2023 Price List and Specifications
Brodart Co. Contract Furniture - Made in USA
280 North Road, Clinton County Industrial Park • McElhattan, PA 17748
Toll-Free: 888-521-1884•E-Mail: furniture@brodart.com • www.brodartfurniture.com

## General Specifications

## TABLETOP FOR WOOD VENEER

Tabletop will be 1 " thick veneered particleboard, with .020 " thick veneer on both faces. Wood veneer tops receive a $1 / 4$ " thick x 1 " W wood (Maple, Oak or Walnut) edge band.

## TABLETOP FOR THERMALLY-FUSED LAMINATE (TFL)

Tabletop will be 1" thick MDF, with .020" thick thermally-fused laminate on both faces. TFL tops receive a PVC edge band which will be flexible polyethylene, 2 mm thick x 1 " W .

TABLETOP FOR HIGH-PRESSURE LAMINATE (HPL)
Tabletop will be 1" thick particleboard, with .035" thick high-pressure laminate surface and .020 thick backing sheet for balanced construction. High-pressure laminate tops receive a PVC edge band which will be flexible polyethylene, 2 mm thick x 1 " W or a $5 / 8$ " thick x 1-1/16"W wood (Maple or Oak) edge band.

## TABLETOP FOR BUTCHER BLOCK

Tabletop will be 1-1/2" thick 5/4 lumber.

## PATH LEGS (METAL)

Legs will be 2" x 2" steel square tubing with a wall thickness not less than 2 mm . Legs are supplied with a standard glide insert. Metal legs attach to table top by means of a flange welded to the leg. Attachment flange will be 3-3/4" x 3-3/4" metal plate formed and welded on two sides to the leg. Each leg attachment flange is attached to the metal apron support frame using four \#8 x 3/4" screws and then attached to the underneath of the tabletop by five \#12 x 3/4" screws. Legs will be finished with electrostatic applied epoxy powder-coat paint.

## BLADE LEGS (METAL)

Legs will be 1" x 3" steel rectangular tubing with a wall thickness not less than 2 mm . Legs are supplied with a standard glide insert. Metal legs attach to table top by means of a flange welded to the leg. Attachment flange will be 3-3/4" x 3-3/4" metal plate formed and welded on two sides to the leg. Each leg attachment flange is attached to the metal apron support frame using four \#8 x 3/4" screws and then attached to the underneath of the tabletop by five \#12 x 3/4" screws. Legs will be finished with electrostatic applied epoxy powder-coat paint.

## APRON SUPPORT FRAME

A metal frame 1"W x 2 " $\mathrm{H} \times 2 \mathrm{~mm}$ thick in various lengths will be attached to underneath of the tabletop using \#12 $\times 3 / 4$ " screws. Each leg attachment flange will be attached to the apron support frame using four \#8 x $3 / 4$ " screws.

with Blade Legs

## The mTable ${ }^{\text {ru }}$ Collection

## General Specifications

## TABLETOP

Tabletop is 1-3/16" thick, 9-ply solid hardwood plywood or 3-ply 45\# density particleboard, with a high-pressure laminate top surface .050 " thick and a backing sheet .020 " thick for balanced construction. Edges are solid Northern-grown Red Oak or maple. Top receives an external solid drop edge Northern-grown Red Oak or maple band $5 / 8$ " x 1-5/8" thick, radiused to form a bullnose.

## APRON (Optional)

A 1-3/4" W x 25/32" Northern-grown Red Oak or maple apron is fitted between the legs and behind the extended tabletop edge band. A $1 / 4$ " styling line, routed into the apron, highlights the tabletop and legs. The bottom edge and both ends of each apron receive a $1 / \mathbf{2}^{\prime \prime}$ radius. Aprons are attached to the table using wood cleats screwed to the underside of the tabletop. Aprons on round tables go straight between the legs.

## LEGS

Legs are 2-3/8" round steel tubing with a wall thickness not less than .64". Legs are finished with electrostatically applied epoxy powder paint. Legs are supplied with a standard glide insert. Lockable caster inserts interchange with the glide insert on any leg. Table legs are attached to the tabletop by means of a flange welded to the leg tube. The attachment flange is $4-5 / 8^{\prime \prime}$ in diameter formed and welded on two sides. The leg flange is attached to the tabletop by six (6) 1/4"-20 $x 1^{\prime \prime}$ bolts engaging $1 / 4$ " internally and externally threaded bushings embedded in the underside of the tabletop.

## CASTERS (Optional)

When specified, a three-inch black nylon hooded twin-wheel caster with a brake is supplied. Lockable caster inserts interchange with the glide insert on any leg. Add one caster per table leg (sold each).

## TABLETOP SUPPORT

For maximum rigidity, rectangular tables 60 " wide or more receive a V-shaped, 14-gauge steel keel securely fastened to the underside of the tabletop. Tables 48"D and more than 60"W, receive two steel keels parallel to the length of the table. Tables 90 " or wider receive two extra legs located under the center of the table to provide added support.

## Optional Wood Apron for Reading Tables

Note: A 1-3/4" W x 25/32" Northern-grown Red Oak or maple apron is fitted between the legs and behind the extended tabletop edge band. A $1 / 4^{\prime \prime}$ styling line, routed into the apron, highlights the tabletop and legs. The bottom edge and both ends of each apron receive a $1 / 2^{\prime \prime}$ radius. Aprons are attached to the table using wood cleats screwed to the underside of the tabletop. Aprons on round tables go straight between the legs.

Please specify Wood Finish (Table 1). Details can be found on page GEN 4.

## General Specifications

## TABLETOPS

Tabletop is 1-3/16" thick, 3-ply 45\# density particle board, with a high-pressure laminate top surface .050 " thick and a backing sheet .020" thick for balanced construction. Edges are solid Northern-grown Red Oak or maple. Top receives an external solid drop edge Northerngrown Red Oak or maple band 5/8" x 1-5/8" thick, radiused to form a bullnose.
Note: Standing Height Tables are Apron construction.

## TABLE SUPPORT

For maximum rigidity, rectangular tables 60 " or more wide receive a V-shaped, 14-gauge steel keel securely fastened to the underside of the tabletop. Tables 48"D and more than 60"W, receive two steel keels parallel to the length of the table. Tables 72" or wider receive two extra legs located under the center of the table to provide added support.

## LEGS

Legs are 2-3/8" round steel tubing with a wall thickness not less than .64". Legs are finished with electrostatically applied epoxy-powder paint. Legs are supplied with a standard glide insert. Lockable caster inserts interchange with the glide insert on any leg. Table legs are attached to the tabletop by means of a flange welded to the leg tube. The attachment flange is $4-5 / 8^{\prime \prime}$ in diameter formed and welded on two sides. The leg flange is attached to the tabletop by six (6) 1/4" - 20 $x 1^{\prime \prime}$ bolts engaging $1 / 4$ " internally and externally threaded bushings embedded in the underside of the tabletop.

## CASTER (OPTIONAL)

When specified, a three-inch black nylon hooded twin-wheel caster with a brake is supplied. Lockable caster inserts interchange with the glide insert on any leg. Add one caster per table leg (sold each).

## PRIVACY PANEL

Privacy panels are 10 " H , constructed of 1" thick, 3-ply veneered particleboard. Exposed edges are banded with 1.6 mm oak or maple edge bands. The privacy panel attaches securely to the tabletop by screws passing through the tabletop and into the privacy panels. The privacy panel is finished to match the table and designed to obscure wires exiting computer equipment, to eliminate incidental tampering and create defined patron space.
Note: 72"W and 90"W tables with privacy panels have additional legs for added support.

## APRON (OPTIONAL)

A 1-3/4"W x 25/32" solid Northern-grown Red Oak or maple apron is fitted between the legs and behind the extended tabletop edge band. A $1 / 4$ " styling line, routed into the apron, highlights the tabletop and legs. The bottom edge and both ends of each apron receive a $1 / \mathbf{2}^{\prime \prime}$ radius. Aprons are attached to the table using wood cleats screwed to the underside of the tabletop. Aprons on round tables go straight between the legs.

## ELECTRICAL

Each position on a Computer Table receives one 3" diameter grommet for wire passage and J-channel wire manager to hold excess wires. Grommets are ABS black plastic with notched removable cap. J -channel is 18 -guage steel with electro-statically applied black powder paint and is mounted to the underside of the tabletop.

## General Specifications

## TABLETOP

Tabletop will be 1-3/16" thick, 3-ply 45\# density particleboard, with .050 " thick high-pressure or whiteboard laminate surface and .020" thick backing sheet for balanced construction. Tops will receive a PVC edgeband, 2 mm thick x 1-3/16" wide.

## LEGS (METAL)

Legs will be 2-3/8" round steel tubing with a wall thickness not less than .64". Legs are supplied with a standard glide insert. Lockable caster inserts interchange with the glide insert on any leg. Table legs will be attached to the tabletop by means of a flange welded to the leg tube. The attachment flange will be 4-5/8" in diameter formed and welded on two sides. The leg flange is attached to the tabletop by six (6) $1 / 4$ "-20 x $1^{\prime \prime}$ bolts engaging $1 / 4$ " internal and external threaded bushings embedded in the underside of the tabletop. Legs will be finished with electrostatic applied epoxy powder-coat paint.

## CASTER

When specified, a 2-1/4" black nylon hooded twin-wheel caster with a brake is supplied. Lockable caster inserts interchange with the glide insert on any leg. Add one caster per table leg (sold each).

| MT-CASTER | Metal Leg Caster | \$34 |
|  | $2-1 / 4 "$ black nylon hooded twin-wheel caster with a brake. Add one caster per table leg (sold each). |  |

Note: Edgeband Color does NOT have to match Laminate Color

## General Specifications

## TABLETOP

Tabletop will be 1-3/16" thick, 3-ply 45\# density particleboard, with .050" thick high-pressure or whiteboard laminate surface and .020" thick backing sheet for balanced construction. Tops will receive a PVC edgeband, 2 mm thick x 1-3/16" wide.

## LEGS (W0OD)

Legs are 2-1/2" round solid Northern-grown red oak. Bottom edges of legs are radiused $1 / 8 "$. Each leg has a 2 " diameter, adjustable glide mounted in a recessed tee-nut. The glide is further recessed into the leg by means of a counter-sunk boring which accepts the upper two-thirds of the glide. Legs attach to tabletops by means of a 5 " square $\times 5 / 16$ " thick steel plate. The plate is attached to the leg by a $5 / 16^{\prime \prime} \times 2-1 / 2^{\prime \prime}$ machine bolt engaging a $5 / 8^{\prime \prime}$ diameter barrel nut inserted into the leg. The steel plate is attached to the tabletop by five $5 / 16^{\prime \prime} \times 1^{\prime \prime}$ machine bolts engaging internally and externally threaded bushings in the underside of the tabletop.

## CASTER (FOR WOOD LEG)

When specified, a 3" black nylon hooded twin-wheel caster with a brake is supplied. Add one caster per table leg (sold each).

Legs will be 2-3/8" round steel tubing with a wall thickness not less than .64". Legs are supplied with a standard glide insert. Lockable caster inserts interchange with the glide insert on any leg. Table legs will be attached to the tabletop by means of a flange welded to the leg tube. The attachment flange will be $4-5 / 8$ " in diameter formed and welded on two sides. The leg flange is attached to the tabletop by six (6) $1 / 4$ "-20 x $1^{\prime \prime}$ bolts engaging $1 / 4$ " internal and external threaded bushings embedded in the underside of the tabletop. Legs will be finished with electrostatic applied epoxy powder-coat paint.

CASTER (FOR METAL LEG)
When specified, a 2-1/4" black nylon hooded twin-wheel caster with a brake is supplied. Lockable caster inserts interchange with the glide insert on any leg. Add one caster per table leg (sold each).

Note: Tables come equipped with two lockable casters, additional casters (below) can be ordered for other legs.

## General Specifications

## CHAIR FRAME

The chair frame is constructed of 16-gauge steel tubing. All joints are mig welded. The front and back legs are 1-3/4" diameter, and the side and front stretchers are 1-1/2" x 3/4" rectangular tubing. The framing includes four metal brackets attached to the seat. The legs are equipped with rubber-cushioned glides.

## CHAIR SEAT

Chair seats are $5 / 8^{\prime \prime}$ thick bent multi-ply faced with maple or rift-cutt red oak as specified.

## UPHOLSTERED SEAT

Upholstered seats receive 1-1/2" thick HR-55, 2.8 density 55 ILD foam prior to being covered by a selected upholstery material that is wrapped around and stapled to the underside of the seat panel.

## WOOD CHAIR BACKS

Chair backs are $5 / 8$ " thick, bent multi-ply faced with maple or rift-cut red oak as specified. Backs are 8"H x 15-1/2"W.

## UPHOLSTERED CHAIR BACKS

Upholstered chair backs have a back platen of curved plywood and receive 1" thick 1835 FR, 1.8 density, 35 ILD foam prior to being covered by a selected upholstery material that is wrapped around and stapled to the back of the platen. This upholstered back platen is then screwed to the wood back from the rear support.

UPHOLSTERY MATERIALS AND FABRICS
Brodart fabric selections and polyurethane foam are fire rated.
Fabrics which meet Calif. Technical Bulletin \#133 are available.

## GLIDES

Each chair leg is equipped with a $7 / 8^{\prime \prime}$ diameter rubber-cushioned glide.

## General Specifications

## CHAIR FRAMES

Each frame member is constructed from 1-1/4" hardwood. All frame joints are mortised, tenoned and glued. Legs, back posts, and stretchers are 1" x 2-3/16"W. Upper side rail is 1" $x$ 3"W; lower side rail is $1^{\prime \prime} \times 2-3 / 16 " W$. Front and back top rails are $1^{\prime \prime} \times 2-1 / 2^{\prime \prime}$ shaped to receive seat. Tops of front and rear vertical post in side frames have a $3 / 4$ " radius, and the bottom of each leg receives a $3 / 4$ " radius. Front and back legs are coped with a $7 / 8$ " radius on the two outside edges. The top of the side seat rails, the top of the side stretchers and the top of the cross stretchers are also coped with a $7 / 8^{\prime \prime}$ radius.

All frames have a 3/4" solid hardwood support brace in each corner of the seat area to give added strength.

## CHAIR SEAT

Standard adult wood seats are 3/4" thick, bent-plywood panel, faced with select hardwood veneers. Standard youth and juvenile wood seats are 1/2" thick bent plywood panel, faced with select hardwood veneers.
Note: Optional 3/4" thick, hardwood seats, (available at extra charge), are constructed of glued-up strips not less than 1" or more than 3"W. Seat panels are scooped for seating comfort.

Upholstered seats are constructed of 1/2" formed plywood. The plywood is covered with 2 " thick foam prior to being covered by a selected upholstery material which is wrapped around and stapled to the underside of seat. The underside of the seat is covered with black cambric material.

## CHAIR BACK

Chair back is 1" x 5" (youth \& juvenile) or 6" H (adult) steam-bent, solid hardwood, screwed into vertical back posts on an 8û angle using four 2" joint connector bolts. Upholstered backs have a back platen which is curved plywood; prior to upholstery two tee-nuts are inserted into the platen. The platen is covered with 1" foam padding and upholstered with all edges wrapped and stapled to the back side of the platen. Upholstered platens are attached to the chair back by two machine bolts which pass through the solid chair back into the tee-nuts in the platen.

## UPHOLSTERY MATERIALS AND FABRICS

Brodart fabric selections and polyurethane foam are fire rated.

Fabrics which meet Calif. Technical Bulletin \#133 are available.

GLIDES
Leg base chairs are equipped with rubber-cushioned glides.

## SLED BASE CHAIRS

Sled base chairs are of the same construction as leg base chairs but receive two 1" x 2-3/16" rails tenoned and glued to the bottom of leg post to form a sled base. Sled base chairs do not receive glides.

Fabric Requirements: Seat 1/2 yards per chair, Non-directional, 54" wide.

## General Specifications

## Calyx Chair

## FRAME

The chair frame is constructed of $5 / 8^{\prime \prime}$ diameter, 13 -gauge steel tubing with reinforcing rods inside the bends. Frames are BIFMA tested. Frames will have a bright chrome surface finish or can be finished with electrostatic applied epoxy powder-coat paint. The legs are equipped with heavy-duty nylon glides.

## SHELL

Shells are 9-ply Beech or Birch heat induction pressed plywood. Shell dimensions are 16"W x 17"D x 15"H x 1/2" thick. Available in two surface materials: HP Laminate and Veneer.

## GLIDES

Each chair leg is equipped with a $5 / 8$ " diameter heavy-duty nylon glide that fits inside chair leg.

Note: Calyx chairs are stackable up to 5 high.

## Calyx Counter Height Stool

## FRAME

The stool frame is constructed of $5 / 8$ " diameter, 13 -gauge steel tubing with reinforcing rods inside the bends. Frames are BIFMA tested. Frames will have a bright chrome surface finish or can be finished with electrostatic applied epoxy powder-coat paint. The legs are equipped with heavy-duty nylon glides.

## SHELL

Shells are 9-ply Beech or Birch heat induction pressed plywood. Shell dimensions are 16 "W x 17"D x 15" $\mathrm{H} \times 1 / 2$ " thick. Available in two surface materials: HP Laminate and Veneer.

GLIDES
Each stool leg is equipped with a $5 / 8^{\prime \prime}$ diameter heavy-duty nylon glide that fits inside stool leg.

## Calyx Bar Height Stool

## FRAME

The stool frame is constructed of $1 / \mathbf{2}^{\prime \prime}$ diameter steel rod. Frames are BIFMA tested. Frames will have a bright chrome surface finish or can be finished with electrostatic applied epoxy powder-coat paint. The sled base frames are equipped with heavy-duty nylon glides.

## SHELL

Shells are 9-ply Beech or Birch heat induction pressed plywood. Shell dimensions are 16 " $\mathrm{W} \times 17$ " $\mathrm{D} \times 15$ " $\mathrm{H} \times 1 / 2$ " thick. Available in two surface materials: HP Laminate and Veneer.

GLIDES
Stool frames are equipped with external heavy-duty nylon glides that fit onto the sled base frame.

## General Specifications

## SHELL

Shells are 9-ply Beech or Birch heat induction pressed 1/2" thick plywood. Shell dimensions are 16 "W x 17"D x 15"H x 1/2" thick. Available in two surface materials: HP Laminate and Veneer. Two options for mechanism - swivel or swivel tilt.

FIVE STAR BASE
Black nylon, five star. Pneumatic height adjustment, 5 " range. Casters suitable for carpet or hard surfaces.

## General Specifications

## CHAIR FRAME

Front legs are $1-1 / \mathbf{2}^{\prime \prime}$ square at the top tapering to $1-3 / 8$ " square at the bottom. The back legs are $1-1 / 4^{\prime \prime} \times 1$ " at the top tapering to $1-3 / 4$ " $\times 1$ " at the bottom. All vertical and horizontal edges are eased. Lower support stretcher brackets are positioned between the front and back legs and measure 1" x 3/4"; upper stretcher support brackets are located between the front legs and between the back legs and also measure $1 \times 3 / 4$ ". Seat rails are $2-1 / 4^{\prime \prime} \times 3 / 4$ ". All joints are mortised, tenoned, and glued.

## ALL WOOD CHAIR SEAT

The chair seat is $1^{\prime \prime}$ thick solid wood, constructed of glued-up strips not less than $\mathbf{1 "}^{\prime \prime}$ or more than $3^{\prime \prime} \mathrm{W}$. Seat panels are scooped for seating comfort.

## CHAIR BACK

The chair back consists of a horizontal top and bottom rail, and four vertical slats positioned between the rails. The top horizontal rail is $3-1 / 4$ " $\times 3 / 4$ " at the center tapering to $2-1 / 4^{\prime \prime} \times 3 / 4$ " at each end. The bottom vertical rail is positioned $1-1 / 4$ " above the seat and measures $1-1 / 2^{\prime \prime} \times 3 / 4$ " at the center tapering to $2-1 / 4$ " $\times 3 / 4$ ". The four vertical slats are positioned 1-5/8" apart and measure $1-1 / 2^{\prime \prime} \times 3 / 8^{\prime \prime}$. The horizontal rails are mortised, tenoned, and glued into the back leg posts. The vertical slats are mortised, tenoned, and glued into the horizontal rails.

## General Specifications

## CHAIR FRAMES

Each frame member is constructed from 1-1/4" hardwood. All frame joints are mortised, tenoned, and glued. Legs, back posts, and stretchers are $1^{\prime \prime}$ x 2-3/16"W. Upper side rail is $1^{\prime \prime}$ x 3 "W; lower side rail is 1 " $\times 2-3 / 16 " W$. Front and back top rails are 1" x 2-1/2" shaped to receive seat. The vertical back rails are dog legged for comfort. Tops of front and rear vertical post in side frames have a $3 / 4$ " radius, and the bottom of each leg receives a $3 / 4$ " radius. Front and back legs are coped with a $7 / 8$ " radius on the two outside edges only. The top of the side seat rails, the top of the side stretchers and the top of the cross stretchers are also be coped with a $7 / 8$ " radius.

All frames have a 3/4" solid hardwood support brace in each corner of the seat area to give added strength. All seats are fastened with six "Z" brackets routed into the front and back rail and screwed into the bottom of the seat.

## CHAIR SEAT

Standard wood seats are $1 / 2^{\prime \prime}$ (adult) or $3 / 4$ " (adult extra wide) thick, bent-plywood seat panel faced with select hardwood veneers.
Note: Optional 3/4" thick, hardwood seats, (available at extra charge), are constructed of glued-up strips not less than 1 " or more than $3 " W$. Seat panels are scooped for seating comfort.

Upholstered seats are constructed of $1 / 2^{\prime \prime}$ formed plywood. The plywood is covered with 2 " thick foam prior to being covered by a selected upholstery material which is wrapped around and stapled to the underside of seat. The underside of the seat is covered with a black cambric material.

## CHAIR BACK

All wood chair backs are 1" x 5 " (adult) or 6" (adult extra wide) steam-bent, solid hardwood, screwed into vertical back posts on a $16^{\circ}$ angle. The $5^{\prime \prime}$ back receives a $1 / 4^{\prime \prime}$ horizontal-design route at the center, creating an appearance of two 2-3/8" slats. The 6 " back receives two 1/4" horizontal-design routes positioned to create the appearance of three 1-13/16" slats. Upholstered backs are a full wrap-around, upholstered, $3 / 4$ " steam-bent solid-wood panel with an 8 " H crown. The back is attached to the chair with four machine screws which pass through the chair back posts.

## UPHOLSTERY MATERIALS AND FABRICS

Brodart fabric selections and polyurethane foam are fire rated.
Fabrics which meet Calif. Technical Bulletin \#133 are available.

## GLIDES

Leg base chairs are equipped with rubber-cushioned glides.

## SLED BASE CHAIRS

Sled base chairs are of the same construction as leg base chairs but receive two 1" x 2-3/16" rails tenoned and glued to the bottom of leg post to form a sled base. Sled base chairs do not receive glides.

[^2]
## General Specifications

## CHAIR FRAME

Chair frame is 36 " overall height and $18-1 / 2^{\prime \prime}$ overall width. Front legs are $1-5 / 8$ " square at the top tapering to $1-3 / 8^{\prime \prime}$ square at the bottom. The back post is bent from selected hardwood and finished to a thickness of 1-1/4" and is routed to a proper depth to accept the seat and seat apron to ensure that the vertical sitting load is supported by these horizontal routes. The back top rail is $3-1 / 2^{\prime \prime}$ overall height and 1 " thick, and is bent to a radius of 18".

## BACK FRAME

The top back rail is double doweled to the vertical back posts and reinforced with \#10 x 1-1/4" wood screws. The Essex version with the accent hole gets a 2-1/4" diameter hole positioned on the centerline of top back rail.

On the Essex chair there are five vertical back slats, which are 1-1/2"W $x 5 / 8 "$ thick. The back slats are tenoned the glued into the top rail and bottom rail of the back frame. These slats are equally spaced.

The seat apron is bent from selected hardwood, finished to $7 / 8^{\prime \prime}$ thick by $1-5 / 8$ " W and is tenoned and glued to both the front legs and back posts. Side stretchers and cross stretchers are 1"W x 3/4" thick. All joinery is mortised, tenoned, and glued. The cross stretchers at the connecting joint are reinforced with steel pin.

## CHAIR SEAT - UPHOLSTERED

The upholstered chair seat panel is 3/4" thick, curved 5-ply plywood. The seat receives 2 " thick, HR-55 high-resilient polyurethane foam glued to the top surface of the seat panel, then upholstered. Cambric material is applied to the bottom of the seat panel. The seat rim rests on a horizontal notch in the back post and is attached to the frame by 11 wood screws that are screwed up through the seat apron into the bottom of the seat.

## CHAIR SEAT - WOOD

The all-wood seat is 1-1/4" thick, made from random width boards between 1" and 4"W, and scooped for seating comfort. The seat rim rests on a horizontal notch in the back post and is attached to the frame by 11 wood screws that are screwed up through the seat apron into the bottom of the seat.

CHAIR GLIDES
Chairs are equipped with 7/8" diameter nylon glides.
UPHOLSTERY MATERIALS AND FABRICS
Brodart fabric selections and polyurethane foam are fire rated.

Fabrics that meet Calif. Technical Bulletin \#133 are available.

## General Specifications

## CHAIR FRAME

Front legs are $1-3 / 4$ " square at the top tapering to $1-1 / 4$ " square at the bottom and radiused on the front outside frame corner. The back post is $1-1 / 2^{\prime \prime} \times 1^{\prime \prime}$ at the top opening to $2-1 / 4^{\prime \prime} \times 1^{\prime \prime}$ at the widest point, just below the seat platen and tapering to $1-5 / 8^{\prime \prime} \times 1$ " at the bottom. All vertical and horizontal edges are eased. The top of the back post receives a radius on the front and outside edges to match the radius of the top back rail.

Two lower support stretchers are positioned between the front and back legs and measure 1" x 3/4"; upper stretcher supports are located between the front legs and between the back legs and also measure $1^{\prime \prime} \times 3 / 4^{\prime \prime}$. Seat rails are $2-1 / 4^{\prime \prime} \times 3 / 4^{\prime \prime}$. All joints are mortised, tenoned, and glued.

CHAIR SEAT- WOOD
The chair seat is $1^{\prime \prime}$ thick solid wood, constructed of glued-up strips not less than 1 " or more than 3 "W. Seat panels are scooped for seating comfort.

## CHAIR SEAT- UPHOLSTERED

The chair seat is $1 / 2$ " thick plywood with the front corners receiving a 1-1/2" radius and 1-1/2" thick, 1850 FR Density polyurethane foam. The standard fabric is Brodart's grade one. Brodart's fabric selections and polyurethane foam are fire rated.

Fabrics which meet Calif. Technical Bulletin \#133 are available.

## CHAIR BACK

The chair back consists of a horizontal top and bottom rail and five vertical slats positioned between the rails. The top horizontal rail is $4^{4 \prime} \times 3 / 4$ ". The bottom horizontal rail measures $3-1 / 2^{\prime \prime} \times 3 / 4$ ". The five vertical slats are positioned 1-1/4" apart and measure 1-1/8" x 1/2". The horizontal rails are mortised, tenoned, and glued into the back leg posts. The vertical slats are mortised, tenoned, and glued into the horizontal rails.

## CHAIR ARMS

Arm is $2-3 / 8^{\prime \prime} \times 1^{\prime \prime}$ at the front tapering to $1-1 / 4^{\prime \prime} \times 1$ " at the back. The arm is attached $2^{\prime \prime}$ back from the front of the arm to a $J$-shaped vertical arm support that is $1-1 / 4^{\prime \prime} \times 1^{\prime \prime}$ at the top, expanding to $1-5 / 8^{\prime \prime} \times 1^{\prime \prime}$ at its connection point with the side seat rail. Vertical arm support is attached to the side seat rail with a wood lag bolt \& fastened with a washer and nut. The arm is attached to the back post 7-1/2" above the seat platen with a wood screw. Screw head is counter-sunk and capped with a wooden cover.

## CHAIR GLIDES

Each chair leg is equipped with a $7 / 8$ " diameter rubber cushioned nail glide.

This chair has passed the ANSI/BIFMA X5.1-2002 Type III test.

Fabric Requirements: 1/2 yards per chair, Non-directional, 54" wide.

[^3]
## General Specifications

## CHAIR FRAME

Each frame member is constructed from 1-1/4" hardwoods. All frame joints are mortised, tenoned and glued. All frames have a 3/4" solid hardwood support brace in each corner to give the chair added strength. All seats are fastened with six "Z" brackets routed into the frame and screwed into the bottom of the seat.

## CHAIR SEAT

Chair seats are 1/2" thick bent multi-ply faced with select hardwood veneers.

## UPHOLSTERED SEAT

Upholstered seats receive 1-1/2" thick HR-55, 2.8 density 55 ILD foam prior to being covered by a selected upholstery material that is wrapped around and stapled to the underside of the seat panel.

## UPHOLSTERED CHAIR BACKS

Upholstered chair backs have a back platen of curved plywood and receive $1 / \mathbf{2}^{\prime \prime}$ thick 1835 FR, 1.8 density, 35 ILD foam prior to being covered by a selected upholstery material that is wrapped around and stapled to the back of the platen. This upholstered back platen is screwed to the wood back from the rear support.

## UPHOLSTERY MATERIALS AND FABRICS

Brodart fabric selections and polyurethane foam are fire rated.
Fabrics that meet Calif. Technical Bulletin \#133 are available.

## GLIDES

Each chair leg is equipped with a 7/8" diameter rubber-cushioned glide.

## WOOD CHAIR BACKS

Chair backs are $5 / 8$ " thick bent multi-ply faced with select hardwood veneers. Adult backs are 6-1/2"H x 20-1/4"W. Youth backs are 5-7/8"H x 17-3/8"W.

Please specify Wood Finish (Table 1) and Upholstery; if applicable (Table 5). Details can be found on pages GEN 4 and GEN 5.

## General Specifications

## CHAIR FRAMES

The chair frame is constructed of straight-grained hardwood. The back posts are cut into a unique curved shape design. The back is curved plywood 3/8" thick.

WOOD CHAIR SEAT
The wood chair seat is hardwood veneer, curved plywood 1/2" thick.

## UPHOLSTERED CHAIR SEAT

The upholstered seat uses a 1/2" thick platen with 1-1/2" thick high-resilient polyurethane foam and fabric as selected.

## UPHOLSTERY MATERIALS AND FABRICS

Brodart fabric selections and polyurethane foam are fire rated.
Fabrics which meet Calif. Technical Bulletin \#133 are available.

Fabric Requirements: 1/2 yard per chair, Non-directional, 54" wide.

## General Specifications

## CHAIR FRAME

Chair frame is 36 " overall height and 18-1/2" overall width. Front legs are $1-5 / 8$ " square at the top tapering to $1-3 / 8$ " square at the bottom. The back post is bent from selected hardwood and finished to a thickness of 1-1/4" and is routed to a proper depth to accept the seat and seat apron to ensure that the vertical sitting load is supported by these horizontal routes. The back top rail is 3-1/2" overall height and 1 " thick, and is bent to a radius of 18 ".

The Parallax chair is available with or without an accent hole in the back frame top rail, and with a wood seat or an upholstered seat.

## BACK FRAME

The top back rail is double doweled to the vertical back posts and reinforced with \#10 x 1-1/4" wood screws. The Parallax version with the accent hole gets a 2-1/4" diameter hole positioned on the centerline of the top back rail.

On the Parallax chair there are five horizontal back slats, which are $1-1 / 2$ "W x $5 / 8$ " thick. The back slats are tenoned and glued into the side rails of the back frame. These slats are equally spaced.

The seat apron is bent from selected hardwood, finished to 7/8" thick by 1-5/8"W and is tenoned and glued to both the front legs and back posts. Side stretchers and cross stretchers are 1"W x 3/4" thick. All joinery is mortised, tenoned, and glued. The cross stretchers at the connecting joint are reinforced with a steel pin.

## CHAIR SEAT (UPHOLSTERED)

The upholstered chair seat panel is 3/4" thick 5-ply plywood. The seat receives a 2 " thick, HR-55 high-resilient polyurethane foam glued to the top surface of the seat panel, then upholstered. Cambric material is applied to the bottom of the seat panel. The seat rim rests on a horizontal notch in the back post and is attached to the frame by 11 wood screws that are screwed up through the seat apron into the bottom of the seat.

CHAIR SEAT (WOOD)
The all wood seat is 1-1/4" thick, made from random width boards between 1" and 4"W, and scooped for seating comfort. The seat rim rests on a horizontal notch in the back post and is attached to the frame by 11 wood screws that are screwed up through the seat apron into the bottom of the seat.

## GLIDES

Chairs are equipped with 7/8" diameter nylon glides.

## UPHOLSTERY MATERIALS AND FABRICS

Brodart fabric selections and polyurethane foam are fire rated.

Fabrics which meet Calif. Technical Bulletin \#133 are available.

## General Specifications

## CHAIR FRAME/LEGS

Chair frames are constructed of $7 / 8^{\prime \prime}$ diameter steel tubing. Cross frames are constructed of 1/2" diameter steel tubing. Front and Rear Cross frames will be bent to follow the seat profile. Frames to be finished with electrostatic applied epoxy powder-coat paint available in a wide range of colors. Legs are equipped with heavy-duty black ABS glide inserts.

## CHAIR SEAT

Chair seats are constructed of $1 / 2^{\prime \prime}$ thick molded plywood, faced with Maple, Oak or Walnut veneers. Chair seats measure 16-1/2"W at the front and taper back to 14 " $\mathrm{W} \times 18-1 / 4$ "D.

CHAIR BACK
Chair backs are constructed of $1 / 2^{\prime \prime}$ thick molded plywood, faced with Maple, Oak or Walnut veneers. Chair backs measure 17-3/4"W x 10-1/4"H.

## CHAIR ARMS

Chair arms are constructed of $5 / 8$ " thick molded plywood, faced with Maple, Oak or Walnut veneers.

## CHAIR GLIDES

Chairs are equipped with $2-3 / 8$ " $\mathrm{H} \times 7 / 8$ " diameter nylon glides.

## NOTES:

Chairs stack four high.
Chairs pass all ANSI / Bifma tests.

## General Specifications

## CHAIR FRAME

Each frame member is constructed from solid hardwood. All frame joints are mortised and tenoned. Horizontal front and back seat rails are 1 " thick x $2-1 / 2^{2 " W}$. The two bottom horizontal cross stretcher rails are $1^{\prime \prime}$ thick $x 1-1 / 4$ "W. On the end frames, the front post is $1^{\prime \prime}$ thick $x$ $2-3 / 16$ " W , the two back posts are 1 " thick $\times 2-3 / 8$ " W , the top side seat rail are 1 " thick x 3 "W and the two bottom side rails are 2-3/16"W x 1" thick. The end frame is $18-1 / 8^{\prime \prime} \mathrm{W}$ at seat level and $24-5 / 8^{\prime \prime} \mathrm{W}$ at floor level.

Four corner blocks of solid wood are glued and triple screwed to the end frames and the upper seat horizontal cross members the seats are attached with six metal "Z" brackets.

The bottom of the end frame is shaped so that the chair may sit level or be tilted back at a $10^{\circ}$ angle.

## CHAIR SEAT - WOOD

Wood seat is $3 / 4$ " thick, bent-plywood seat panel faced with select hardwood veneer.

## CHAIR SEAT - UPHOLSTERED

Upholstered seat is constructed of formed 1/2" plywood and fitted with 1-1/2" thick foam prior to being covered with the selected upholstery material, which is wrapped around and stapled to the underside of the seat. The underside of the seat is covered with a black cambric material.

## CHAIR BACK - WOOD

Chair back is 1 " thick x 6 " H steam bent solid hardwood in an arched design. Back is attached to vertical back posts at an $8^{\circ}$ angle using four 2 " joint connector bolts that pass through the vertical back posts.

## CHAIR BACK - UPHOLSTERED

Upholstered Chair back is 3/4" steam-bent solid hardwood in an arched design. Back panel is fully wrapped with 1" thick foam prior to being covered by selected upholstery material. Back is attached to vertical back posts at an $8^{\circ}$ angle using four $2^{\prime \prime}$ joint connector bolts that pass through the vertical back posts.

## UPHOLSTERY MATERIALS AND FABRICS

Brodart fabric selections and polyurethane foam are fire rated.
Fabrics which meet Calif. Technical Bulletin \#133 are available.

Fabric Requirements: 1/2 yard per chair, Non-directional, 54" wide.

## Lounge Furniture

## General Specifications

## FRAME

End frame assemblies are constructed of 1" x 3"W solid red oak with outside edges bullnosed. All pieces are mortised, tenoned, and glued to form a solid frame. Leg type or sled type is available.

The front facing of 1" x 3-1/2"W solid oak and the back rail of 1" x 3-1/2" solid oak are mortised, tenoned and glued into the end frame assemblies. Solid hardwood corner blocks are positioned under the cushion frame and screwed to the end frame and the front and back rails.

UPHOLSTERED SEAT/BACK PANEL
The seat and back frame are a single piece of $3 / 4$ " bent plywood. The seat portion is fitted with a Dimatrol Webbing and then covered with black cambric fabric for comfort. This is then covered with 3-1/2" thick foam, which is also used on the chair back. The foam is mitered at the jointure of both the seat and back. The entire seat and back assembly is covered with the specified upholstery fabric, except for the underside of the seat which is covered with black cambric fabric.

Brodart upholstery materials meet requirements of the following fire codes: Calif. Technical Bulletin \#117 (Sec. E part 1); CS-191-53 class 1.

Fabrics which meet Calif. Technical Bulletin \#133 are available.
L1 - Seating has passed the American National Standards Test X5.41983 (ANSI).

## GLIDES

Each end frame assembly receive two 1" diameter rubber-cushioned glides.

## BENCH - FRAME

End frame assemblies are constructed of 1" $\times 3$ "W or 5"W solid oak, with all edges heavily eased. Facing rails are 1" x 3"W solid oak. Bench seats are attached to end frame assemblies by bolting through solid hardwood bolting blocks into internally and externally threaded brass bushings embedded into end frames.

LOUNGE TABLES - FRAME
See L1 Series Bench Frame Construction.

## TABLETOP

Tabletop is 3 -ply construction consisting of $3 / 4$ " thick particleboard core and 3 " wood facings, with a .50 " thick, high-pressure laminate top sheet and a backing sheet not less than $\mathbf{. 2 0 "}$ thick for balanced construction. High-pressure laminate has a lo-glare finish resistent to scratches, fading, and staining.

Please specify Wood Finish (Table 1) and Upholstery; if applicable (Table 5). Details can be found on pages GEN 4 and GEN 5.

## General Specifications

## BRODART'S CONNECTING MODULAR LOUNGE SYSTEM

Lounge chairs are supplied either with arms on the left side only or the right side only as well as without arms. Individual chairs may be held in position with heavy-duty steel brackets which are provided with each chair.

## FRAME

End frame assemblies will be constructed of 1 " $\times 3$ " wide solid $r$ ed oak with outside edges bullnosed. All pieces will be mortised, tenoned, and glued to form a solid frame. Leg type and sled type available.

The front facing of 1" x 3-1/2" wide solid oak and the back rail of 1" x 3-1/2" solid oak will be mortised, tenoned and glued into the end frame assemblies. Solid hardwood corner blocks will be positioned under the cushion frame and screwed to the end frame and the front and back rails.

## UPHOLSTERED SEAT/BACK PANEL

The seat and back frame are a single piece of $3 / 4$ " bent plywood. The seat portion is fitted with a Flex-0-Lator perma mesh system and then covered with black cambric fabric for comfort. This is then covered with $3-1 / 2^{\prime \prime}$ thick foam, which is also used on the chair back. The foam is mitered at the jointure of both the seat and back. The entire seat and back assembly is covered with the specified upholstery fabric, except for the underside of the seat which is covered with black cambric fabric.

Brodart upholstery materials meet requirements of the following fire codes: Calif. Technical Bulletin \#117 (Sec. E part 1); CS-191-53 class 1.

Fabrics which meet Calif. Technical Bulletin \#133 are available.

## GLIDES

Each end frame will receive two adjustable nickel/chrome floor glides.

## TABLETOPS

Tabletop will be 1-1/4" thick, particleboard core with solid-wood edges, surfaced with .050 high-pressure laminate and backed with .020 phenolic sheeting. Tops is 14 " high.

The Top rests on the top edge of the adjoining end frames and is held securely in place with heavy-duty steel brackets, mechanically fastened to the underside of the top.

## General Specifications

## END FRAME ASSEMBLY

End frames are 24-1/4"H x 26-5/8"D x 2-1/2" thick skeletal type construction. The arm is 24-1/4" high at the front and arches down with a 71 " radius to $20-3 / 4$ " high at the rear of the arm. The arm assembly receives a 1/4" polyurethane 1240 FR density foam wrap and is fully upholstered. When specified only, the end frame assembly will receive a 1" thick solid wood top cap of either red oak or maple as specified. The wood cap is $3-3 / 8$ " wide. The arm assembly on the bottom surface will receive two-nickel chrome plated nail glides.

## UPHOLSTERED SEAT AND BACK

The seat and back frame are a single piece of $3 / 4$ " bent-plywood. The seat portion is fitted with a Dimatrol Webbing and then covered with black cambric fabric for comfort. This is then covered with 3-1/2" thick foam, which is also used on the chair back. The entire seat and back assembly are covered with the specified upholstery fabric except for the underside of the seat which is covered with a black cambric fabric.

Brodart upholstery materials meet requirements of the following fire codes: Calif. Technical Bulletin \#117 (sec. E part 1); CS-191-53 class 1.

Fabrics which meet Calif. Technical Bulletin \#133 are available.
Seat height at front - 17"
Arm height - 24-9/32."

## SEAT TO ARM STRETCHER RAIL

The front rail is $24-3 / 4$ " long $x$ 3-1/2" wide and wrapped with the same $1 / 4$ " foam as the ends and upholstery. The seat support rail is $24-3 / 4^{\prime \prime}$ long $x 3-1 / 2^{\prime \prime}$ wide and is not upholstered. The rear rail is $24-3 / 4$ " long $x 11-7 / 8$ " wide and is wrapped with the same $1 / 4$ " foam as the ends, and is upholstered. All rails are bolted with 1/4"- 20 bolts through metal brackets into metal bushings inserted in the arm assemblies.

## General Specifications

## END FRAME ASSEMBLY

End frames are constructed of legs that are 1" thick x 3"W, a bottom stretcher rail 1" thick x 2-1/4"W and a top arm rail 2-1/2"W x 1" thick that is arched to match the radius of the arm. All parts are constructed from solid red oak. All joints are mortised, tenoned, and glued to form a solid unit.

The arm is 1 " thick $x 3-3 / 8$ " W at the front and tapers to a width of $2-5 / 8$ " at the back. The arm is constructed of solid red oak which has been steam bent to a 72 " radius.

The front stretcher and front seat rail are 3"W x 1" thick solid red oak. The back seat rail is $2-3 / 4$ "W by 1 " thick solid red oak. The cross stretcher and seat rails are mortised, tenoned, and glued into the side frames.

## UPHOLSTERED SEAT AND BACK

The seat and back frame are a single piece of $3 / 4$ " bent-plywood. The seat portion is fitted with a Dimatrol Webbing and then covered with black cambric fabric for comfort. This is then covered with 3-1/2" thick foam, which is also used on the chair back. The entire seat and back assembly are covered with the specified upholstery fabric except for the underside of the seat which is covered with a black cambric fabric.

Brodart upholstery materials meet requirements of the following fire codes: Calif. Technical Bulletin \#117 (sec. E part 1); CS-191-53 class 1.

Fabrics which meet Calif. Technical Bulletin \#133 are available.
Seat height at front - 16-3/4."
Arm height - 24-9/32."

## WOOD PLATEN FOR SIDE FRAME (OPTIONAL)

A 1/4" thick wood platen can be inserted into the side frame at the time of manufacture. This frame is constructed of $1 / 4$ " veneered plywood and is mortised into the adjoining frame members.

UPHOLSTERED SIDE FRAME (OPTIONAL)
The side frame is upholstered using $1 / 4^{\text {" fire-resistant polyurethane }}$ foam over a 1/4" platen and covered with the selected upholstery material.

Please specify Wood Finish (Table 1) and Upholstery; if applicable (Table 5). Details can be found on pages GEN 4 and GEN 5.

## General Specifications

## TABLETOPS

Tabletops are 1-3/16" thick, 3-ply, 45\# density particleboard core with a .050 " thick, high-pressure laminate top sheet and a backing sheet not less than . 020 " thick for balanced construction.
High-pressure laminate has a lo-glare finish resistant to scratches, fading, and staining. Edges are solid Northern-grown red oak. The edge band is applied before the top laminate sheet constituting an internal edge band.

## APRON

A 3-1/2"W x 1" thick solid Northern-grown red oak apron is fitted between the legs, and behind the extended tabletop edge band. Bottom edge and both ends of each apron receive a $1 / 2^{\prime \prime}$ radius. Aprons are secured to the tabletop by attaching hardwood cleats to the inside surface of the aprons and screwing through the cleats into the underside of the tabletop.

## LEGS

Legs are glued up, 2-1/4" solid Northern-grown red oak. All vertical edges of legs receive a $1 / 2^{\prime \prime}$ radius. Bottom edges of legs are radiused $1 / 8$ ". Each leg has a 2 " diameter, adjustable glide mounted in a recessed tee-nut. The glide is further recessed into the leg by means of counter-sunk boring which accepts the upper two-thirds of the glide. Legs attach to the aprons by means of formed 14 -gauge steel corner brackets. Each leg is bolted to the corner bracket with two $5 / 16$ "-hex-head bolts per leg.

## General Specifications

## INNER CORE

Inner core is constructed using a styrofoam core with 2" thick XL65 foam on top and $1 / 2$ thick XL65 foam on the sides.

BASE

## UPHOLSTERY MATERIALS AND FABRICS

Brodart fabric selections and polyurethane foam are fire rated.
Fabrics which meet Calif. Technical Bulletin \#133 are available.

Base is constructed using $5 / 8^{\prime \prime}$ thick plywood.

## GLIDES

Seats are equipped with $1 / 4$ " thick $\times 7 / 8^{\prime \prime}$ diameter nylon glides.

## General Specifications

## TOPS

When specified, optional tops will be 1-3/16" thick, 3-ply, 45\# particleboard grade M2 or better with a top surface of .050" thick, high-pressure laminate and a backing sheet not less than .020 " thick for balanced construction. High-pressure laminate will be lo-glare finish resistant to scratches, fading, and staining that meets or exceeds NEMA standards. Top will receive matching 2 mm PVC bands on one long and two short edges.

## SUBTOP

The cabinet will receive $3 / 4$ " thick, thermally-fused laminated panel, in the top of the cabinet. The top will be doweled to the end panels to complete construction of the cabinet. The sub top will anchor the top to the cabinet.

## END PANEL

End panels will be 3/4" thick panel with plain-sliced slip matched Northern-grown Red Oak or Maple veneer on both sides or TFL. Exposed edges are externally banded with a $3 / 4$ " $\times 1.5 \mathrm{~mm}$ solid, Northern-grown Red Oak or Maple veneer edge band or 2mm PVC edge band. The end panels and sub top will be joined with dowel pin construction.

## BASE

The cabinet will receive a $3 / 4^{\prime \prime}$ thick $\times 4$ " high themally-fused laminated base rail in the front of the cabinet. The rail will be doweled to the end panels to complete construction of the cabinet. Base rail will be positioned inside the end panels of the cabinet.

## BACK PANEL

The back panel will be $1 / 4$ " thick, 3-ply furniture-grade plywood with plain sliced Northern-grown Red Oak or Maple veneers or TFL. The top, base and end panels will receive a dado which captures the back panel on four sides. The back panel will rest on the base.

## DOORS

When specified, doors will be 3/4" thick, veneered panel. Northerngrown Red Oak or Maple veneer on both sides or TFL. Exposed edges will be externally banded with a $3 / 4$ " $\times 1.5 \mathrm{~mm}$ thick solid, Northerngrown Red Oak or maple veneer edge band or 2 mm PVC edge band. Each door receives two (2) European hinges and one four inch flat black wire pull. Doors will be full overlay.

## SHELVES

When specified, shelves will be $3 / 4$ " thick panel with plain-sliced slip matched Northern-grown Red Oak or maple veneer on both sides or TFL. Front edge is externally banded with a $3 / 4^{\prime \prime} \times 1.5 \mathrm{~mm}$ thick solid, Northern-grown Red Oak or maple veneer edge band or 2 mm PVC edge band.

## SPACER RAIL

When specified, cabinets with drawers will receive spacer rails placed between drawers for structural support and as a drawer stop. Rails are $3 / 4$ " thick, thermally-fused laminated rails. The rails will be doweled to the end panels to complete construction of the cabinet.

## HANGER RAIL

The cabinet will receive a $3 / 4^{\prime \prime} \times 4$ ", thermally-fused laminated rail in the top and bottom rear of the cabinet. The rails will be doweled to the end panels to complete construction of the cabinet. Hanger rails will be positioned inside the end panels.

## DRAWER

When specified, drawers will be constructed of solid hardwood with 1/4" thick wood bottom panel. Drawers will have 3-ply particleboard fronts with select Northern-grown Red Oak or Maple face veneer or TFL with an MDF core. Drawers will receive full extension slides with 100 \# load capacity and one 4 " flat black wire pull.

[^9]
## General Specifications

## TOPS AND BOTTOMS

Standard top will be 3/4" thick, 3-ply, 45\# density particleboard core with plain-sliced slip matched Northern-grown Red Oak or Maple veneer on both sides or TFL with an MDF core. Exposed edges will be externally banded with a $3 / 4^{\prime \prime} \times 1.5 \mathrm{~mm}$ solid, Northern-grown Red Oak or maple veneer edge band or 2 mm PVC edge band.

## END PANEL

End panel will be 3/4" thick panel with plain-sliced slip matched Northern-grown Red Oak or Maple veneer on both sides or TFL. Exposed edges will be externally banded with a $3 / 4$ " $\times 1.5 \mathrm{~mm}$ solid, Northern-grown Red Oak or Maple veneer edge band or 2mm PVC edge band. The end panel will receive 32 mm boring for shelf adjustment. The end panels, top and bottom will be joined with dowel pin construction.

## BACK PANEL

The back panel will be $1 / 4$ " thick, 3-ply furniture-grade plywood with plain sliced Northern-grown Red Oak or maple veneers or TFL. The top, bottom and end panels will receive a dado which captures the back panel on four sides.

## HANGER RAIL

The cabinet will receive $3 / 4$ " x 4", thermally-fused laminated rail in the top and bottom rear of the cabinet. The rails will be doweled to the end panels to complete construction of the cabinet. Hanger rails will be positioned inside the end panels.

## DOORS

When specified, doors will be 3/4" thick, veneered panel. Northerngrown Red Oak or Maple veneer on both sides or TFL. Exposed edges will be externally banded with a $3 / 4^{\prime \prime} \times 1.5 \mathrm{~mm}$ thick solid, Northerngrown Red Oak or maple veneer edge band or 2 mm PVC edge band. Each door receives two (2) European hinges and one four inch flat black wire pull. Doors will be full overlay.

## SHELVES

When specified, shelves will be $3 / 4$ " thick panel with plain-sliced slip matched Northern-grown Red Oak or maple veneer on both sides or TFL. Front edge is externally banded with a $3 / 4$ " $\times 1.5 \mathrm{~mm}$ thick solid, Northern-grown Red Oak or maple veneer edge band or 2 mm PVC edge band.

## General Specifications

## TOPS

Standard top will be 3/4" thick, 3-ply, 45\# density particleboard core with plain-sliced slip matched Northern-grown Red Oak or Maple veneer on both sides or TFL with an MDF core. Exposed edges will be externally banded with a $3 / 4^{\prime \prime} \times 1.5 \mathrm{~mm}$ solid, Northern-grown Red Oak or Maple veneer edge band or 2 mm PVC edge band. Top will be positioned over and flush with the outside edges of the end panels.

## END PANEL

End panel will be 3/4" thick panel with plain-sliced slip matched Northern-grown Red Oak or Maple veneer on both sides or TFL. Exposed edges will be externally banded with a $3 / 4$ " $x$ 1.5mm solid, Northern-grown Red Oak or maple veneer edge band or 2 mm PVC edge band. The end panels and top will be joined with 12-gauge angled metal brackets $3 / 4^{\prime \prime} \times 3 / 4^{\prime \prime}$ screwed to the inside surface of the panel and top. Each panel will receive two (2) 3/4" nylon nail glides.

## INTERMEDIATE PANEL

When specified, intermediate panel will be a $3 / 4$ " thick panel with plain-sliced slip matched Northern-grown Red Oak or maple veneer on both sides or TFL. Exposed edges will be externally banded with a 3/4" x 1.5mm thick solid, Northern-grown Red Oak or Maple veneer edge band or 2 mm PVC edge band.

## BASE

The cabinet base will receive a 3/4" x 4" 3-ply, thermally-fused laminated rail in the front and rear of the cabinet. The rails will be doweled and pocket screwed to the end panels to complete construction of the cabinet. Exposed edges will be externally banded with a 3/4" x 1.5 mm thick solid, Northern-grown Red Oak or maple veneer edge band or 2 mm PVC edge band. Base rails will be positioned inside the end panels of the desk module.

## BACK PANEL

The back panel will be 1/4" thick, 3-ply furniture-grade plywood with plain sliced Northern-grown Red Oak or Maple veneers or TFL. The top and end panels will receive a dado which captures the back panel on three sides. The back will receive ten (10) $5 / 8^{\prime \prime}$ - \#8 Philips pan head screws fastened to the hanger rails and end panels. The back panel will rest on the base rail.

## DOORS

When specified, doors will be $3 / 4$ " thick, veneered panel. Northerngrown Red Oak or Maple veneer on both sides or TFL. Exposed edges will be externally banded with a 3/4" x 1.5 mm thick solid, Northerngrown Red Oak or maple veneer edge band or 2 mm edge band. Each door receives two (2) European hinges and one four inch flat black wire pull. Doors will be full overlay.

## SHELVES

Shelves will be 3/4" thick panel with plain-sliced slip matched Northern-grown Red Oak or maple veneer on both sides or TFL. Exposed edge on the front side of the shelf will be externally banded with a $3 / 4^{\prime \prime}$ x 1.5 mm solid, Northern-grown Red Oak or Maple veneer edge band or 2 mm PVC edge band.

## HANGER RAIL

The cabinet will receive a 3/4" x 4", thermally-fused laminated rail in the top, bottom and middle rear of the cabinet. The rails will be doweled to the end panels to complete construction of the cabinet. Hanger rails will be positioned inside the end panels

[^13]
## General Specifications

## TOPS

When specified, optional tops will be 1-3/16" thick, 3-ply, 45\# particleboard grade M2 or better with a top surface of .050" thick, high-pressure plastic laminate and a backing sheet not less than .020 "thick for balanced construction. Plastic laminate will be lo-glare finish resistant to scratches, fading, and staining that meets or exceeds NEMA standards. Top will receive matching 2 mm PVC bands on one long and two short edges.

## SUBTOP

The cabinet will receive $3 / 4^{\prime \prime}$, thermally-fused laminated panel in the top of the cabinet. The top will be doweled to the end panels to complete construction of the cabinet. The sub top will anchor the top to the cabinet.

## END PANEL

End panels will be 3/4" thick panel with plain-sliced slip matched Northern-grown Red Oak or Maple veneer on both sides or TFL. Exposed edges are externally banded with a $3 / 4$ " $\times 1.5 \mathrm{~mm}$ solid, Northern-grown Red Oak or Maple veneer edge band or 2 mm PVC edge band. The end panels and sub top will be joined with dowel pin construction.

## BASE

The cabinet will receive a $3 / 4$ " Thick $x 4$ " high thermally-fused laminated base rail in the front of the cabinet. The rail will be doweled to the end panels to complete construction of the cabinet. Base rail will be positioned inside the end panels of the cabinet.

## BACK PANEL

The back panel will be 1/4" thick, 3-ply furniture-grade plywood with plain sliced Northern-grown Red Oak or Maple veneers or TFL. The top, base and end panels will receive a dado which captures the back panel on four sides. The back panel will rest on the base.

## DOOR

When specified, doors will be $3 / 4^{\prime \prime}$ thick, veneered panel, Northerngrown Red Oak or Maple veneer on both sides or TFL. Exposed edges will be externally banded with a $3 / 4$ " $\times 1.5 \mathrm{~mm}$ thick solid, Northerngrown Red Oak or maple veneer edge band or 2 mm PVC edge band. Each door receives two (2) European hinges and one four inch flat black wire pull. Doors will be full overlay.

## SHELVES

When specified, shelves will be 3/4" thick panel with plain-sliced slip matched Northern-grown Red Oak or maple veneer on both sides or TFL. Front edge is externally banded with a $3 / 4^{\prime \prime} \times 1.5 \mathrm{~mm}$ thick solid, Northern-grown Red Oak or maple veneer edge band or 2 mm PVC edge band.

## General Specifications

## TOPS

Standard top will be 3/4" thick, 3-ply, 45\# density particleboard core with plain-sliced slip matched Northern-grown Red Oak or Maple veneer on both sides or TFL with an MDF core. Exposed edges will be externally banded with a $3 / 4^{\prime \prime} \times 1.5 \mathrm{~mm}$ solid, Northern-grown Red Oak or Maple veneer edge band or 2 mm PVC edge band. Top will be positioned over and flush with the outside edges of the end panels.

## END PANEL

End panel will be 3/4" thick panel with plain-sliced slip matched Northern-grown Red Oak or Maple veneer on both sides or TFL. Exposed edges will be externally banded with a $3 / 4$ " $x 1.5 \mathrm{~mm}$ solid, Northern-grown Red Oak or maple veneer edge band or 2 mm PVC edge band. The end panels and top will be joined with 12-gauge angled metal brackets $3 / 4^{\prime \prime} \times 3 / 4^{\prime \prime}$ screwed to the inside surface of the panel and top. Each panel will receive two (2) 3/4" nylon nail glides.

## INTERMEDIATE PANEL

When specified, intermediate panel will be a 3/4" thick panel with plain-sliced slip matched Northern-grown Red Oak or maple veneer on both sides or TFL. Exposed edges will be externally banded with a 3/4" x 1.5 mm thick solid, Northern-grown Red Oak or Maple veneer edge band or 2 mm PVC edge band.

## BASE

The cabinet base will receive a $3 / 4^{\prime \prime} \times 4$ " thermally-fused laminated rail in the front and rear of the cabinet. The rails will be doweled and pocket screwed to the end panels to complete construction of the cabinet. Exposed edges will be externally banded with a 3/4" $x$ 1.5 mm thick solid, Northern-grown Red Oak or maple veneer edge band or 2 mm PVC edge band. Base rails will be positioned inside the end panels of the desk module.

## BACK PANEL

The back panel will be 1/4" thick, 3-ply furniture-grade plywood with plain sliced Northern-grown Red Oak or Maple veneers or TFL. The top and end panels will receive a dado which captures the back panel on three sides. The back will receive ten (10) 5/8"- \#8 Philips pan head screws fastened to the hanger rails and end panels. The back panel will rest on the base rail.

## DOORS

When specified, doors will be 3/4" thick, veneered panel. Northerngrown Red Oak or Maple veneer on both sides or TFL. Exposed edges will be externally banded with a 3/4" x 1.5 mm thick solid, Northerngrown Red Oak or maple veneer edge band or 2 mm PVC edge band. Each door receives two (2) European hinges and one four inch flat black wire pull. Doors will be full overlay.

## SHELF

Shelf will be 3/4" thick panel with plain-sliced slip matched Northerngrown Red Oak or maple veneer on both sides or TFL. Exposed edge on the front side of the shelf will be externally banded with a 3/4" $x$ 1.5 mm solid, Northern-grown Red Oak or Maple veneer edge band or 2 mm PVC edge band.

## HANGER RAIL

The cabinet will receive a 3/4" $\times 4$ ", thermally-fused laminated rail in the top, bottom and middle rear of the cabinet. The rails will be doweled to the end panels to complete construction of the cabinet. Hanger rails will be positioned inside the end panels

## General Specifications

## BOOK SHELF UNIT

Shelves are constructed of 18 -gauge metal. Book shelves are flat and 10"D. All units come with an acrylic signage display area at the top of the unit. The viewable display area is $3-1 / 4$ " $\mathrm{H} \times 48$ "W.

## MEDIA SHELF UNIT

Shelves are constructed of 18-gauge metal. Media shelves are set at an angle for easy viewing and are 6-1/2"D. Nickel plated wire metal dividers are available for the media shelves and can be inserted in $1-3 / 4^{\prime \prime}$ increments. Media shelves also come with a $1 / 8^{\prime \prime}$ thick acrylic lip that runs the length of the shelf and protrudes above the base of the shelf 2-1/4".

## END PANELS

End panels are available in both solid and slatwall configurations. Panels are constructed of 3/4" Veneered Particleboard and banded with 1.6 mm edge banding. The panels are mounted to the unit via two 14 -gauge metal brackets.

## General Specifications

Construction is solid hardwood not less than 3/4" thick. Except when indicated, each truck is supplied with two fixed and two swivel carpet casters with 5" diameter tires. Each caster is attached with four lag screws, except as indicated. Caster forks are steel, heat treated, and bright nickel plated. Wheels are gray rubber, 1-9/32"W on ball bearings. Seals and O-rings are used to produce a quiet caster. Load capacity rated at 200\# per caster.

## General Specifications

The Brodart power distribution system distributes power from the building's power supply to the furniture through the use of power-distribution channels which may be interconnected to allow multiple pieces to be shared from one power source. The components of the system are as follows:
A.) Power entry: Connects the building's power supply and feeds power to the furniture.
B.) Power-distribution channel: Houses duplex electrical outlets to access power and serves as a wire management channel.
C.) J-channel: An optional wire management tray, which may house data jacks. This channel is necessary when additional storage is required or when data lines are run in addition to electrical cords.

## POWER-ENTRY ASSEMBLIES

Single-circuit power-entry assembly consist of a wood chase that is fastened to the unit with modular fasteners, a PVC plastic liner fastened to the wood chase, and the power-entry cable which is fastened inside of the PVC liner. The power entry cable has a 24" STO cord fitted with a 20-amp plug at the bottom of the assembly and a flexible metal conduit with a quick-connect coupling at the top. This power-entry assembly is used for single-circuit power distribution systems and provides access to circuit \#1. The assembly can be plugged into any 20 -amp outlet.

Multiple-circuit power-entry assembly is to be used if more than one circuit is required. The multiple-circuit power-entry assembly consists of a wood chase that is fastened to the unit with modular fasteners, a PVC plastic liner that is fastened to the wood chase and the power-entry cable which is fastened inside the PVC liner. The bottom of the power-entry has a 72" long liquid-tight conduit. Inside the conduit is an eight-wire harness that is wired to four building circuits: three sharing a common ground and one dedicated with an isolated ground.

The top of the power entry consists of a flexible metal conduit and a quick-connect coupling. This power entry is required when more than one circuit or when an isolated with a dedicated ground is required. This assembly must be installed by a qualified licensed electrician. A multiple-circuit system is required under the following conditions:
1.) The length of the wiring served by the power entry exceeds 30 feet.
2.) The total amperage served by the power entry exceeds 20 amps .
3.) A dedicated computer circuit is required. The dedicated computer circuit on system is circuit \#4.
4.) More than thirteen (13) duplex receptacles are required.

Note: One power-entry assembly is required for each building power source accessed.

## PANEL-MOUNT, POWER-DISTRIBUTION CHANNEL

The panel-mount power-distribution channel is constructed of 20-gauge steel and is finished using a black electrostatically applied epoxy powder paint. The channel is open at the top to allow excess wire to be stored behind the power blocks and the duplex receptacles. Front of the channel has cutouts so two duplex outlets can be mounted. The duplex outlets are rated 15 -amps at the receptacle with $20-\mathrm{amps}$ though power. The duplex outlets are connected to each other and the power entry by means of $3 / 4$ " flexible metal conduit, which has a quick-connect coupling. The cable consists of an eight-wire, four-circuit system with three standard utility circuits and one isolated circuit with a dedicated ground (computer circuit). If a channel is ordered with one duplex outlet, a plastic cover is provided to cover the unused hole. Units mount to back panels or table keels.

Panel Mount PowerDistribution Channel

## 15-AMP POWER-ENTRY LEGS

Power-entry legs are to be used with leg-base tables and computer-access stations. Power-entry legs are available in single circuit only. Power-entry legs are finished to match the other legs on the table.
Note: $15-\mathrm{amp}$ power legs cannot accept power strips. Receptacles are for electrical device only.

## WIRE MANAGEMENT LEGS

Wire management legs are to be used with leg-base tables and computer-access stations. Wire management legs are finished to match the other legs on the table and allow wires to be run from the floor to the table inconspicuously.

## J-CHANNEL (OPTIONAL)

$J$-Channel is constructed using 18 -gauge steel and is finished using a black electrostatically applied epoxy powder-paint. The J-Channel attaches to the bottom of the power-distribution channel with the same screws that attach the power-distribution channels to the unit. The channel is $3-1 / 8 \mathrm{H}$ and 4"D; the front lip of the channel is 2 H . The J-Channel provides additional wire-storage capacity or a data wire-management channel when data lines are required. J-Channel has four square holes that hold either communication or data jacks. Unit uses modular insert data jacks, which must be ordered separately.

## DUPLEX OUTLET RECEPTACLES (Multiple-Circuit System)

Duplex outlets can be ordered to access any of the four circuits available in the power-distribution channel. You must specify the number of the circuit to be accessed for each duplex outlet ordered. Circuit IV outlets access the isolated circuit with the dedicated ground. If circuit numbers are not specified, your power-distribution channels are shipped with circuit one duplex outlet receptacles. Duplex outlets are easily interchanged within the power-distribution assembly by pushing the duplex receptacle sideways and then pulling it out.

When ordering duplex receptacles for circuits I, II, III, or IV, the following catalog numbers should be specified.

## General Specifications

Have electrical power and data access conveniently located; where you need it and in the format required by your computer system and all other electrically powered equipment. Prevent wire clutter by storing excess cables and wires in wire-management channels. Based upon your specification, Brodart provides single or multi-circuit power systems with optional dedicated computer circuitry. Also, a choice of $15-\mathrm{amp}$ or $\mathbf{2 0 - a m p}$ systems, as you specify. Quick-connect cable couplings are utilized by Brodart to permit easy, on-site installations and to provide for rearrangement as changing needs dictate.

NOTES: Grommets are not always included as standard with the product. If wires are to be passed though work surfaces or from one unit to another you will need to order the grommets separately. For factory-cut holes to install grommets, a sketch must be provided to show the unit in the work surface with dimensions noting the exact location.

| Catalog No. | Description |
| :--- | :--- | :--- |
| Grommet with Cap, 2" Round |  |$\quad$| Grommet with Cap, 2" Round |
| :--- |
| Constructed Black of ABS plastic, 2" round grommet |
| fits $\mathbf{0 0 1}$ |
| Includes notched $5 / 8 "$ " W removable cap. |

## Grommet with Cap, 3-1/2" Round

Grommet with Cap, 3-1/2" Round
Constructed Black of ABS plastic, 3-1/2" round grommet fits 3" diameter hole. Nominal 2-7/8" inside diameter. Includes notched 5/8" W removable cap

Description

Price

Plastic J-Channel Wire Manager
X1 700020
Plastic J-Channel Wire Manager
\$101
Constructed of dark brown ABS plastic. Designed to be mounted
by screwing or stapling to most surfaces. Front " J " is flexible
for inserting cords. Inside dimensions: 1-1/2"Hx 1"W x 72"L

## Data and Communication Raceway, 1/2"H x 1"W x 6'L

Data and Communication Raceway, $1 / 2$ " $\mathrm{H} \times 1$ " $\mathrm{W} \times 6$ 'L
One-piece, black, latching surface raceway for low voltage communications
cabling applications. Supplied with preapplied adhesive-backed tape for trouble-free and permanent mounting. Will hold up to four data cables. Can be used with category 5 and fiber optic cabling applications.

## Power Data Raceway, 7/8"H x 1-1/2"W x 10'L

X1 700066
Power Data Raceway, $7 / 8^{\prime \prime} \mathrm{Hx} 1-1 / 2$ "Wx 10'L
\$193
One-piece, brown, latching surface raceway for data, voice, video,
fiber optic and power cabling applications. Unit has two channels
that can route both power and data. Supplied with preapplied adhesive-backed
tape for trouble-free and permanent mounting. Unit requires screw mounting when using for power applications.

## Wire Manager For Table Mounting

## X1 700030

X1 700031
22" J-Channel, 3-1/2"Hx 22"Wx3-1/4"D
$\$ 85$
28" J-Channel, 3-1/2"H x 28 "W x 3-1/4"D
\$108
Designed for electrical or data cables, unit is constructed of 18-gauge steel with electrostatically applied black powder-paint. Designed to be mounted to the underside of a tabletop.

Note: Grommets are not always included on product as a standard item. If wires are to be passed through the work surface or from one unit to another, grommets may need to be ordered separately.

## Wire Manager For Panel Mounting

XJ 012 S00
XJ 673 S00
XJ 047 S00
XJ 460 S00

30" J-Channel, 3-1/8"H x 30"Wx4"D \$171
32" J-Channel, 3-1/8"Hx32"Wx4"D \$171
38" J-Channel, 3-1/8"Hx38"Wx4"D \$193
44" J-Channel, 3-1/8"Hx44"Wx4"D \$206
Designed for electrical or data cables, unit is constructed of 18-gauge steel with electrostatically applied black powder-paint. The front lip of the panel is 2 H . Unit mounts to back panels or keels.

Note: Grommets are not always included on product as a standard item. If wires are to be passed through the work surface or from one unit to another, grommets may need to be ordered separately. Modular insert data jacks sold separately.

| Flexible Wire Management Channels (Leg Style) |  |  |
| :--- | :--- | :--- |
| 73210 S00 | $32^{\prime \prime}$ for Sitting Height Tables |  |
| 73210 S01 | $39^{\prime \prime}$ for Standing Height Tables | $\$ 394$ |

## Oval Cable Management Vertebrae

| X4 950 001 | Oval Cable Management Vertebrae |
| :--- | :--- |
|  | Made from ABS Plastic. |
|  | Height is Customizable, It can reach up to 30". |

Please specify color: Black or Silver.

#### Abstract

325

Made from ABS Plastic.
Height is Customizable, It can reach up to 30".

## Height Adjustable Vertebrae

Height Adjustable Vertebrae \$390
Made from ABS Plastic with a Steel Base.
Height is Customizable, It can reach up to $51^{\prime \prime}$.

Please specify color: Black or Silver.

Metal Vertical Wire Manager

| X1 700050 | Vertical Wire Manager for Table Mounting |
| :--- | :--- |
| Designed to be mounted underneath the work surface below a grommet. |  |
|  | Unit is constructed of a 3-1/2" diameter steel tube and finished with black |
|  | electrostatically applied powder paint. |

[^0]:    Please specify Wood Finish for Tabletop and Wood Edge Band (Table 1). Details can be found on page GEN 4.

[^1]:    Please specify Laminate Color (Tables 2 and 4) and Metal Leg Color (Table 3). Details can be found on pages GEN 4 and GEN 5.

[^2]:    Please specify Wood Finish (Table 1) and Upholstery; if applicable (Table 5). Details can be found on pages GEN 4 and GEN 5.

[^3]:    Please specify Wood Finish (Table 1) and Upholstery; if applicable (Table 5). Details can be found on pages GEN 4 and GEN 5.

[^4]:    Please specify Wood Finish (Table 1) or Laminate Finish (Table 4). Details can be found on page GEN 4 and GEN 5.

[^5]:    Please specify Wood Finish (Table 1) or Laminate Finish (Table 4). Details can be found on page GEN 4 and GEN 5.

[^6]:    Please specify Wood Finish (Table 1) or Laminate Finish (Table 4). Details can be found on page GEN 4 and GEN 5.

[^7]:    Please specify Wood Finish (Table 1) or Laminate Finish (Table 4). Details can be found on page GEN 4 and GEN 5.

[^8]:    Please specify Wood Finish (Table 1) or Laminate Finish (Table 4). Details can be found on page GEN 4 and GEN 5.

[^9]:    Please specify Wood Finish (Table 1) or Laminate Finish (Table 4). Details can be found on page GEN 4 and GEN 5.

[^10]:    Please specify Wood Finish (Table 1) or Laminate Finish (Table 4). Details can be found on page GEN 4 and GEN 5.

[^11]:    Please specify Wood Finish (Table 1) or Laminate Finish (Table 4). Details can be found on page GEN 4 and GEN 5.

[^12]:    Please specify Wood Finish (Table 1) or Laminate Finish (Table 4). Details can be found on page GEN 4 and GEN 5.

[^13]:    Please specify Wood Finish (Table 1) or Laminate Finish (Table 4). Details can be found on page GEN 4 and GEN 5.
