## CROSSOVER

Price List  
2018

A detailed technical line drawing of various mechanical components, including gears, shafts, and structural frames, rendered in white lines on a dark teal background with a fine grid pattern. The components are arranged in a dynamic, overlapping composition that suggests a complex engineering design.

# INNOVATION ENGINEERED

With every Senator design comes a great deal of thought. The design process begins way before pencil reaches paper, beginning with looking at you. We look at how you sit, reach, move and work to create a design which not only looks beautiful, but is a pleasure to use too.

Behind every Senator product is a fusion of intelligent thinking and innovative engineering to create products which support people whether they're focusing, collaborating, presenting or organizing.

Care & Maintenance

# Crossover

Crossover is based around a pair of horizontal beams which provide a robust structure and a continuous fixing method for all furniture elements. Legs, screens, wire management, worksurfaces and accessories can be attached at any point along the beams regardless of desk module.

The Crossover beam system allows adjacent workstations to be linked therefore removing redundant structure. The ability to be able to attach at any point on the beam provides the flexibility to position key furniture elements to suit specific functional and ergonomic requirements. Additionally, by

attaching all structural elements to the beams, the workstation structure can be built with worksurfaces removed; providing easy access when laying power and data cables.

The flexibility designed into the system allows Crossover to provide a comprehensive range of different applications. Crossover can be specified as a simple rectangular desk or configured into multi-linked workstation clusters. From 90° and 120° single piece desks, through rectilinear planning, bench style desking, to wave and double wave applications, Crossover can accommodate a multitude of different applications from a common set of

components and without compromise.

Crossover has been developed to cause the minimum impact on the environment. The product has been designed for a maximum working life and whenever possible reclaimable materials are used. Crossover is up to 100% recyclable at the end of its useful life and is made from 55% recycled materials.

## Care & Maintenance

---

Periodic maintenance is necessary to ensure long term durability and customer satisfaction. All products should be closely inspected each month. If any item shows signs of structural failure it should be taken out of service immediately.

### Fabric

Please follow specific manufacturing guidelines when cleaning fabric. Cleaning with an unapproved solution could damage the fabric.

Neglect is the most common cause of the premature breakdown of any upholstery fabrics. Problems occur as a result of inadequate removal of dirt, dust and grit which settles on the surface of the upholstery. If not removed, the dirt and grit will eventually penetrate the structure of the fabric. With further agitation, the dirt and grit will act like sandpaper wearing away and breaking fibers in the fabric structure. If enough fibers are broken, a hole will eventually form in the upholstery.

### Epoxy powder frames

Clean using a damp cloth with a mild solution of soap and water.

### TFL

TFL tops are very resistant to normal office problems, such as tea or coffee stains. Simply wiping with a soft damp cloth will remove most stains. Should a stubborn problem arise, clean with a soft damp cloth and a mild detergent solution. Do not use abrasive cleaners. Cut back edges should be wiped with a dry cloth only.

pay same upon demand of Seller.

- g) SIC shall be entitled to a general lien on any Goods and other property owned by Buyer in SIC's possession (although the Buyer may have paid for the same in full) in satisfaction of the whole or part as the case may be of the unpaid price of any Goods sold and delivered to Buyer under any contract. In no event shall SIC's liability to Buyer (whether for breach of warranty, breach of contract, negligence, misrepresentation, or otherwise) exceed the cost of the Goods which gave rise to such claim liability. SIC does not accept (and expressly disclaims) any responsibility for electrical work installation which SIC's personnel do not supervise and all electrical installation must be undertaken by Buyer through a competent and qualified licensed electrician.
