared position. Worksurfaces require to the floor support every 72".
- Levelers provide 1½" vertical adjustment.
- Must be connected into panel slots for panel hung applications.
- Panel mounted models can be converted to freestanding with removal of panel mount bracket.
- Support leg bracket kit (non-handed) converts freestanding model to panel mounted.

#### Support Columns (page 67)

- Used to support one end of curvilinear worksurfaces.
- D-shaped, P-shaped, peninsula, jetty, boomerang, and reef worksurfaces require support columns (ordered separately).
- Includes column, worksurface bracket kit T6BK, attaching hardware, and adjustable glides.

#### Cantilever Brackets — handed (page 67)

- Cantilever brackets are left or right handed. No assembly required.
- They can be inserted into panel reveals in 1" vertical increments.
- One size is used for both 24" and 30"D worksurfaces.
- 18"D cantilever are for use with 20"D worksurfaces and to support 24"D worksurfaces 66"-72"W that require a cantilever bracket for center support in panel mounted applications.
- 12"D cantilevers are only for use with 12"D secondary worksurfaces.
- Both left and right brackets are required in shared applications.
- Includes tie bracket and attachment hardware.
- Use with runs 72" or less — avoid installation on only one side of a straight connection except to support corner worksurfaces. Floor support is required for runs greater than 72". See page 40.
- Cantilevers can and should still be used in the middle of a worksurface run 72"W or less for proper support and to help prevent worksurface bowing. See page 40.
- DO NOT position at the end of a panel run.
- DO NOT use to support worksurfaces from which a hanging pedestal is suspended or peninsula worksurface is attached.
- DO NOT use cantilever brackets to support worksurfaces supported with permanent-wall hanger kit.

#### Cantilever Bracket — non-handed (page 67)

- Assembly required. Includes attachment hardware.
- Includes two angle brackets for shared applications. Use two cantilever brackets when adjacent worksurfaces are positioned at different heights.
- One size is used for both 24" and 30"D worksurfaces.

### Worksurface Supports

Worksurface Brackets

#### Worksurface Bracket Kit — T6BK (page 67)

- Worksurface bracket kit allows one end of a worksurface to be supported by a return panel. Return panel width must be the same as the depth of the worksurface.
- Kit includes one pair of brackets and attachment hardware.
- Freestanding pedestals can also be used to support one end of a panel-attached worksurface in conjunction with worksurface bracket.

#### Worksurface Storage Bracket Kit — T6SB (page 67)

- Worksurface storage bracket kit (T6SB) is used for aesthetics where under-desk storage is immediately adjacent to the return panel. In all other applications use worksurface bracket kit (T6BK) to utilize worksurface threaded metal inserts.
- Black only.
- Kit includes one pair of brackets and attachment hardware.
- Brackets do not align with worksurface threaded metal inserts, and therefore require wood screws (included).

Flat Brackets

Pedestal-to-Panel Brackets

#### Flat Brackets (page 67)

- Includes bracket and attaching hardware.
- Can be used to connect one worksurface perpendicular to another worksurface.

#### Pedestal-to-Panel Attachment Bracket (page 67)

- Can be used in place of full end panel or return panel.
- Provides structural support to panel run by securing panel directly to pedestal.
- Works with Essentials™ and Involve® pedestals.

External Worksurface Support Channel

#### External Worksurface Support Channel (page 57)

- Is required on a systems worksurface for additional support for spans greater than 60". Width of worksurface span can be reduced by using support storage.
- Extends 1½" below the worksurface.
- When using 28"H mobile pedestals the length of support channel needs to be reduced to accommodate width of the pedestal.
- Support channel may interfere with mounting of some CPU holders and keyboard supports. May require spacer kit AKMH.

#### Freestanding Desks

- Freestanding desks can be created by combining primary and corner worksurfaces with modesty panels and appropriate desk supports. See Cadence® pages 47-55.

Cadence offers unlimited versatility. Its modular flexibility creates office solutions of all shapes, sizes, and styles.

Gussets

### All the right choices

Choose Cadence freestanding desking with confidence. It personalizes any work environment, accommodates a range of needs, and offers all the right features — curvilinear worksurface shapes, multiple worksurface edges, and a complete paint finish and laminate offering. Cadence is made to last with heavy-gauge steel construction. Metal-to-metal worksurface connection points make installation and reconfiguration reliable and easy. And Cadence is backed by a lifetime warranty.

### Universally flexible

Cadence sets up easily and reconfigures time after time. It even shares components with Optimize, Terrace®, and Concensys®, which simplifies inventory management. Cadence is created with worksurfaces, supports, modesty panels, end panels, and brackets. Cadence is compatible with the entire line of Allsteel storage solutions and Extensions™ — work tools to provide personalized organization for every workstyle.

**Systems integration** — Cadence works in combination with Optimize, Terrace, or Concensys panels, extending the functionality of each product line.

**Highly adaptable** — Make the most of building architecture by using an existing wall to create a semi-private workspace.

**Space utilization** — Multiple worksurface shapes offer unlimited design potential for using space creatively and efficiently.

**Team interaction** — Cadence design flexibility allows you to create personal workspace and a team collaboration area in the same office.

### The Cadence choice

It works in the open plan, the private office, or in combination with Optimize, Terrace, or Concensys panels, allowing complete office coordination. The flexible, universal design of Cadence supports virtually any workstyle and any interior aesthetic. Backed by Allsteel's Lifetime Warranty and manufactured to strict environmental standards, Cadence provides one high-value package.

## Configurations

### End Panels **E** and Support Legs **L**

Each are available in two options: freestanding or panel-mount. The only difference between the two options are the panel-mount models come with a left- or right-handed bracket to attach the support to a panel in a Cadence systems application. If the freestanding version is purchased and later needs to be converted to panel-mount, the proper handed panel-mount bracket may be purchased separately.

The 11"D end panel is used to freestand peninsulas, curvilinear shapes, and D-tops in panel applications.

### Corner Desk Legs **C**

Corner desk legs have a 90-degree bend and welded construction. The strong construction allows gussets or half-height modesty panels to be used with corner legs.

### Bridge Kits **B**

Bridge kits include: two flat brackets, two modesty panel-to-end panel attachment brackets, and two tie straps. This kit is used when attaching a bridge unit between two rectangular worksurfaces.

There are some bridge instances where only half of a bridge kit is needed (e.g. using a bridge between a rectangular worksurface and a corner or peninsula). A return kit may be ordered for these instances.

### Surface **S**

### Support Column **SC**

Support columns are used to support one end of curvilinear worksurfaces. Includes column, worksurface bracket kit T6BK, attaching hardware, and adjustable glides.

### Return Kits **R**

Return kits include: one flat bracket, one modesty panel-to-end panel attachment bracket, and one tie strap. These are used when attaching a return to a primary desk. Return kits can also be used in some bridge applications — one example is shown below when using a peninsula.

### Desk-to-Panel Attachment Kits **D**

Desk-to-panel attachment kits are used to connect a worksurface and modesty panel perpendicular to a panel of corresponding width. Opposing end of worksurface must be attached with an end-panel, support leg, or corner leg mounted directly under this worksurface.

When using a corner or corner cove worksurface with the rear corner attached to a panel, and opposing end of worksurface is attached to a freestanding desk, use corner w/desk attachment kit. Hand of unit is determined from the user's side of the desk (right hand unit attaches to right side of modesty).

### Corner w/Desk Panel Attachment Kit **CW**

Corner w/desk panel attachment kit connects the rear corner of a corner or corner cove worksurface and modesty panel to a panel when the opposing end of the worksurface shares a support leg with an adjacent freestanding desk and the support leg is mounted under the freestanding desk. Hand of unit is determined from the user's side of the desk (left hand unit attaches to left side of modesty).

### Corner Worksurfaces

Corner worksurfaces to accommodate 90-degree corner desk legs.

### In-Line Connections of Desks

Freestanding full end panels must be used to support adjacent rectangular desks, corner desks, and corner desks with returns. Freestanding support legs should NOT be used at the in-line junction. 24"D full end panels may be used at the in-line junction on 30"D rectangular desks if two worksurface tie straps are used to secure the desks together. Contact Allsteel Customer Support for ordering information.

### Pedestals and Storage

Pedestals must be ordered one size smaller than the depth of the worksurface. For example, 20"D peds should be used with 24"D worksurfaces. 20"D or 23"D pedestals can be used with 30"D worksurfaces. Using 18"D laterals or personal files provide additional pull style and storage options under 24"D worksurfaces.

### Modesty Panels **M**

The following are some general guidelines for Cadence modesty panels:

- **Desk:** Modesty panel width is the same width as the worksurface
- **Return:** Modesty panel width is 6" greater than the width of the worksurface
- **Bridge connecting two rectangular worksurfaces:** Modesty panel width is 12" greater than the width of the bridge worksurface
- **Bridge connecting a rectangular worksurface and corner or peninsula:** Modesty panel width is 6" greater than the width of the worksurface
- **Corner connecting to an adjacent worksurface:** Modesty panel width is the same width as the worksurface.

### Stand-Alone Corner Modesty Panels **SM**

Stand-alone corner modesty panels are used only when one or both sides of a corner or corner cove worksurface are freestanding and NOT attached to another worksurface. Specify the width the same as the width of the worksurface.

### Gussets **G**

Gussets can be used in place of a modesty panel with desks 36"W to 60"W. Gussets can also be used with corner desk legs.

### Cadence Supports

End-Panel Supports

#### End-Panel Supports (page 68)

- End panels are 1½" thick. For use at the end of worksurface runs.
- Levelers provide 1½" vertical adjustment.
- Freestanding models can be converted to Optimize panel-mount with end panel bracket kit.
- Must be connected into panel slots for panel hung applications.
- Straight worksurfaces adjacent to 120° connections must be supported by full end panels.
- 11"D models for use with D-shaped worksurfaces or curvilinear shaped worksurfaces in freestanding applications.

Support Leg

#### Support Legs (page 68)

- Support legs are non-handed. Supports the junction of two worksurfaces.
- Leg portion is 12¾"D and is 1½" thick.
- Flat bracket included.
- Levelers provide 2¾" vertical adjustment.
- Freestanding models can be converted to Optimize panel-mount with support leg bracket (non-handed).
- Must be connected into panel slots for panel hung applications.

Corner Desk Leg

#### Corner Desk Leg (page 68)

- Attaches two modesty panels at rear of corner desk.
- Leveler provides 2¾" vertical adjustment.
- See examples on pages 49 and 52.

Bridge Kit

#### Bridge Kit (page 68)

- Connects bridge worksurface and modesty panel to end panels and worksurfaces that are perpendicular to the bridge worksurface.
- Includes two flat brackets and two modesty panel-to-end-panel brackets.
- See examples on pages 49 and 52.

Return Kit

#### Return Kit (page 68)

- Connects return worksurface and modesty panel to end panel and perpendicular worksurface — non-handed.
- Includes one flat brackets and one modesty panel-to-end-panel bracket.
- See examples on pages 48 and 50.

Desk-to-Panel Attachment Kit

#### Desk-to-Panel Attachment Kits for Optimize (page 68)

- Used to connect a worksurface and modesty panel perpendicularly to a Optimize Panel of corresponding width. Opposing end of worksurface must be attached with an end-panel, support leg, or corner leg mounted directly under this worksurface.
- If using corner or corner cove with the rear corner attached to a panel, and opposing end of worksurface is attached to a freestanding desk — use corner w/desk panel attachment kit.
- “Hand” of unit is determined from the user’s side of the desk (left hand unit attaches to left side of modesty).

Corner w/Desk Attachment Kit

#### Corner w/Desk Panel Attachment Kit for Optimize (page 68)

- Used when the rear corner of a corner or corner cove worksurface and modesty panel is attached to a Optimize panel and opposing end of worksurface is attached to a freestanding desk. Opposing end of worksurface shares the support leg that is mounted under the adjacent freestanding desk.
- “Hand” of unit is determined from the user’s side of the desk.

Flat Bracket

#### Flat Brackets (page 68)

- Bracket and attaching hardware.
- Can be used to connect one worksurface perpendicular to another worksurface.

## Cadence Supports

## Freestanding Pedestals

- Can also be used to support one end of a panel-attached worksurface in conjunction with worksurface bracket.

## Freestanding Desks

- Freestanding desks can be created by combining primary and corner worksurfaces with modesty panels and appropriate desk supports. See pages 47-53.

## Pedestal Compatibility with Cadence and Panel-hung Worksurfaces

Cadence Desking	24" Deep	30" Deep
18"D Ped	Yes	Yes
19½"D Ped	Yes*	Yes
23¾"D Ped		Yes
29½"D Ped		
Systems Panel-hung	24" Deep	30" Deep
18"D Ped	Yes	Yes
19½"D Ped	Yes*	Yes
23¾"D Ped	Yes*	Yes
29½"D Ped		Yes*

\*Wire management grommet is blocked in these applications.

**Note:** Pedestal placement may affect access to receptacles in base pathway.

PMP47		•		•	•		
PMP53			•			•	•

## Optimize Wall Track/Tile Attachment Kits (page 68)

- Allows for mounting of system panel components on permanent wall structures.
- Begin with one pair of ends; for multiple kits in line, add middle unit(s) between ends.
- Height of wall track coordinates with panel height. Field cut for lower heights.
- Wall track will add 1" to depth of attached components.
- Use Terrace® wall track tile attachment kit to install tiles onto Optimize wall track. Kit includes two tile bars. Top bar may only be used in the top uppermost position on wall track. Bottom bar can be used in the bottom position at any location on wall track.
- When segmenting tiles on wall track, segment bars must be ordered for placement between all vertically adjacent tiles or at the top position of a single tile that is not in the uppermost position.
- When using Optimize wall track and using Terrace tiles to create a tackboard situation under overheads hung at 65"H, make sure to use a 30"H tile or 2-15"H tiles to cover the entire area between the overheads and the worksurface.

## Modesty Panel (page 69)

- Mounts to end-panel supports, desk support legs, bridge kit, return kit, desk-to-panel, and corner w/desk panel attachment kits.
- 29½"H units provide ¾" of space between bottom of modesty panel and floor.
- Actual width of 29½"H modesty panel is ¾" less than the nominal dimension listed in the Systems Price List.
- 14"H units provide 1¼" of space between bottom of modesty panel and floor.
- Refer to pages 47-53 to select proper width.
- Use 14"H modesty panels for desks positioned against a wall to provide access to electrical receptacles.
- 14"H modesty panels, stand-alone corner modesty panels or gussets can be used with corner or corner cove worksurfaces.

## Stand-alone Corner Modesty Panel (page 69)

- 29½"H units provide ¾" of spacing between bottom of panel and floor.
- 14"H units provide 1¼" of space between bottom of modesty panel and floor.
- Actual width of modesty panel is 6⅙" less than the nominal dimension listed in the Systems Price List.
- Modesty panels are inset 2⅞"; when adding pedestals, consult chart below.

## Pedestal-to-Pedestal Modesty Panels (page 69)

- Widths available to work with 60"W, 66"W, and 72"W worksurfaces to create freestanding double pedestal desk using two medal support pedestals.

## Gussets (page 69)

- Provides easy access to wall outlets.
- Cannot be used with suspended pedestals.
- Gussets can be used on corner and corner cove worksurfaces.

## Universal Modesty Panel (page 69)

- Mounts under peninsula, P-shape, jetty, and boomerang worksurfaces. Refer to chart below to select proper width.
- Can be used with panel-mounted and freestanding worksurfaces.
- Provides 8½" of privacy and is non-handed.
- Constructed of steel. No upcharge for Select paint.
- Only requires attachment to the worksurface.
- Does not provide electrical, data or structural support.
- Panel is 1½" thick and can be mounted at various distances from edge of worksurface based on user's preference for clearance and conferencing requirements.

For specification information see pages 37-55.  
For non-standard worksurface sizes see pages 64-65.

- Notes:**
- 1) Add suffix and upcharge for 24"D and 30"D primary worksurfaces to span a "T" or extended straight connection. Suffix = "TM" for flat edge worksurfaces or "T" for T-mold edge worksurfaces (Optimize — adds 2¼" to width) \$32 upcharge. Examples: **T53030STM, 833024AT**
  - 2) Add Suffix "N" to model number for no grommet, no upcharge. Example: **T53078SN**
  - 3) Add Suffix "S" to model number for scallop wire management detail for flat edge models only, no upcharge.

**E** All Optimize models are available in the **Everyday Advantage®** program, see page 9 for details.

The diagram illustrates the dimensions of the work surfaces. The top part is a perspective view of a rectangular work surface with rounded corners and a wavy bottom edge. The bottom part is a side view showing the profile of the work surface, with a vertical dimension 'L' and a horizontal dimension 'W' at the top. The side view also shows a small circular hole on the left side and a small rectangular notch on the right side.

# Worksurfaces

9120 Program

## Laminate Worksurfaces / Non-Standard Sizes

### ORDERING

The 9120 Program can be used to order particle board rectangular worksurfaces in any non-standard width and depth in  $\frac{1}{8}$ " increments up to a maximum of 120" W x 36" D.

Specify:

- Model Number**  
Specify closest nominal width/depth model (round up).
- Grommet Option** (if desired)  
See grommet specification instructions on this page.
- Grommet Type:**  
**P** Plastic  
**M** Metal (add \$11 per grommet for laminate)
- Grommet Color:**  
(Metal only)  
**EL** Matte Silver  
**NOTE:** Plastic grommet will match flat edge.
- Laminate Choices**  
See inside front cover.
- Flat Edge Color Choices**  
See EDGE COLORS inside front cover for laminates.
- Exact Size**  
Specify the **EXACT Width** and **EXACT Depth** you require.  
Width and depth is specified in  $\frac{1}{8}$ " increments which is denoted as a single digit following the whole number dimension at the end of the model number string.

$\frac{1}{8}$ " = 1	$\frac{5}{8}$ " = 5
$\frac{2}{8}$ " = 2	$\frac{6}{8}$ " = 6
$\frac{3}{8}$ " = 3	$\frac{7}{8}$ " = 7
$\frac{4}{8}$ " = 4	no extra increment = 0

For example, when ordering a worksurface that is 34 $\frac{3}{8}$ " W x 20 $\frac{1}{2}$ " D, specification should be 345Wx204D.  
**Example: 9120R3624.G0.TM33.EU.345Wx204D.**

### PRODUCT SPECIFICATIONS

- Flat Edge on all sides
- 45 lb. particle board
- 1 $\frac{1}{4}$ " top thickness
- .020 resin impregnated paper backer sheet
- Grommets available
- Maximum width 120" (maximum recommended unsupported span is 42")
- Maximum depth 36"
- Standard Allsteel laminates
- Quantities of 10 or greater are palletized; less than 10 are individually cartoned.

**Note:** 9120 worksurface maximum unsupported span is 42". 9120 worksurfaces do not have pre-drilled pilot holes or threaded metal inserts.

When spanning multiple freestanding storage units with one worksurface, add  $\frac{1}{8}$ " for each additional storage unit. For example, when ordering a worksurface for three 30"W lateral files. 3 units x 30" = 90" +  $\frac{1}{8}$ " +  $\frac{1}{8}$ " = 90 $\frac{1}{4}$ " worksurface. Do NOT follow this rule if panel wrapping storage units.

### CHANGES / CANCELLATIONS

No changes/cancellations for 9120 Program Worksurfaces.

### GROMMET SPECIFICATIONS

Plastic grommets are made of durable ABS plastic and grommets match edge color on laminate worksurfaces. Metal grommets are only available Matte Silver oval for laminate.

### PRICING

One Grommet – GC, GL, or GR Position ..... \$17.00  
Two Grommets – G3 or G4 Position..... \$34.00  
**NOTE:** Add \$11 per grommet for Metal grommets with laminate.

### ORDERING

Specify grommet location and color.

Example: **9120R10836.GCP.TM33.EU.1022Wx326D**

#### Code Grommet Position

- GC Centered side-to-side – 3 $\frac{1}{8}$ " from rear to grommet edge; 4 $\frac{1}{2}$ " from rear to grommet center
- GL 3" from left side – 3 $\frac{1}{8}$ " from rear to grommet edge; 4 $\frac{1}{2}$ " from rear to grommet center
- GR 3" from right side – 3 $\frac{1}{8}$ " from rear to grommet edge; 4 $\frac{1}{2}$ " from rear to grommet center
- G3 Pair of grommets each 18" from side edge – 3 $\frac{1}{8}$ " from rear to grommet edge; 4 $\frac{1}{2}$ " from rear to grommet center (Position G3 not available on tops 60"W or less.)
- G4 Pair of grommets each 3 $\frac{1}{8}$ " from side edge – 3 $\frac{1}{8}$ " from rear to grommet edge; 4 $\frac{1}{2}$ " from rear to grommet center
- G0 No grommets

Dimensions are from grommet center line to top edge.

Rectangular Top

Grommet positions other than those shown above are considered non-standard.

Width	24", 30", 36", 42", 48", 60", and 72"
Inside width	Flipper or 24"-36"W Hinged door — ⅜" less than width 42"-48"W Hinged or Sliding door — two compartments that are half of ⅜" less than width
Depth	14¼" RTA models 12"
Inside depth	12⅞" Receding door 12⅝" RTA models 11⅝"
Height	15"
Inside height	12¾" Receding door 11⅝" RTA models 12¾"
Open Shelf	
Width	24", 30", 36", 42", 48", 60", and 72"
Depth	12⅞" RTA models 11½"
Height	4⅝" RTA models 5⅝"

- **Task lights** can be mounted beneath storage shelves and overhead storage cabinets.
- Additional panel hung and freestanding lighting options are available.
- **Cord retainer clips** fasten into panel slots to anchor power cords.
- Available in black only.
- Clips are provided with under-shelf mounted task lights. Additional clips can be purchased separately.

### Specification Guidelines

- In a panel run, only two overhead storage cabinets or open storage shelves are recommended per panel side.
- Overhead storage cabinets and open storage shelves can be mounted on Optimize structural and stacking panels to a maximum height of 80"H.
- Base panel frames with stacking frames that have an overall height of 57½" will not accept overhead storage cabinets if spanning between stacker and base panel.
- Immediate adjacent panels must be equal height to panels with overhead storage cabinets on them.

**When overhead storage units are suspended from stacking frames,** the following guidelines should be adhered to:

- Stacking panels can be added to any base panel up to 80"H.
- Stacking frames should be added to all the parent run panels, and to each return-panel run. Stacking panels added to return panel must match the parent run configuration.
- A maximum of two overhead storage units should be suspended from each side of stacking frames on any given panel.

- No limitation to the number of units on structural frames when run is supported with return panels on each side of storage shelves or overhead storage cabinets.

- **Assembled metal overhead cabinets** can be mounted on a panel equal to or up to 18" narrower than cabinet.
- One side of overhead must be held on-module.

- **RTA overhead, RTA shelf, and receding door** width must correspond with width of panel(s).
- It is possible to span two panels when combined panel width equals cabinet or shelf width.

## Overheads, Shelves, and Hutches

Sliding Door Overhead

Flipper Door Overhead

Hinged Door Overhead

Open Shelf

Upmount Kit for Overhead Cabinets

Horizontal Wall Track

### Assembled Overhead Storage Cabinet (page 74)

- Steel cabinet with backstop.
- Available with sliding, hinged, or flipper door(s).
- Easy-Assist flipper door optional — requires minimal assistance in opening and closing.
- Easy-Assist flipper door not available on 60"W or 72"W cabinets — specify 2–30"W cabinets or 2–36"W cabinets.
- Self-engaging safety latch to secure cabinet to panel.
- Width can correspond with width of panel, or two panels joined with an inline connector kit.
- Arch or square pull optional on flipper doors.
- 60"W and 72"W flipper door cabinets have two doors with two independent locks.
- 24"-36"W hinged door cabinets have 1 lock and 2 optional pulls, 42"-48"W have 2 locks and 4 optional pulls.
- Accommodates recessed task lighting (specified separately).
- For locking specifications, see pages 120-122.
- Cabinets are 14¼"D x 15"H.
- 15"H cabinets can also be mounted on a panel equal to or up to 18" narrower than cabinet.
- Sliding doors have a built-in pull.
- Sliding, Hinged, and Flipper Door Overhead Weight Limits:
 

24"W .....	59 lbs.	42"W .....	105 lbs.
30"W .....	74 lbs.	48"W .....	121 lbs.
36"W .....	90 lbs.	60"W .....	152 lbs.
- Mounting an overhead on frames that have an overall height of 57½"H is not recommended. Slot modularity in relation to adjacent panels may be compromised.

### Assembled Open Shelf (page 74)

- Metal shelf with back stop.
- Locking clips (2) standard.
- Will accommodate recessed task lighting (ordered separately).
- Weight Limits:
 

24"W .....	61 lbs.	42"W .....	108 lbs.
30"W .....	77 lbs.	48"W .....	124 lbs.
36"W .....	93 lbs.	60"W .....	155 lbs.
- Mounting an open shelf on Optimize frames cannot span base panel frame and stack-on frame — slot modularity is not maintained.

### Upmount Kits for Assembled Overhead Cabinets (page 74)

- Consists of two upmount brackets, full back panel, and required installation hardware.
- Allows mounting of an assembled overhead cabinet up to 15" above height of panel.
- Specify "Z2" prefix model number upmount kits with 15"H, 35"H, 50"H, or 65"H Optimize panels; and "Z4" prefix model number upmount kits with 42½"H Optimize panels.
- Brackets require a clearance of 6½" below bottom of overhead cabinet.
- Width must correspond with width of panel frame or 2 panel frames joined directly inline.
- Full back panel adds ½" to depth of overhead case.
- Full back panel only used when upmounting cabinet.
- Cannot be used with RTA models.

### Horizontal Wall Track (page 74)

- Allows mounting assembled overhead cabinets on permanent wall structures ONLY. Attachment hardware not included.
- Cannot be used with RTA models.
- Track is 60"W and notched at 6" intervals as a guide for field cutting.
- For use with 15"H sliding door overhead, field modification is necessary.
- Available in black only.

#### Overheads, Shelves, and Hutches

#### Assembled Receding Door Overhead Storage Cabinet (page 75)

- Steel cabinet with open back. Optional back can be ordered separately.
- Arch or square pull optional.
- 60"W cabinet has 2 – 30"W doors with 2 independent locks.
- Accommodates recessed task lighting — ordered separately.
- For locking specifications, see pages 120-122.
- Cabinets are 13¼"D x 15"H. When door is recessed, interior dimensions are 12⅞"D x 11⅞"H.
- Weight Limits:
 

30"W .....	70 lbs.	48"W .....	110 lbs.
36"W .....	85 lbs.	60"W .....	138 lbs.
42"W .....	100 lbs.		

#### Receding Door Overhead Back (page 75)

- Optional for use with receding door overhead.
- Order width to match overhead cabinet.

#### Ready to Assemble (RTA) Flipper Door Overhead (page 75)

- Steel cabinet with open back.
- 60"W and 72"W cabinets have 2 doors with independent locks.
- Accommodates recessed task lighting — ordered separately.
- Random keying, for locking specifications see pages 120-122.
- Cabinets are 12"D x 15"H. Interior dimensions 11⅞"D x 12¾"H.

#### Ready to Assemble (RTA) Shelf (page 75)

- Metal shelf with locking clips.
- Accommodates recessed task lighting — ordered separately.

Stack-On Hutch

#### Stack-on Hutch (page 76)

- Have flipper doors with square horizontal edges.
- Universal model can be converted to an open hutch.
- Doors are standard with a core removable lock (60"W, 66"W and 72"W have two doors and two locks.)
- Attachment tape provided.
- Order hutch to match width of worksurface(s) it covers.
- Hutches have clearance of 19¼" for computers, etc.
- Depth dimensions shown includes thickness of door.
- Universal model inside depth dimension is 12¾".
- Stack-on hutches accommodate recessed task lighting.
- For locking specification see pages 120-122.
- Chicago task light cords cannot be routed through the hutch end panels, due to the large size of the fused plugs.

Tackboards for  
Hutches

#### Tackboards (page 76)

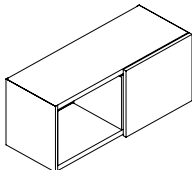

- Use tackboard to close the back of stack-on or hutch below storage unit.
- Due to width of fabric roll, 72"W tackboards are available in railroad cut only.

## Additional Allsteel Storage Solutions are available in the Storage and Stride Price Lists:

- Align™ Metal and Veneer — Pedestals, Personal Files, Credenzas, Towers, Lockers, Laterals, Combination Files, and Bookcases
- Involve® Laminate — Pedestals, Credenzas, Towers, Stacking Storage, Overheads, Soft Seating, and Bookcases
- Stride Painted Wood — Pedestals, Credenzas, Towers, Combination Files, and Overhead Cabinets

Storage is an essential part of the productive workplace.

Make storage a matter of personal choice as well as necessity. Choose from metal, laminate, or veneer with features like multiple pull styles, drawer sizes, finishes, and more. It's your workspace. Shouldn't it look like it?

PERSONAL STORAGE		LATERALS AND SHARED STORAGE	
1. <b>Pedestal.</b> Support, mobile, or suspended, with three drawer sizes.	3. <b>Personal tower.</b> Versatile storage with a small footprint. It's storage that goes up, not out. Combine drawers, personal storage, and wardrobe options for the right solution.	5. <b>Lateral file.</b> The storage workhorse, in multiple heights and widths. Works with systems furniture or by itself.	7. <b>Storage cabinet.</b> Equipped with hinged, locking doors and adjustable shelves to conceal and secure supplies.
2. <b>Personal file.</b> Combines pedestal and lateral storage to create a personal filing solution for letter and legal size documents.	4. <b>Low credenza.</b> Active storage that creates a layered look in any workspace.	6. <b>Combination file.</b> The perfect combination of file storage and shelf storage, with concealed or open shelves.	8. <b>Bookcases.</b> Quick access to information, in depths to match laterals or narrower profiles to stand on their own.

- Additional Allsteel Storage Solutions are available in the Storage and Stride® System Price Lists:**
- Align™ Metal and Veneer — Pedestals, Personal Files, Credenzas, Towers, Lockers, Laterals, Combination Files, and Bookcases
  - Involve® Laminate — Pedestals, Credenzas, Towers, Stacking Storage, Overheads, Soft Seating, and Bookcases
  - Stride Painted Wood — Pedestals, Credenzas, Towers, Combination Files, and Overhead Cabinets

# Essentials™ Metal Storage

## Working with Pedestals

GSA Reference Page

### Essentials Pedestals

- File drawers can accommodate front-to-back filing on all models, and side-to-side filing on 22 $\frac{7}{8}$ "D and 28 $\frac{7}{8}$ "D models.
- Support pedestals of a maximum depth, relative to the worksurface depth, result in one panel receptacle position being inaccessible.
- 22 $\frac{7}{8}$ "D units cannot be used with 24"D Cadence® Freestanding.
- 28 $\frac{7}{8}$ "D units cannot be used with any 30"D Cadence Freestanding or any 24"D panel-hung worksurface.
- For locking specifications, see pages 200-202.
- Leveling capacity is 2" on 28"H pedestals.

**Support pedestals** can support one end of a panel-attached worksurface, in lieu of other worksurface supports by using a 28"H support pedestal but cannot be used to support freestanding desking without an end panel.

**Suspended pedestals** mount to the underside of the worksurface using keyhole slots in top of pedestals. Do not mount suspended pedestals on bridges or peninsulas. Always mount suspended pedestals at end of worksurfaces.

When using suspended units on systems, a return panel should extend 18" minimum beyond leading edge of worksurface on which unit(s) is mounted.

**Mobile Pedestals** can be used to provide flexible storage. The nominal height of a mobile pedestal is equal to that of a freestanding pedestal of equivalent design. There is no need to add extra height for the casters.

28"H mobile pedestals can be nested under worksurfaces mounted at 29 $\frac{1}{2}$ "H.

Mobile pedestals cannot be leveled. Take this into consideration when planning offices which may have uneven floors.

### Pedestal Compatibility with Cadence Desking and Systems Worksurfaces

Pedestal Depth	Cadence Freestanding		Systems Panel-hung Worksurfaces	
	24" Deep	30" Deep	24" Deep	30" Deep
18"	Yes	Yes	Yes	Yes
19 $\frac{7}{8}$ "	Yes*	Yes	Yes*	Yes
22 $\frac{7}{8}$ "		Yes	Yes*	Yes
28 $\frac{7}{8}$ "				Yes*

\*Wire management grommet is blocked in these applications.

**Note:** Pedestal placement may affect access to receptacles in base pathway.

Worksurface height mobile and worksurface supporting pedestals have a taller base plate, resulting in a taller overall cabinet height. Consideration must be made to ensure that units align visually with each other and with selected Essentials lateral files. The accompanying chart will help you select the correct pedestal for your application.

Essentials Pedestal Model begins with	Style	Overall Height	Base Height	Units align with these Essentials Lateral Models begin with
xx11	Seat height	22 $\frac{1}{2}$ "	2"	na
xx14	Suspended	19 $\frac{1}{2}$ "	na	na
xx18, xx38	Worksurface height mobile	28"	3 $\frac{1}{8}$ "	ELF8 (2-high only)
xx19, xx39	Worksurface supporting*	28"	3 $\frac{1}{8}$ "	ELF8 (2-high only)

\*Units will support conventional 29 $\frac{1}{2}$ " high worksurfaces.

### Essentials Pedestals

#### Essentials Support and Suspended Pedestals (page 89)

- Steel, ball-bearing slide suspension with full-extension on file drawers, 90% extension on box drawers.
- File drawer has high sides to allow front-to-back filing.
- Side-to-side filing utilizes follower block and cross rail.
- Follower block (APFB80) sold separately.
- Cross rail is standard in all pedestals.
- Pencil tray included — one per pedestal with box drawers.
- For improved aesthetics on 28"H pedestals, order flush mount kick plates.
- Support units have four leveling glides.
- Counterweight is standard in mobile pedestals.
- Support pedestals not used to support a worksurface require a counterweight kit — order separately.
- Box drawers have adjustable divider.
- Caster package available to field convert support pedestals to mobile.
- Standard core removable locks. See pages 120-122.

#### Essentials Mobile Pedestals (page 89)

- Steel, ball-bearing slide suspension with full-extension on file drawers, 90% extension on box drawers.
- File drawer has high sides to allow front-to-back filing.
- Side-to-side filing utilizes follower block and cross rail.
- Follower block (APFB80) sold separately.
- Cross rail is standard in all pedestals.
- Pencil tray included — one per pedestal with box drawers.
- Counterweight is standard in mobile pedestals.
- Box drawers have adjustable divider.
- Rear casters swivel, front casters are fixed.
- Standard core removable locks. See pages 120-122.
- Adjustable glide kit available to field convert mobile pedestals to support.
- Casters on box/file mobile pedestal require installation.
- For improved aesthetics on 28"H pedestals, order flush mount kick plates.

#### Essentials Basic Support Pedestals (page 90)

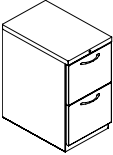

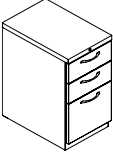

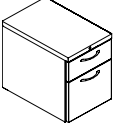

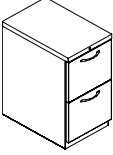

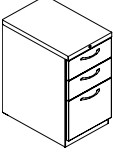

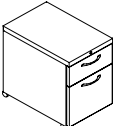

- Steel, ball-bearing slide suspension with 90% extension on file drawers, and 75% extension on box drawers.
- Follower block (APFB80), pencil tray (A2280-000), and adjustable divider (PD80) for box drawers sold separately.
- Side-to-side filing utilizes two cross rails (AP519495) sold separately.
- File drawer has high sides to allow front-to-back filing.
- Support pedestals not used to support a worksurface require a counterweight kit sold separately.
- Caster package available to field convert support pedestals to mobile.
- Standard core removable locks. See pages 120-122.
- Adjustable glide kit available to field convert mobile pedestals to support.
- For improved aesthetics on 28"H pedestals, order flush mount kick plates.

#### Essentials Basic Mobile Pedestals (page 90)

- Steel, ball-bearing slide suspension with 90% extension on file drawers, and 75% extension on box drawers.
- Follower block (APFB80), pencil tray (A2280-000), and adjustable divider (PD80) for box drawers sold separately.
- Side-to-side filing utilizes two cross rails (AP519495) sold separately.
- File drawer has high sides to allow front-to-back filing.
- Counterweight is standard in mobile pedestals.
- Support pedestals not used to support a worksurface require a counterweight kit sold separately.
- Caster package available to field convert support pedestals to mobile.
- Standard core removable locks. See pages 120-122.
- Adjustable glide kit available to field convert mobile pedestals to support.
- For improved aesthetics on 28"H pedestals, order flush mount kick plates.

#### Essentials Seat Cushion (page 91)

- Seat cushion provides quick and convenient additional seating.
- Seat cushion adds approximately 2"H to pedestal.
- YPPA prefix models have stitched corners and bumpers on bottom.
- ASPT prefix models have wrap around corners and attach with double-sided tape.
- COM yardage for seat cushion is  $\frac{2}{3}$  yard.

## Extensions — Introduction

**Extensions accessory line by Allsteel is designed to help you create your own space.**

### • Create a unique space

Each person is unique, no one person works exactly like another, and different tasks require different tools. Extensions work tools allow each person the ability to create a unique environment that is all their own. Lots of paper to manage? Need active files within arm's reach? Want to maximize your worksurface space? Need light somewhere other than below a cabinet? Whatever the task, we have the tools to accommodate your workstyle.

### • Create a comfortable space

With a full line of organization, ergonomic, and illumination tools, Extensions allow you to create a comfortable, ergonomic work area. Organization tools keep important items visible and within your reach. Ergonomic tools help you stay comfortable while working. Illumination tools allow you to put your light where it suits you.

### • Create an organized space

Tired of all the piles of paper building up on your worksurface? Organization tools house your materials and keep them in an orderly fashion. With a combination of hanging or freestanding organizational accessories, Extensions let you manage everything from binders to paper clips.

### • Organization tools

Work tools are a durable metal construction. Extensions allow you to manage your workspace smartly with tools like the phone caddy to elevate the phone off the worksurface, landscaped mail box trays to minimize worksurface intrusion, folder holders and tool box pen and pencil holders that hang off the slat rail and each other.

Increase your efficiency with organization!

### • Ergonomic tools

Ergonomics is more than just comfort, it's flexibility and safety. The adjustable keyboard options allow users to maintain and vary comfortable wrist and arm positions throughout the day, whether typing or mousing. Monitor Arms offer versatile adjustability while providing optimum comfort for the eyes, neck, and shoulders.

### • Illumination tools

Sleek and flexible, our lighting components offer you several choices. Recessed task lights conserve space and feature electronic ballast for longer bulb life and cooler operating temperature. LED tasklights' slim design blends in with its surrounding while utilizing energy-efficient LED technology. The Link light offers award-winning style to a highly versatile and energy efficient light.

# Extensions™

## Working with Organization Tools

GSA Reference Page

**Allsteel's tool rail** works in conjunction with a variety of accessories. Modular accessories free up worksurface space and provide orderly storage that is well within reach. Units can be arranged and rearranged to respond to changing workflow. The work tools that attach to the tool rail are:

- Mail Box
- Folder Holder
- Phone Caddy
- Binder Bin
- Tool Box
- Clip Caddy™
- Sidebar™ Personal Shelf
- Paper Wave™
- Gripper Clip

Additional accessories that work with the **tool rail work tools** aesthetically are:

- Bookends
- Freestanding Mail Box

Coat hooks, marker boards and center drawers round out the organization offering.

Tool rail, shown above, is height-adjustable in 1" increments using slots in panels or metal hutch. Tool rail shown with two tool boxes, two mail boxes, folder holder, and phone caddy. Folder holders and binder bins extend below a tool rail. Paper Wave and contents extend above a tool rail.

### Tool Rails and Work Tools (page 105)

- Sturdy aluminum extrusion with steel support construction.
- Powder coated for durable finish.
- Use to hang Extensions tools. Cannot be used to support monitor arms.
- Suggested weight capacity not to exceed 80 lbs.
- Consideration needs to be given to height of tools and location of worksurfaces.
- For use with Stride®, Terrace®, Concensys®, and Optimize™ systems.
- 5" high rail (widths coordinate with panels).
- Attachment via vertical reveals.
- Can be hung from wall track. Good solution for above copiers.
- Systems tool rail is off-modular — can be used on a panel of equal width or one size smaller.
- May span two panels of appropriate size, i.e., 60" W Tool Rail on two 30" W panels.

### Tool Rail for Hutches (page 105)

- Will work on Universal, Terrace, Optimize, and Concensys system hutches produced after July 2, 2000 and Align™ metal hutches.
- Sturdy aluminum extrusion with steel support construction.
- Powder coated for durable finish.
- Use to hang Extensions tools. Cannot be used to support monitor arms.
- Suggested weight capacity not to exceed 80 lbs.
- Consideration needs to be given to height of tools and location of worksurfaces.

### Mail Box (page 106)

- Holds standard letter-size paper and inter-office envelopes.
- Minimal horizontal intrusion.

### Folder Holder (page 106)

- Holds manila envelopes.
- Is capable of hanging on other folder holders to maximize space.
- Stores vertically for easy access to files.

### Phone Caddy (page 106)

- Holds telephone at optimum ergonomic angle.
- Wire management cut-outs.
- Accommodates standard phone sizes.

### Binder Bin (page 106)

- Holds folders, binders, and manuals.

### Tool Box (page 106)

- Holds pencils and other writing utensils, large post-it notes, and other desk top accessories.

### Clip Caddy™ (page 106)

- Holds paper clips and other small objects.

### Sidebar™ Personal Shelf (page 106)

- Holds office supplies and personal effects.

### Paper Wave™ (page 106)

- Provides 3 fully divided slots for organizing files.
- Keeps papers from "bowing" at bottom.

#### Gripper Clip (page 106)

- Binds project papers together.
- Mounts to tool rail or tool tile.

#### Bookends (page 106)

- Can be used on shelves or in cabinets.
- Used to hold books, binders, and catalogs upright.

#### Freestanding Mail Box (page 106)

- Incorporates similar aesthetic to mounted Mail Box.
- Mounting brackets allow for free access from front and back.
- Sold in pairs of two; will stack up to eight high.
- Individual mail box dimension = 1 3/4" H.
- Stacking brackets are black.

#### Coat Hook APMC6 (page 106)

- Hangs directly into slotted Stride®, Terrace®, Optimize™, or Concensys® panel frame. Use for coat or bag.
- Package of six. Available in black only.

#### Power/Data Modules — Clamp On Worksurface (page 107)

- On-surface mounting option, fits on any worksurface with a 4" overhang.
- 6' Power cord. UL Listed.
- Includes adapters to allow use of commercially available data terminals or blanks to fill unused openings. Many of the AMP, AT&T, Krone, Leviton and most commercial data terminals can be used.

#### Power/Data Modules — Clamp On Worksurface (page 107)

- Worksurface clamp can be used on any surface with a 2 1/2" overhang.
- Must be installed at time of initial worksurface installation if installing between a worksurface and panel.
- 6' Power cord. UL Listed.
- The USB hub allows simultaneous powering of 2 USB-A devices. The USB hub is a charger only, no ability to connect to a PC. The charging capacity is limited and may not charge all devices.

#### Power/Data Modules — Under Worksurface (page 107)

- Under surface mounting can be used on any surface with a 5" clearance.
- 6' Power cord. UL Listed.

#### Technology Modules (page 107)

- Can be mounted by clamping to worksurface or mounting flush to the worksurface top.
- Must be installed at time of initial worksurface installation if mounting between a worksurface and panel.
- The USB hub allows simultaneous powering of four USB-A devices. The USB hub is a charger only, no ability to connect to a PC. The charging capability is limited and may not charge all devices.
- Opening size needed to flush mount in worksurface.

Model	Depth of Cut	Width of Cut
A87P2U1R	4"	8"
A87P2D1R	4"	8"

#### Byrne's Docking Station for iPod® and iPhone® (page 107)

- The iDoc charges and syncs with patent pending Roc.in.Doc™ technology eliminating the need for charging adapters.
- The mount provides quick access to the iPod or iPhone display for easy user control.
- Contact Byrne to check for compatibility with the latest technology.

#### Worksurface Power/Data Module (page 107)

- Provides easy access to technology at primary worksurface.
- Mounts to edge of a worksurface and requires 3/8" gap. Consider whether 3/8" gap will work with layout.
- Must be mounted at time of initial worksurface installation if mounting between a worksurface and a panel. Maintaining 3/8" gap may not be possible with worksurfaces that are panel wrapped.

**Marker Board** (page 107)

- For use with dry marking pens.
- Hangs directly on Optimize™ or Concensys® panel frame.
- Brackets are installed for Concensys applications.
- Brackets must be field re-located for use with other systems.
- Porcelain-coated steel surface.
- White with silver trim.
- Width must correspond with width of panel.

**Metal Center Drawers** (page 107)

- All metal center drawers feature pencil trays with three compartments for storage.
- Center drawers will not fit in center of 24" D worksurfaces which are wider than 60" due to location of center support bracket.
- For locking specifications, see pages 120-122.
- Ball-bearing slide suspension.

**Laptop Drawer — U7WDA** (page 107)

- Drawer body made of sheet metal.
- Drawer front made of 3/4" particle board with high pressure laminate on both sides and fused laser edge banding.
- Core removable lock is located on right side drawer front
- 17 5/8" W x 18" D x 3 3/8" H Outside (interior 13" W x 16" D x 1 7/8" H)
- Minimum surface depth is 21" for surfaces not using an external stiffener; and 27" for surfaces using an external stiffener.
- Drawer extends 16"
- Maximum load: 45 lbs (functional BIFMA load)
- Drawer assembly and cover have cut out in back to allow for cables to exit drawer.
- Distance from floor to bottom of unit w/glides fully retracted is 24 3/4".
- Does not interfere with Further leg mounting plates so drawer can be placed directly next to either a system or table leg.
- When being placed next tower storage using the tower ell bracket (Z6LB) to support surface the drawer must be inset 3" to clear the ell bracket.
- Can be placed directly next to any support storage from any Allsteel product line (excluding towers).
- Flat brackets — drawer must be offset 3" from seam between surfaces to clear the bracket. See illustration at left.
- Can be used with rabbet edge worksurface models but there will be a larger reveal between surface and drawer.
- Can be used with knife edge worksurface models but reveal and depth need to be considered.

**Flat Brackets**

### AKM5 Keyboard Support w/Switch-n-Click Mousepad (page 112)

- Convenient lift and lock mechanism provides 8 $\frac{3}{8}$ " of height adjustment and offers more precise placement accommodated with visual dial-a-tilt height and tilt gauge.
- +10°/-15° tilt adjustment and 360° rotation provides support of neutral position of shoulders, arms, and wrists while accommodating multiple working postures.
- Slim, low-profile design.
- Pairs with a convertible keyboard platform that can be positioned in-line, over, or forward of keyboard platform — without the need for tools.
- Includes detachable leatherette-covered gel palm rest, nonslip pad, mouse pad, mouse guard, and cord management clips.
- Phenolic material on keyboard platform can be cleaned and sanitized to maintain a bacteria-free environment; articulating arm made of cold-rolled steel is recyclable.
- Recommended for straight-edge worksurfaces.

### AKM3 Keyboard Support w/Switch-n-Click Mousepad (page 112)

- Features intuitive lift and lock height and tilt mechanism. Provides 7" of height adjustment.
- Slim, low-profile design that can be positioned flush with the worksurface for an extended workspace.
- +15°/-15° tilt adjustment and 360° rotation provides support of neutral position of shoulders, arms, and wrists while accommodating multiple working postures.
- Pairs with a convertible keyboard platform that can be positioned in-line, over, or forward of keyboard platform — without the need for tools.
- Includes detachable leatherette-covered gel palm rest, nonslip pad, mouse pad, mouse guard, and cord management clips.
- Phenolic material on keyboard platform can be cleaned and sanitized to maintain a bacteria-free environment; articulating arm made of cold-rolled steel is recyclable.
- Recommended for straight-edge worksurfaces.

### AKMX Cobra™ Keyboard Support w/Mousepad (page 112)

- Lift and lock intuitive height adjustment.
- Positive and negative tilt for the best ergonomic positioning.
- +10°/-20° tilt adjustment and 360° rotation provides support of neutral position of shoulders, arms, and wrists while accommodating multiple working postures.
- Non-handed mouse tray can be moved from right hand to left hand side.
- Surpasses ANSI/BIFMA standards.
- Black powder-coat finish.

### AKM1 Keyboard Support w/Mousepad (page 112)

- Simple, spring-assisted mechanism provides 6 $\frac{1}{4}$ " of height adjustment.
- Features soft-touch knob for simultaneous height and tilt adjustments.
- +10°/-15° tilt adjustment and 360° rotation provides support of neutral position of shoulders, arms, and wrists while accommodating multiple working postures.
- Accommodates keyboard and mouse on the same level
- Includes detachable leatherette-covered gel palm rest, nonslip pad, mouse pad, mouse guard, and cord management clips.
- Keyboard platform made of 90% post-consumer recycled materials and completely recyclable. Free of formaldehydes and carcinogens and emits no VOCs.

### Keyboard Spacer Kit (page 112)

- Kit provides ten 2 $\frac{1}{8}$ "H spacers and hardware for mounting keyboard support beneath an external worksurface support channel.

### CPU Hammock™ (page 112)

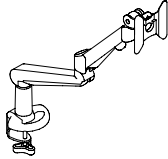

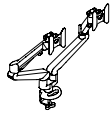

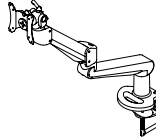

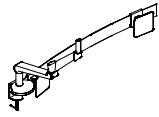

- Features 360° swivel with 13 $\frac{1}{2}$ " ball bearing glide track.
- Load capacity 55 lbs.
- Fits CPUs 5" to 20" in overall height and 3" to 6" in width.
- Height adjustable from 16" to 23" below worksurface.
- No tools required to make adjustments.
- Features a textured, silver paint finish.

### Metal Corner Sleeves (page 112)

- 22 $\frac{1}{2}$ "W leading edge x 18"D.
- Corner sleeves connect intersecting worksurfaces to create "corner desk" work areas.
- All corner sleeves have pre-drilled holes to allow attachment of articulating keyboard platforms.

\*ZW810T is NOT approved for Tool Rail Models EASRxx or EAHSRxx that attach to system panel slots or hutches.

\*\*Width of monitors can be extended with ZW8SM sliding mount.

### ZW8 Series Monitor Arms (page 113)

- Versatile adjustability with a refined design and effortless, pneumatic fingertip adjustment.
- Multiple points of adjustment, including 360° swivel at two points, 21" extension and 13" of height adjustment, and a 180° lockout feature.
- Monitor tilts +30°/-25°.
- Tension adjustment feature at two locations to accommodate monitor weight and desired tilt tension.
- Maximize use of worksurface with ability to retract to minimal footprint of 3½", making ZW8 ideal for shallow worksurfaces.
- Model includes grommet and worksurface mounting options.
- Integrated cable management.
- Desk clamp mounts to surfaces ⅞" to 2" thick; grommet mount requires hole diameter of ⅝" to 2" wide, and accommodates surfaces up to 2" thick.
- Single arm supports 6½ to 18 lbs.; dual arm offers perfect horizontal alignment, and each arm supports 6½ to 18 lbs.
- ZW8 for tool tile is compatible on Allsteel tool tiles and Stride bench rail includes one dynamic extension limb. Arm extension is 15" from tile/rail, height adjustment 12".  
(Not approved for tool rail models EASRxx or EAHSRxx that attach to system panel vertical slots or hitches.)
- ZW810S and ZW820D will fit all depths of Stride double-sided benches. Interference with support beam on 54" bench, desk clamp will not install flush to edge of worksurface, but will allow power access door to close completely.
- Mounting location on Stride single-sided bench and screen-based bench may be impacted by location of connecting brackets and supports.
- VESA 75mm and VESA 100mm compatible.
- Quick release feature simplifies monitor installation and exchanges.

### ZW8SM Sliding Mount (page 113)

- Provides 9" of additional horizontal adjustability when attached to ZW810S or ZW820D above.
- Not compatible with Heavy Duty Series.
- 12¼"W x 2¼"H x 5½"D; 2 lbs.

### ZW8 Heavy Duty Series (page 113)

- ZW810H heavy duty arm supports 7.6 to 44 lbs. in total weight.
- ZW820DH supports weight capacity 12 to 38.5 lbs. combined (to accommodate 5.5 lbs. weight of crossbar).
- Single arm features 22¼" extension, dual arm extends 26¾".
- Height adjustment range of 9" to 23" (14" total).
- Features 360° rotation at 3 points.
- Integrated cable management.
- Tension adjustment feature at two locations to accommodate monitor weight and desired tilt tension.
- Quick release feature simplifies monitor installation and exchanges.
- Monitor rotates 180° and tilts +85°/-35°.
- Dual arm crossbar length of 41"; monitors can be positioned by sliding along crossbar to accommodate various sizes. Can accommodate up to two 24" diagonal monitors (total outside casing dimension of 38" wide).
- Cannot be installed on 54" Stride double-sided bench due to interference with support beam.
- Mounting location on Stride single-sided bench and screen-based bench may be impacted by location of connecting brackets and supports.

### Laptop Tray (page 113)

- Adjustable laptop tray can be used on ZW810S and ZW820D.
- Features adjustable depth of 11¼" to 17¼" to accommodate docking stations along with laptop computer.
- Width 12".
- Designed with ventilation holes for adequate heat dissipation.
- Non-skid protective pads included to prevent laptop from sliding.
- Weight of laptop tray 7 lbs; include when calculating total weight of tray + laptop to comply with weight capacity.

Allsteel Extensions offers Illumination in four styles — Task Light, Undercabinet LED Light, Wand Light, and Link Light.

### Task Light

Recessed task lights conserve space and provide an efficient solution for illuminating the workplace. All models are equipped with electronic ballast for longer bulb life and cooler operating temperature.

Recessed task light models mount under storage cabinets or shelves to provide optimal space utilization. Models are available in two styles and three sizes to correspond with the width of the cabinet or shelf. Task lights with a fused plug are available to meet Chicago electrical code.

### Undercabinet LED Light

The Undercabinet LED Light is a low-profile, linear solution for overhead cabinets and shelves and is an ideal solution for painted wood storage. It utilizes energy-efficient LED technology which provides a long life. The Undercabinet LED Light provides the opportunity to mount the fixture where light is needed most.

The Undercabinet LED Light features a metal trough reflector with diffuser lens. The light has a sleek ½" thick profile and provides two options for mounting, either magnetically or with hardware. Undercabinet LED Lights can be daisy-chained.

Optional undercabinet occupancy sensor is available which will automatically turn off the fixture after 30 minutes of no detection and back on immediately as the user re-enters the detection range using Passive Infrared (PIR) sensor technology. Unit features 360° lens with 90° outward detection angle, providing a 36" coverage diameter at 18". Occupancy sensor comes with connector and is required to be connected in the sequence shown below. Connect occupancy sensor to a light, or first light in daisy chain to control all linked lights.

#### CONNECTION SEQUENCE\*

\*Cannot deviate from this sequence

### Recessed Task Lights (page 116)

- Recessed task lights are black with a 9' long black cord that is attached to the right rear corner of the fixture. (Color does not need to be specified.)
- Bulbs are included.
- RECOMMENDATION: Provide a separate circuit for task lights to ensure proper, long-term operation.
- Includes 4 cord retainer clips.
- Shorter width models can be used on wider overheads, shelves and hutches.
- All models are equipped with electronic ballast for longer bulb life and cooler operating temperature.
- On/Off switch provides individual control of tasklight within the workstation.
- Daisy chain models require a master control model — 10 fixtures maximum.

### Undercabinet LED Lights (page 117)

- Low profile energy-efficient LED task light for use with overhead storage cabinets and shelves.
- 20W power supply for 10W 17" unit (.166 amps).
- 20W power supply for 20W 31" unit (.166 amps).
- 60W power supply for daisy-chain starter units (.5 amps). Must order one starter unit for each daisy-chain application.
- Specify up to 5 additional 17" interconnect units (ALED17UJMP30) to daisy-chain together with 17" daisy-chain starter fixture (ALED17U60).

*Example:* Daisy-chain 4–17" undercabinet LED lights:

Specify: 1 ALED17U60

Specify: 3 ALED17UJMP30 with 10" jumper cord

- Specify up to 2 additional 31" interconnect units (ALED31UJMP30) with 10" jumper cords to daisy-chain together with 31" tasklight (ALED31U60); or 17" daisy-chain starter fixture (ALED17U60).
- 3500K color temperature.
- 131 footcandles at 18" on ALED31U; 76 footcandles at 18" on ALED17U.
- Magnetic or screw-mount option — attachment hardware included.
- On 20 watt models, power drive is attached to plug; allow 1½"D space at outlet.
- On 60 watt models, power drive brick is in center of cord and can be attached to underside of worksurface with velcro mount.
- Includes 3 cord retainer clips.
- Meets California Title 24 Energy Efficiency Standards.
- "Instant On" switch with infinite dimming cycle from 100% to 15% with the last state memory, allowing the user to set their desired level of lighting.
- Fixture automatically turns off after 10 hours of use to reduce unwanted energy use.
- Optional occupancy sensor automatically turns off all interlinked fixtures after 30 minutes of no detection and back on immediately when detection is found.

#### Link™ Light

Link's simple forms, slim profile, and expressive details make a surprising design statement in any workplace. The playful lamp head offers 180-degree movement for natural and precise adjustability. The concentrated array of high-power LEDs delivers a brighter light output than standard fluorescent lights, while operating cooler for consistent, long-lasting, and uniform-quality light. Plus, its efficient design elegantly conserves the amount of materials required, paring them down to their most essential. Engineered for effortless disassembly, Link is 97 percent recyclable.

#### Link Light (page 117)

- Single- or dual-arm style.
- 3300K color temperature, 7.5 watts.
- Available in two soft-touch colors (Silver and Black).
- Mounting options include a freestanding base, worksurface edge clamp, or tool rail bracket. Each allows for unobstructed lamp rotation.
- Freestanding base is 9½" x 9½".
- Cord length: 9' with detachable power adapter.
- The lamp head forms the handle, offering 180-degree up/down movement.
- Low Profile worksurface clamp allows for minimal clearance conditions but must be installed before worksurface.
- Power is delivered through a conductive aluminum skin, eliminating internal wiring.
- L-shaped base sits in the corner, using minimal workspace.
- Meets California Title 24 Energy Efficiency Standards.
- Link Light is UL, CE, and RoHS compliant.
- Actual length of model LED18U is 19".
- Actual length of model LED36U is 37¼".

#### Wand™ Task Light

Wand freestanding task light offers a clean, simple design along with powerful LED technology to illuminate the workspace. The swivel base and arm tilt allow users to position the light just where they need it. The 7.7 watt LED light offers efficiency and long life, providing up to 25 years of daily use. The slim, sleek design makes it easy to integrate into any workspace. Wand task light is 97% recyclable. Optional Occupancy Sensor available.

#### Wand LED Freestanding Task Light (page 117)

- Available in Silver or White. 9'4" cord is Silver.
- Full range dimming from 100% — 10% with last state memory.
- More efficient than original Wand light with brighter and broader range of light.
- Uses 7.7 watts at highest setting and as low as 1 watt at its lowest setting, providing 85 to 12 footcandles of light, respectively (16" above worksurface).
- 7½" round swivel base and 16½"H tilt arm allow versatile positioning of the 13" lampshade.
- Designed for 50,000 hours of life, providing up to 25 years of daily use. Warranty — 5 years (fixture); 3 years (power supply).
- Color Temperature: 3500K. Color Rendering Index (CRI): 80.
- Materials: aluminum arm and lampshade, steel base.
- Weight: 4.4 lbs. 97% recyclable, 76% post-consumer.
- Certifications: UL and CUL. TAA compliant.
- Occupancy sensor available with automatic shut-off after 6 minutes if no motion is detected.

For specification information see pages 114-115.

## Locking Specifications

GSA Reference Page

### Laterals, Pedestals and Storage, Painted Wood Storage

#### Standard Options

- Random Keying — The factory will assign key(s) arbitrarily using key numbers from chart below.
- Omit Lock Core — The factory will omit lock cores. Removable lock core kits with specific key number must be ordered to facilitate keying alike in the field.

#### Replacing Lock Cores

- Lock must be in the unlocked position.
- Insert core removal key and pull core straight out.  
(Reach units require rotating key 90° clockwise past unlocked position.)
- Insert new core with core removable key, hold core into lock and withdraw core removal key.
- Retain original core for future use.

### Vertical Files

#### Standard Options

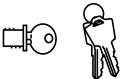

- Random Keying — The factory will assign key(s) arbitrarily (see below chart for key numbers).

#### Key Alike Process

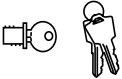

- Order standard product which will be shipped with factory installed locks and random numbered cores.
- Order the appropriate quantity of like numbered cores required for each workstation or keyed area.
- Simply replace the factory installed core with the replacement cores after product has been installed.

## Locking Specifications — Easy Lock Program

SIN 711-1, 711-3

### EASY LOCK PROGRAM

The Allsteel Easy Lock Program simplifies the lock-core ordering process when multiple cores are being specified. The Easy Lock cores can be used with Allsteel storage that currently uses the **ALKF23C** cores (all storage except Receding Door Overheads).

To ensure ease of ordering in different situations the Easy Lock cores can be specified in three different ways — Random, Specified or Sequential.

#### Random Keying

The Random Keying option is provided for instances where there are multiple orders or phases to a project and the offices need to be keyed alike but the key numbering is not required. With the random keying option key numbers are not specified, however, the core kits will be in sequential order from a random starting point.

**Example:** *There are 15 offices which each have 5 black locks that need to be keyed alike, but the actual key numbers are not important.*

This order would look like: **LKFE5BLK.X.15**

This specifies that 15 5-core kits are needed in black with random key numbers.

#### Specified Keying

The Specified Keying option is provided for the instances where there is a specific key number desired for all of the cores ordered.

**Example:** *There are 10 offices which each have 2 silver locks that need to be keyed-alike with key number 202.*

This order would look like: **LKFE2SLV.X202.10**

This specifies that 10 2-core kits are needed in silver with key number 202.

#### Sequential Keying

Allsteel Sequential Keying option is provided for the instances when there are multiple orders or phases to a project and it is imperative that key numbers are not duplicated.

**Example:** *A multiple phase project has 60 total offices — 40 offices in Phase I, and 20 offices in Phase II. The project manager has expressed a need to have keyed-alike offices but doesn't want any of the offices to use the same key numbers.*

*The first 40 offices have 4 silver locks each that need to be keyed-alike.*

This order would look like: **LKFE4SLV.SEQ/101.40**

This specifies that 40 4-core kits are needed in silver and the starting number is 101.

*The second set of 20 offices only have 3 silver locks each that need to be keyed-alike; and it is important which key number starts off the sequence to ensure that no key number is duplicated. It is known that the first key range was key numbers 101-140.*

The second order would look like: **LKFE3SLV.SEQ/141.20**

This specifies that 20 3-core kits are needed in silver and key sequence has to start at key number 141.

### HOW TO ORDER:

Numbers 101-225 are available. Orders without key numbers specified will be keyed at random.

SAMPLE ORDER FOR EXAMPLES GIVEN:

Model	Key Type	Quantity
LKFE5BLK.	X.	15
LKFE2SLV.	X202.	10
LKFE4SLV.	SEQ/101.	40
LKFE3SLV.	SEQ/141.	20

**NOTE:** Quantity required is last number in model.option string.

Description	Model / Color	List Price
<b>Easy Lock Lock-Core</b>		
Lock Core Kit — 1 core, 2 keys	LKFE1 _____	\$ 18
Lock Core Kit — 2 cores, 2 keys	LKFE2 _____	\$ 36
Lock Core Kit — 3 cores, 2 keys	LKFE3 _____	\$ 54
Lock Core Kit — 4 cores, 2 keys	LKFE4 _____	\$ 72
Lock Core Kit — 5 cores, 2 keys	LKFE5 _____	\$ 90
Lock Core Kit — 6 cores, 2 keys	LKFE6 _____	\$108
Lock Core Kit — 7 cores, 2 keys	LKFE7 _____	\$126
Lock Core Kit — 8 cores, 2 keys	LKFE8 _____	\$144

Add color suffix to model: **SLV** Silver, **BLK** Black, **MTS** Matte Silver

**Note:** One core removal key minimum per order. One additional core removal key per 25 lock-cores will be shipped.

#### Master Key

(One key) Available to authorized dealers only on faxed orders.

**AMKF22** \$ 17

#### How to specify using Easy Lock Program:

**Step 1** — Count the number of lock cores and color required in each workstation that need to be keyed alike.

2 overheads with 1 lock-core each = 2  
2 pedestals with 1 lock-core each = 2  
Total silver lock-cores per station = 4

**Step 2** — Count the total number of workstations needing 4 lock-cores.

4 total workstations

**Step 3** — Specify model number based on total number of lock-cores in a station and quantity of kits based on number of workstations.

**LKFE4SLV.X.4**  
Lock-Cores per station  
Color of Core  
Number of workstations

### ALLSTEEL

#### PARTNERSHIP PROGRAM

Allsteel understands that customers may want to specify panel and seating textiles outside of Allsteel's standard offering. Allsteel's **Partnership Program** consists of on-trend and design-forward patterns that have been tested and approved by Allsteel for use on Allsteel products. A subset of these approved patterns is available on cards in the textile binder, while numerous others are available on our website, [allsteeloffice.com](http://allsteeloffice.com).

**For memo samples, please contact our partners:**

- Carnegie, [carnegiefabrics.com](http://carnegiefabrics.com)  
1.800.727.6770
- CF Stinson, [cfstinson.com](http://cfstinson.com)  
1.800.841.6279
- Edelman, [edelmanleather.com](http://edelmanleather.com)  
1.800.886.8339
- HBF Textiles, [hbftextiles.com](http://hbftextiles.com)  
1.877.494.5727
- Maharam, [maharam.com](http://maharam.com)  
1.800.645.3943
- Momentum Textiles, [memosamples.com](http://memosamples.com)  
1.800.366.6839
- Ultrafabrics, [ultrafabricsllc.com](http://ultrafabricsllc.com)

The intent of the **Partnership Program** is to offer a wide variety of on-trend textiles to meet your varied needs, but since these textiles are not part of our standard offering they may be subject to extended lead times. Because new materials will be introduced regularly, Allsteel reserves the right to change the offering at any time.
