FINISHES

The natural world and industrial spaces have influenced our wood and metal finishes.

Wood grain finishes are European in tone, from crisp Hacienda White, to warm Beech, to cool Winter Oak.

For a contemporary look choose from muted shades of Blue, Yellow or a neutral palette of Black, Gray and White.

Matte wood finishes absorb the light and polished metal frames add reflection, combining light with dark for the ultimate finish.

Care & Maintenance

Periodic maintenance is necessary to ensure long term durability and customer satisfaction. All products should be closely inspected each month. If any item shows signs of structural failure it should be taken out of service immediately.

Fabric
Please follow specific manufacturing guidelines when cleaning fabric. Cleaning with an unapproved solution could damage the fabric.

Neglect is the most common cause of the premature breakdown of any upholstery fabrics. Problems occur as a result of inadequate removal of dirt, dust and grit which settles on the surface of the upholstery. If not removed, the dirt and grit will eventually penetrate the structure of the fabric. With further agitation, the dirt and grit will act like sandpaper wearing away and breaking fibers in the fabric structure. If enough fibers are broken, a hole will eventually form in the upholstery.

Epoxy powder frames
Clean using a damp cloth with a mild solution of soap and water.

Chrome frames
Clean chrome with a good grade chrome cleaner to maintain a bright finish. Ocassionally chrome leakage can occur on products that have been just delivered. Wipe down with a chrome cleaner to eliminate this.

TFL
TFL & Laminate tops are very resistant to normal office problems, such as tea or coffee stains. Simply wiping with a soft damp cloth will remove most stains. Should a stubborn problem arise, clean with a soft damp cloth and a mild detergent solution. Do not use abrasive cleaners. Cut back edges should be wiped with a dry cloth only.

Ad-Lib Tables – Conference room planning

Seating Capacity Guide

With so many top shapes and sizes to choose from, it can be difficult to visualize the amount of space required for each table. We have designed a room planning guide that shows some 'typical' set ups, designed to help you specify the right table. The diagrams offer an indication of spacial requirements, including advised distances between the table area and other furniture or walls. Each set up has two diagrams showing an estimated seating capacity based on conference seating and an estimated seating capacity using multi-purpose seating. The most important considerations are the size and purpose of your room because the tables size and shape, the size of the chairs and any ancillary storage credenzas, must be planned according to your room's capacity. It's important that the space does not become crowded.

Following are some example room configurations that include different kinds of seating. More configurations plus a full guide is available to download at thesenatorgroup.com
