Panel Profile

Hanger frame has a slot pattern on a 1" standard increment for hang on components. Slots are $\frac{3}{4}$ " tall x approximately $\frac{1}{8}$ " wide. Hanger frame is factory installed and removal is not required for panel installation.

Hanger frame face is factory finished and requires no endcap or HiLo trim after panel installation.

Hanger frame topcap is field installed and remains easily removable to facilitate panel installation and reconfiguration.

Panel topcap is factory installed. Topcaps on permanent monolithic panels are fixed.

Panel polypropylene hinge inserts into hinge channels built into every hanger frame in order to connect panels together. A 21" length is inserted to the bottom and then an additional length for each panel height needed.

Divi Insert Panel Product Details

Panel Profile (Cont.)

Alignment plate holds panels in vertical alignment and prevents panel shear.

8 wire 4 circuit powerway is included with every powered panel and is factory installed.

Raceway glides are adjustable up to 1 3/4" for installation on unlevel floors and include carpet grippers.

Metal raceway divider (optional) separates low voltage data cables and high voltage electrical cables if desired. Divider attaches to raceway glides and is retrofitable on installed panels.

Base cover assembly ships separate as one piece and installs by sliding under panel after panel installation, hinging up and snapping to the underside of the panel. Non-powered or powered base covers are shipped with non-powered or powered panels, respectively. Base covers have a small "mud flap" for data cable egress.

Duplex outlets are ordered separately. Two outlets can be used per side, four total per panel. Outlets utilize top base cover holes.

Duplex outlet covers hide unused duplex outlet or data locations. Six are shipped with every panel. A 24"W gets three duplex outlet covers. Order extra as needed.

Snap-in data jack housing (order separately) accommodates six Hubbell or compatible data/voice jacks. Snap-in housings may not be used back to back on a spine wall.

Data cable raceway cavity is approximately 2" wide by 3" tall and can accommodate between 32 and 40 Cat 6 data cables, depending on how tightly they are packed.

Cat 5 and 6 data jacks extend beyond center line of raceway, preventing jack housings to be used back to back on a spine. Plan on using "cross corners" on panel to eliminate this issue.

Insert panel topcaps can be removed to facilitate insert replacement.

Inserts are removable by sliding out from the top of the hanger frame channels.

Insert retainers separate tiles horizontally and may be removed by sliding up and out of the top of the panel.

Insert Panel Specifications

66" High x 36" Wide Example Panel
Segmented Front and Back

For instance, a 66"H x 36"W segmented panel has a total of six inserts (three inserts per side). If the three inserts on Side A were to be Grade C fabric, the upcharge for the panel would be \$47.

Side A Position 1, 27"H x 36"W insert Grade C Upcharge = \$21
Side A Position 2, 16"H x 36"W insert Grade C Upcharge = \$13
Side A Position 3, 16"H x 36"W insert Grade C Upcharge = \$13
Total upcharge = \$47 for the panel.

If the Position 1 and Position 2 inserts on Side A were to be Grade C fabric, and the Position 3 insert on Side A were to be Grade D fabric, the upcharge for the panel would be \$61.

Side A Position 1, 27"H x 36"W insert Grade C Upcharge = \$21
Side A Position 2, 16"H x 36"W insert Grade C Upcharge = \$13
Side A Position 3, 16"H x 36"W insert Grade D Upcharge = \$27
Total upcharge = \$61 for the panel.

If all six inserts (three on Side A, three on Side B) were to be Grade C fabric, the Grade C fabric upcharge for the panel would be \$94.

- Side A Position 1, 27"H x 36"W insert Grade C Upcharge = \$21
- Side B Position 1, 27"H x 36"W insert Grade C Upcharge = \$21
- Side A Position 2, 16"H x 36"W insert Grade C Upcharge = \$13
- Side B Position 2, 16"H x 36"W insert Grade C Upcharge = \$13
- Side A Position 3, 16"H x 36"W insert Grade C Upcharge = \$13
- Side B Position 3, 16"H x 36"W insert Grade C Upcharge = \$13
- Total upcharge = \$94 for the panel.

Divi Connector Product Details

Product Detail 1 Possible Insert Panel Side Elevations

The panel connection hinge is able to be used in numerous types of panel connections as shown below. No additional panel connection hardware is needed to connect panels. However, base raceway shrouds are required for certain 2-way and 3-way applications to cover electrical and data cables.

Straight / 180° Connection:

Hinge channels in hanger frame form a 90° angle when two panels are aligned in a straight line. The hinge is extruded at this angle and installs easily when panels are started at this angle. After installation of hinge, panels can be rotated to achieve other angles.

2-Way 90° Connection:

2-Way 60°/120° Connection:

2-Way 45°/135° Connection:

3-Way 90° Connection:

3-Way 120° Connection:

4-Way 90° Connection:

Divi Electrical Product Details

Product Detail 1 Electrical Components (8 Wire, 4 Circuit)

AIS Divi 8 Wire 4 Circuit electrical system contains four circuits. Each circuit is rated at 20 amps/120 volts maximum. Circuit 1, Circuit 2 and Circuit 3 are served by a system neutral and an equipment ground. Circuit 4 is dedicated and is served by its own neutral and ground. Circuit and ground conductors are #12 A.G.W. (gauge). All neutrals are #10 A.G.W. (gauge).

Shown below is a cross section of metal cable used for 8 Wire 4 Circuit jumpers and infeeds. Circuit and ground conductors are #12 A.G.W. (gauge). All neutrals are #10 A.G.W. (gauge).

Powerways provide electrical distribution and access for duplex outlets back to back. 24" wide panels can accept only one duplex outlet per side, two total back to back. All other panels can accept two per side, four total back to back. Powerways "grow" in length with frames of greater width, making panel to panel connections a "standard" configuration and allowing for "pass through" connections. Each powerway has locations for up to four jumpers, two at each end. Powerways are included when ordering powered panels.

Duplex Outlets are designated as circuits 1 through 4. Each duplex outlet contains two single receptacles (places to plug into) of the same circuit and are specified separately from powerways. All duplex outlets have black faces. The lettering on outlets for Circuit 1, 2 and 3 is white. The lettering on outlets for Circuit 4 is orange. Outlets are screw mounted to powerway. Duplex outlets are standard 15 amp outlets. For 20 amp outlets, call AIS Customer Service.

- Notes**

 - Duplex Outlets are available at designated circuits 1 through 4.
 - Each duplex outlet contains two single receptacles (places to plug into) of the same circuit and are specified separately from powerways.
 - Available in black or white. The lettering on outlets for Circuit 1, 2 and 3 is white. The lettering on outlets for Circuit 4 is orange.
 - Outlets are screw mounted to powerway.
 - Duplex outlets are standard 15 amp outlets.
 - Can be used with multi-circuit electrical units.
- Notes**

 - In California, 50 percent of all outlets in a systems panel cluster or benching cluster, for new construction, **MUST** be controlled outlets, even if there is no task lighting.
 - Customers should plan on using circuits 2 and 3 for controlled circuits, and plan general load for all other items on circuits 1 and 4.
 - If using 2 + 2 configuration, controlled circuits should be 1 and 2, and general load circuits on 4 and 5.
 - Outlets must have the “controlled” symbol for identification purposes.
 - Can be used with multi-circuit electrical units.

Note: Certain areas of Chicago prohibit the use of modular electrical systems and require all electrical components to be hardwired. All electrical components need to be supplied by the electrician excluding junction boxes, which can be purchased from AIS.
